8. Consider for Approval Garbage and Refuse Code Revision (discussion/action)

Roll Call Vote

Minutes:

Assistant City Manager Gallegos presented the revised Garbage and Refuse code. Councilmember Dunn inquired if the public will be notified of these changes. Gallegos stated all garbage users will be notified in writing. MOTION to approve the revised Garbage and Refuse Code with the change of "any lithium or lead acid battery" was made by Councilmember Dunn and seconded by Councilmember Henderson. Roll Call Vote: Chamberlain, Aye Henderson, Aye Rice, Aye Dunn, Aye Skinner, Absent The motion passed unanimously.

Vote results:

Ayes: 4 / Nays: 0

9. Planned Unit Development (discussion)

Minutes:

Gallegos presented the purpose for a planned unit development. Planning Commission Chairman Bennett explained the City has one in the current code however it is extremely out of date. She stated the changes that need to be made to bring it into Utah State compliance. This portion of the code has never been used so she asked the Council if they would like to remove it from the code or revise. The Council decided to keep it in the code and update it to accommodate new construction.

10. Requirements for Vacated Businesses on Center and Main (discussion/action)

Minutes:

Councilmember Henderson initiated this discussion with the Council. Chamberlain feels this is an issue that must be addressed to improve the appearance of the City. Henderson has researched this topic extensively and suggested registration and fees be assigned for abandoned/vacant buildings. She also presented standards each property owner should maintain to avoid those fees. This agenda item was discussed at length by the Council and City employees. City Manager Kulow was assigned the task of putting a rough draft proposal together for Council at the November work meeting.

11. Administrative Communications

Minutes:

Building Permit Report: Gallegos presented a building/conditional use/variance permit report dated back to Jan. 2023. Councilmember Rice requested public works be consulted before a citizen puts up a fence. Currently Monticello City code does not require a citizen to apply for a fence permit. Gallegos suggested an update to the fence code stating if the fence hinders public works employees from accessing utility easements they will be required to remove the necessary portion of the fence. Bennett explained that some of the older properties in Monticello were not recorded with the easements present. She also explained why the fence permit was dropped from City code. Bennett inquired if the city GIS system was up to date so the lines could be checked by administration if the permit for a fence was added back into the code. That is something that could be done.

EV Charging Station Update: Gallegos reported a guideline for EV charging stations has been requested of the City. Kulow has addressed this with the City Attorney and as it stands charging stations would have to follow the code for gas stations.

Utah League of Cities and Towns: The Dignity Movement: City Recorder Gill presented The Dignity Movement to the Council and asked them to review and encourage others to investigate it. Councilmember Rice inquired about a RV that is parked in the Overbite parking lot and occupied by a family. Kulow has been working with the owner and will begin enacting fees for this violation. Kulow needs two Council members to join a committee to review the City Attorney RFP's. Henderson and Dunn volunteered.

12. Consider Upcoming Agenda Items (action)

Recommendation: Motion to add _____ to the next agenda. Consensus

Minutes:

13. Adjournment (action)

ZONE CHANGE APPLICATION (General Information)

PURPOSE

All lands within the City are zoned for a specific type of land use (single family residential, multi-family, commercial, industrial, etc). Zoning occurs to provide for a relationship between various types of land uses which promotes the health, safety, welfare, order, economics, and aesthetics of the community. Zoning is one of the main tools used to implement the City's General Plan.

WHEN REQUIRED

A zone change request is required any time a property owner desires to make a significant change to the use of his/her land. The change may be from one zone density (say 1 acre lots) to smaller lots (10,000 square foot lots). Or, it may be to an entirely different type of use, such as a change from single family zoning to multiple family or commercial zoning. Since the zone applied to your land limits what you can do, a rezoning application is typically the first step toward a change.

