

Mayor Scott O'Hare
Council Member Jim Beagley
Council Member Rod McGary
Council Member LuAnn Johnson
Council Member Heather O'Hare
Deputy Clerk, Stacey Hill
Clerk, Tammie Morgan

Dave Smith, Kenneth Snow

Mayor O'Hare said, Okay, it's six o'clock. I want to welcome everybody to the town meeting Snowville town meeting on October 11, 2023. I'm Mayor O'Hare and I like to welcome everybody. We'd like to also recognize Jim Beagley, Council Member, and Councilwoman. Heather O'Hare. We'd like to excuse Council Member Rod McGary and Council Member Luann Johnson. They are not going to be here tonight. We will go ahead with our meeting but we will not have any voting tonight. Is that correct? Because we do not have a majority of you, I only vote for tiebreakers.

Tammie said, but there are three.

Mayor O'Hare said, Oh, we can still vote. Okay, I thought we had to have at least three because I can only vote for tiebreakers. I can't vote with them. So if these two vote yay, and these two decide to vote no, or yes or whatever, you can still just need three including the mayor. Okay. Then we can vote then we can go ahead and proceed with the business at hand. We're going to have the Pledge of Allegiance. We're going to have Councilmember Jim Beagley lead us with that and then on the prayer, Councilwoman Heather O'Hare will lead us in the prayer. Jim said, ready to begin.

I pledge allegiance to the flag of the United States of America. Four Ways to stand one nation under God, indivisible, with liberty and justice for all.

Heather O'Hare said the opening prayer Father, never thank you for this day. And thank you for letting us all be here and safe. And that will return home safely. And thank you for this meeting. And it will go well, and we say so named Jesus Christ. Amen.

Mayor O'Hare said, Thank you, Jim. And Heather. Also, I forgot to recognize that sorry about that. I'd like to recognize, excuse me, Sergeant Eddington with the

Box Elder County Sheriff's Department who's present tonight, as well as our EMS president, Dave Smith.

So everybody, town council members, was emailed the agenda. And the minutes from the previous month. We also have Stacey as she has to email us as well as the expense sheet from now on. So that way we can kind of look at them before we come in here and get involved. Then I tried to figure it out. So did anybody have anything to add to the agenda?

Jim said that he would like to add just a couple of things you're gonna put on there. Mayor O'Hare said You want to put it on? Is it on the agenda? Jim said, no, it's not. Mayor O'Hare said, Okay. So we need to add it.

Jim said, Well, I don't know. I just want an update on what you have going on the vehicles. The people have a multi-vehicle around their property.

Mayor O'Hare said, Well, we haven't discussed that.

Jim said, last meeting. We discussed them down there. And you said you were gonna.

Mayor O'Hare said, Oh, yeah, Yeah, I'm gonna go back to my notes. Yeah. Now. Yeah, we can discuss that.

Jim said An update on the dump.

Yep, I got all that. Yeah, I've got the Mayor's update, which I have here underneath mine.

Jim said, and I still don't have any bids on those trees on that corner yet.

Mayor O'Hare said, Okay. Anything from you Heather? Do you need anything to add? I need to add the Cemetery and The Park maintenance just to discuss this as there is no voting because we can't vote now that we're adding it now. We can vote on it. But we can discuss it. Cemetery and Park maintenance for 2024 for roads and bridges, Main Street Bridge. No trucks down this road anymore. We'll discuss it and if we have and I don't see. Eric's not here, seeing if we have any money. And maybe you can ask for the money to paint Mollie's parking lot in the front to a slant where we can get the cars over. But we'll discuss that. So I'm going to add that to the bottom. You guys got the minutes. Did you see anything in the minutes that we needed to be? No. Okay.

So if I can get acceptance or a motion to accept the agenda and the minutes from the previous meeting. Heather we got a motion for Heather got a second from Jim. All in favor? The two of you. All opposed? Okay passed.

Mayor O'Hare said, Okay, we'd like to welcome Stefanie Madison, Hi, Stefanie, Welcome, Stefanie is with the Water Conservation Board.

Stefanie said it's more of a steering committee. Okay. Am I okay, just if I sit here? Mayor O'Hare said we need you to stand up here. Yeah, because we have a recorder here. And if you could just state your name, and who you're with, then you can go ahead and present.

Stefanie Madson. I am a member of the steering committee for the county water master plan. I spoke with AJ Morgan and Rod McGary and then sent a letter to Stacey as well, maybe you all have seen the letter that the the steering committee is doing a kickoff meeting on November 2, and we would like to have at least one or two representatives from Snowville to come to those meetings and start the conversation about how to preserve our water here in the county. We're inviting all water providers, both culinary and secondary water to the meeting to start those discussions. And we don't know a location yet for that November 2 meeting, but we'd like to have you participate, and send somebody to that.

Mayor O'Hare said, Do we have an if you don't have a location? You probably don't have time.

Stefanie said Six o'clock, Yeah, and that I'll just be in touch. If you have, you know, some people you want to talk to if you want me to communicate with Stacey or whoever where that meeting will be so she can get the word out to whoever it is that is going to hopefully, you know, represent you at those meetings.

Mayor O'Hare said, Well, we definitely will most likely AJ will be there. As well as Rod since Rob's a council member of the water department. And AJ is the water director for the town.

Stefanie said, Great, so yeah, just to give you a little bit of background on it to the steering committee, most of the group was also at the growing Water Smart workshop that we did for three days over at Utah State University and started kind of getting an idea of what we needed to do as a county. But the County Commission has supported this and the Water Conservancy will be kind of where the head of it is. And then the Mayor of Honeyville is our chairperson. By the end of 2025, we have to have a water master plan that's either incorporated into our county general plan or its plan. So that's where we're going with this word, just

the word, just the body trying to facilitate getting it going and leading through that. Two years.

Mayor O'Hare said, Excellent. Yeah, I think we did receive that email.

Stefanie asked, Any questions you have or should I just communicate with Stacey?

Mayor O'Hare asked do you have AJ's email address.

Stefanie said AJ's and Rod McGary. I think I just sent it to a small town. I can't remember. I will have to look.

Mayor O'Hare said, Yeah, if you have Snowville town that's fine. Or we can get you AJ's and Rod McGary's email and you can see them on it. Stacey when she gets it, she'll pass it on to the town council as well as AJ.

Tammie said so Stacey's not here I'm Tammie.

Stefanie said, All right. So yeah, look forward to that and look forward to it as well. Your cooperation

Mayor O'Hare said, Thank you so much.

