

Mayor Scott O'Hare
Rod McGary, Council Member
LuAnn Johnson, Council Member
Jim Beagley, Council Member
Stacey Hill, Deputy Clerk
Tammie Morgan. Clerk

Jed Pugsley, Candice Price
Sergeant Eddington, Hedges

Welcome to everybody to our Snowville Town Council Meeting for this Wednesday, the 12th of July. Mayor Scott O'Hare has been excused due to a medical emergency. So Scott is not here. And my name Rob McGary will be acting as interim Mayor for this evening. And with that, we will like I said, welcome everybody here and appreciate you all coming in the evening. So our first item of action will be our pledge by LuAnn Johnson and then I will take the prayer for Mayor Scott. So for due process, we had a copy of the meetings from the previous June meeting, and are there any additions, changes or modifications to the minutes, minutes? Okay, if we're gonna have a motion to accept that and make a motion to accept the minutes of the June meeting. LuAnn Johnson made the motion and Jim Beagley seconded it. All in favor? Aye. Opposed?

Also, we're given the agenda, which we're currently reviewing right here. Is the agenda acceptable? Or are there any items that were missed? What do we need to think about? If not, could we have a motion?

I'll make a motion to accept the agenda for tonight's meeting.

LuAnn Johnson made a motion to accept the agenda.

Okay. Motion was given by LuAnn Johnson and seconded by Jim Beagley. All in favor? Aye. Opposed,

Okay. So with our thing, our first item to be talked about is Candice Price. Did you want to address the council?

Candice stated I'm kind of nervous because I'm not used to talking.

Rod stated that We're very informal. The only thing that we will ask you to do is to come up front, state your name, because that's being recorded on the recorder and just discuss what you'd like to present. And we'll maybe ask you a few questions. But as far as we go, okay.

Candice said Never been able to do this.

Rod said you will be just fine, state your name.

Hey, my name is Candice Price, the subject is the landfill being able to use it. Rod said Okay.

Candice stated I'm about basically a mile from the corner from where I live here. Rod said Right.

Candice said And yes, it is out of out in the county. But I've used it four or five times in the time

I've lived here. I went to use it the other day. But I had to go through some people to get the permission to do so. At that time I never even knew that there was a limit on being able to do it only in town. And I couldn't do it in County. Well, I never knew anything about that. So what I'm trying to figure out is that I don't use it all the time. I'm willing to pay the price. I have no problem with that trailer the other day, which is a real quick, actual load otherwise it would have been in the smaller trailer. And I'm sorry for that. Basically, all I'm asking is, you know, to be fair, I know it's the town and I know I don't live in the town, but I do pay for water through the town. I'm also going to try and get some trash cans through the town. And you know, I'm just hoping you guys will allow me to do that.

Rod said, So let me reiterate you're requesting permission to use the landfill and you are willing to pay a fee if that's accepted by the council. Have any questions or discussion?

Jim stated that he was wanting to talk to you the other day. I was doing an impression that is currently Rod stated that is what we have stipulated yes.

Jim said that he texted back when she explained about using it so many times. And I called Scott and talked to Stacey and stuff like that. I text you back. I got confirmation we will allow you to dump \$25 A truckload and \$35 a load for a 10 foot long trailer and \$50 for a 20 foot long trailer. Rod said okay. Jim said I thought the issue was already taken care of. Jim said she texted back and said okay. Then she texted back and asked if Jim was ready, Candice she they were already, Candice asked how much it was going to cost. Jim asked her how long the trailer was and she didn't know, that she would meet him at the city building, Jim said I explained to her the prices I quoted was for a normal trailer, she came out there with about an 18 foot trailer. Candice said I don't think it was an 18 foot trailer. Jim said I have a picture of it. Candice asked someone what trailer was it? Candice said and most of it was wood.

Jim said it doesn't matter whether it's wood or not. Candice said I understand how. Jim said not unless it was green waste. I thought it was okay but then I found out afterwards, Tim maybe he called and he explained to me that after talking for a while that he remembered that they were allowed the residents that lived in the County, to dump into the dump as courtesy from the Town. But he says that if you remember is right and he said to find out from Stacey too that he thinks the charging a little bit more because of that. Rod said okay. Jim said I agree with that. Rod said so it sounds like everybody thinks that it is okay for you to do it. The only discrepancy right now is the price.

Jim said and that's one of the things I had back on the agenda was to talk to everybody about the prices for the dump.

LuAnn asked did everything go into a dumpster? Jim said Yes. LuAnn said okay the dumpster is we are charged the dumpster price per pound. Candice said Right. LuAnn said and it's and it's a lot of money. Candice said Yeah.

Candice said so if I would have known that was green waste and I could have just dumped it out there. Jim said No, Not all woods are green wastes. Candice said Oh, okay. Jim said 2x4 is not green waste. Rod said like trees or tree branches.

Candice said okay. But I know when the other mayor, not the female but here the one. Tim and Candice said yeah, he said back then they weren't charging the city or the town. They were charging out of town. Candice said that's what I was under everybody. LuAnn said everybody pays. Candice said okay, well. Jim said you know how much we collected?

For all we've been able to get, and it sort of cost us over \$700. LuAnn said Yeah that is why it can't go in the dumpster. Jim said you're getting a pretty good deal compared to going to Logan?

Candice said I'm not, I don't have a problem with paying. Jim said she was actually paid more. And I gave it to Stacey.

Candice said I don't have a problem paying me extra. So availability, if I need it?

Rod said I think the answer is yes. Candice said Okay.

Jim said what I was gonna clarify tonight in this meeting, because it's on the agenda.

Rod said but I think what's good might be changes, we're gonna be talking about price structure.

Candice said okay. Rod said and so, I think the availability from what I'm hearing is, is still available. Candice okay. Rod said it is just the price structure may be different, and that's one of our topics of discussion. So we'll, we'll discuss that. Candice okay. Rod said and, you know, and you're welcome to make comments on it towards the end, at the end, you know, go ahead and make notes. And if you want to make a comment at the end. Candice okay. Rod said to Miss Price, we're grateful for you to come address the council, we appreciate that.

Candice said Thank you for being open minded. Rod said and we are we tried to do what we can to you guys,

Jim said but people would come to these meetings to keep us in line. Rod said we're here and we're here to support the town and the public at large. And so if there's something that we can do that better serves the town, bring it to our attention and we can discuss it and if it's feasible, in fact, legal, etc.oka. Candie said thank you. Rod asked if there were any other comments.

Rod said next item a topic Fourth of July

Okay, so on the Fourth of July have we got all the receipts that we need? Do we have everything? Comments? How it went, any thoughts? of good comments on the parade?

Tammie said I feel like there weren't as many people but I think that there were more local people. I felt like they could be because we didn't have the toys and stuff that brought in all the others. But that was good too.

Rod said by and large, did you guys like the downplayed? Fourth of July type thing? Or did you guys miss anything? Good, bad, indifferent? The dinner? What do you think?

LuAnn said I thought the meat was crappy.

Jim said yeah, I was just gonna bring that up. And I've been trying to go around in my mind and, and you women, all that stuff, and it would be good. It would be easy to make for next year?

LuAnn said not that I don't think we should go with that. Jim said No, LuAnn said that they didn't like the beef, it was like water. Jim said there was a lot of fat in there. LuAnn said yeah, and the pork was just nasty. It didn't even have a good flavor. I don't want to do that again. And the potato salad from cans was really running, Either it wasn't refrigerated, long enough or well enough or something but it was just straight water too, I was disappointed, the baked beans and rolls were good.

