Aug 23, 2023

Dear School Board Members,

I would like to adjust my Trustlands/TSSA plan to include a software purchase. Brain Pop is widely used in my school, and was provided by the school district last school year using ESSER funding. My teachers would like to continue to use BrainPop. There is no need to change the allocation of funds in my budget. I budgeted more than the cost of the other software in my TSSA plan because we hadn't received a final cost on those softwares. I would like to add BrainPop as an option for purchase. The cost for a site license for Brainpop is \$3163.50. Brainpop aligns with our goals of improving reading, math, and science outcomes.

I would also like to allocate the extra funds in TSSA (due to the rollover) to TSSA travel for potential travel needs for Lego League, and for travel for professional development. This aligns with PEERS Goal #4, Step 2.

Thank you for your consideration,

Ginny Nobis  
Principal, South Mesa Elementary