Stefanie said it will be an interesting time.

Mayor O'Hare said Yeah, so well. I also forgot to mention I like to excuse Stacey Hill for tonight's meeting and also recognize Tammie Morgan is here with us as well.

Mayor O'Hare said, okay, so the Snowville Town elections have been canceled. We will not be holding elections this year as no nobody ran against those who put their paperwork in for it.

Jim asked, So how was the person supposed to find out about putting in stuff like that goes

Mayor O'Hare said it goes out to three different places it goes out to like when she posted the notice. Tammie said when she posted a notice that was open to the public notice website. It should be posted here. I just think she posted at the post office. I hadn't seen anything about the cancellation.

Jim said we don't have a website.

Mayor O'Hare said We do. Tammie said, I think she'll post now after says since this is on the agenda then now she's gonna go post it after you guys discussed it. Jim said That doesn't take care of the problem. People that wanted to vote right on vote but wanted to run.

Mayor O'Hare said, yeah, it was posted. Now we're 65 days prior. So what happened was you had a deadline, and I believe the deadline was July. July for

right. And so Heather got her in, Rod got his in, I got my in. And then that deadline came and went, Okay, so then that went away. So then Declaration of Candidacy, right Declaration of Candidacy, and then we have the open, anybody can handwrite their name into the ballot, and you had 65, up to 65 days before election day, which election days on November 7, we've hit the 65 days. So now nobody has come forward at the election board for the county, or to the town saying that they want to be considered for a seat.

Jim said, So what you're saying is it was posted, it was posted in person wanting to write in to do by this certain date?

Mayor O'Hare said 65 they had put their name in.

Jim said, I never saw anything. Mayor O'Hare asked Jim Did you know somebody that wanted to put in?

Jim said, there was someone who wanted to put in.

Mayor O'Hare said well yeah, it's but we have to post it in three spots. By law, we have to post it.

Jim said, I'm just saying. I looked at that bulletin board at the post office. Nothing there. But I haven't seen anything here. And I know you use it for one, where's the Ranch House too?

Mayor O'Hare said we'll have to get with Stacey. Stacey is the one who posts all this and finds out

Tammie said I looked to see what date that was. I don't see it in this particular email.

Jim asked, Was it brought up in any past meetings?

Mayor O'Hare said, "Yeah, it was brought up.

Jim said, The only one I remember is.

Mayor O'Hare said, I remember us talking about it, because it was talked about here in August.

Jim said, as a person who wanted to write in, you know, they need to do it by a certain deadline that was never brought up.

Tammie said, What do you mean? Heather said Do you have a town website?

Jim said, I don't see anyone right now. I tried too.

Tammie said there is a public notice website.

Mayor O'Hare said, There is a website, but it's no there is Jim but it used to be right. That's why I'm saying if you go to the thing, it's gonna say under construction, but we do have a website

Jim said, then people can't get on it.

Mayor O'Hare said, No, people can't get on there. Right? Because we're trying to get an update and everyone is supposed to be able to, well. Maybe they should come to a meeting. That's what I'm thinking, maybe they should come to me. We talked about it in the meeting, we can go back to the minutes.

Jim said People could come in and write in. I don't remember. The last time I remember anything brought up that we had to put our stuff in, was in July.

Mayor O'Hare said, Right. And then they have the 65 days we'll have to find out for the 65 days. I know we talked about it because I know about it. 65 days prior.

Jim said I got copies of all the minutes.

Mayor O'Hare said, yeah. So everybody does, everybody gets them. So who was it that was needed? Well, you don't have to tell who it was. But I would tell those people that if they want to be part of the election and run for a seat, maybe they should come to a town council meeting. And, participate in the town council meeting because we did talk about it. We did say it. I just don't know where it's off the top of my head.

Jim said, Okay. I find that you've talked about it all, apologize.

Mayor O'Hare said, Well, no, we don't need an apologist to talk about it. Jim said, you apologize and it needs to be straightened. It's not an apology. It's not about apologizing, Jim, it's about if people want to be part of this town and be involved in it.

Jim said If it wasn't for now. Then people need to get it.

Heather said, Okay. I think this is something to ask Stacey.

Mayor O'Hare said, Yeah, this is a Stacey question. Stacey's the one who takes care of it.

Jim said I will look at the minutes.

Dave asked if Stacey put it out in the water bills.

Mayor O'Hare said, No, no, it doesn't go into water bills.

Tammie said, should have been posted. If it wasn't some have been posted in three spots.

Mayor O'Hare said, well, it has to be posted. It's law that it has to be posted on the website. It's just well we've talked about the website later with Yeah, but it would be nice if, you know, if they want to be part of the town and be involved in the town, they should come to the town council meeting. They haven't been.

Because I know whose

Jim said I didn't tell you their names.

Mayor O'Hare said, Well, no, I know, you know, but I'm just saying this. You know, if they have, then they would have heard that no, there are 65 days before the election that you can write your name.

Jim said, we'll see.

Mayor O'Hare said, So okay. Update the Council on the conversation with Mr. Molgard Okay, so my conversation with Mr. Molgard. I spoke to him about two subjects. One was Maria, and she asked the town to pay for the fixing of the power when we had the storm, and the tree got blown over and it's the town's tree and not their tree, blah, blah, blah. Anyway, I talked to him about that. He was supposed to get back to me on that. And then also, I talked to him about the transfer station, dump whatever you want to call it. He was supposed to get back to me. I talked to him on a Tuesday, and he was supposed to come back to me on Friday, but he never got back to me. I waited a week, he never got back to me. I called yesterday and got a call from his dad today. He's out in Europe somewhere. I'm not happy with the situation. But we can talk about this later. This is not the first time that he has not followed up with what we've asked him to do.

Jim asked Mayor O'Hare if he received an email from the County guy he sent to you. I just got it,

Mayor O'Hare asked, today.

Jim said It was a couple of days ago.

Mayor O'Hare said, Okay, I can check my email, but I did not see it. So anyway, so Mr. Molgard was, the father stated, basically what I had stated that we are, we are not liable for any damage to somebody's house, because of a town tree, because of an act of God, or whether now if we were invited or not violation, but if we were in when you want to call it, if we knew there was something wrong with the tree and it needed to be cut down and we did nothing, then we're liable for it. But since the trees are down and it's chopped up and gone, and who knows if it was rotted, or we don't we don't know. So he said that we are not we're not liable for the fixing of her power line. He didn't comment, just to be transparent. He did make a comment that you guys do have insurance. Right. And I go well, yeah, well, maybe you should contact your insurance company. I don't think we should. I don't think we should file an insurance claim on our insurance and have our premiums go up. I again, stand by what I think and he said that we're not liable for it. So that would be something the council would have to decide whether they want us to fork out just shy of \$1,000. Or stand by what he said.