REQUIRED CONSIDERATIONS TO APPROVE A ZONE CHANGE

When approving a zone change the following factors should be considered by the Planning Commission and City Council:

1. Whether the proposed amendment is consistent with the Goals, Objectives and Policies of the City's General Plan;
2. Whether the proposed amendment is harmonious with the overall character of existing development in the vicinity of the subject property;
3. The extent to which the proposed amendment may adversely affect adjacent property; and
4. The adequacy of facilities and services intended to serve the subject property, including, but not limited to roadways, parks and recreation facilities, police and fire protection, schools, storm water drainage systems, water supplies, and wastewater and refuse collection.

PROCESS

Contact the Planning Department for when the deadline for submission is. After it is deemed complete, staff will review the request, and prepare a report and recommendation for the Planning Commission. This will be reviewed at a public hearing where the applicant should attend, present the project, and respond to questions from the Planning Commission. Since it is a public hearing, members of the public may also have questions or comments. At the public hearing the Planning Commission will review the application and staff report and forward a recommendation to the City Council of approval, approval with modifications, or denial of the zone change application.

Upon receipt of the Planning Commission recommendation, the City Council will hold a public hearing to hear comments regarding the proposed zone change and to consider and act on the Commission's recommendation. The action of the City Council is final. If denied, a similar application generally cannot be heard for a year.

Monticello Disc Golf Course Proposal

What Is Disc Golf?

Disc Golf is a sport very similar to golf. Instead of hitting a ball with a club towards a hole in the ground you throw a frisbee into a basket above ground. Like golf you want the fewest throws and each "hole" is given a par. In disc golf you have different discs instead of different clubs that each perform differently. It is an easy sport to learn, low cost to get into, and a lot of fun. For more details visit: <https://discgolf.com/disc-golf-education-development/how-to-play-disc-golf/>

Why put in a Disc Golf Course?

- 1) **New free activity for residents** - Disc golf is growing across the country and becoming a common past-time. There 10,000 courses across the US, including courses in Moab, Blanding, Bluff, and Cortez. Most disc golf courses are done in partnership with the city on public land and are set up as free to play. Disc golf can be played on unmaintained grounds and doesn't require maintenance. Building a course would bring a great new activity to the town for our residents.
- 2) **Better utilization of Memorial Park area** - This area of town offers several features for our residents that may be under-utilized including walking paths, memorial area, and a series of mountain biking trails. Having another draw to this location could increase the area's use and draw in visitors to Monticello.
- 3) **Low Cost** - The cost to build a course is very low and can easily be done on unused portions of public land. Cost details below.

Costs to Install Disc Golf Course

Material costs for a 9-basket course are as follows:

	Qty	Cost per unit	Cost	Description	Comment
Baskets	9	\$300	\$2,700	Metal disc golf basket. Outdoor weather proof	Axiom Mach 2 basket (lowest outdoor cost option)
Pole Sleeve	9	\$5	\$45	Basket pole slides into the sleeve in the ground.	20 inch length stainless steel pole, 2 inch diameter
Cement	9	\$6	\$54	Used to stabilize the basket.	50 lbs per hole, two foot foundation hole per basket
Locks	9	\$10	\$90	Used to secure a basket to the cement foundation.	
Signs	9	\$5	\$45	Indicates the throwing start location and direction of the basket	Metal sign panel, paste on laminated tee picture.
Sign Pole	9	\$15	\$135	Pole for the sign to be attached to	U post, 8 ft, bury two feet
Total Cost			\$3,069		

Labor for installation would be volunteer at no cost. Some materials may be able to be acquired through donations. Any desired course maintenance is not required and would be on a volunteer basis. The disc golf course would be free to play.

Location Proposal

The location would be on the upper hillside of the trail area on the south side of town across highway 191 from the golf course. The course would start near the Mountain Bike/Hiking trail sign at the upper parking lot and weave its way through the hillside below the parking lot and above the main trail loop at the bottom of the hill. This is currently a low traffic area and is easily accessible from main street. Tee and basket positions have been designed to ensure clear visibility for safety, and to not interfere with the walking path. Each dot below represents a tee and basket location.