Tammie said maybe next year they can have sliced roast beef on a sandwich, LuAnn said get a hoagie bun and have a slice of the roast beef with little bags of chips that are pretty good. We did that a couple of years when I was doing

Rod said yeah there was no other option than a potato bar. LuAnn said that was a lot and was too much work for us. LuAnn said the cheese would go melty. Rod said so you guys want some cool? LuAnn said for dessert we had watermelon was always a hit when we did it. Rod said I was gonna say watermelons. LuAnn said we just sliced them up and had them sitting on trays and everyone grabbed some. Rod said one time we had corn on the cob.

Jim said it's too bad they don't make miniature hotdogs and little buns because kids love hot dogs.

LuAnn said we cooked hamburgers once too. Rod said that would be good too. LuAnn said on that grill inside of the bowery that was a lot of work. But everybody liked them too.

Roda said there are a lot of options. I know this was cattle country, we could do fried chicken and just hand out pieces.

LuAnn said that might be really expensive to buy with fried chicken. Tammie said you could price it and see.

LuAnn said yeah, well, I think we need to change it up because I was not impressed with what we had.

Rod said I don't know how we would annotate that for next year to stay away from the meat place. We've done that for about three years.

Jim said there should be someplace else. Stacey said I think that's where Tim got the roast beef, from Lowery's. LuAnn said the year that we did it we bought it from Kent's.

LuAnn said as long as it's better roast beef than this year because it was poor. It was bad.

Tammie said that maybe next year you can see what the prices are like and go from there.

Stacey said then we ran out of stuff. I didn't like that. Rod said I think that may have been I don't know. We're using those big spoons and stuff. But I don't know.

Jim said but there are two more bags unless you got pork over there in that freezer. LuAnn said there was \$70 in the envelope. Stacey said right. Jim said and I gave her 20 myself. Okay, so we'll probably move it to just back to replenish the Fourth of July funds.

Rod asked any other good, bad, or indifferent about the Fourth of July.

Jed Pugsley said whoever cleaned up my firework mess, I appreciate you.

Jim said I thought you were busy.

Jed said I had to go to work that I left at midnight that night and bale hay all night long and came back about dark on the fifth to clean it up and was taken care of. So

Jim said I didn't mind doing it. I just took my little trailer, and I just raked everything up as much good as I could put in the bag. Jed said that he appreciated it. Thank you very much. Jim said Yeah, I didn't mind, it's not a problem. If I am not doing anything then I don't mind putting it out there.

Jed said I appreciate it.

Rod said I think that as a community we come together and try to help out when we can so much appreciate that. Jed said thank you because we cleaned it up and put it in the dumpster and caught the dumpster on fire.

Rod said okay, the next item on the agenda is just a discussion on animal control, Jim has resigned from that position. And so that position is now open. So we need to start thinking about people, persons that would like to or that would be a good fit to be animal control.

Stacey said that posted last day was July 3.

Rod asked Did we have a response? Stacey said No and I posted it on June 24.

Jim said I'd still be doing it but there is conflict.

LuAnn asked what was the contract that we got in our emails about the contract with Brigham City.

Stacey said there is a contract with Brigham and that is why it's on the agenda. There's a contract. Scott is supposed to sign. I can go grab it, and you guys can look at it. But they don't come out here. No. And it talks about fees and stuff. Tammie asked how big of a problem is the dog catcher stuff.

Jim said It can be a big headache. We have a lot of people in this town. That lets their dogs roam, bark all night, and they won't get the rabies shots and all kinds of stuff. That's part of the job of following up on all those little things. That is why we have a contract with Brigham City. Anything we take down, they will determine if they need to have medical care, they'll determine that. Tammie said so it sounds like we need to have someone in the town to take that job.

Rod okay, so maybe you start beating bushes and see if anything falls out? Well, give it some thought, and see if you think it's somebody or somebody that sparks your interest because it sounds like we didn't get a response on your postings. Stacey asked so do you want to repost? Tammie said that it wouldn't hurt. Stacey said I'll be posted on Monday. Rod said yeah, I think we need to keep reposting until we actually get it out from somewhere.

Sergeant Eddington said I think it defaults to the mayor, that you guys don't have anybody's assignments. So Mayor Scott will get phone calls from the sheriff's office if we get animal direct calls. So you have per your ordinance, you probably have to have an animal control officer there's not one assigned? I think it defaults to the mayor. Jim said I hate to see that. Tamie said so you might have to step back up.

Jim said not unless he changes.

Rod said and the problem is his work is going to take him from town so he won't be there. I'm a Pro Term Mayor, But my problem is, I also work out of town. I'm working part-time in town and part-time out. So I'm not a good fit either. So we need somebody who would be local and who would be here all the time.

Sergeant Eddington said there's just so if we get called into the city, the sheriff's office and the complaint is relating to the ordinance of Snowville City. There's no enforcement that we can take, that'd be a phone call that would be made to the mayor and say that you need to make arrangements to have this taken care of.

Rod said he is still available now by phone. Just because he's on the road is a long-haul trucker. He is available and you are welcome to call him and he's told us many times any town issues or anything, please contact him. Okay, any other discussions on animal control?

Okay, we have a new council member, but because of a medical emergency, Heather O'Hare is not here tonight. So she will be sworn in next time.

Jim asked so that you get voted in by us at all?

Rod asked do we vote on that? I thought, correct me if I'm wrong for an interim council member, they can be appointed by the mayor, until the election. Was that right?

Tammie said I thought the mayor was and the council?

Jim said the ordinance, It says the mayor picks in person but with the advice and consent of this town council.

Tammie said obviously with the council. Stacey said she was the only one that signed the papers.

Tammie said that it should be discussed with the counsel, in a closed meeting if you have concerns. Rod said correct, yeah. Tammie said maybe just have somebody else in mind that if you have somebody that you'd like to appoint because they don't necessarily wouldn't have to come in and say I want to do it. You guys could come up with a name and go approach that person and see if they'll do it.

Jed said under their voluntold. Tammie said voluntold.

Rod said there you go. Okay. So if somebody's going to collect the responses, you know, concerns or whatever, who's going to collect those? I mean, if anybody has an opposition why don't you send an email or text to Stacey, on your concerns? Your reservations?

Jim said not a problem? Luann said don't have any concerns. Okay.

Rod said okay, so you, you'll be getting an email from Jim. Okay. And, you know, if, if it becomes, we think it's an issue or something that we don't approve of, and then we can state that next time. If we do approve, then we will swear her in next time.

Stacey said if you guys meet, just not let you know, was it 12 hours or 24 hours we have posted?

Tammie said yeah, just 24 hours before you meet, she will just see the posts that the council is going to be meeting to discuss and discuss, like with the community, the citizens just have to know what's happening.

Jed said it has to be noticed if you want to have it just note it as a closed meeting, which means it's just the council that sits in and discusses. Tammie said but you can bring up your concerns and work them out.

Rod said okay, the next item was the I guess it's going to be the animal control agreement with Brigham City, we need to sign it, but Scott's not here to sign it.

LuAnn asked have we entered into that with Brigham City. Previously? Rod said yes. LuAnn asked has it had been good. Or has it been way expensive? Or has it been good?

Tammie said that hasn't been an issue. Jim said since I've been here, we haven't had to take any dogs.