Jim said I tried to rip the stumped out yesterday. But my tractor is not big enough. I am going to have to get something bigger, trying to get pulled out.

Mayor O'Hare said, because as soon as we and again, go and pay for them, then the next person is going to come and say, oh, you know, will this fell on my house or this fell over on my car or whatever. And then you know, we're just opening ourselves up to where they think we should go by what the law states and the law states that we are not liable.

Jim said, in town where they took care of it.

Mayor O'Hare said, Well, that's the proper way of doing it. Yeah, you know, because we have a process of doing three bids. If we can't get three bids, and we do our due diligence. So that's that. And I did talk to Maria, she did call me in wanting to know and I told her exactly what I just told you. I said I haven't heard back from him yet. But I'm going to tell you Maria, the way that I look at it. And the way that he thinks that this is the way it is is that we're not liable because it's not. It's not any of our doing, you know, it was a storm that came through the wind and was blowing pretty hard and it knocked the tree over. And then on the landfill or the transfer station. So the county is Correct. Not the state. The county came in, as everybody knows, and shut down the transfer station. We have no dump because they said we don't have a permit to run it. And the last time we had a permit was when Mike Morgan was Mayor in 2006. So we're talking 2003 Oh, that's even worse. Yes. So some are older, they're 20 years old. Yeah. 20 years and now all of a sudden, they've come to us and shut us down after 20 years of not having a permit. Who knows why?

Jim said, but we've been inspected since then.

Mayor O'Hare said, I've talked to the previous Mayor, and he said we had two inspections during his term. Nobody ever said anything about it. So I asked him if he could check into the proper things. So this is a thing we own that property the town does, it's within a half mile of our town limits, we can just annex ourselves annex that into the town limits. And then I don't think we have to deal with the county.

Jim said, Good.

Mayor O'Hare said, I think we can if that's annexed and it's now part of town, corporate court incorporated town, that we deal with that ourselves now we do have to have, I believe, EPA and stuff like that. We have to follow that. But I don't think the county can then tell us what we can and can't do with the landfill. Again, that's my thought. I don't know. He's gonna get back to me once he gets back into town.

Jim said hazardous waste has ever been out there.

Mayor O'Hare said, there's nothing out there except for a garbage dump that Rupps brings us and they take away enough garbage. So it's no different than any citizen in the town. Bring Rupp's into their house drop it in a container and fill it up then, they come and take it away. That's all we've been doing.

Heather asked What are the procedures for getting that permit?

Mayor O'Hare said, Well, it's,

Jim said I've got it on my phone.

Mayor O'Hare said He's got it. And when I read it, it was a quarterly fee that we had to pay quarterly.

Jim said, once a year of your plan for the next year. Yep. All kinds of crap.

Mayor O'Hare said, It's a lot of red tape you gotta go through to maintain it. So. But again, my way of just my thought was we just incorporate that. And while we're at it, why don't we incorporate the Cemetery, we also own that property, but it's not in the town limits. It's right on the corner. So let's incorporate that as well, as well as over here by the Webeckes, the property we have over there. Let's incorporate that and incorporate that into the town. That's my thought. Of course, it comes up to the town council, whether you guys want to do that or not. But that would be my thought. If we're going to incorporate we own land just on the outskirts of town. Let's go ahead and incorporate it. Is it going to benefit the town? I don't think so. Except for property taxes that we pay on it, we will get some of that back. So why not get some of that money back from the county when we pay our property taxes on those lands? So that's something we can talk about next month when the other two are here. If you guys are okay with that.

Mayor O'Hare said, that winterizing the Park and Cemetery, was done today. They came out. They did winterize the Cemetery and they winterize the Park. The Park was about \$165 I think the Cemetery. Yeah, that's what he told me when I talked to him on the phone. They're gonna give it to me. I hope that's okay. I told him to put it as one bill. Just the Park and Cemetery winterized. Park and Cemetery because we only have one budget for the two right? Or do we have them separated? Okay. I can call him back. I've got his number. Separated. Tammie said, It's okay. It's on the same bill, it's hard.

Mayor O'Hare said, yeah, he will. He'll put up winterize. Okay. So they did that. So, again, if we want to have them do it yearly, I don't think it would be a bad thing.

Jim asked if they could do a thorough job. And he agreed with what? Me and wasn't you? The bishop wouldn't try to find two valve boxes. And we couldn't find him today. Agree. There are two missing somewhere.

Mayor O'Hare asked, "What did you do today.?"

Jim said We didn't find them.

Mayor O'Hare said, Okay.

Jim said, But he agreed two boxes were missing somewhere.

Mayor O'Hare said, Did Keith come out? Keith Thompson came out.

Jim said, Yeah.

Mayor O'Hare said, okay. Because I called him.

Jim said that he didn't know where they were.

Mayor O'Hare said, okay, because he's the one that showed me last year when we started doing it all.

Jim said, So there was a rumor that there was some stuff covered up when they poured the concrete slab, the slab for the hills and stuff. They caught some sprinklers and then they corrected it. I think they're underneath. concrete slabs.

Dave said that a good place for it.

Mayor O'Hare said Well, that's good to know.

Jim said until we start having problems with sprinklers and then we'll have to find it.

Mayor O'Hare Oh, there he is. Awesome. Okay. The next one is fixing the park fence. Tammie, I have looked through all of my stuff and I cannot for the life of me find this guy's phone number that came in and installed that fence.

Jim said I can give you that.

Mayor O'Hare said, Oh, you had it? Well, he sent me a bid to do mine. I think If you do, can you send me his number, and Tammie if you could find it, could you send me his number so I can get a hold of him to get out here to fix that fence? And while we're on that, let me go ahead. So I went over to talk to Jackie at Mollie's, and she did not get back to me. So I'm going to go there tomorrow and talk to her about putting a rail up where that fence line is, so we don't get the damage of the fence anymore, at least because that was backed into by a trailer, a truck, or something. But that's what happened. So if we can put K Rail up there, I think we can buy K Rail for like, I think Jim saw some. And I saw some for less than \$1,000. And we can put K Rail down that side of that fence line. As long as she agrees. Now we had the other owner agree to it. And then we didn't get it done before he sold it. So now we have to go through Jackie, on that. So I'm going to talk. I'm gonna go by and talk to her tomorrow. We talked about the

annexation of the town properties. Eric sent you here, maybe I'll ask you, I don't know if you know. So they closed the county, came in, and shut down our landfill. Eric said he did.