Ryan Nehl, Forest Supervisor
Manti-La Sal National Forest
Attn: Forest Plan Revision
599 West Price River Drive
Price, UT, 84501

Re: Draft Revised Forest Plan and Draft Environmental Impact Statement (DEIS)

Dear Mr. Nehl:

San Juan County appreciates the opportunity to provide comments on the Draft Revised Forest Plan and Draft Environmental Impact Statement (DEIS). The portions of the Manti-La Sal National Forest within the County are an integral part of the economy, lifestyle, culture, heritage, health and welfare of the County and its residents. As such, the plan for the management of these forest lands and resources has a significant impact on County administration and function and the lives of its residents. We offer the following comments on the draft plan in the spirit of improving the health and management of the forest along with benefits to the County and its residents.

Revised Plan:

Coordination of Planning Efforts. We do not find any record in the draft plan or DEIS of coordination of forest planning efforts with the plans of county and local governments. The National Forest Management Act of 1976 includes a coordination provision which states "...the Secretary of Agriculture shall develop, maintain, and, as appropriate, revise land and resource management plans...coordinated with the land and resource management planning processes of State and local governments...". The Forest Service Handbook (FSH 1909.12, Chapter 40; 44-Participation and Coordination with Federally Recognized Indian Tribes, Alaska Native Corporations, Other Federal Agencies, and State and Local Governments) outlines guidance for implementing this coordination requirement. This handbook states that for forest planning efforts, the responsible forest official shall "review planning and land use policies of ...state and local governments..." and that this review shall be displayed in the EIS for the plan. This review shall include consideration of 1) the objectives of State and local governments as expressed in their plans and policies, 2) the compatibility and interrelated impacts of these plans and policies, 3) opportunities for the plan to address the impacts identified and 4) opportunities to resolve or reduce conflicts.

A section in the EIS documenting this review of local plans would have been useful to the public so that they would be more knowledgeable in making their comments.

p.2-23 Watershed and Aquatic Resources, GD-01: “To maintain healthy aquatic habitats, management activities should not fragment aquatic habitats or aquatic organism passages or adversely impact hydrologic connectivity.” The phrase “or adversely impact hydrologic connectivity” may be too stringent and could be interpreted to preclude construction of reservoirs for community water supply or other uses (livestock, wildlife, recreation, irrigation). Such an interpretation would be inconsistent with the preceding Description and Values section which references the importance of water sources on the Forest to local communities and water users. We recommend deleting this phrase from the guideline or modifying it to allow exceptions for such public uses.

p. 2-28 Groundwater-Dependent Ecosystems and Wetlands ST-01 “New road and trail development shall not be authorized in groundwater-dependent ecosystems and wetlands.” Such a prohibition without provision for exceptions is overly restrictive. This standard should be modified to allow exceptions for emergency or temporary uses or instances where mitigation may avoid or reduce any impacts.

p.2-36 Deciduous Forest – Description and Values: There is no mention of the value of quaking aspen as a fuelwood. Many residents of San Juan County harvest aspen for home heating. This use should be added to the values statement.

p. 2-38 Woodlands – Description and Values : There is no mention of the value of pinyon and juniper for fuelwood. Many residents of San Juan County and surrounding areas harvest this wood for home heating and cooking. This use should be added to the values statement.

p. 2-54 Areas of Tribal Importance GD-04 “To respect tribal values, plant populations and plant communities of tribal value should be protected during fuels reduction activities.” Protection of these plant communities may not be possible in all instances.

p. 2-54 Areas of Tribal Importance GD-06 “To protect cultural resources, management actions such as fencing, or relocation of infrastructure should be taken if adverse impacts from livestock grazing are identified.” This statement should also be included in the livestock grazing section of the plan so that it can more easily be found when researching guidelines for livestock grazing.

p. 2-59 Recreation Opportunity Spectrum ST-02 states “Existing roads and motorized trails in Primitive and Semi-Primitive Non-Motorized recreation opportunity spectrum classes shall be considered for closure during travel planning.” The phrase “shall be considered for closure” casts an overly negative mandate for road closures. It may be that existing roads and motorized trails in such ROS areas serve a useful purpose and should be left open for travel and cherry-stemmed out of the particular ROS area. We recommend this standard be rewritten to state: “The classification (open, closed or restricted) of existing roads and motorized trails in Primitive and Semi-Primitive Non-Motorized recreation opportunity spectrum class areas will be determined in future travel planning.”

