

DRAFT

West Weber

A Utah Inland Port Project Area

Draft Project Area Plan & Budget

January 10, 2024

DEFINITIONS

Term	Definitions
Authority Infrastructure Bank	“Authority Infrastructure Bank” or “AIB” means the UIPA infrastructure revolving loan fund, established in Utah Code 63A-3-402, with the purpose of providing funding, through infrastructure loans, for infrastructure projects undertaken by a borrower for use within a Project Area.
Base Taxable Value	The taxable value of property within any portion of a Project Area, as designated by board resolution, from which the property tax differential will be collected, as shown upon the assessment roll last equalized before the year in which UIPA adopts a project area plan for that area.
Development Project	A project for the development of land within a Project Area
Effective Date	Date designated in the UIPA board resolution adopting the Project Area Plan on which the Project Area Plan becomes effective. It is also the beginning date UIPA will be paid Differential generated from a Project Area.
Project Area	As to land outside the authority jurisdictional land, whether consisting of a single contiguous area or multiple non-contiguous areas, real property described in a project area plan or draft project area plan, where the development project set forth in the project area plan or draft project area plan takes place or is proposed to take place. The authority jurisdictional land (see Utah Code Ann. sections 11-58-102(2) and 11-58-501(1)) is a separate project area.
Legislative Body	For unincorporated land, the county commission or council. For land in a municipality, it is the legislative body of such municipality.
Loan Approval Committee	Committee consisting of the individuals who are the voting members of the UIPA board.
Project Area Budget	Multiyear projection of annual or cumulative revenues and expenses and other fiscal matters pertaining to a Project Area.
Project Area Plan	Written plan that, after its effective date, guides and controls the development within a Project Area.
Property Tax(es)	Includes a privilege tax and each levy on an ad valorem basis on tangible or intangible personal or real property.
Property Tax Differential	The difference between the amount of property tax revenues generated each tax year by all Taxing Entities from a Project Area, using the current assessed value of the property and the amount of Property Tax revenues that would be generated from that same area using the Base Taxable Value of the property but excluding an assessing and collecting levy, a judgment levy, and a levy for a general obligation bond. This is commonly referred to as tax increment.
Taxing Entity	Public entity that levies a Property Tax on property within a Project Area, other than a public infrastructure district that UIPA creates.

EXECUTIVE SUMMARY

The Utah Inland Port Authority (UIPA) was established to facilitate appropriate development of the Inland Port's jurisdictional land and other Project Areas within the state of Utah to further the policies and objectives of the Inland Port outlined in Chapter 58, Title 11 Utah Code Annotated 1953, as amended (UIPA Act). One mechanism for achieving these purposes is the creation of a Project Area where a Development Project is proposed to take place (Project Area). A Project Area is created as explained below under the Requirements section.

In order for a Project Area to be established by UIPA, the legislative body of the county or municipality in which the Project Area is located must provide written consent. The following public entities passed formal resolutions requesting the establishment of a UIPA Project Area on the following dates:

- The Weber County Commission passed a Resolution on September 12, 2023, and the County Commission agreed to amend that Resolution on December 18, 2023. Once the amended resolution is officially approved (expected in January 2024) by the Weber County Commission, it will be included in the Appendix C of this document.

This move aims to tap into the funding, resources and benefits provided by UIPA that will support and enhance the development of the subject properties (West Weber Inland Port Project Area). In doing so, the area expects that development of the West Weber Inland Port Project Area, with the support and participation of UIPA, will not only meet the business needs of those within the Project Area, but also contribute to the needs of the immediate community and the region as a whole.

The West Weber Project Area fits the area's economic development vision by encouraging the retention and expansion of existing companies and the recruitment of new companies to create employment opportunities for residents in the greater Box Elder County area. This Project Area enjoys a very strategic location with access to: Interstate 15, Interstate 84, US Highway 89, Union Pacific rail and a nearby regional airport. This is also a future site for a connection with the West Davis Corridor. As this Project Area develops out, right-sizing future logistical assets to improve freight movement will leverage new opportunities throughout the region. Additionally, this Project Area will fit the County's general plan and the zoning for this area.

Statute requires the drafting of a Project Area Plan and a public process to adopt the plan. This document, once adopted, would constitute the plan (West Weber Inland Port Project Area Plan or Project Area Plan).

LOGISTICS INFRASTRUCTURE & VALUE PROPOSITION

West Weber Project Area

The West Weber Project Area is a proposed industrial development on the eastern shores of the Great Salt Lake near the area known as Little Mountain.

SUPPLY AND DEMAND

Weber County is the fourth largest county in the state, with a population of 262,223 residents according to the 2020 Census. Between 2010 and 2020, Weber County grew by 30,987 residents, primarily driven by natural increase. Weber County's population is projected to grow from 262,223 on July 1, 2020, to 396,265 in 2060. This figure represents a 66% increase to the total population over 40 years.

Weber County is part of the Greater Salt Lake Region. This 12-county economic region functions largely as a single consumer market and labor market. Weber County's employment is projected to increase from 148,295 in 2020 to 205,921 in 2060. Leading growth sectors include construction, manufacturing, professional, scientific, and technical services, and health care and social assistance, which accounts for 51% of employment growth.

In the last 10 years, several companies have announced plans to bring thousands of jobs and hundreds of millions in capital investment to Weber County. The chart below is meant to highlight the recent investments and expansions into Weber County and is not meant to be an exhaustive list.