Mayor O'Hare said, or our transfer station as they call it. Apparently, we haven't had a permit since 2003. That is 20 years. And now they've come and decided, yeah, and it's been inspected in between this time.

Eric said, sure, yeah.

Mayor O'Hare said, and so now all of a sudden, they came out to inspect it, and they shut it down, because there's no permit. So I've talked to our lawyer about just annexing that property into the town limits because we own the property. And then just running it ourselves. Eric said, Sure.

Mayor asked, Do you know anything about what would happen? If that would be something we could do,

Eric asked, is it bound? Or is it next to our property?

Mayor O'Hare said next to it. But as long as it's within half a mile? Is that what? That's what the new code says. Yeah, half a mile.

Eric said, Yeah.

Mayor O'Hare said, Well, the code says half a mile, you have to come to us first. And give us first refusal before you go to the county to build. But since we're not going to, I mean, if we're going to, we're not going to build but I'm just wondering, I've checked with Jed to see if we can still annex it. So annex Oh, three parcels that we own?

Tammie asked if it would just follow the road.

Mayor O'Hare said, Yeah, that's just on the outside of the road. No, no, not the farming area there, it would just go down the side of the road, it would just be the road that goes down. It just captures that and it would capture that area there. Well, I guess that's how they would do it. The Lieutenant Governor is the one who actually does the boundaries. He's the one that actually makes the map for it. So you can strip a strip annexation, or would it be Yeah, just annex it into the town? Sorry, wouldn't it be an island? I don't think so. Okay. I mean, we could do one of two things. Jim and I had been talking about this. Either that or just use that as a green waste. We don't need a permit for green waste, because all we do is dump green and burn. Right? Just use it as a fire pit for the fire department. And then take the dumpster and we can bring it over here to where the Webeck's property is where we got this property over here. That's right along our property line and turn that 10 acres and a corner and do a transfer station there with just one barrel and one container like we got now. Yeah. So I mean, it was thrown

around putting it out here next to the buildings. But then do you really want to have a dumpster in the middle of town? And then you're gonna have rodents come in and all that, but if we put it out there, at least it's out of the way I know why we're at it annexing the Cemetery. Yes. Because it sits right on the corner of the border. Okay. Any questions on that? Jim? Heather.

Mayor O'Hare okay, Sergeant Eddington. Welcome, sir. Good to see you.

Sergeant Eddington said, Thank you. Mayor O'Hare asked, How have you been?

Sergeant Eddington said, Good.

Mayor O'Hare said Good. I bet you are busy.

Sergeant Eddington said it has been a couple of months since I've been here. I'll try to be here as often as I can. But sometimes life gets in the way.

Mayor O'Hare said Right.

Sergeant Eddington asked if everybody had the stats for the month of September. When I'm not here. I tried to send them to the Mayor as soon as possible after the meeting. There's been a couple of things that have come up. One of the things is I talked to somebody who was complaining of semis cutting through the town property here and ignoring the stop sign here. I looked into it. There's no state law that prohibits that. You would have to put some type of barrier up to stop that.

Mayor O'Hare asked them to come through this parking lot here.

Sergeant Eddington said, you get the cattle haulers that one doesn't want to stop right? Mayor O'Hare said, Is it through this parking lot? Well, we're hoping to buy. Sergeant Eddington said, you'd have to, so you would just, you'd have to do something because now there are people that are concerned about it. I don't care one way or the other, but I thought I'd bring it up that it is a concern of the town, it is, if you guys have an ordinance, we could enforce it, the best way to do it is you just have to put barriers up and stop them from, like, I came here one day, and I thought a semi, was going to take out a car over here. So because they don't even stop, they've run right through which I get it. The Semi doesn't like to stop, because this takes that much more to get going.

Mayor O'Hare said just so you know, we have this bridge down here that's not rated for the semi trucks, it's a 25-ton bridge, and it's getting ready to get condemned. So it's very possible within the next nine months that this road is going to be shut down. So there will be nobody going down this road except these people that go to the post offices, and it's gonna be shut down there, or at the bridge, and then on the other side. And then we're dealing with the state trying to build a new bridge, but they want so much money and we don't have the

budget and this and that. So the next thing is to shut this road down completely to semis.

Sergeant Eddington said, Okay, I'm not on the freeway.

Mayor O'Hare said they have to go to the freeway and go down the road. I mean, it's I mean, come on. It's so this would be shut down to any semi trucks anything over 10 feet, because we still have to discuss it. But that's sure to end up in the conversation.

Sergeant Eddington said, So I just want to let you guys know that I kind of research that and that's Yeah, so the other thing is about people dumping them. I don't know who picked up the trash on Curlew Drive. I appreciate it. We were still in the middle of trying to figure out who it was. We found out who it was last Saturday. Yeah, we put them on notice. It's probably not who people think it is. But we know who it is. We know where the trash came from.

Mayor O'Hare said, It was owned by Webecke's, they went just outside the town limits. And they dumped all their trash, just a bunch of trash.

Sergeant Eddington asked if anyone knew who picked it up. Does anybody know?

Mayor O'Hare said I don't know. I got notified by LuAnn. And then I sent you those photos.

Sergeant Eddington said I found out I sent the person up there. And there was no trash, there was a little bit of trash, they went up there really quick because I said if you don't pick it up, we're going to have another issue. So sure it was picked up. I don't know who probably went back home and picked it up. I appreciate that. But just so you know, it's a state with lots of Class C misdemeanors. If it happens in town, if it happens in the county, the people that dumped it there. I told them next time I find out that you dumped it there if I see you do it or somebody take I'm just gonna take you to jail. Right? I hate taking people to jail for Class C misdemeanor just because it's this. But there's nothing more frustrating than people dumping their garbage on the side of the road just because the transfer station gets shut down, everybody can have as many dumpsters as they want in town. Right? So if you produce that much garbage, you put it in the dumpster. Yeah. So let us know what people are dumping around town because your landfill gets shut down. Let us know.

Mayor O'Hare said, Yep, we will. Thank you for that.

Sergeant Eddington said, If you see somebody dumping, take a picture, take a video because we can do a lot with that information.

Mayor O'Hare said, Okay.

Sergeant Eddington said, So I know that's been a concern. But I don't have anything else. Does anybody have any questions for me?