p.2-62 Access – Even though road and trail maintenance funding has decreased on the forest and this may lead to public safety and resource damage concerns, we urge the forest to consider other

maintenance funding sources before using lack of funding as the rationale for road and trail closures. We support Objective-05 “Plan and coordinate maintenance and monitoring of roads and trails with local governments, partners and volunteers annually” and Goal-01 “Expand partnerships and agreements with local governments, partners and volunteers for shared maintenance and monitoring of roads and trails”. Use of local governments, grants, partners and volunteers should provide additional funding opportunities for road and trail maintenance to meet the ever increasing demand for public access.

p. 2-63 Access – DC-06 “Road and motorized trail use do not impact wildlife winter range and quiet winter recreation opportunities.” The requirement of “do not impact” is an impossible condition to achieve as road and trail motorized uses will have some impact on wildlife and quiet winter recreation opportunities. This phrase should be changed to read “have minimal impact” or similar language.

p. 3-82 Wilderness Areas – Desired Conditions: DC-10 states: “Use within the Peavine Corridor has a minimal effect on Dark Canyon wilderness resources;...”. This statement is inconsistent with the legislation establishing the wilderness area and Peavine Corridor. Nowhere in the legislation is there a requirement that use in the Corridor have minimal effect on adjacent wilderness resources. In fact, Section 303 Prohibition on Buffer Zones in the legislation states “Congress does not intend that designation of wilderness areas in the State of Utah lead to the creation of protective perimeters or buffer zones around any wilderness area. The fact that nonwilderness activities or uses can be seen or heard from areas within the wilderness shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.” This Desired Condition is also inconsistent with the San Juan County Resource Management Plan (RMP) policy for wilderness which states “4. Management of lands adjacent to wilderness, wilderness study or wilderness character or similar areas with the same management restrictions or considerations as these special designation areas (buffer zones) is not supported.” This condition could be used to apply restrictions on motorized uses in the corridor which would not be supported by the designating legislation nor San Juan County policy. This Desired Condition should be removed from the Plan.

p. 3-84 Wilderness Areas- Guidelines: GD-02 states: “To maintain wilderness character, management actions along the motorized Peavine Corridor should minimize user conflict and reduce impacts on soil, watershed, vegetation, and other resources.” Here again, liberties have been taken in drafting this statement that are not supported by the enabling legislation (see above comment). The Peavine Corridor is not wilderness. It was specifically carved out of wilderness to provide for motorized travel. There is no statement in the legislation that requires management actions within the Corridor to maintain wilderness character. This statement should be modified to delete reference to maintaining wilderness character and should read: ‘Management actions along the motorized Peavine Corridor should minimize user conflict and reduce impacts on soil, watershed, vegetation, and other resources.’

DEIS:

Volume 1, 2.8 Comparison of Alternatives by Outcomes and Components

p. 2-34 Livestock Grazing Alternative D: “Vacant allotments should not be made available for permitted livestock grazing. Permits waived without preference should be left vacant and not restocked when there is limited interest.” These statements are inconsistent with the San Juan County RMP, Livestock Grazing Policy 4 which states: “Support continued properly managed livestock grazing on grazing allotments rather than conversion to conservation, wildlife or other uses even when a permittee may propose relinquishment or retirement of grazing AUMs for other purposes.” San Juan County recognizes and supports livestock grazing for the natural, cultural, social and economic benefits it provides and therefore would not support a reduction in livestock grazing through loss of grazing allotments. The County would not support the inclusion of these requirements in the Final Plan.