Year	Business Name	Projected Jobs	Projected Capital Investment (\$)
2023	Ya Ya Foods	300	\$92.0M
2020	Northrop Grumman	2,250	\$380.0M
2020	Williams International	300	\$60.0M
2019	Oatly	50	\$40.0M
2019	Amer Sports	110	\$1.50M
2018	Borsight	95	\$6.30M
2018	Parker Hannifin	77	\$2.80M
2015	Selle Royal	65	\$4.00M
2014	CSM Bakery	100	\$30.4M

Total Businesses: 9	Projected Jobs: 3,347	Projected Investment: \$617.0M
----------------------------	------------------------------	---------------------------------------

Weber County has cemented itself as a powerhouse for Utah based manufacturers. Autoliv, a motor vehicle parts manufacturer, is one of the largest employers of the county, employing more than 2,000 people. Other manufacturers in the county include:

- Northrop Grumman, an aerospace and defense manufacturer, employing over 1,000
- Freseni USA Manufacturing, a surgical and medical instruments manufacturer, employing over 1,000
- Parker Hannifin, an aerospace manufacturer, employing 500

- Nutrabrands, a pharmaceutical manufacturing company, employing 500
- Williams International, an aerospace manufacturer, employing 500
- Ralcorp Frozen Bakery Products, a cookie and cracker manufacturer, employing 500
- Capstone Nutrition, a pharmaceutical manufacturing company, employing 500
- Petersen Inc., a plate work manufacturing company, employing 500

In addition to an outsized manufacturing presence, the federal government employs thousands of people between the Department of the Treasury and the Department of Defense, contributing millions to the local economy.

RAIL

Weber County has been an integral part of the American railroad network since the Union Pacific railroad reached Ogden on March 8, 1869, as part of the construction of the original transcontinental railroad. Ogden would become the eventual junction between the Central Pacific and Union Pacific railroads, cementing its status as a terminal and interchange point between the Union Pacific Railroad, Southern Pacific Railroad, Denver and Rio Grande Western Railroad, and multiple shortline railroads in the 150 years since the completion of the transcontinental railroad.

In Utah, the weight of freight moved by rail has experienced some fluctuation with a significant shift downward in volume from 2007 to 2012. This is attributed to increased scrutiny around coal as a power source. Both Class I carriers and several short lines relied heavily on coal for originating carloads in the state. Volumes have shifted to other business units with coal trending downward in recent years. Freight moved by rail is projected to remain steady with marginal increases.

Today, Weber County is served by two Class I railroads; Union Pacific and BNSF. Union Pacific owns all railroad infrastructure in the county. BNSF has trackage rights over the Salt Lake Subdivision to the Ogden Yard. In addition to the two Class I railroads, two short lines - the Utah Central Railroad and the Utah Railroad - operate inside Weber County.

Ogden serves as a strategic junction point where multiple main lines converge and multiple subdivisions meet. The Ogden and Riverdale yards serve a major railcar classification area with Union Pacific opting in recent years to shift an increasing amount of traffic to those facilities. In addition, Ogden is an important junction in Union Pacific's intermodal network, with container traffic from Los Angeles, Long Beach, and Oakland all converging in Ogden before moving to points further inland. In spite of the increased amount of traffic that is being routed through Ogden, both the Ogden and Riverdale yards have capacity for growth.

Both the Utah Central and Utah shortline railroads serve customers in the greater Ogden area providing convenience and consistency to rail-served customers while maintaining proximity to a major class I rail yard for expedited carload service.

Weber County has 90 rail-served customers. One is located inside the present boundaries of the proposed project area. The customer, Western Zirconium Inc., is one of the largest rail-served customers by carload volume in the State of Utah.

TRUCK

The freight system is the backbone of the economy supporting the production and consumption of goods throughout the state of Utah. The weight of freight moved by truck grew by 30% from 1997 (98,605 thousand tons) to 2017 (128,530 thousand tons). However, this has not been a steady increase. Between 2007 and 2012 there was a precipitous 32% drop followed by a 63% surge between 2012 and 2017. In 2050 the weight moved by truck is projected to increase by 42% to 182,999 thousand tons.

The primary freight corridors include 900 South and 9300 West. 900 South eventually meets SR 134 and becomes SR 39 that interchanges with Interstate 15 at 12th St.

The primary driver of truck traffic in the area stems from long standing industries in the Little Mountain area including Compass Minerals, Western Zirconium, and the Little Mountain Test Facility operated by the Department of Defense.

INFRASTRUCTURE: CURRENT STATE

The proposed project area is largely undeveloped. Connectivity to the proposed project area is provided via 900 South to Interstate 15. Other roads include 9300 West, 8300 West, and 7500 West. Roads will continue to be constructed as the project area matures.

Mainline rail exists to the south of the proposed project area with an industrial lead serving Compass Minerals and Western Zirconium. The industrial lead is serviced by Union Pacific Railroad and the Utah Railroad.

Given the close proximity to the Great Salt Lake, care will need to be taken from the beginning to ensure water-wise construction, wildlife-friendly lighting practices, and traffic considerations that minimize impacts to the surrounding area.

INFRASTRUCTURE: SHORT TERM CONSIDERATIONS (3 - 5 YEARS)

Area roads will likely require improvements as the proposed project area matures. UDOT has scheduled an extension to the existing West Davis Corridor that will bisect the proposed project area parts, providing an arterial connection to Davis and Salt Lake Counties. UIPA will work closely with Weber County, UDOT, and surrounding municipalities to plan for future improvements.

Depending on the rate that rail-served companies choose to locate inside the proposed project area will determine short-term improvements to the rail network. The current industrial lead will most likely need to be optimized to handle the increased number of carloads. Compass Minerals and Western Zirconium are two of the largest customers by rail car volume in the state with traffic handled by both Union Pacific and BNSF (handled by Utah Railroad as a serving carrier).