About anything?

Mayor O'Hare said, No, no, not that I want to bring up here. We can talk later.

Sergeant Eddington said Absolutely.

Mayor O'Hare said yeah.

Sergeant Eddington said so anyway, I appreciate thank you so much. We really appreciate your number. If you need anything

We try to come through here twice a day to and from home so get a hold of me if you need anything.

Mayor O'Hare said, If you need anything from us, please, by all means, let us know.

Sergeant Eddington said, Absolutely.

Mayor O'Hare said, Thank you, Sergeant.

Jim said I'm sorry I can't find the number for that fence guy.

Mayor O'Hare said, The Fence guy. That's okay. Stacey will have it. She'll be back on Monday.

Mayor O'Hare said Yeah. Eric,

Eric said how are you, Sir? How are you today? Good. Good.

Eric said, So a couple of things here. LSF EA. Was the refreshing plan updating them? Well, number one.

Tammie said, yeah, he told me.

Mayor O'Hare asked Who was it? I was gonna say that back from the dead.

Tammie said that is AJ's real name. Right. AJ? Yes. Yeah.

Mayor O'Hare said Do you think AJ stands for?

Eric said, I don't know.

Mayor O'Hare said you know, part of it.

Eric said, AGP. JJ. Anyway, this required an update. I thought that I didn't renew this. Well, I couldn't find the one I did in the past.

Tammie said he thought so too, because he got a letter.

Eric said, Yeah,

Tammie said that AJ thought there was one that was done.

Eric said, Yeah. So there was one done. Did I just, I don't know, 8 or 9 years ago? I couldn't find it just quickly before it came out. So the day simply a template to spell out goes pretty fast, maybe an hour, an hour and a half. So if I can't find the one I've done in the past, I'll either do a GRAMMA request or just simply fill it

out because nothing's changed, nothing's changed. So, I'll take care of this for AJ. Okay. And then on the PBR are the evaluation court, the Well, number two to get that thing cleaned up so to speak. There are some concerns that they sent back from USDA. Yeah identified maybe Tammie helped me out with this too is it the Snowville median household income in 2021 was \$64,000? And the per capita was 17. So huge swings there were kind of red flags to me. And then that first half that person's per household is 4.3, which I thought was about twice as high as it should be. So the numbers are a little weird here. But the problem with that is it messes up your opportunity for grants and loans.

Tammie said Yeah.

Eric said, So it kind of puts you out of that ballgame. So we need to make a phone call and get that amended. So it's correct

Eric said, So it's 2021. Yeah. Census.

Tammie said the census.

Mayor O'Hare said, Yeah, the census that we each town member or each town council we went out to?

Tammie said That was something to brag about for the CDBG funding.

Eric said, yeah, we wanted to realign. I think these numbers are from the state.

Mayor O'Hare said, Yeah. Because those ones we sent out were not that. No. It was far, far from that.

Eric said, Yeah. And that's kind of my thought to that. That's way higher than it used to be.

Mayor O'Hare said So you got to look at how many people we have in the town. Right. And the number of dwellings we have in the town. That doesn't close.

Eric said Yeah, that goes way beyond the year in the first 4.3.

Mayor O'Hare said, Yes, that's what I'm talking about. If you do that, with what the dwellings we have in this town, there's way over way over 178 people.

Eric said, So if you don't mind, I'll jump in and dig around the business there to find that asset. Otherwise, you're out of a bunch of money and stuff like that. Let's see another thing they sent back on this, they said, and this is a response to questions they have. And I paused. I said I've met with Alan out there, the true old Alan Terry. And with the discharge in the pipe off at well, number two, his posts have a screen on it. I remember when he turned that thing on that pond. So it was like that, and no one wanted to volunteer or dive into the political pipe. So it should be dry. It has a screen at the entrance. I'll go verify that control valve.

Yes. Safak dab? Yes, it does. Yes. examination. So I just put my hand over that. And the number two question I will have to talk to AJ about is the east side.

There inch line on the east side over here. The heads up to the property we're talking about last time and says Does this have a flushing device? I know they have a high-yard hydrant. But a flushing device is unknown. And Alan I can't he told me I think he said just a yard hydrant, the flushing device if you don't.

Tammie said, there's not I didn't think.

Mayor O'Hare asked the guy putting it in.

Eric said, Well, no. The old one on it now uses a three-quarter-inch yard. That's what I don't think there is.

Eric said, just to meet this, these couple questions on your show how it started and they were okay with the amendment. They are here with that. We're going to send you kind of an updated response back to us and cc if you want to check that out, too. So that is all I have any questions for me? Oh, the traffic, the curb, and the gutter there.

Mayor O'Hare said, Yep.

Eric said, I again contacted Boyd to see kind of where he was today. He hasn't responded. Yeah, so I want to kind of follow up so he has plans in his hand. I just ended up with what's gonna cost us.

Mayor O'Hare said, right. So and I think that we talked about this discussed, I think it came to the town council. I don't think we didn't vote on it. I don't think we discussed and I think they're leaning more toward not putting a curb and gutter on Molly's side.

Eric said, Okay.

Mayor O'Hare said, So my next question would be, we got to do something with these cars. I'm sorry. But we've got to do something with the cars in front of Mollie's. I don't want to be the bad guy and say listen, that's our property. We're taking it, you know, but do we have enough money in that budget when it comes back to paint their front parking lot at an angle? So the cars will have visuals so they can start parking at an angle. So people don't have to go past the stop sign to look down that road to see if there's anybody coming?

Eric said, Yeah,

Mayor O'Hare said because that's the problem we have is that people especially the big pickup trucks and stuff and farm trucks and all that they parked in front, you can't see when you get up here to the stop sign you got to you got to edge your way out creep your way out. You know, and that's that somebody's gonna get hit. We're gonna have another big accident and I asked him when we talked to him when we went out there just let's slant your parking.

Eric said, Yeah.

Mayor O'Hare said, You don't have as many. But that's you got plenty of parking around everywhere else.

Eric said, Yeah

Mayor O'Hare said, you know, and if we could paint, you know if we could paint a visual white line where the curb and gutter would go.

Eric said, Yeah

Mayor O'Hare said, you know, I'm saying that we could paint it. And then paint the parking spaces. Yeah. Then we don't have to have the curb and gutter, they can still have their parking in front. So we don't, you know, kind of like, help out with everybody. And I don't know if we have enough money. If you can find out how much that would cost?

Eric said maybe my 500 bucks. Yeah, definitely.