Volume 2 3.28 Recommended Wilderness Management Area

p. 3-30 The County would not support the recommendation of any wilderness management unit on national forest lands in the county. The Utah Wilderness Act of 1984 (Public Law 98-428) designated 12 wilderness areas within Utah’s national forests. The stated purposes of this act were to designate certain national forest lands in Utah as wilderness and to insure that other national forest lands in Utah be available for nonwilderness multiple uses. The Act further states in Sec. 201. (b)(5) “unless expressly authorized by Congress, Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of Utah for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.” To our knowledge, Congress did not make an authorization for the Forest Service to conduct additional wilderness area evaluations for the Manti la-Sal National Forest. The Forest Service contends it was required to do so by the 2012 Planning Rule. However, this planning rule does not override the 1984 Utah Wilderness Act. Therefore, we contend that wilderness evaluations in this planning effort were unnecessary and not authorized by Congress and any such evaluations and subsequent wilderness recommendations in this planning effort would be contrary to the 1984 Act.

Furthermore, San Juan County already has one designated wilderness area and several Inventoried Roadless Areas on the National Forest and the majority of the remainder of the federal lands in the county are managed under various restrictive designations including Canyonlands National Park, Glen Canyon National Recreation Area, Hovenweep National Monument, Natural Bridges National Monument, Rainbow Bridge National Monument, Bears Ears National Monument, and various wilderness study areas and wilderness character areas. In the Bears Ears National Monument, which includes $\frac{3}{4}$ of the Monticello District of the National Forest, the developing monument plan will include protective stipulations for uses on included forest lands which will protect monument objects and landscapes. Additional stipulations that would be imposed by any wilderness area recommendations would only add more unnecessary restrictions which would hinder the implementation of various management practices to improve or maintain forest health and would add more onerous restrictions to the use of forest lands by Anglos and Native Americans.

Volume 2 3.34 Elk Ridge Geographic Area

p. 3-336 San Juan County would not support the inclusion of this geographic management area in the Final Forest Plan. Currently, it is only included in Alternative D which may be appropriate for a range of analysis. However, we do not think this area has the unique and interrelated resources and values to warrant a separate management area designation. The area is entirely within the Bears Ears National Monument and shares the same objects and resources that would be managed by the Monument Plan. Designating this area with its own separate management prescriptions within the BEM Plan and overall Forest Plan would only create unnecessary confusion as to which management plan prescriptions would be followed. For these reasons we would not support its inclusion in the Final Plan.

Volume 3 Appendix A Maps: Map 27 Monticello District Municipal Water Supply Management Area shows an excluded zone in the Jackson Ridge area. We thought this area was in and should be in the Municipal Water Supply Area. Is this a mapping error or is there a reason for this exclusion? On this same map the SE boundary of the Bears Ears Monument does not show clearly as do the remaining boundaries of the Monument (shown in red).

Volume 3 Appendix A Maps: Maps 61-63 Monticello District Summer ROS Classes, Maps 70-72 Monticello District Winter ROS Classes and Maps 82-84 Monticello District Visual Quality Objectives do not depict these ROS classes and Visual Quality Objectives for the Bears Ears Monument segment of the forest. We understand these were omitted as being deferred to the development of the Bears Ears Monument Plan. However, ROS classes and Visual Qualities (and related Objectives) would seem to be inventory classes which would not change with management alternatives. It would have been useful to have had these items shown on the maps to give better context in developing comments. We recommend these inventoried classes be shown.

Generally, the County favors some aspects of Alternative C as it allows for more proactive management that should contribute to the achievement of Desired Conditions more quickly than the other alternatives. Such management should provide for better fuels management to reduce the potential frequency and intensity of wildfires. One benefit of this management would be to reduce the risk of fire damage to cultural and heritage resources. Other management actions would contribute to improved forest health such as more rapid restoration/recovery of declining aspen stands.

Alternative C would also be less restrictive concerning tribal members access to sensitive cultural and historic resources and is more proactive in its approach to tribal consultation and engagement.

Additionally, Alternative C would promote connectivity of motorized trails and would provide more acres for Semi-Primitive Motorized recreation opportunities. Both factors would better help meet the demand for motorized recreation opportunities.

We appreciate this opportunity to offer comments. Please contact us if you have questions about any comments.

Sincerely,

Bruce Adams