INFRASTRUCTURE: LONG TERM CONSIDERATIONS (5+ YEARS)

Collaboration with the Utah Department of Transportation (UDOT) and Metropolitan Planning Organizations (MPOs) is essential for strategic, long-term planning of truck parking and freight in the project area and nearby regions. These collaborative efforts will result in studies that guide targeted resource allocation, driving sustainable freight growth in these areas.

It is crucial to assess current railroad operations and infrastructure with the goal of creating future plans that focus on enhancing capacity and efficiency. This process includes continuing to explore opportunities to attract new rail users to the project area, thereby boosting its economic potential.

Coordinating with systems of higher education is a strategic approach to bring workforce training programs to the area. These initiatives will likely aim to offer new opportunities for residents to engage in meaningful, high-wage employment, which in turn enables them to reinvest in their local communities and regions, fostering overall growth and development.

OVERVIEW

Purposes and Intent

By adopting this Project Area Plan and creating the West Weber Inland Port Project Area, UIPA will be maximizing long-term economic benefits to the Project Area, the region, and the State; maximizing the creation of high-quality jobs, and other purposes, policies, and objectives described herein and as outlined in the Port Authority Act.

Area Boundaries

A legal description of the proposed area boundaries and a map can be found in [Appendices A](#) and [B](#).

Legislative Body Consent

Written consent from the Weber County Commission was passed as a Resolution on September 12, 2023 and will be amended in January 2024. Once it is officially presented to the Weber County Commission, the final version will be included in the Plan and Budget. The amended resolution will be found in [Appendix C](#).

Landowner Exclusion

Pursuant to UCA 11-58-501, "an owner of land proposed to be included within a project area may request that the owner's land be excluded from the project area." A project area exclusion request must be submitted by the respective landowner in writing to the UIPA board no more than 45 days after their public meeting under Subsection 11-58-502(1), which states, "the board shall hold at least one public meeting to consider and discuss a draft project area plan." Landowners may submit notarized written requests either in person or via certified mail to Attn: Larry Shepherd, 111 S. Main Street, Ste. 550, Salt Lake City, UT 84111.

Project Area Budget

UIPA will prepare a yearly budget for each year prior to expending tax differential revenues. A preliminary summary budget for the project area can be found in [Appendix D](#).

Initial Environmental Review

For the UIPA Board to adopt a Project Area Plan, an initial environmental review for the project area must be completed. To ensure that any required environmental studies, documentation, or action is conducted according to federal, state, and local regulatory standards, the project area site location and history, scope of work, prior studies, as well as environmental resources located in and adjacent to the

project area will be reviewed to provide recommendations for next steps and/or approval before work, which could pose environmental impacts, may commence. The environmental review report can be found in [Appendix E](#).

The initial environmental review will consist of a desktop review that considers the following elements as applicable:

- Environmental Justice
- NEPA Reporting Requirements, if any
- Past and Present Land Uses
- Geotechnical Resources
 - Geology and Soils
 - Hydrogeology and Hydrology
- Historical and Cultural Resources
 - Tribal Lands
- Natural Resources
 - Threatened and Endangered Species & Critical Habitats
 - Forest Practices
 - Prime, Important, Unique, or of Local Importance Farmland
- Water Resources
 - Wetlands
 - Floodplains
 - National Rivers
- Environmental Quality
 - Identified Sources of Contamination
 - Hazardous Materials
 - Waste Generation, Storage, and Disposal
 - Above-Ground and Underground Storage Tanks (ASTs and USTs)
- Air Quality

Recruitment Strategy

Incentives will generally favor industries such as those listed below:

- Advanced manufacturing
- Aerospace and defense
- Distribution and logistics
- Data centers
- Renewable Energy

General guidelines for incentives are for businesses that are creating new growth as follows:

New Capital Investment	% of Tax Differential
\$25M	10%
\$50M	15%

\$100M	20%
\$300M	30%

Variables that could impact the percent of tax differential awarded include the following:

- Water Stewardship
- Targeted industry businesses
- Renewable Energy
- Logistics volume created
- Platform and capabilities of the business
- Participation with local civic organizations and endeavors
- Opportunities for internships or job placement partnerships with local high schools, tech colleges, and universities

Project Area Performance Indicators

UIPA will monitor and record the economic benefit of this Project Area and report this information bi-annually to the UIPA Board and Weber County. UIPA will work with Weber County to determine the right key performance indicators. The following represent likely performance indicators that UIPA will report on:

- Number of high paying jobs as defined by state statute (110% of county wage or higher)
- Change in county poverty rate
- Total jobs created
- Total attrition values
- Improvements to road and rail
- Infrastructure improvements including power, water, sewage, fiber, etc.
- Commodity flow by type and value
- Commodity transload by type and value
- Air quality and environmental metrics

Conclusion

With a significant population base, and a strong industrial base Weber County is the critical economic leader in Northern Utah. The County's economy is very diverse with industrial employers supporting Hill Air Force Base, and Weber State University producing highly-educated graduates for innovation related jobs in the region. This collaboration between the Utah Inland Port Authority and Weber County will ensure that Weber County remains the economic engine for Northern Utah, while serving as an industrial leader for the state of Utah and the entire rocky mountain region.

West Weber county represents a unique opportunity to create generational economic growth as it has mostly undeveloped parcels. While the area needs significant infrastructure investments, the Port feels strongly that coordinated efforts will attract private capital to support development in the region. The West Weber Project Area also has unique potential to attract durable advanced manufacturers to the region, including the creation of high-wage jobs.

Weber County, working together with the Port and local developers, creates a unique opportunity to synergize efforts and resources to optimize growth in this area.

