

Notes for 1st day of RecRAP Application Presentation 10-23-23

Present committee members - Jessica Kirby, Keren Mazanec, Amy Yost, Ian Hartley, and David Darcey. Amy Jones from Summit County present. Breke Harnagel and Leonard McGee not present. Presentations were every 30 minutes starting at 9am with last presentation at 4:30pm. Meeting begun 9am.

RAPREC 12-23 Peoa Recreational District - Ask \$29,000. Remove barbed wire and replace with pipe fencing. Has one bid but getting 2 more. The arena gets used a lot for 4A events, stampede, other events. When no activity then they rent it out to people who need a place to keep horses. Recently they had a horse get hurt from barbed wire. Goal of fencing is to keep animals inside (not keep animals out). Pipe fence - open. Approx 1355' of fencing. According to Ian if only partial funding then they would build as much fencing as possible.

RAPREC 8-23 PCHS Baseball/Softball

Asking \$66,000. Matt Strader and Dave Feasler presented. Most likely will not move fields to Treasure for 3 more years. They are waiting on district to give them more information. District is adding new fencing and updates to scoreboard this fall - approx \$30-40k. Most of the items they are asking for will be transferable to new field. If they only received part of the ask then they would focus on the turf mounds and the full field tarp. The tarp could make a huge difference - if field is ready for play and then we get one night of snow they would not have to wait several days for it to dry out, they would just remove tarp and play. Their application is easy to read - everything listed out.

RAPREC 10-23 Park City Municipal Corp - Robotic Painter

Ask \$42,570. Jarred Chamberlain is applicant. They did get 2 bids but went with Tiny Mobile due to pricing and only takes one person to lift device into truck. Real Salt Lake Soccer team has 2 Tiny Mobile painters (this same brand). PCMC would save a lot of money due to decrease in man power and time.

RAPREC 3-23 Francis City - Wild Willow Park-Kati Hennessy

Ask \$368,250

Two other parks in the past. Part is ADA. Phase 1 complete. Now phase 2 - nature park. If only received park funding then they would apply for other grants from UORG. Maybe downsize park or only complete portion of phase 2.

The community has become more receptive of the park than previously. The city has worked with residents that had property line disagreements. Parking may be an issue and there is a possibility they could park closer to town and ride in on path on Hilltop. SSTRails is working with them on the Hilltop road/path.

RAPREC 13-23 South Summit School District - Wes Blazzard and Steve Southerland
Aquatic Center. Asking \$284,248.50.

3 projects reviewed. School board can help with difference on the locker room renovation if cost beyond ask. U of U and Logan HS switched over to this water system. If they only get partial funding then the district will help them with the differences on the locker room but not sure if they will do all 3 projects. Currently the district is already paying for the new liner in the pool (\$300k) and some roofing issues.

They are the only Recreation center in Utah that is 100% school district fully owned and operated. But they run it like a city/public facility.

RAPREC 17-23 Summit Bike Share Program

Ask \$95,000

Own all the bikes. Summit County started operating the entire program in May of 2023. They own 250 bikes. Risk manager Clay Coleman. Other bike shares have had lawsuits. The rider does sign a waiver electronically before using. Some employees rebalance bikes already so they would clean helmets when there. They would not need lockers at some locations - they would go inside and get a helmet.

The helmets would just be cleaned with Clorox wipes. Research shows that if you charge extra they won't use the helmet. Also if they just put the helmet on the bike then they will just toss it.

RAPREC 15-23 Summit Community garden and Eats - Sun Shades

Kelly Vandetti

Ask for \$41,370

If not totally funded then would only get one or two shades and probably apply again next year.

RAPREC 9-23 Park City Municipal Corporation -Rail Trail bridges

Logan Jones

Asking \$364,911.18

Silver Creek Village - affordable housing - can use Rail Trail to get into town. Current bridge has screws popping up (even when fixed) and is not wide enough for the amount of traffic it receives. New bridge would allow pathway to be groomed in winter.

Phase 1 we gave \$500k - widening crossings, surveys, Kimley-Horn and Associates design, \$287,731, added items

RAPREC 11-23 Park City Municipal maintenance of pathways/equipment

Billy Kurek

Ask \$26,746.76

Mower for weeds on side of trail. Will save lots of money and man power. It can mulch trees as it runs over them. This piece of equipment will fit with their current tractor.

RAPREC 5-23 Kamas City, presented by Jessica Bateman and Matt McCormick

Ask \$300,000 for improvements to rodeo grounds and city park

Goal is to make the park and rodeo grounds more friendly to users, get more use out of it.

They want the rodeo to get more excitement, more of a boost, and if improved look then would help. They have improved the electric connections and WI-FI speed. If not able to fund 100% what are your priorities? Ornamental fence and gate are a top priority to attract more people. 2nd-chain link gate and fence. 3rd - Flag Pole. Many requests for Vet recognition. 4th priority - restrooms. Last priority - stock pens

Ian brought up the point that part of the ask was for aesthetics and not for recreation. Should we be paying for beautification. Should we be paying for a \$50k flag pole? What does it have to do with recreation?

RAPREC 1-23 Coalville City Trail

RaeShel Hortin

Ask \$167,500

See below

RAPREC 2-23 Coalville City - Trailhead parking (RAPREC 1&2 were presented together so notes together).

RaeShel Hortin (treasurer for City of Coalville) Ask \$155,500

Summit County Historic department put the first sign at trailhead. Goal to make it a safer access off the Main Street. Put in picnic tables, add lighting, add signage, landscaping, doggie bags, close to access to Rail Trail and Chalk Creek (put stairs down to that). Just recognized in Get Healthy Utah - want to encourage walking and hiking to locals.

Preservation of the petroglyphs-cameras, lighting,...

Working on getting some other grant funding - state. We encouraged them to look into the Cultural RAP tax application. The petroglyphs are on the school district land and the superintendent has agreed to this project but it still needs to go in front of board. Questions brought up about if the petroglyphs are protected, are known to Utah historical societies or correct agencies, how will they protect from vandalism?

RAPREC 7-23 North Summit Recreation

Charity Richins and Amanda Pace

Ask \$963,098.45

North Summit board decided to get started so prices would not continue to increase.

Cultural Tax paid for food truck pad and basketball court but no Pickleball courts. It was not worth it to do one, need to do 2 or 4 at once or waste money on materials. Goal is to have a community gathering place - food trucks promote this more than concession stands.

Question brought up about where people will park and they said on the school district lot.

What happens if schools district takes this parking away (trailers, etc). Also, they plan to have a rec center but there is no planned parking for it as well.

RAPREC 4-23 Henefer City - refurbish tennis courts

Robin Riches

Ask for \$60,000

2 tennis courts in the town park. Did speak with the person that will refurbish the courts and he recommended the contingency number. The contingency is 22%- a little high. The courts are already lit. There are also bathrooms in the city office. And there is a porta-potty. They figured it would cost \$250k if they totally removed the courts and put new ones in.

Town support.

Committee adjourned at 4:45pm.

notes by Keren Mazanec, RecRAP secretary
