Professional Learning Communities at Work Place SLC, UT Date Nov. 2013

Reasons you want to attend and potential good to the students you see from your Attendance: (Use reverse side if necessary)

Mrs. Stoker and Mrs. Dyreng are both members of our school math leadership team. Stacy is the leader of this team, and also serves as the district elementary math facilitator. In these roles she serves as a math leader and a liason between USOE and our district. These teachers represent the primary (K-3, Hilary) and upper grade (4-6, Stacy) bands in our school. They will work together upon their return to prepare a training for RCES teachers in June. The goal of their presentation will be to help teachers achieve a deeper understanding of the CCSS-M and its impact on student learning and classroom practice. This trip will be funded through our trust lands budget for professional development.

Recommendation of Principal Sandra Nielsen