Rod said as I understand that, we take it to them, and they take ownership and responsibility, LuAnn said they charge us for the fees. Every flat fee, including now, so those fees will be charged to the new municipality, which will be us because we entered into this contract, so we have to pay whatever, whatever payments, whatever thing that bills all that upfront,

Tammie said if it's somebody's personal dog or whatever, then you could try to go after them as well. Rod said the talk was to put it in the water bill that was tacked on to the water bill. And if they don't pay them within a certain number of months, then their water becomes shut off.

Jim said okay, there's that I wanted to bring up and I was just going to simply talk about landfill and water though but I could talk about that too.

Okay, all right. Why don't we defer that? When you discuss those, also make a note to talk about them when you come up.

Rod said okay, I believe that we had an agreement with Clark Hurd for using the town pastor. We talked about it last time, and we just wanted to accept that the public is aware we all need to vote, right? Stacey said I just made sure it was on the agenda, so the public was aware. Rod said Clark Hurd is using it. Stacey said yes he's gonna use it.

Rod said okay, the next item was FYI, that we're going to split the hours between the park and the cemetery to 60 hours each. So that affects you. With your time for the park and stuff, you will have extra hours.

LuAnn said we have to try and get all the trimming and all the mowing done in the 60 hours. It all has to be included in 60 hours, not Brent doing it, you have to mow and trim in 60 hours isn't included in that 60 hours to Yes. And

If Brent helps you, then you have to lower your hours. Because we can't go above 60 hours total for both parties. Jesus said that is fine.

Rod said so that works for you? But keep us apprised. Let us know how it works for you. Rod said thank you, to Rois.

Rod said next, we have a report from Sergeant Eddington, Everybody that wants one of these has one of these. So the first sheet here is the call to service and Snowville for the month of June, there were 34 of them. self-explanatory, but what they are, does anybody have any questions about them? Like, give me a description of what they might be.

LuAnn asked what was the sex offense.

Sergeant Eddington said a sex offense. I can't give details about what.

LuAnn said that somebody attacks somebody or was a family. Sergeant Eddington said so it'd be, it could be a rape. It could be a family situation, it could be a child sex offense, we just classified it as a sex offense. Tammie asked at one of the businesses. Sergeant Eddington said it could be in a business, it could be if it was called to the situation, it'd be classified under lewdness. Like if somebody was exposing themselves. It'd be either under indecent exposure or lewdness. So a sex offense is something that is some type of sex crime that occurred.

LuAnn asked what is the traffic enforcement detail.

Sergeant Eddington said so I know the council in the past has asked the sheriff's office to come to Snowville and spend some time doing traffic enforcement. And so that's what that would be that we added did a deputy come to the town sometime in June and spend some time for the case for traffic enforcement detail and his sole job on that was stopping cars and whatever extra patrols are kind of the same thing. They're not specific to traffic, but they're we checked on businesses. The other day, I was here in the middle of the night I checked on that business in town. And we kind of grid patrol the area, looking for anything suspicious or people sleeping in front of the fire station. That's a phone call.

LuAnn asked what the safety hazard would be.

Sergeant Eddington said it could be tire tread in the roadway. LuAnn said a lockout is somebody that locks keys.

Sergeant Eddington said so we're working on getting all the deputies lockout kits, not everybody has one. But we're working on that. So people who lock their keys in the car will not have to call a locksmith. LuAnn asked about community policing.

Sergeant Eddington said that's what I'm doing today, right now, and being at the Fourth of July celebration. Or that's what those would be. You'll see one of those in every community that the deputies assigned. Because we call a case and like in my community policing report, I'm just going to report that there's not an animal control officer and that'll go back to the mayor so that if we get a call here of a dog running at large and it's inside Snowville City, we know who to contact. So, if we take a dog from Park Valley, for example, and we take it to the shelter Box Elder County gets billed, all those vet fees, they pay everything that's related to that dog until that dog is either euthanized or adopted out. And so that's I mean we have the same type of contract which brings to the county that we pay those fees. But if we take the dog, if you guys have a contract, Snowville pays the bill and the sheriff's office ends up taking the dog. If we're not too busy, we'll take the dog to the shelter. But because we took it we'll still put this came from Snowville and Snowville City will be built that way All right. Any other questions? That's the other. The other one, the next page, is citations. There's no citation issued in the council bill. And that's within city limits, there were two violations. So if you look at this, this says one citation two violations, that just means that somebody received a citation for speeding and expired registration or something like that. So there are two violations on that one citation. So it shows the number of citations issued in the town and the amount of how many violations on those citations. The next page is filled with interviews. And so this is where, so deputies when they come in, they make a traffic stop, they don't issue a citation, they'll do a field interview on our person. And it's simple to pull this person over again, with a verbal warning for speed. That can also be that if we see somebody on one of our x patrols, sleeping in the park or at the church, and we stop and talk to him, we'll find out what they're doing there. And then we will document in a field interview report that we made contact with this person, this is where we make contact, this is what they're doing. This is what they said they were doing. So there were six of those who, in the month of June, where we made them, could all be in traffic in the mornings. I don't know if it's not broken down to what they are. But there were six contacts made outside of the cases that we responded to where we made contact to find out what people were doing in the city. That's the month of June. And the last time ever to the sheriff's office for almost 15 years. Seems like every year it gets busier and busier out here. There were times when we'd go a month, and they don't have a Snowville once or twice. And so it's getting busier and busier, I think but you know what, a gas station. LuAnn said we have more and more not desirable people. Sergeant Eddington said sure, But we have nothing crazy in town the month of June. Any questions for me for the Sheriff's Office? Rod said much appreciated for all you do.

LuAnn said love to see you guys out here. Whenever I see one of you guys is out of here.

Sergeant Eddington said I mean, we are out here a lot in Snowville. LuAnn said we like to see us out here.

Sergeant Eddington said and somebody told me there's this Facebook group amongst a bunch of people that says the sheriff's in town. Put all your legal stuff away. I don't know what it is.

LuAnn said I'd love to see a police presence in our town. I'd love to see that. The more the merrier.

Jim said I would like right in the vehicle that you had in the parade.

Sergeant Eddington said yeah, I shouldn't have parked it in the parking level the kids climb around. LuAnn asked was that yours? Sergeant Eddington said no, that's the sheriff's office.

LuAnn said yeah, it was really cool.

Sergeant Eddington said I think that's what communities want. And that's what I'm trying to put in. ingrained in the sheriff's office is that, you know, it's great that I come to these meetings and hand up pieces of paper right. But when it comes down to it, I think that the communities want us to get their city functions. That's where they want us and just

out here. LuAnn said to go to the cafe and have a Coke or whatever. It might just be here. Yeah, I just love it. I love it when we have cops living here. And the police car is always parked here.

24/7 You know, they were always around. That was good.

Sergeant Eddington said well, twice a day. On the days I work, I come through Snowville and make the loop. I usually make a little bit that might not be reflected as an extra patrol because I have to go to break them. But I drove through Snowville going in and coming home.

Stacey said I've seen the Highway Patrol a lot more too.

LuAnn said I have to see Highway Patrol more too. Yeah, that's great. I love it.

Okay, much appreciated.