Staff Recommendation

As this project meets multiple of the required public benefit objectives, staff is recommending that the Utah Inland Port Authority board adopt the West Weber Inland Port Project Area.

DRAFT

REQUIREMENTS

The UIPA Act outlines certain steps that must be followed before the West Weber Project Area Plan is adopted. The requirements are as follows:

Statutory Requirement

A draft of the Project Area Plan must be prepared.

A Project Area Plan shall contain:

- (a) Legal description of the boundary of the project area;
- (b) The Authority's purposes and intent with respect to the project area; and
- (c) The board's findings and determination that:
 - (i) there is a need to effectuate a public purpose;
 - (ii) there is a public benefit to the proposed development project;
 - (iii) it is economically sound and feasible to adopt and carry out the project area plan; and
 - (iv) carrying out the project area plan will promote the goals and objectives stated in Subsection 11-58-203(1).

Adoption of the Project Area Plan is contingent on the UIPA Board receiving written consent to the land's inclusion in the project areas from:

- Legislative Body (See Exhibit C)

Source: UCA 11-58-501 Preparation of project area plan -- Required contents of project area plan.

The UIPA Board shall hold at least one public meeting to consider the draft Project Area Plan.

At least 10 days before holding the public meeting, the board shall give notice of the public meeting:

- (a) to each Taxing Entity;
- (b) to a municipality where the proposed project area is located or any municipality that is located within one-half mile of the proposed area; and,
- (c) on the Utah Public Notice Website.

After public input is received and evaluated and at least one public meeting is held, the UIPA Board may adopt this Project Area Plan, which such modifications as it considers necessary or appropriate.

Source: UCA 11-58-502 Public meeting to consider and discuss draft project are plan - Notice - Adoption of plan

In addition, after the Project Area Plan is adopted, its adoption must be property advertised and notice given to certain governmental entities, along with an accurate map or plat, all as provided in the UIPA Act.

Source: UCA 11-58-503 Notice of project area plan adoption - Effective date of plan - Time for challenging a project area plan or project area

BOARD FINDINGS & DETERMINATION

Pursuant to UIPA Act, the Board makes the following findings and determination:

Public Purpose

“There is a need to effectuate a public purpose.”

With a 2% vacancy rate in Weber and Davis Counties combined, Northern Utah’s demand for more industrial space will be met with the West Weber Inland Port Project Area. The increased tax revenue to the western communities of Weber County will greatly increase the prosperity of the region. Providing a new frontier for industrial development in the high growth market will ease growth strain along the I-15 corridor.

Public Benefit

“There is a public benefit to the proposed Project Area.”

In order to facilitate a world-class industrial complex, there will need to be significant infrastructure improvements including water, waste water, power and natural gas. These improvements will, by extension, support the surrounding area with crucial public infrastructure. Increased industrial development will generate new jobs and the project area has elected to invest in workforce housing. The generated revenue benchmarked to housing will create an estimated 14,000 housing units over the course of development. The project is required to spend at least 1% of tax differential on wetland mitigation in the area. The creation of the West Weber Inland Port Project Area will fund protections for these critical wetlands along the banks of the Great Salt Lake.

Economic Soundness and Feasibility

“It is economically sound and feasible to adopt and carry out the Project Area plan.”

UIPA determines and finds that development of the West Weber Inland Port Project Area, as contemplated by UIPA, property owners, and the local governments, will be economically sound and feasible. A Project Area budget summary based on current estimates is included as [Appendix D](#). Through the investment of Property Tax Differential, the Project Area will grow faster and in a more coordinated manner than would be possible otherwise. This will result in long-term financial returns for the Taxing Entities that are greater than would be achieved if the Project Area is not undertaken. The following table shows estimates of current taxable revenues for each taxing entity and expected revenues once the project area is complete. The base value shown for 2023 will continue to be sent to taxing entities, along with 25% of new growth. At the end of the project, all taxes will revert to taxing entities.

Taxing Entity	2023 Property Tax Revenues	2050 Estimated Property Tax Revenues
Weber County School District	106,800	15,935,000
Weber County	37,100	5,535,000
Weber Fire District	21,200	3,163,000
Weber Basin Water Conservancy District	3,500	522,000
Municipal Type Service Fund	3,400	507,000
County Assessing & Collecting Levy	3,300	492,000
Weber Area Dispatch 911 and Emergency Services District	3,300	492,000
West Warren Park Service Area	3,100	463,000
Warren-West Warren Cemetery Maintenance District	2,100	313,000
Weber County Mosquito Abatement District	1,300	194,000
Weber Fire District - Bond	700	104,000
Warren Water Improvement District	400	60,000
Multicounty Assessing & Collecting Levy	300	45,000

The Project Area has infrastructure needs in order to optimize the project area and fully utilize rail in the area, and the Project Area will enable the use of property tax incentives to recruit companies that will provide jobs and make substantial economic investments in the area. The Project Area will allow for the reinvestment of Differential in the area.

The Property Tax Differential collected from the West Weber Project Area is 75% of the difference between the Property Tax revenues and the Property Tax revenue that would be generated from the Base Taxable Value, with the remaining 25% flowing through to the Taxing Entities. Differential collected shall begin on the date specified by board resolution and continue for 25 years and may be extended for an additional 15 years by the board if it is determined that doing so produces a significant benefit. The expected trigger date for the tax differential is 2025.

