Garrick Willden- Discussion on Water Infrastructure grant/loan Project

Based on the most recent culinary water master plan and a few things that have been discussed since then, Garrick suggests the city apply for two grants, a study and a project. Replacing the transmission line, increasing or adding another line would help with the low pressure throughout town, and loop lines. A great study would be an aquifer storage and recovery plan. The State is allowing communities that own their full spring water rights to run water down the well to recharge the aquaphor. The grant application should also include in the study to see if the line is air locked. Recorder Belnap will work with Garrick to get the applications filled out and turned in by the deadline.

Discussion on Planning & Zoning Board approving fence permits

Mayor Leatherwood mentioned in the last meeting he misspoke stating letters were being sent out to those individuals that the city was aware of that had not received a permit for a fence, that is not currently happening. Would like to get to the point that letters will be sent out to individuals notifying them that they need to get a permit before construction.

Councilwoman Huff would like them to keep coming to the council. Based on things that happened before with the P&Z board approving things they shouldn't have. Sorenson tends to agree with Huff, another set of eyes is a good thing. Council would like to leave things the way they are and have fence permits continue to come to the council for final approval.