Rod said Scott informed me that Eric was not gonna be here. But he did say that they believe that there's about 4k left in the budget to do the curb and gutter on the town hall side. And so he said that they're trying to get a firm bid so that we know the actual cost if it's gonna be more or less. And then if we want to also do Mollie's side, what that would cost and be as an increase? LuAnn said 100% against Mollie's side, It's gonna hurt the business over there. And it will shut them down, if people can't park in front, I'm 100% against putting a curb over there, especially the way it was designed to do. Jim asked whose idea wasn't to design it that way.

LuAnn said I don't know. But I think it's terrible. I think it hinders your business.

Rod said I think Eric was kind of, you know, designing curb and gutter for the town for that whole corner. So I think that's kind of what the design was.

Jim said I know we want to prove the town. But do we need a curb and gutter in a western town?

Rod said it was part of the bid for the improvement when they did the light pole and the traffic light thing. So just because we get a bid for this.

Rod said okay, the fire department is next, Jed In pretty quiet for us, I'm gonna look for fire department wise, that are trying to think if we had a call for service, as far as the fire department is concerned, fireworks, there are no fireworks, we did have one call up in Idaho, for a Semi that was had some breaks on fire to the last 30 days. But the fire department's been pretty quiet when we have maintenance left on one of our town fire trucks as far as annual maintenance or semi-annual maintenance. So we'll be working through that. Our black town brush truck went out on it. So we're in the process of tearing it down and getting the pump rebuilt. So that we can rebuild through the County Fire Department will help us out on that as far as parts are concerned and labor. Other than that, I appreciate the town council working with us through our crazy last year, trying to get the budget all figured out and everything we were severely behind on maintenance on all of our trucks. And so we're gonna keep up on top of that. Nothing had

been necessarily maintained from the time that I took over. So we had oil that had to be changed. It's been very expensive for the fire department. As you all know, we have a very small budget that we've worked with as far as dedicated funds. So try to do the best with what we can.

Jim said when you get caught up in a maintenance cost drop,

Jed said it will, it will like our town engine, the big fire truck for structures. It hadn't had an oil change in four years. And so just little things like that it doesn't, that truck doesn't dwell on very many calls, and most of the time sits in the department and does nothing but when we need to turn on, I want to if you're not going to do that without maintenance.

Jim said It's expensive to change.

Jed said it is a big Detroit engine. I think it was 900 bucks to get that truck serviced and up and going. I mean, that's a tenth of my budget. Just service in that one in that one engine. So it's been a while. Since Dave's gone, I'll just give you a quick update on EMS as well, you all seen the new ambulance. It looks pretty neat.

Yeah, we're still working a few kinks out with it. The radio guy was out today working on the radios. And one of the Google decks it's called so it has a couple different frequency monitors for the radios. One of the decks that was brand new has been malfunctioning and crashed today. So they've taken it back to Salt Lake to get it all rebuilt back together. So we'll still be operational through what's called the 800 megahertz frequency. It's our mainland throughout the county. So the ambulance still has it for a while but any of our UHF radios are down in the ambulance for now.

LuAnn asked What did you decide to do with the old ambulance?

Jed said that we discussed a little bit with the EMS and fire department and I know Dave was going to bring it up to you guys Council and see what you'd like to do be thrown around a couple of ideas with one of the main ideas. We have the little trailer that sits over on the far side of the fire department, if you've noticed kind of in between the two. So we call the MCI trailer. So for a mass casualty incident. We had a suburban bus rollover full of people. We were treating two or three patients matching character, the trailer setup and so we could hook that to a truck, get it out onto the scene and have those match casualty supplies. Again, maintenance needs new tires. And so it's kind of updated. One thing that we had discussed would be switching a lot of our MCI supplies into the old ambulance. And instead of having a trailer that we'd have to pull with the truck, we'd have an on-scene vehicle. First type in for sure be easier in the ledger to oh, it would not have triggered RS macro.

And again, there's going to be some expenses with maintaining the old ambulance and a few things like that. But without it being the daily driver. I'm sure some of those cost a little while. I think going forward, the conversation that I've had with Dave is I'll bring that to you guys to the town council and kind of get your ideas and what you'd like to see happen with it. At the end of the day, I think it is a townhome vehicle. So

Rod said I think one of the items we talked about once was approaching the gold mine and seeing if they wanted to participate.

LuAnn asked do we answer their calls.

Jed said so that's actually something I should have brought up too. We've got a meeting tomorrow with the goldmine as far as fire and EMS to sit down and have a preliminary discussion going on with them. The Goldmine technically sits in what we call no man's land. So there's a strip from the Idaho border on the west side of the hills that divide Holbrook and Stone

all the way over to the top of Black Pine that's outside of the Malta Fire Protection District. So Malta doesn't cover it. And it's outside of Oneidas Fire Protection District and so Oneida County doesn't cover it. That's why we've got the strip along the freeway for ambulance services. Then we're on a requested call from both CassiaCounty and Oneida County to cover those areas.

LuAnn said they would probably contribute big time too.

Jed said there has been an agreement with Box Elder County signed for Cassia County, that we can go in on mutual aid and take care of things on the Cassia County side, which is pretty much all the Black Pine Mountains. But it's everything down off of Black Pine and through Oneida County still working on, we could go out and get something specific to Snowville Town. It's gonna take lawyers and everything in order to get it done. It's easier if the county enters into those agreements, and then we operate under the county agreements. So they're still working on that. And I'm optimistic about the discussion tomorrow on how that's going to go and what it's going to look like. But as of right now, we do provide services all the way up into Black Pine Mine as needed.

Rod said maybe just putting the bug in their ear that if they can help push that along and tell him that this ambulance might be another item to think about.

Jed said so we'll see where that goes tomorrow. It's definitely something we'll bring up. I'm an optimist. They're shopping for some money that they're wanting to dump into some of these smaller communities. And oh, they're talking to Malta in two weeks as well. But we're 30 to 35 minutes closer than Malta responses were in Black Pine.

LuAnn said Malta has an ambulance. Jed said Malta was an ambulance. LuAnn said I did not know that.

Jed said they operate under Cassia County and so they have an ambulance. And then they've got three structure trucks, a tanker, and two brush trucks that are stationed in Malta. And so, but again, they'd have to come all the way around down the freeway, cross Juniper Road, Black Pine, which we still have a ways to go as well, but they don't necessarily want it. Cassia County stays busy enough with their freeway piece and everything. We don't necessarily want it but, Snowville but somebody needs to provide it so if they're gonna throw money at us. We're not in the business of turning down free cash.

Rod said I just remember FY when they came and talked to the council before we told him that we were getting that new ambulance, they said, well, we wish we would have known we would have bought it for you. So that's the kind of funding they're looking for. Jed said they're still in the exploration phase up there, which means they're dumping cash right now.

LuAnn asked so they're not actually working the mine yet. Jed said not actually like pulling material out. They're still testing material and trying to get the infrastructure in place.

Rod said that when they came and did the report, they were very positive about that.

LuAnn asked where they can have everybody live.

Jed said they've established a man camp up there. And so mine actually owns the exploration company owes, I think it's 25 acres up there at the foot of Black Pine that they rip, power, and water into. And we'll have hookups for a lot of that stuff. The last numbers that I've seen though were estimating 500 full-time employees and peak performance, not mine, they were expecting the bulk of those individuals to look for housing around the surrounding communities pretty much meaning Snowville and Malta.

Sergeant Eddington said I know there are guys who have been staying at the motel, they work like 14 days on and then they're off for so many days. There have been a couple of rooms over there.