Mayor O'Hare said We should find that somewhere. So that would be something that way we you know, everybody's happy. That's what I'm thinking. You know, she was. She wasn't happy. Yeah, the last discussion we had with her. Do you remember he had? And like I said, I don't blame her. I understand. I understand it. Businesses bid I get it. But when it comes to the safety of the people that are coming to this town, and we know as a town, that's a problem. And if somebody gets killed or hurt, guess who's liable? We are because we've already said there's a problem. And we've done nothing to fix it. So we've got to do, I mean, we've already got the light end, we got the stop signs in. We'd love it to be a four-way stop, but we can't without the curb and gutter.

Eric said, So I'll find out.

Mayor O'Hare said Okay, that would be fabulous. Does anybody have any questions for Eric?

Mayor O'Hare said, No. No ok next is the Snowville Fire Department who do want to excuse Jed Pugsley he's not gonna be here. He did call me right before. Basically, everything he talked to me about is here, open burn ends October 31 of this month, and people are still allowed to open burn with a permit. They have to have a permit. So if anybody says that they need to open a fire or something like that, let him know. Just call Jed, and he gives them a permit. I don't even think we charge for permits, do we? There's not even a charge.

Jim asked if you could get a permit after that day.

Mayor O'Hare said, as of right now, there will be no open burn after October 31.

Jim asked how he is going to trench during the winter when it snows on the ground.

Mayor O'Hare said, So's that's the next thing burning weeds out of ditches and culverts. So the fire department is going to start doing PM maintenance on the ditches and culverts. So they're gonna start going through and clean up the ditches, the culverts, and start burning. The pit is out there. Yeah. I've talked to him about that. And he's gonna get the crew together and get out there and get that burned.

Jim said Because I just pushed a lot of stuff in there yesterday.

Mayor O'Hare said Yeah. they just gotta get there and burn it. And then the trash on Curlew Drive. We already discussed that that's been addressed. I would either, either that or the gentleman that found it to begin with. That was in there. He actually was digging through it to see if he could figure out, who did it. But the culvert on first is at first and main street, across from the Vit's that culvert, That's there has got submitted things thrown in there and it's crushed the culvert down. So it needs to be fixed. So he just wanted to know, is it a town issue? Or is it the culvert? The water? People that take care of the culverts and stuff? Is it their problem? Either way, it's plugged up and they want it until it's the canal. That's what I was thinking, but again.

Dave said I think it would be their delivery.

Mayor O'Hare said, Yeah, so that's the thing that will have Jed contact them and get that because he wants to get all this stuff cleaned and everything before the winter gets here. The snow starts coming to make sure everything's opened up for when it starts to melt. So we don't have what we did this last year where we had backups.

Mayor O'Hare asked EMS, President Smith, how are you?

Dave said, Good. We have the EMT conference that we typically send our EMTs to coming up in November. It's the 9th, 10th and 11th.

Mayor O'Hare asked where it at.

Dave said that it was in Provo,

Mayor O'Hare asked if it was in Provo every year.

Dave said Yeah, it has been there for quite a few years now. So, which gives CME hours for all of our EMTs you have to have so many to recertify. So really, as long as you make it to one of those conferences and attend a few other things, you'll have enough CME hours to recertify so it makes it an easy way to keep them certified. But we need to get that going.

Mayor O'Hare said, So you need hotel rooms.

Dave said, Yeah.

Mayor O'Hare asked how many people you got going?

Dave said that he would send out a text.

Mayor O'Hare said, Okay

Dave said here tonight, and then I can give it a number to Tammie. And that's the next thing about 10. People, I would bet some of us shared rooms.

Mayor O'Hare asked Do you know how much we spent on it last year?

Tammie said, I don't.

Dave said the registration itself for the three days is like 370, I think, per person.

Mayor O'Hare asked do we needed to have a number. Do we have to have to have a dollar amount to vote on it? Or can we just vote on it to send them?

Because it comes out of their budget? Right.

Tammie said That's come out of their budget. So yes. It's gonna be similar to last year. Yeah. And they do get a grant that pays back?

Dave said we typically get a grant.

Tammie said, Yeah.

Dave said One of the grants to help cover that.

Mayor O'Hare said, So yep, I remember all this.

Tammie said, you probably just want to make a motion motion for that and get it all going.

Mayor O'Hare asked What else do you have?

Dave said The only other thing I have is just the FirstNet. You know, we were talking about getting a tablet in the ambulance. And rather than updating the services there, we were looking into this new service. I had been kind of lacking, but I did get with them. There's. I don't have a quote or actual proposal from them. They've got my emails and are supposed to get it to me.

Mayor O'Hare asked Dave so when they send you the proposal, could you forward that to all of us on the town council?

Dave said, Yeah.

Mayor O'Hare said, and then that way we can look at it. And then when you send that we know exactly what it is for.

Dave said I don't know what we're paying for it with Verizon.

Mayor O'Hare said, So this FirstNet refresh my memory, doesn't it? Is it run off of cellular or is it run off a satellite?

Dave said No, it's cellular. It's still cellular G power.

Mayor O'Hare said, Okay,

DAve said it is to give first responders emergency personnel that are supposed to get the priority.

Mayor O'Hare said If there was something going on where a mass casualty or disaster? We're not working?

Dave said, You're supposed to be on the list to get first priority.

Mayor O'Hare Okay, What you don't have with Verizon?

Dave said, No.

Mayor O'Hare said So that's a plus.

Dave said I don't think we do.

Tammie said I mean, I don't think so either.

Mayor O'Hare said, " If Verizon is just a regular cellular, it's just, you know, and then when you get to a certain point, you get throttled.

Dave said, Yeah, and I don't know. I mean, that's not a big issue. I mean, we've never really had an issue with Verizon, but it's while we make the change, we might as well look into it.

Mayor O'Hare said yeah.

Dave said, Because if this is about the same money or do you know, it makes sense, maybe it's the right way to go.

Mayor O'Hare said, Okay.

Dave said, So that's all that I have.

Mayor O'Hare said, so the EMT conference on November 9,10th, and 11th, it'll be so we need hotel rooms for three nights. The eighth, ninth, 10th.

Dave said it would just be two nights, just Yeah.

Mayor O'Hare said, so they drive up on the 9th to the conference, the 9th and the 10th, and then drive home after the conference on the 11th

DAve said, Yeah, and we never reimburse for food at all everybody just does their own thing to cover their food. So it's just it's just the registration and the hotel. Everyone else gets themselves there and so pays for their food.