In addition to the Differential and with a positive recommendation from Weber County, UIPA may sponsor a Public Infrastructure District (PID) in the Project Area. A PID is a separate taxing entity that may levy taxes and issue bonds. A PID is formed following consent of property owners and is governed by a separate board. UIPA will not manage or control the PID, and no liability of the PID will constitute a liability against UIPA; however, the UIPA board must authorize the issuance of bonds from a PID. PIDs also require the creation of governing documents, which define the membership and tax rate of the PID. The purpose of PID-assessed taxes and bonds is to pay for public infrastructure needs in the district, especially those with a large benefit across the project area. Bonds issued by the district may be guaranteed and paid back by tax differential revenues. An Authority Infrastructure Bank (AIB) loan for rail infrastructure needs could also be granted via separate approval by the UIPA board, and such loans would be repayable from tax differential proceeds.

Projected tax differentials received by UIPA for the 25-year term of the Project Area are approximately \$343 million. UIPA will prepare and adopt a formal budget prior to expending tax differential funds, and current projections are preliminary and expected to change. UIPA may apply the funds collected to encourage the Project Area as deemed appropriate by UIPA and the participating entities as contemplated in the Project Area Plan, including but not limited to the cost and maintenance of public infrastructure and other improvements located within or benefitting the Project Area. UIPA will contract with qualified developers and other parties to spend Tax Differential on public infrastructure that benefits the community. Allowable uses of tax differential include:

- Administrative expenses
- Infrastructure bank loan repayment
- Repayment of PID bonds used for public infrastructure

- Rail infrastructure and rail crossings
- Other logistics infrastructure
- Affordable housing
- Roads
- Utilities
- Associated costs of public utilities
- Wetlands mitigation
- Business recruitment incentives

UIPA will establish auditing rights with developers to ensure provided funding is used only for allowable uses and report findings to participating entities. Following the initial planned development and agreements, UIPA staff will coordinate with participating entities to determine if unencumbered Differential should be used for additional development or on other public infrastructure. Not less than every five years, UIPA will review with major Taxing Entities the Differential being remitted to UIPA and determine if any adjustments to the amount passed through to Taxing Entities or the administration percentage should be adjusted.

Promote Statutory Goals and Objectives

“Carrying out the Project Area Plan will promote UIPA goals and objectives.”

The West Weber Inland Port Project Area promotes the following goals and objectives (U.C.A. 11-58-203) to be considered a UIPA Project Area:

- (a) maximize long-term economic benefits to the area, the region, and the state;(b) maximize the creation of high-quality jobs;
- (c) respect and maintain sensitivity to the unique natural environment of areas in proximity to the authority jurisdictional land and land in other authority project areas;
- (d) improve air quality and minimize resource use;
- (e) respect existing land use and other agreements and arrangements between property owners within the authority jurisdictional land and within other authority project areas and applicable governmental authorities;
- (f) promote and encourage development and uses that are compatible with or complement uses in areas in proximity to the authority jurisdictional land or land in other authority project areas;
- (g) take advantage of the authority jurisdictional land's strategic location and other features, including the proximity to transportation and other infrastructure and facilities, that make the authority jurisdictional land attractive to:
 - (i) businesses that engage in regional, national, or international trade; and
 - (ii) businesses that complement businesses engaged in regional, national, or international trade;
- (h) facilitate the transportation of goods;
- (i) coordinate trade-related opportunities to export Utah products nationally and internationally;
- (j) support and promote land uses on the authority jurisdictional land and land in other authority project areas that generate economic development, including rural economic development;
- (k) establish a project of regional significance;
- (l) facilitate an intermodal facility;
- (m) support uses of the authority jurisdictional land for inland port uses, including warehousing, light manufacturing, and distribution facilities;

- (n) facilitate an increase in trade in the region and in global commerce;
- (o) promote the development of facilities that help connect local businesses to potential foreign markets for exporting or that increase foreign direct investment;
- (q) encourage the development and use of cost-efficient renewable energy in project areas;
- (r) aggressively pursue world-class businesses that employ cutting-edge technologies to locate within a project area; and
- (s) pursue land remediation and development opportunities for publicly owned land to add value to a project area.

Parcel: 100330008

The Southeast Quarter of the Northeast Quarter of the Southeast Quarter of Section 9, Township 6 North, Range 3 West, Salt Lake Base And Meridian,

Together with an easement for ingress and egress purposes over the easterly 50 feet of Section 16 and the South 1/2 of the Southeast Quarter of said Section 9. Said Township and Range. Containing 10.20 acres more or less.

Parcels: 100310003, 100310001, 100310002, 100310004, 100310003

A part of Sections 4, Township 6 North, Range 3 West, Salt Lake Base and Meridian, US Survey,

Beginning at a point, said point being North $0^{\circ} 23' 24''$ East for a distance of 1,329.77 feet from the Southeast Quarter Corner of Section 4, Township 6 North, Range 3 West or POINT OF BEGINNING; and running thence, S $89^{\circ} 59' 55.0''$ W for a distance of 967.61 feet to a point on a line, thence, S $84^{\circ} 59' 13.9''$ W for a distance of 164.23 feet to a point on a line, thence, N $88^{\circ} 49' 51.2''$ W for a distance of 1547.34 feet to a point on a line, thence, N $01^{\circ} 43' 54.6''$ E for a distance of 1399.27 feet to a point on a line, thence, N $00^{\circ} 26' 10.8''$ E for a distance of 628.50 feet to a point on a line, thence, N $00^{\circ} 06' 04.6''$ E for a distance of 627.04 feet to a point on a line, thence, N $00^{\circ} 00' 00.0''$ E for a distance of 0.02 feet to a point on a line, thence, S $88^{\circ} 32' 32.9''$ E for a distance of 832.79 feet to a point on a line, thence, S $88^{\circ} 47' 21.6''$ E for a distance of 1798.48 feet to a point on a line, thence, S $00^{\circ} 55' 57.5''$ W for a distance of 1003.45 feet to a point on a line, thence, S $00^{\circ} 24' 17.7''$ W for a distance of 254.22 feet to a point on a line, thence, S $00^{\circ} 41' 25.9''$ E for a distance of 1052.33 feet to a point on a line, thence S $00^{\circ} 55' 35.1''$ E a distance of 302.45 feet to the POINT OF BEGINNING. Containing 159.79 acres more or less.

