

75% of companies without business plans fail within three years after facing a disaster and or operational disruption.

Is your business prepared?

November is [Critical Infrastructure Preparedness Month](#). An important part of Critical Infrastructure

Security and Resilience Month is the work on implementing the [National Infrastructure Protection Plan](#) to safeguard both cyber and physical systems through collaborative public-private partnerships at all levels of government and industry from local, regional, national, and international perspectives. Please download the [Critical Infrastructure Toolkit at this link](#).

In addition for november [Be Ready Business](#) explores points 7 and 8 of the [12 Points of Business Continuity Planning](#).

#7 Identify Internal Resources & Capabilities: Poll your organization for any resources and skills that can be utilized for emergency response and recovery. Identify those available now and those you need to build.

#8 Workplace Evacuation & Sheltering Plans: Training employees for an active shooter or fire evacuation prepares them to [respond without confusion during an actual emergency](#). Who will assist customers out of your building? Where should they go, what should they take and how long should they plan to stay away – or is it safer to shelter in place?

Disaster Preakness is [The Cost of Doing Business](#). Every month [Be Ready Business](#) provides an informative newsletter article that includes tips and links for the [12 Points of Business Continuity Planning](#).

To access previous newsletters please [link here](#). In addition [please link here to answer a few questions](#).

At no cost to you, we can support your Business in building disaster continuity. We look forward to the visit.