Stacey said, but the guy told me that like five years because I asked him, and he said, it's not ready to go. Rod said things that they gotta get permissions and all the fees and environmental impacts. Stacey said that Klane keeps up on it too, and they're trying to sell it. They're trying to get everything ready and packaged ready. Exactly. Thank you, Jed. Yeah. Somebody's gonna put a price tag on it. Somebody's gonna come in and like, be operational, is gonna be a turn-key, you show up with your money and start digging into your political scene over here.

Sergeant Eddington said the guy that is over here is just drilling samples.

LuAnn said what are they looking for, gold?

Jed said their test holes so they know what they expect if you pull out five kilos how much gold five tons? All documented, they started holes even on the backside of Black Pine Mountain. So all that stuff previously has been on this. LuAnn asked so they bought that whole mountain? Jed said it's all National Forest Lands.

Stacey said they have to reclaim it.

Jed said after you claim it and all that there'll be under M Shaw and all that sort of stuff. As far as mining requirements,

LuAnn said like planting the trees back.

Jed said if you've been up there, it's like the leach field is still part of the way they pull that mold out of arsenic. So they have to pull the gold out and reclaim that dirt water plan to do all sorts of stuff. So it's a lovely plot. placer gold, I understand find gold. So we'll see how that goes. I'll report back to you at the next town council meeting, come meet with the mine and what they're looking for. Keep fire and EMS going.

Stacey asked do you need the building? Are you okay?

Jed said I think it's going to be small, so we'll just do the firehouse. There is no air conditioner. Oh, we don't have anything over there either. It's heated, but there is no air conditioner. Other than that, any questions I can answer for the council. Fire EMS-wise.

LuAnn well, I just have one question that was on the financials. What's \$129,000? Tammie and Stacey both said it was for the ambulance. LuAnn said that was the portion we had to pay.

Tammie said we've already, that was the money. LuAnn said okay, that's what I wanted to hear what was going on. Tammie said we have in our P.T.I.F accounts that we've been saving for that. They do have \$100,000, saved in the container fund, the money is ear tagged for a new ambulance.

LuAnn asked what the total price of just \$100,000 was.

Tammie said it was \$229,000 that was all grant money.

LuAnn said wow.

Jed said that helps us get those grants. There's been a lot of COVID money in the healthcare world there for a while. And that's where a lot of it came from was COVID bump money trying to get that sort of figured out.

Rod said okay, turn the time over to Tammie and Stacey. Do you have something for us?

Tammie said that she doesn't have anything. Stacey said the only thing that I had was this, So I had Matt give me a quote for the bibs for the water to have keyless.

Rod asked is this the one about the hose bib? Stacey said yeah. Rod said okay.

Jim asked if it was for the fire station also.

Stacey said no it is. It was just for the town hall, and it was \$440 for just the town hall.

LuAnn asked if we can lock up our water here at the town hall, but I don't know if you guys want to do it, it's just me. But I think somebody's taking water out of the hoses. Jim said he's seen it at our firehouse so something to think about

Jed said the firehouse is locked down now. I've walked locked that hydrant, there's a snake lock on if we need it I have the key.

LuAnn said that now they can just turn on the faucet.

Tammie said that there are hydrants at the park that need them also.

Jim said we should look at that.

Rod said is there a place with a padlock?

Jed said snake lock would be better so down on the handle, they have an open hole that you can put a snake lock through. And it's just a cable lock that actually sent them to Scotts two nights ago. Here's an order: some off of Amazon, they are like 15 bucks. But then they just cinch down and tighten and they can't put the handle.

Stacey said I don't know what you guys want to do with this one. It's under budget, or it's under \$500. But

Rod asked so would they be putting the case in their lock case or is that different?

Jim asked are they like the ones in the Bowery? Stacey said I'm not sure exactly what he has.

Jim said they had to be at least 500, maybe 250-gallon tanks. I saw him do it, the truck was red, and they live out on the flats. You've got a group of trailers on the west side roadway out there.

LuAnn said I think those are the squatters that are on Dave White's property LuAnn said we need to stop them for sure.

Sergeant Eddington said that RV's that park here overnight to fill their tanks. LuAnn said Why do people think that's okay. Sergeant Eddington said a lot of towns provide free water in places. So they show up and they think oh, this is a town building. We're going to take water.

Stacey said so it's up to you. I can tell it. Yes. You guys tell me what you want to do.

What do you guys think?

Rod said I think he got thumbs up while I'm here.

LuAnn said I'm Yes.

Jim asked if it was freezing.

Tammie said well, it's under \$500. So really, technically.

Rod asked if we have funding for a source now. Tammie said our budget was renewed on July 1, it's just complicated because all the money doesn't get put in there. It's like it comes each month so yeah, there's money. Yeah, Rod said there's just an avenue for it. Jed said it is like robbing Peter to pay Paul. Tammie said yep.

Rod said okay, so we just have to meet your budget. You have to like this kind of use throughout the whole year. Like don't everybody use your right now.

Rod said let's keep Paul happy then, please. Yes, Stacey said so I'll have that taken care of.

LuAnn asked Jim if he was ok with it. Jim said Yes.

My only comment for me is they're still wondering what we're gonna do with t

the lead and copper piping thing. But that's an Eric question. So he's not here. So that's all for me. turn the time over to Jim.

Jim said okay, the first thing I got was a printout of this flyer, okay, I kind of modified this a little bit after the situation. That we have with Miss Price. LuAnn asked where they live. Jim asked why they are using the city water. Tammie said that the city water goes all the way up to the Rose of Snowville double-wide. Jim said what was on that trailer, you wouldn't believe it? LuAnn said Yeah, that's BS.

Tammie said I kind of overheard her say that if you lived in the city about to dump for free. That was probably during like, we used to do free dump days. And they would have if you lived in the county you still had to pay but the city of people but that was only for a day of moderation. As for the day, it wasn't like truckloads

Jim said we quit doing that free day because we were having everyone coming and dumping their stuff. LuAnn said and I think when they bring in a trailer or truck as they had there, we should just tell them no, we don't take loads like that.

Jim said then you have to say that no one in the county can dump that.

LuAnn said then that would be fine, a trailer like that, I shouldn't go into our dumpster. That is not a service that we have to provide.

Jim said exactly, and when she pulled up there, I told her I said the prices I told you for regular trailers. This is not a regular trailer. And I'm an honest person, I told you the price. I'll stick by that, but from now on, if you're bringing this trailer in here, it's gonna cost you a lot more money. I told her that, that's what I've modified, this the bottom trailers that are longer or higher side will cost more depending on the length.

Rod said do we want to come up with a formula and say, no volume.

Jim said I put down on the trailers here, right foot trailers on one-foot sides and 20-foot trailer, two-foot side,

Rod said and then anything that's bigger than that, we probably need to go by a formula, or we'll take the volume. We're rough in volume, length, width, and height. Tammie asked if they use the scale at OSI. I think they charge like five bucks to use their scale. It might be worth it. So you could pass the cost on to them.

LuAnn said there's a scale house out to Dennis Poulsen Farm, have them get a scale ticket and charge them by that.

Jim said that's way out there. LuAnn said but they've one at Simon's too.

Jim said I understand that well, I don't know what the procedures are on that scale.

Tammie said they can use it. Rod said you just have to call and get permission and pay for it.

