Dear Residents of Davis County and Public Health Partners,

The Davis County Board of Health is proud to endorse the 2014-2018 Community Health Improvement Plan (CHIP). This plan outlines a systematic effort to address the most important public health issues in Davis County.

The CHIP is the culmination of a community-based improvement process. Representatives of government agencies and community organizations reviewed the findings of the Davis County Community Health Assessment and selected four priority health issues to work on during the next five years. Those priorities are suicide prevention, obesity, access to behavioral health services, and air quality.

Work groups are already working on these priorities. They are identifying effective programs and policies, aligning resources, eliminating redundancy and establishing accountability for actions and outcomes.

The Davis County Board of Health pledges its full support for the CHIP and encourages continued involvement from community leaders, service providers, and citizens as we focus on health issues that are important to the residents of Davis County.

Sincerely,

Don Wood, Chair
Davis County Board of Health
