Mr Tippets/Forbes,

Thanks for passing this along. I do suggest clarification to the highlighted sentence. Fence included in the FHWA project is impacted replacement fence only as shown in the exhibit. Because the cattle guard at 85+47 is new, fence to tie into the new cattleguard is not shown in the plans and is the responsibility of others. Another reference is the attached plan sheet B7 for the summary of fence replacement locations. Thanks for everyone's help getting this together!

As additional consideration the granting of this Easement, the GRANTEE shall cause to be constructed a 24-foot-wide cattle guard at Station 85 + 47 as shown on the Project Plans, install new fence into existing fence, and insure that there are no gaps in the fence line, all of which shall be installed and completed prior to the termination or expiration of the Easement. Such work shall be performed in a good and workmanlike manner, and GRANTOR'S property shall be otherwise restored to its same physical condition prior to the installation. Without limiting the generality of the above, all rock and debris shall be removed or buried, and the ground cover restored.

Thanks and have a great weekend,

Braden Peters, P.E.

Brandi:

See attached files for review. Once we are in agreement and signatures are in place from the County Commissioners I will provide our signatures and have the document notarized.

Brian,

Here are the documents regarding the Temporary Construction Easement Agreement. Will you please sign and date, and return back to me?

Thank you,