Tammie said he's always been so great to work with the town. LuAnn said Ryan Westmoreland is over there just to have them call her, one of the guys that work up can help with it, they're always around there, and we need to pass that expense on. We just decide on a price without knowing what the weight of it is, because we're charged by the pound.

Jim said I agree with you, that trailer filled up half that dumpster. LuAnn said we absolutely cannot do that. Jim said it was ridiculous. LuAnn said then they can haul it to Tremonton because you go across the scale as soon as you go across the gate there.

Jim said that should be with anybody, even the town's people to do it. LuAnn said Absolutely.

Rod said except for out of towners should have an extra fee.

Jim said that's something we will have to come up with, how much do we want to charge for people in the county? Rod said I think we want to have an excise fee for our county, and I think for any trailers that don't meet our stipulations, we should have a formula. Your length, width, height,

LuAnn said it needs to be by weight because that's how they charge us.

Jim said a question for you: the trailer that they drove just down the road then they went to the Fast Stop Gas station had the rear axle chained up, it looked like it was going to fall apart, Sergeant Eddington said the trailer probably unregistered trailer, I mean, the actual being chained up.

Jim asked what can we do about that.

Sergeant Eddington said not a whole lot, but it's not registered. It's what it is. I might be speaking out of turn into a previous life. I spent four years in Alaska managing the landfill. And we charged people by the ton and to get rid of garbage to pay what it cost to get rid of it. We were at \$65 a ton to get rid of garbage. I managed to transfer stations and that and a pit landfill and it was \$65 a ton to dump in the dumpster. And so you figure out what it costs so all these dumpsters that you have are certain cubic yards right? And so you have to know what you guys pay per pound or per cubic yard. I don't know what they charge it to kind of landfill this by the pound by the cubic yard. Oh, I look anyway and then you have to break it down and say okay, if we're charged this there's calculation say then, if you bring me three tons, this is what it has to cost to go in this dumpster, I took it, I tried to transfer stations in the landfill who had been running in the red for 10 plus years to running in the black, just by a simple change like that. So if you have a 30 cubic yard dumpster, you'd have to figure out how much 30 cubic yards of trash cost the town to dump that the county landfill, then you have to calculate that down that when people come in, and we break it down by pound by tons, whatever it is, and then you have to make that determination. We changed it because it was \$30 a ton. When I first took over the management of that, by ordinance, we changed it to \$65 a ton, there was a lot of kickback. But the borough that I worked for up there, the Denali borough, they were eating a lot of that.

LuAnn said we shouldn't have to pay for somebody to dump their garbage in. That shouldn't be at the town's expense. That should be the Patriots' expense.

Sergeant Eddington said I have experience in that. LuAnn said they're gonna have to pay for it, and we're having to be exorbitant. But it has to be a fee that is manageable for us to not have to pay all the extra.

Sergeant Eddington said if you can separate your construction debris from yours it's called municipal solid waste debris, that's household trash, right? Because construction debris can be broken down Tremonton does what their green waste, you know, go dump two by fours and stuff, their green waste facility. And then they run it through. I mean, I don't know if you guys have people to come run through grinders, your green waste stuff.

LuAnn said so I just thought we just can't take what we can take care of this construction debris.

Sergeant Eddington said, So you might have somebody walk in there. And they only have three kinds of construction debris, they just build your whole dumpster up. And so that's why we separated. We had different bins for construction debris versus municipal solid waste because somebody's garbage that comes from their house is a different volume than somebody bringing

in the big sheets of plywood that are nailed together in boxes, they need to get rid of it. So there is a difference too.

Jim said you're talking about the big city operation, we got an open pit that you would put a green waste in there.

Sergeant Eddington said I mean, the borough apparently had 2000 residents, but we saw 500,000 visitors to Denali National Park every year and so, we kind of had this problem, but there is this I mean, there you can calculate based upon the yardage of your dumpster there to determine what you should be charging per ton. And at scale. I mean, they're expensive. But if you're losing \$600 Every time you dump that dumpster it becomes really cheap really quick, right? And so, scales become cheap really quickly.

Jim said they charge a flat rate for coming out here and dropping it off and getting them warmed up. But then after that, they're counting after that.

Tammie said we need to call them and get those details. Stacey asked Jim so when did they come to pick the dumpster up? Jim said Yes. Stacey said okay we will probably have a bill next month and probably before Town Council and when it comes in, I will let you know. Jim said I took my front loader out there and I packed it down as much as I could and kept on putting stuff on there. I've got five couches out there and one recliner that it didn't dare put in there Because it would add up really quickly. LuAnn said so let me just tell him no.

Jim said three of the couches and recliners were when Gwen was here.

Sergeant Eddington said so I got to Grouse Creek, they have a transfer station. If you have a couch you can throw it here, they have a place for construction debris and there's some other stuff but it doesn't go in their bin just because once again it's volume right just weighs 200 pounds but it takes up this section of your dumpster.

Jim said I was just going to take a load to Logan. I was going to get some stuff, just load it on my trailer and take it to the dump there. It will be cheaper to do that.

LuAnn asked if people were just chucking it over the fence or what?

Jim said no has been dropped off there. Because there's never been any stipulation on what you've put in there. Except for green waste.

LuAnn said there should be no appliances, no furniture.

Sergeant Eddington said appliances or holding for it, because of the freon in them in the landfill wanting to take an appliance if it's in the dumpster because of the freon guys that worked for the land to the landfill that they were certified to evacuate refrigerators. And so if somebody brought a refrigerator in, it was \$50 to dump it because we'd have to evacuate the refrigerant out of the, and then it could go in the dumpster once it was evacuated. Well, that's a whole, that's a whole different thing.

Jim said we got a big pile of scrap metal out there. We'll find someone that wants it, we don't charge them a dime, they come and get it and they take care of it.

LuAnn said the scrap metal is gonna pay him because Dave White went out and looked at it and he said it was crappy metal they wouldn't make any money on it. So they didn't want to take it. So if this is crappy scrap metal what do we do with it? We can't just leave it sitting there.

Jim said no because I didn't want to do that. I tried to push it over and kind of pushed it all back away from the dumpster and made more room.

LuAnn said because if we can't get rid of it with somebody that wants scrap metal and Dave collects a lot of scrap metal so he said he went out and looked at it and it wasn't worth taking. He said.

Jed said maybe once scraps or something like right now, a ton of scrap metal only brings about 100 bucks. But yeah, three years ago, a ton of scrap metal might have been worth 400 bucks. It just depends on what it is.

LuAnn asked can we put that in the dumpster.

Jim said scrap metal, I don't think you can, or at least can't say for sure. They haven't in the past.

LuAnn said so we need to come up with do's and don'ts. What we will take and what we will sign needs to be made a great big sign. It needs to be put up there.

Jim said we live so far out here, you're gonna have so much stuff dumped underneath the freeway. Jim said Tim and I went out there and picked up a big sectional couch, if you don't have a place to put it, they'll just dump it anywhere to somebody doing that. There was a pile of junk outside of the junkyard, Somebody just went out there just dumped it outside the dump.

Tammie said so I think that's why they used to do the free dump days so people would just come and clean up their yards and take it and dispose of it correctly. Jim said we need to do something but he is not sure what, if you start restricting people, you're gonna start having trash all over the place.