DRAFT

Appendix B: Maps & Imagery of the Project Area

Appendix C: Legislative Body Written Consent

The Weber County Commission passed a Resolution on September 12, 2023 and the County Commission agreed to amend that Resolution on December 18, 2023.

Once the amended resolution is officially approved, which is expected in January 2024, by the Weber County Commission, it will be included here in Appendix C.

DRAFT

Appendix D: Project Area Budget Summary

Model Summary	
Differential Tax Revenue Allocation	
Project Area Share	75%
Other Taxing Entities Share	25%
Duration (Years)	25
Differential Tax Revenue \$ Allocation	
	Full Value
Base Year Taxable Revenues	\$ 190,000
Tax Differential to Project Area	\$ 360,800,000
Tax Differential to Other Taxing Entities	\$ 120,300,000
Total Tax Differential	\$ 481,100,000
Less: Wetland Mitigation	\$ 3,600,000
Less: Admin Expenses	\$ 18,000,000
Total Remaining Differential for Projects	\$ 342,800,000

Appendix E: Initial Environmental Review

INTRODUCTION

For the Utah Inland Port Authority (UIPA) Board to adopt a Project Area Plan, an initial environmental review for the Project Area must be completed. This document provides an overview to ensure compliance with all federal, state, and local requirements related to future opportunities associated with the development and optimization of the project area. The Utah Inland Port Authority, in conjunction with development parties and the government stakeholders, will review these environmental considerations prior to moving forward with development.

PROJECT AREA DESCRIPTION

The West Weber Project Area candidate (Figures 1 and 2) consists of 2 zones (Little Mountain and Weber Bend) and comprises approximately 9,000 acres located east of Promontory Point near the eastern shore of the Great Salt Lake.

DRAFT

FIGURE 1: LITTLE MOUNTAIN ZONE WEST WEBER PROJECT AREA CANDIDATE

FIGURE 2: WEBER BEND ZONE WEST WEBER PROJECT AREA CANDIDATE

ENVIRONMENTAL JUSTICE CONSIDERATIONS

Environmental Justice considerations are key components for federal funding opportunities.

It is important to consider the composition of the affected area, to determine whether minority populations, low-income populations, or Indian tribes are present and if so whether they may incur disproportionately high and adverse human health or environmental effects. The Bureau of the Census (BOC) has data available that can be used to identify the composition of the potentially affected population.

Geographic distribution by race, ethnicity, and income, as well as a delineation of tribal lands and resources, should all be examined.

Public engagement and participation in the decision-making process can help assure meaningful community representation throughout the process. Opportunities for the public, especially nearby community members, to provide public comment and voice concerns should be provided.

The Environmental Protection Agency (EPA) has an environmental justice mapping and screening tool called [EJScreen](#). It is based on nationally consistent data and an approach that combines environmental and demographic indicators in maps and reports. The EJScreen community report for Weber County is below.

DRAFT

EJScreen Community Report

This report provides environmental and socioeconomic information for user-defined areas, and combines that data into environmental justice and supplemental indexes.

Weber County, UT

County: Weber
Population: 259,390
Area in square miles: 659.84

A3 Landscape

COMMUNITY INFORMATION

LANGUAGES SPOKEN AT HOME

LANGUAGE	PERCENT
English	86%
Spanish	12%
Other Indo-European	1%
Total Non-English	14%

BREAKDOWN BY RACE

BREAKDOWN BY AGE

LIMITED ENGLISH SPEAKING BREAKDOWN

Notes: Numbers may not sum to totals due to rounding. Hispanic population can be of any race. Source: U.S. Census Bureau, American Community Survey (ACS) 2017-2021. Life expectancy data comes from the Centers for Disease Control.

Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to these for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the [EJScreen website](#).

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

EJ INDEXES FOR THE SELECTED LOCATION

SUPPLEMENTAL INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low-income, percent linguistically isolated, percent less than high school education, percent unemployed, and low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION

These percentiles provide perspective on how the selected block group or buffer area compares to the entire state or nation.

*Diesel particulate matter, air toxics cancer risk, and air toxics respiratory hazard index are from the EPA's Air Toxics Data Update, which is the Agency's ongoing, comprehensive evaluation of air toxics in the United States. This effort aims to prioritize air toxics, emission sources, and localities of interest for further study. It is important to remember that the air toxics data presented here provide broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. Cancer risks and hazard indices from the Air Toxics Data Update are reported to one significant figure and any additional significant figures here are due to rounding. More information on the Air Toxics Data Update can be found at: <https://www.epa.gov/tsp/air-toxics-data-update>.

Report for County: Weber

www.epa.gov/ejscreen

PAST AND PRESENT LAND USES

Public land records—including historical city directories, fire insurance maps, topographic maps, and aerial imagery—can be accessed online and reviewed to help determine previous ownership and identify any structures on properties/adjacent properties in the project area, or indications of environmental contamination.

A visual site inspection should be conducted to observe properties in the project area, any structures on the properties and adjacent properties to identify indications of environmental contamination that may have resulted from activities that took place on the site or from activities at neighboring properties.