Mayor O'Hare said, Okay, so to recap it has been 10 to 13 possible that we'll be going to the EMS. It'll be two nights some will be bunking some won't and then their registration fee so I just need a motion to accept that.

Heather made a motion to accept and Jim second All in favor passed.

Mayor O'Hare asked one question. How's the ambulance doing good? It rides nice as a patient. I can tell you that much.

Dave said, working well for us. There is tomorrow a ribbon cutting at the hospital for the new ER you know the call

Mayor O'Hare said Yeah.

Dave said, and actually, they wanted the ambulances that service there to be there for the ribbon cutting and photo op. So I think we've got it set up and our ambulance will drive in there.

Mayor O'Hare said, well, you still got the old one here right that's still usable.

Dave said, yeah, kinda sorta but I mean if something happens we'll still be in service.

Mayor O'Hare said, right right. We'll leave here but you have this one here that somebody can jump on this one to get to.

Dave said, Yeah, we will still have EMTs here and can respond if something happens but yeah, they were trying to put together I guess more of a photo.

Mayor O'Hare said Yeah, it looks good. I actually got to visit it. And it's not my scene at all, not by choice, but I did get to see the new ER, and it's pretty cool.

It's pretty nice

DAve said they finished it up.

Mayor O'Hare said, So it's pretty nice.

Mayor O'Hare asked if Snowville Clerk, and Treasurer, I'll just do both at the same time.

Tammie said, I just have one thing, but it's time again to apply for the CDBG funding. So there's a meeting I'm going to be attending, so we can qualify for that on the 19th of October.

Mayor O'Hare said, and that's in Salt Lake City?

Tammie said, No, there's actually one in Logan and one in Brigham. Just depends if they're both on the same day once it's three and once it's six. So I'm not 100% sure which one I'm gonna go to.

Mayor O'Hare asked Did you need a hotel room for that as well?

Tammie said, no you're just gonna go up, come back.

Mayor O'Hare asked Did you need anybody from the council with you? Or just are you good?

Tammie said, If you wanted to.

Mayor O'Hare said, I mean, normally you just go on your own and do this. Right.

Tammie said, Yeah.

Maryo O'Hare okay. So, this will be for the funding that we can apply for again for this road.

Tammie said, Yeah.

Mayor O'Hare said Okay. I still haven't got the Mayor's Association meeting for this month sent to me. So I still don't know when it is and I leave Friday to go

back out on the road. So hopefully, they'll have it when I get back. I didn't get anything from Marla or whatever. Marla. Okay, anything else for us?

Tammie said, No. I have a couple of things. AJ wanted me to say when it comes to maybe I don't see him on that.

Mayor O'Hare Yeah, I don't know why he's not on here maybe was when? McGarry. So maybe the next person?

Mayor O'Hare said, Yeah. Which is it now?

Tammie said, Okay. Oh, just I guess we kind of talked about it. He wanted to know about the Source Protection Plan. But it sounds like Eric's on top of that. So that's good. It needs to be done ASAP. Apparently, it's so, and then he also did talk to the guy who told you guys about the cross-connection person. And yeah, Nate said he was willing to do that for the town.

Mayor O'Hare said, Good.

Tammie said, So I just wanted you guys to know that.

Mayor O'Hare said so I think we already agreed on that last month. Is that correct? Jim, do you remember that? The guy that's gonna come and take care of the cross-connection.

Tammie said, decide on what you were gonna pay him. And that is not on the agenda here. So well, we can't.

Mayor O'Hare said, Yeah, we can't, we have to do it next month. Can we get it? Can you ask AJ if he can find out? The ballpark? Yeah. What do those type of jobs pay?

Tammie said, and I'll tell him and Stacey never put that on the agenda. The agenda for next month?

Mayor O'Hare Yeah, perfect. Thank you, Tammie.

Mayor O'Hare said Councilmember McGarry has been excused he will not be here. He did not send me anything that he needed us to talk about. So we will bypass him.

We'll go to Councilmember Beagley. There's nothing here. But you didn't have anything on the agenda. But no, but you've got stuff you want to speak about.

Jim said, yes the exercise that we had with the Elementary School today.

Mayor O'Hare said oh, yes. You want to tell everybody what has happened since you were here.

Jim said they had a practice exercise in case there was a disaster or something with Elementary School, and they all marched down there to play some games until the parents came and picked him up. Now, they would like to have some

more in the future than when they want to do it in more depth and stuff like that. And maybe have some kid play act being hurt. Maybe they had EMTs.

Mayor O'Hare said Trudy was here for that today.

Dave said Yeah. I mean, they've talked about doing something where you'd have to do a little bit more making a plan. What would you do? If there were some that were hurt? Yes, you have those that are hurt, those that are hurt.

Mayor O'Hare said I think that'd be a great idea.

Jim said, The one thing they didn't want to do is have a shooting one. I agree with that.

Mayor O'Hare asked Why would they want to have that? One?

Jim said don't want to scare the kids, they did the earthquake or they'll do something.

Mayor O'Hare said Well, let them that's their kid. So let them decide on what kind of training they should have.

Dave said, But well, you know, and honestly, it's like we were talking about, there's a lot of similarities. I mean, if you were practicing, or you know, going through, okay, you know, an earthquake, or you know, something happened at the school and so you have some kids hurt with some kids not hurt. You know, there's a lot of similarities. Sure, they'll be the same type of thing and doing your triage and you know how you would Try to protect those that are hurt and, you know, do something.

Mayor O'Hare said, but hopefully, a plan is in place in case somebody does come into the school.

Jim said Well, I'm sure they do.

Sergeant Eddington said, they do, but it shouldn't be talked about in public.

Jim said right.

Sergeant Eddington said Because there's no doubt what they're doing. But the thing was, in the reunification Val, there was an active shooter at the school or if there was something that happened, yeah, this would have been from the school. And so I've been part of completing those plans. And if people know details of the plans.

Jim said they were going to get a hold of me in the future, about more

Mayor O'Hare said, good. Well, we thank you for taking the time to come down here and Trudy is not here. Trudy is one of our town emergency managers. So she was here for that.

Tammie said, the ward I guess they're kind of in the process of putting together community emergency preparedness. So Jed is on the committee and I'm helping with that.

Mayor O'Hare said I think just working with them as far as implementing that is working together with the ward with the town.

Tammie said, Yeah. So that'll be really good once they get a master plan for the whole community in case there's a big disaster. Resources and stuff.

Mayor O'Hare said, very good. Anything else, Jim? Okay, thank you.