Jed said one thing that I don't know. You can take it from Jed, a business owner, and the fire chief, I don't care which one. But garbage disposal in the town of Snowville is really economical. Really and truly have a can sit over my lot. It's like \$40 a month. And I fill my dumpsters full or my garbage cans full and they disappear. And I don't have to do anything because it's cheap for me as a business owner to have garbage cans. Not everybody sees it that way. And not everybody wants a garbage can. Garbage disposal is cheap, the same company that picks up garbage here in town, I've got two cans in my house, they come onto the flats and pick up garbage for me and Stone and it's cheap. I mean, I'm 40 bucks a month, either my house or my business for garbage disposal. So a lot of the people that have tons of garbage around they just need to get a can, issues going on up there too. I went after him for burning because they built a 600-gallon trash burner and we're burning tons and tons of garbage in an illegal way.

Stacey said that's why she asked me for a can and I said can't give you one because you live in the county. I can get you a number and it's really the price isn't much different. LuAnn asked if they'd go out of town and pick up garbage. Rod said Yeah.

Sergeant Eddington said okay if you've never paid for garbage before and then all of a sudden you get the smaller black can and pay \$3 a month. Some people think that's outrageous. I would advocate that to Park Valley in a heartbeat.

Tammie said it took a lot for the people that live in Snowville to get Econo waste to come out here. And then they would after we got him out here. They complained about the price. They complained they were only coming once every other week. And so then we moved to Idaho people doing it you know it's just they take it for granted that they have that and we get it out. The garbage being emptied every week is great. I love it.

Jim said me and my wife recycle a lot so we hardly ever have garbage.

Jed said for me that can is super economical he just stuffs a full and disappears but for a flat rate I don't think people can go wrong with the garbage yeah it might take you two months to fill

your garbage can full each time getting stuff gone that people need a way to get rid of garbage town provides us service already through their contract.

Jed said so it's the big stuff on the couches that type of stuff that people have an issue with but LuAnn said should we still take them? LuAnn said they should take them to Tremonton. They take everything there.

Tammie said if you put it out in front of your house and say free it goes really quick.

Jim said just kind of kicking around your mind and get a hold of me and your guys' ideas and I tried to compile it. We have to do something every month or every time we know that it's costing a lot of money. Rod said there's always the option that you just close it. That's another option.

Jim said at least we can get rid of that scrap and I'm going to quit taking scrap metal.

LuAnn said if they're putting it in a landfill it must not be worth anything. Jim asked so should I quit taking couches too? LuAnn said I don't know if these guys said that would be a mistake, it might just clutter up the town somewhere.

Jim said that's gonna happen as I said, Tim and I went under the freeway the couch was just setting there,

LuAnn said and you can't put it in the hole?

Jim said no, that's for burning green waste only. You can put two by fours in there or you will get into trouble.

Jed said it is how grumpy the EPA wants to be.

Jim said they are going to burden it, every couple of years we burn it.

Sergeant Eddington said to set up a fee schedule where the couch is \$15. And yet we did this at a longer transfer station. The flatbed trailer he brought a couch was \$15 for the couch and then went on. The flatbed trailer didn't do your dumpster if you have to look at this dumpster as every square inch of that thing costs money. So your big items if somebody's willing to haul it into the landfill you charge \$15 for this couch, and you can put 10 couches on this trailer and then you haul it in and you dump it for \$15 right total in the landfill it may have saved the city some money in that in that realm. There is there are ways to make it work where you separate your trash but I found that when you have transfer stations and you have roll-off bins municipal solid waste which are household trash is the easiest way to break even or make your money on the filling it up with that type of trash once you start introducing construction and demolition type waste or big couches or tires take up a lot of room.

LuAnn asked what kind of trash did that lady have? Jim said she had a couch and a lot of wood but she had just a lot of junk.

Jed said this didn't come from me so do it that which may but they're in the business of cleaning junk up for people too. Jim said yes, I know that. Jed said so those people might as well go in with the trailer and clean up your junk and then they go to the town and dump it in the town dumpster next to nothing. I haven't got I might have paid them \$250 to get rid of my pile of junk and the town just charged them \$25 to get rid of all the garbage that's not even there it is somebody else's from up and Stone, or out on flats.

Jim said he asked me what to do with that scrap metal.

Jed said if you want it gone, I guarantee a phone call will disappear.

Sergeant Eddington said he would take your metal. He's scraping pretty heavily right now.

Jim said okay, I'm gonna get a hold of him and he will have to take it all. Jed said it will be gone tomorrow. Jim said the couches he will load up today and take them to Logan. Tammie said do it

for nothing. Jim said you guys can't afford me. Tammie said we will be forever indebted to you. Rod said so on bigger items I think we need to have a length, width, height, and volume.

Jim said once we eliminate the scrap metal and couches, you know, and stuff like that. Over here at the park just on the north side across from the Gamble's there a tree and branches broke out over the road. Rod Arbon took me over here and showed me which ones, and we tried to get Rocky Mountain Power when they were trimming the trees around here. So they would trim it. They can't by the rules, which I can understand. LuAnn said because it's not interfering with the power lines. Jim said it's on the outside of the park. Why can't we cut that off? And put it out in the green waste? And then we don't have to worry about the tree. It's not doing any good to anybody on the outside of the park fence, but it's going out over the street. LuAnn said yeah cut it down before it falls.

Jim said I will just take a chainsaw over there and cut the darn thing down. There's one branch. LuAnn asked, "Big tree is it? Is it gonna fall over? Jim said it's about 20 feet tall.

Rod said I'm just wondering when it falls down, is it going to hit the fence.

Jim said I'll just cut it in a fall right on the grass towards the street, then just cut it up.

LuAnn said that is a yes from me.

Jim said great. Rod said I don't have any problem with it. Jim said good, I'll even get Rod Arbon to help. He said would.

LuAnn said he can't lift anything. Jim said that's all right, he can supervise. Stacey said he has a tractor. LuAnn said oh, yeah, he has a tractor.

Jim said what we've been doing, I understand, is allowing people to put like the dump fees on their water bills, and stuff like that. And what was the other one that we put on the water, our water bills, got the dog, dog fines, and stuff like that? If those people have enough financial problems that they will say filing bankruptcy or something like that, they might be able to recoup that water bill, but you will be able to recruit other funds on. So we want to continue doing that?

Jim said it started with Gwen. Stacey said it was with Tim also and we didn't have very many.

Tammie said I remember that it was just doing the dog licensing stuff and people just pay them and we didn't have a problem, laminating just dog licenses.

LuAnn asked did you include a bill for whatever they owed with their water bill every time.

Tammie said it has been a separate thing, we just put a charge and it was one time, honestly don't know how legal it is, maybe you're not supposed to do that, I don't know if you can shut people's water off.

Jim said I don't think he can. Tammie said I don't know, it's never come to anybody arguing about it, so we really haven't had a problem with that. Jim said so we'll think about it if you know.

Jim said I was confronted by the big guy there, on the trailer there was a big couch on it. And if the long trailer belonged to the Gamble he told me to use that little trailer, he would dump it and tell the city to put it on our bill.

Tammie said we can't do that unless they call and tell us to do that.

Stacey said when Wayne Gamble came to pay for the water, I asked him when he was going to pay for the landfill. And he's like, No, not this time. And I'm like, Oh my gosh, now, remember, LuAnn said we news cash in hand first so that gets paid.

Jim said that is what Tim said to have cash in hand before they dump out there.

Rod said I think that's a good practice.

LuAnn said it is just like if you charge your groceries, and eat them, do you still owe for them?