Past and present landowners, operators, and/or occupants of properties, along with any knowledgeable local government officials should be interviewed to gather information around past and present land uses of properties in the project area.

GEOTECHNICAL RESOURCES

In order to characterize subsurface conditions and provide design parameters needed to proceed with site development, geotechnical constraints must be identified for the project area.

Potential geotechnical constraints may include:

- anticipated foundation system
- anticipated excavation equipment
- pavement
- anticipated seismic site class
- anticipated frost depth
- bedrock constraints
- blasting anticipated
- groundwater constraints
- dewatering anticipated
- corrosive soils
- karst constraints
- sinkholes
- seismic liquefaction
- settlement monitoring likely required
- fill anticipated on-site
- site usage

Field explorations via soil borings and/or test pits are recommended to determine the geotechnical constraints for the project area.

GEOLOGY AND SOILS

Geological constraints of a project area that should be considered include:

- soil grade,
- soil composition,
- soil permeability and compressibility,
- soil stability,
- soil load-bearing capacity,
- soil corrosivity,
- soil shrink-swell potential,
- soil settlement potential, and
- soil liquefaction potential.

The USDA maintains the [Web Soil Survey](#) (WSS) which provides soil data and information produced by the National Cooperative Soil Survey. It is operated by the USDA Natural Resources Conservation Service (NRCS) and provides access to the largest natural resource information system in the world. The site is updated and maintained online as the single authoritative source of soil survey information. Figures 3 and 4 display the WSS maps for the project area. Map units are defined below.

*values represented by "0.0%" are non-zero values that are insignificantly small

HYDROGEOLOGY AND HYDROLOGY

Groundwater constraints of the project area that should be considered include:

- depth to groundwater,
- groundwater flow direction, and
- contamination migration potential.

Field explorations via soil borings are recommended to determine and document groundwater depths, flow direction, and contamination migration potential.

HISTORICAL AND CULTURAL RESOURCES

The [National Register of Historical Places](#) (NRHP) lists cultural resources previously recorded on the official list of the Nation's historic places worthy of preservation.

Additional previously recorded resources may be on-file at the Utah State Historic Preservation Office (SHPO). If additional information is needed from the Utah SHPO, a qualified cultural resource professional will need to be consulted.

The table below lists cultural resources in Weber County that have been previously recorded on the official list of the Nation's historic places worthy of preservation. None of the cultural resources recorded on the NRHP in Weber County are present in the project area.

TRIBAL LANDS

The U.S. Domestic Sovereign Nations: [Indian Lands of Federally-Recognized Tribes of the United States map](#) (commonly referred to as Indian lands) identifies tribal lands with the Bureau of Indian Affairs (BIA) Land Area Representation (LAR).

While there are no land-areas of federally recognized tribes located in the project area, the Northwestern Band of the Shoshone Nation is located approximately 20 miles northeast of the project area.

The [Northwestern Band of the Shoshone Nation](#) are represented by Chairman Dennis Alex, elected in April 2020. Their regional office is located at 2575 Commerce Way in Ogden, Utah.

NATURAL RESOURCES

The Endangered Species Act (ESA) provides a program for the conservation of threatened and endangered plants and animals and the habitats in which they are found per 50 CFR 17.

The lead federal agencies for implementing ESA are:

- U.S. Fish and Wildlife Service (FWS)
 - The FWS maintains a worldwide list of endangered species. Species include birds, insects, fish, reptiles, mammals, crustaceans, flowers, grasses, and trees
- U.S. National Oceanic and Atmospheric Administration (NOAA) Fisheries Service

The [U.S. Fish & Wildlife Information for Planning and Consultation \(IPaC\) tool](#) identifies any listed species, critical habitat, migratory birds, or other natural and biological resources that may be impacted by a project.

The yellow-billed cuckoo is a threatened species that may be present in the project area; however, the project area does not overlap its critical habitat. Monarch butterflies are listed as candidate species and may exist in the project area. Ute ladies'-tresses are listed as a threatened plant species that may exist in the project area. Critical habitat for both monarch butterflies and Ute ladies'-tresses have not been designated. There are no critical habitats listed in the project area. It is recommended to determine whether project area is likely to adversely affect threatened and candidate plant and animal species in the project area.

There are 19 migratory bird species that occur on the US Fish and Wildlife Service (USFWS) Birds of Conservation Concern (BCC) list or warrant special attention in the project area with breeding seasons ranging between March 1st and August 31st. These migratory bird species of concern include the American White Pelican, Bald Eagle, Black Tern, Bobolink, California Gull, Cassin's Finch, Clark's Grebe, Franklin's Gull, Golden Eagle, Lesser Yellowlegs, Long-eared Owl, Marbled Godwit, Pectoral Sandpiper, Rufous

Hummingbird, Sage Thrasher, Virginia's Warbler, Western Grebe, and Willet. It is recommended that construction activities are completed outside of the BCC breeding season (3/1 - 8/31).

The Ogden Bay Waterfowl Management Area is located approximately 3 miles southeast of the project area. The Willard Bay Upland Game Area is located approximately 10 miles northeast of the project area. Several other wildlife and waterfowl management areas have been designated throughout Weber County. More information regarding these areas can be found on the [Utah Division of Wildlife Resources website](#).

UTAH NATURAL HERITAGE PROGRAM

The [Utah Natural Heritage Program \(UNHP\)](#), an integral part of the Utah Division of Wildlife Resources and the Utah Department of Natural Resources (UDNR), is the central repository for information on Utah's native plant and animal species, with a focus on rare and other high-interest species. The UNHP Online Species Search Report for the West Weber Project Area is below.