Mayor O'Hare said Councilmember Johnson has been excused, she did come down with the flu. So she did email me or text me and said, The only thing that's asked her is if there's anything she wants to discuss on the roads or bridges while we're here. And she says just that all the stop and speed signs are back up, and all the road repairs are done. So the road repairs have been done and all the speed signs and stop signs that had been either vandalized, torn down, stolen or whatever are our backup in its place. The one thing I did have that I wanted to add to hers when she was here, but we could just my two cents. That's it. My two cents is the road here. We all know we have the bridge that's going to be condemned here shortly if we don't get it fixed. We all know that the State wants us to spend \$3.7 million, or \$ 240,000 of our money, which is almost a year and a half of our annual budget, if not two years. But they won't put you know, the culverts like they want to do up here on Stone Road, which would cause this one up here would cost roughly and this is just a guesstimate, around \$200,000, maybe \$250,000 After talking to the County road guy to fix that culvert up there were washed out in this year. So that's two six to eight-foot-wide cement culverts side by side which would give you eight which would give you 16 feet to the water can go under remember backup, it will never back up never. So my question and if I have to I can go talk to whoever's above the state, you know, I can go to the Capitol or whatever talk to whoever needs to be talked to. Why can't we do that down here? Is this? And that's county well, that's county that's County, right? But this is a State road and this isn't. But this isn't any different than that. There are not pedestrians that go into that. That's all water. It's just like the same thing. It's a canal that drives the drain off. That's all that is. So I don't understand why the State unless somebody can explain it to me, wants to spend \$3.7 million on that when they can remember what we can do for cheaper, you know, I'm saying?

Tammie So the money you're tagged in everything.

Eric said they do a lot of things such as hydraulics and pasture flow capacity. That thing. They have a dog engineer for the new bridge. So past massive storms, which it has in the past. Yeah, it had water for the moment, it was dangerous, that bridge alone or water. And that's the challenge. I suggested the ICANN arch ban is just hard to get through and pass either. They want to make sure to float that point.

Mayor O'Hare said So it's just so then it's just volume. That's what that's, what do we have that much volume that goes there that on occasion you just like wait, well up here we all got backed up. So we only have a 30-inch pipe that goes across the under the road. Well, that makes a little bit more sense. It's just, you know, but see, they didn't explain it to us that way. They just said this is how it is. This is the way it's going to be sure. And so we're here that then everybody just says we'll find that condemned it. Shut it down. We don't care, we'll put your stop signs up there on both sides. You know, people could still get into town down Cemetery Road, people could still get up here, you know, they come back this way. So that's okay,

Tammie said, the CDBG funds that have over \$100,000 are going to be given out so we can apply for, like, 300,000.

Mayor O'Hare said, If we can apply, we're gonna play for 400,000. We could do that. Was that up here?

Tammie said Now, it used to be, but I think since they have more money, it might raise that. That's what they'll tell me.

Eric said, Oh, really awesome.

Mayor O'Hare said, So I'll find out if we can get a CBD for that one. And then I could ask my association for this one over here for money for that because I'm starting the application process for that right now. I gotta get with LuAnn. I've got the application.

Eric said That it seems the house picked that one again, and they have already given money for it. It didn't fix it.

Mayor O'Hare said I don't know.

Eric said Because we have pictures right. And the road washed out?

Mayor O'Hare said Oh, yeah. We've got plenty of pictures. And we had I mean, yeah, it's still not 100% back. It's still starting to crumble a little bit on the west side.

Eric said it happened again to be worse this year.

Tammie said I can't remember.

Eric said But I would give you a call today and have again, this is an undersized

Mayor O'Hare said Maybe it's because it's a County when I talked to them, they told me those eight-foot wide cement culverts, you know, they're like around \$60,000 per. So if we got two of them back over here, on Stone roads, or even one. And of course, the County said they'll come in and install it and do the road everything at cost. So I mean, we've got them to back us so that, Eric said, yeah, get rid of their culvert.

Mayor O'Hare said Yeah because he thinks that things get ready and nothing's going to collapse. They said probably within the next 10 years, seven to 10 years. They said it's gonna be so obvious.

Tammie said, Yeah. That's crazy. I just did that. Whatever the years go.

Eric said unchallenged, should we extend the bulk incident? Right, we had an attempt on both sides of that. Well, that reduces the flow because of increasing friction, so it is kind of a double-edged sword.

Mayor O'Hare said Yeah, well, the only problem with this one is it got clogged. You know, it's only 30 inches wide. You know, the diameter is 30 inches and it got clogged. That's what caused the backup. And then 14 What is 14 to 16 feet of water over there? Over on Morgan's property, Because if you figure if you got pictures of it where the water was. So if you look at that picture, and then you look at a picture next to it with no water, it's 16 feet deep, almost a lot of water.

Mayor O'Hare asked okay, Councilmember O'Hare, do you have anything for the council? Heather said, No.

Mayor O'Hare said Okay, public comments. Did you come for public comments? I just let you know, that you just came to be here. Yeah, it's gonna be great. We're glad to have you here. We really are. Thank you for coming. We like it. When the citizens come. I was trying to get everybody out here. So Terry can't come. So they said, somebody. There. Were there any questions you had? Or just do it? We answered them all. For? He actually answered them through the meetings? Great. Great. Well, I'm glad you came out. So the town council got the email, we started putting the expenses in your email now so we can read them. Before we get here? Did anybody see anything? Do we have any additions, Tammie?

Tammie said The only one is still in town for the water?

Mayor O'Hare said to pay ourselves.

Mayor O'Hare asked Jim or Heather. Do you have any questions or concerns about this?

Jim said I think it's a good idea that you come up with, again, the time to go actually go over it.

Mayor O'Hare said It was actually Heather's idea. She said we got it because we usually just get this in a meeting and we're trying to look at it and try to do a meeting at the same time. So yeah, that's what I said that way you get your questions ready to answer or whatever. So Tammie and Stacey will be doing that, from now on. We'll be getting those. Okay, well, we don't have anything to add to it. Well, except for the addition of paying Snowville Town, their water bill. Do I have an accepted motion to accept the expenses and pay the bills?

We got a motion from Heather, do I have a second? Jim Second? All in favor? Okay, thank you. Okay, past just turn to page one more time. Okay. I need a motion to adjourn.

I have a motion from Heather. second. From Jim and all favor.

All in favor? Aye.

Okay pass and we are adjourned thank you everybody for coming

1 Hour and 5 minutes