Rod said they will come to repossess that. LuAnn said yeah, I mean, they have no recourse.

Jom said to pay before you go and policy on this flyer, too. LuAnn said no checks, cash only.

Jim asked the council what about putting it on the water bill, stop that or continue? Tammie said only if it's an absolute emergency. LuAnn said I'd say if you put anything in the dumpster give me cash money first.

Rod said if there was an extenuating circumstance where they could kind of come and talk to us first.

LuAnn said what did the extenuating circumstance be that you'd have to go to the dump and charge it?

Tammie said well, for example, Brent ran down there and forgot his wallet, you know, or something.

LuAnn said then he would come back to the house, drive the garbage back and get a wallet. Is there no extenuating circumstance to dump garbage and not pay for Stacey on

Monday. Stacey said just like I asked him, Jim was here, You heard me. Jim said yeah, then he said I don't think I can pay it this time.

Sergeant Edington said then you have to have change and all that stuff. It's \$10. They give me a \$20 bill, right? This is gonna be 20 flat. Yeah. \$5 Tip \$5

Tammie said we'll take the change and apply it to your water bill.

Jim said I mentioned that she gave me \$60. The amount was only 50 bucks charged to her, I said okay. Jim said that's up to you, and she wouldn't take a receipt. I think I'm going to still force receipts on them.

Tammie said I would for sure if it was cash.

Jim said I don't mind carrying a little bit of cash. It's not a problem but the first time I get dumped on the head.

Jim said no to putting it on the water bills.

Rod asked Jim if he had any other items. Jim said he was done.

LuAnn said they didn't get done all the way with the sprinklers today but they'll finish up tomorrow they only got just a few six or seven more puts in they did have some of the T's break because they didn't put any lubricant or any you know that tape stuff so you can unscrew and so they had to replace a few of those, they were the just the T's that they broke and the law mower thanks to Jim, works like a champ often runs this so good, and thank him so much for that because that's wonderful, I need a little more road repair, I noticed that we have on 800 North on the dairies old road, there are quite a few potholes up there. We need to fix those. And then on the north side of the church, there is a big pothole right there. I know this because I ran right in so I will just call the county again and see when they can come out because there's not a ton like we had the first time. Do we have money to do it?

Rod said there's a few couples on Cemetery Road there's kind of a strip like somebody took something and a sort of plow on the side. LuAnn asked if it was on the side and Rod said yes Rod said there are also a couple of places where the asphalt has broken. LuAnn said that she will give the county a call to see when they could come out and fix them. Tammie said that there is money to have them fixed. Jed said just for your information LuAnn there are two or

three bags of quick patch in the fire station, it is just a pothole filler, so if you have one and it is starting to be a problem, Jed said that he would get it for her. LuAnn said the State guy would every once in a while just drop some on the potholes and it would take care of them. Jed said that it isn't the best fix but it will work until they can come and fill the potholes in.

Rod asked if there were anyone with a public comment. No one responded.

LuAnn said I have a couple of questions on the expense sheet which is why I haven't signed it yet.

So they answered the Ambulance one, What maintenance was done on the Bowery? Because if it was the electrical it didn't work the power kept flitting off when we had the 4th of July. LuAnn said it was F&F, and Tammie, and Stacey said that is Scott when he mows the Park. Tammie said that is what he gets to mow the Park, but it should go down because they are cutting hours at the Park. LuAnn said Let me get this in my head, Scott is a contractor that is paid by the city using city equipment and gas to do the job. So he is not here to irrigate and turn on sprinklers then what happens? Is it going to be nothing, when he is gone for three weeks on the truck, everything is going to be dry, then we need to rethink stepping down when he is back on the truck. Jim said on the job announcement there are a lot of things that he is supposed to do, cleaning the bathrooms, cleaning the Bowery, and all kinds of stuff that he is not doing. Stacey said Jim cleaned the Bowery for the 4th of July with his steam cleaner. LuAnn said I am just concerned that is a lot of money out every month for a job not done. Tammie said that job includes opening it up for people when they rent it and cleaning it. LuAnn said there was nothing done for Bowery. Tammie, we need to address it and see how that is going to be taken care of. Jim said the sprinklers are on a timer. LuAnn said what about the irrigation? Stacey said this is what he told me to post the job so I posted the job on June 24th so I gave it to the 3rd of July then he told me that he was going to have his brother-in-law take the job. We had someone interested in the job. I am not going to say who, but we had someone interested. He told me that he could fire and hire whoever he wanted. LuAnn said is that true? Tammie said that she would ask Marla. Tammie said if she had any questions at all she would call Marla. Tammie said she is the County Clerk. LuAnn my concern is the irrigating because that is how we get the Park watered. Jim said can't you fire a contractor when they aren't doing their job. Tammie something to look into when the Park is up for bid again, I got a bid from IMT in Tremonton that they would come and mow it and use their equipment and gas. It is pretty similar to what we pay to Scott. LuAnn said they wouldn't do the irrigation or open and close the Bowery when it is rented. They would have their own equipment and we wouldn't have that cost. Just something to be concerned about when that comes up. LuAnn said when he got the new truck driving job I will be gone for three weeks and home for one. What happens if that water turn doesn't fall on the time that he is home, what happens to our Park? He can't keep asking people to do it because you have to babysit that water, especially in the Park. LuAnn said that is a concern to me. LuAnn asked what are the 511 wages for Scott. Tammie said that he is the Assistant Fire Chief and does the paperwork. He and Jed split the wages. So we combined the Assistant's and the Fire Chief's wages and cut them in half. He takes half and Jed takes half. LuAnn asked Jed how is that working for you when he is gone? Jed said when he was home he would come on calls and help. LuAnn said so he needs to be fired for that job too. I am not trying to be mean but we don't have money to waste if the job is not being done. Jed said that is a Town Council decision. LuAnn said if he is going to be a truck driver that he needs to get someone

else to do that job. If he is going to be the Mayor then he needs to be the Mayor, he can't do both. In my opinion, I will tell him that when he comes back. LuAnn said I am not being mean to him, I am just saying. Jim said you're 100% right. LuAnn said because the 4th of July didn't go over very well if everyone hadn't rallied in the valley to put that on it wouldn't have happened. Jim said Keith Thompson fixed the hot water heater and gave us extra elements for the hot water heater, so we should be good forever on that. Jim said if we had a plumber come out and fix that it would have cost the town a lot of money, so I gave him two bags of meat. LuAnn said that is perfect. Jim said he was happy with that. LuAnn said seriously, Jim? Jim said yes he liked the meat. LuAnn said it wasn't good meat. Jim said to use it on chips and other things.

Rod asked if there were any additions to the expense. Stacey said yes there is, Fuel Network, Rain for the website, and Utah Tax put I was going to have Tammie look at that because I am not sure we pay that I have never seen before. Stacey said that will be on the next time's expense sheet. I got Jim's dog catcher wages. Jim said I am not worried about that. I told Tammie and you would say that. That is all I have.

Rod asked for a motion to accept the expense along with the additions that were mentioned by the Clerks.

LuAnn Johnson said I will make a motion to accept the expense along with the additions that were mentioned by the Clerks.

Jim Beagley 2nd it. Rod said All in favor. Aye. Any Opposed. Passed

Rod asked for a motion to Adjourn.

LuAnn Johnson made a motion to Adjourn.

Jim Beagley 2nd it. All in favor. Aye. Any Opposed. Passed.
