  - Community Stakeholders

Collection Management Software

- **Real-Time Updates on the Collection**
  Gives us an up-to-date, organized view of the entire collection—what we have, where it is…etc. Takes us away from static excel documents.
- **Easier Maintenance Tracking**
  Helps us keep track of all maintenance work done on the collection.
- **Quick Access to Important Documents**
  Keeps contracts, press releases, images, and other key files in one easy-to-find place.
- **Central Spot for Artist & Fabricator Contacts**
  Searchable contact info for artists, fabricators, and vendors
- **Report Generation**
  Allows us to easily generate reports based on a variety of criteria—such as by district, maintenance history, or artist.
