

International Plumbing and Fuel Gas Code Update Course Description and Outline

Instructor: Jon Webster

Contact Phone: (801)593-2100

Email: mary.vanburen@datc.edu

Course Description:

This twelve-hour course meets the Utah requirement for licensed plumber's continuing education credits. This course covers the most significant IPC and IFGC Code changes. The course reviews general regulations, fixtures faucets and fixture fittings, water heaters, water distribution, drainage, venting and storm drainage sizing and gas piping installations.

Course Objectives:

- Understand code sections in the 2012 IPC and IFGC that have been changed
- Understand why certain 2012 IPC and IFGC changes were made
- Apply the 2012 IPC and IFGC changes to workplace situations

Length:

12 hours (core)

Books & Materials:

- International Plumbing Code 2009, (Required)
- International Fuel Gas Code 2009, (Recommended)
- Significant Changes to the IPC, IMC and IFGC, 2012 Edition (Recommended)
