Dear Commissioners:
Thank you for your support of the American Lands Council and our shared goal of bringing land management decisions home -- where they belong!

Our mission is incredibly important because we all want abundant outdoor recreation; healthy air, water and wildlife; and safe, vibrant communities. But when people learn the shocking truth that federal control over our lands often produces just the opposite, over 90% of the folks we reach are inclined to support our efforts. The challenge is to reach them in the first place. That's where you can

help!

Look how far we have come:
The problem has been defined
The homework has mostly been done
The strategy has been identified
The money has been appropriated
A competent legal team has been identified
We are working to identify sister states willing to join a lawsuit, but we will need your powerful influence to help us convince the Governor and the Attorney General to file the suit.

Although we have a great solution that is both compelling and constitutionally sound, significant financial resources are needed. Together we can accomplish the single greatest thing that can be done to honestly protect America's environment, while at the same time restoring our foundational economies and liberating the states (and the people, wildlife, and beneficial resources within them) from deeply flawed, highly unconstitutional, and harmful practices associated with federal control over the lands within our states.

We are truly a nonprofit organization that operates primarily on volunteerism. We have built an amazing network of support from key organizations and over 1,000 public officials -- plus approximately 50,000 grass roots supporters. Of course, organized opposition has been trying to bury the truths about problems with federal lands and each state's constitutional right to govern the lands and resources within their borders.

We are implementing strategic goals within the legislative, judicial, and executive realms of government as well as growing popular support nationwide. Our message resonates with republicans, democrats, libertarians, independents, and greens. We need your help to get it out and effect correct legal and policy actions. Whether it be the environment, economy, freedoms, community health and safety, education funding, hunting/fishing/trapping, outdoor recreation or deep constitutional doctrine - our solution directly involves and supports them all.

To make it happen, we must have generous financial support from patriots like

you. You will find excellent information and videos at www.AmericanLandsCouncil.org. Imagine if we had the resources to get our message out more widely!

Members in good standing will be able to take advantage of valuable resources available in our online Leader Toolkit. Of course, the main advantage of your membership in ALC is to help accomplish the only solution big enough for our lands, our environment, and our local economy. We are very grateful for all the support you can give, and we look forward to working with you. Please let us know if you have any questions or suggestions.

Sincerely,
Doug Heaton
