Tanner Davis, Chairman
Greendale Canal Company
1100 Flaming Gorge Lodge
Dutch John, UT 84023

Dear Mr. Davis,

Daggett County is pleased to write this letter in support of the Greendale Canal Enclosure Project which is requesting funding through the Bureau of Reclamation WaterSMART: Water and Energy Efficiency Projects Grant Program.

We appreciate your efforts to increase the efficiency of your system and to conserve valuable water by piping and pressurizing the Greendale Canal.

Daggett County recognizes the importance of water preservation and reliability within the Colorado River Basin. The water saved through these improvements will benefit water users and the regional environment and will create more drought-resilient water delivery systems that help to secure water rights. Greendale resident's and the many visitors to the area will benefit from the efficiencies proposed. Continued water within the Flaming Gorge and the entire Colorado River Basin is vital to the economy of our area.

We strongly support your grant application and appreciate the advancements it will make in water savings and improving water efficiencies in the area.

Sincerely,

Matt Tippets
Daggett County Commission Chair