Project Information

Project Name

West Weber Project Area

Project Description

The West Weber Project Area fits the area's economic development vision by encouraging the retention and expansion of existing companies and the recruitment of new companies to create employment opportunities for residents in the area.

Location Description

The West Weber Project Area candidate comprises approximately 9,000 acres and is located east of Promontory Point near the eastern shore of the Great Salt Lake.

Animals within a ½ mile radius

Common Name	Scientific Name	State Status	U.S. ESA Status	Last Observation Year

------	---

U.S. Endangered Species Act

LE	A taxon that is listed by the U.S. Fish and Wildlife Service as "endangered" with the probability of worldwide extinction
LT	A taxon that is listed by the U.S. Fish and Wildlife Service as "threatened" with becoming endangered
LE;XN	An "endangered" taxon that is considered by the U.S. Fish and Wildlife Service to be "experimental and nonessential" in its designated use areas in Utah
C	A taxon for which the U.S. Fish and Wildlife Service has on file sufficient information on biological vulnerability and threats to justify it being a "candidate" for listing as endangered or threatened
PT/PE	A taxon "proposed" to be listed as "endangered" or "threatened" by the U.S. Fish and Wildlife Service

Disclaimer

The information provided in this report is based on data existing in the Utah Division of Wildlife Resources' central database at the time of the request. It should not be regarded as a final statement on the occurrence of any species on or near the designated site, nor should it be considered a substitute for on-the-ground biological surveys. Moreover, because the Utah Division of Wildlife Resources' central database is continually updated, any given response is only appropriate for its respective request.

The UDWR provides no warranty, nor accepts any liability, occurring from any incorrect, incomplete, or misleading data, or from any incorrect, incomplete, or misleading use of these data.

The results are a query of species tracked by the Utah Natural Heritage Program, which includes all species listed under the U.S. Endangered Species Act and species on the Utah Wildlife Action Plan. Other significant wildlife values might also be present on the designated site. Please [contact](#) UDWR's regional habitat manager if you have any questions.

For additional information about species listed under the Endangered Species Act and their Critical Habitats that may be affected by activities in this area or for information about Section 7 consultation under the Endangered Species Act, please visit <https://ecos.fws.gov/ipac/> or contact the [U.S. Fish and Wildlife Service Utah Ecological Services Field Office](#) at (801) 975-3330 or utahfieldoffice_esa@fws.gov.

Please contact our office at (801) 538-4759 or habitat@utah.gov if you require further assistance.

Your project is located in the following UDWR region(s): Northern region

WATER RESOURCES

The Clean Water Act (CWA) establishes the basic structure for regulating discharges of pollutants into the waters of the United States and regulating quality standards for surface waters.

The eastern shore of the Great Salt Lake is located approximately 3 miles west of the project area.

WETLANDS

Section 404 of the Clean Water Act (CWA) establishes a program to regulate the discharge of dredged or fill material into waters of the United States, including wetlands. Activities in waters of the United States regulated under this program include fill for development, water resource projects (such as dams and levees), infrastructure development (such as highways and airports) and mining projects. Section 404 requires a permit before dredged or fill material may be discharged into waters of the United States, unless the activity is exempt from Section 404 regulation (e.g., certain farming and forestry activities).

An individual permit may be required if the project poses potentially significant impacts to the nearby wetland, or if fill from the project area would be discharged into the nearby wetland. Individual permits are reviewed by the U.S. Army Corps of Engineers, which evaluates applications under a public interest review, as well as the environmental criteria set forth in the [CWA Section 404\(b\)\(1\) Guidelines](#).

The [National Wetlands Inventory \(NWI\)](#) was established by the United States Fish and Wildlife Service (USFWS) to conduct a nationwide inventory of U.S. wetlands to provide information on the distribution and type of wetlands to aid in conservation efforts. Wetlands or other mapped features in the NWI may have changed since the date of the imagery and/or field work used for characterization. According to the National Wetlands Inventory, Figures 5 and 6 display national wetlands located in the project area.

FLOODPLAINS

Congress established the National Flood Insurance Program (NFIP) with the passage of the [National Flood Insurance Act of 1968](#). Since the inception of NFIP, [additional legislation](#) has been enacted. The NFIP goes through periodic [Congressional reauthorization](#) to renew the NFIP's statutory authority to operate.

Flood maps are one tool that communities use to know which areas have the highest risk of flooding. FEMA maintains and updates data through [flood maps](#) and [risk assessments](#).

FEMA's [National Flood Hazard Layer \(NFHL\) Viewer](#) is a map tool that identifies flood hazard areas.

The flood hazard survey map for the project area is below (Figures 7 and 8).

PREVIOUSLY IDENTIFIED SOURCES OF CONTAMINATION

To determine whether previously identified sources of contamination are present at the project area, Federal, State, and local government records of sites or facilities where there has been a release of hazardous substances and which are likely to cause or contribute to a release or threatened release of hazardous substances on the property, including investigation reports for such sites or facilities; Federal, State, and local government environmental records, obtainable through a Freedom of Information Act request, of activities likely to cause or contribute to a release or threatened release of hazardous substances on the property, including landfill and other disposal location records, underground storage tank records, hazardous waste handler and generator records and spill reporting records; and such other Federal, State, and local government environmental records which report incidents or activities which are likely to cause or contribute to release or threatened release of hazardous substances on the property can be reviewed. These data sources include the following regulatory database lists and files, and the minimum search distances in miles, as well as other documentation (if available and applicable):

- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), -.5 mile;
- National Priorities List (NPL), - 1.0 mile;
- Facility Index Listing (FINDS), - subject sites;
- Federal Agency Hazardous Waste Compliance Docket, - 1.0 mile;
- Federal RCRA TSD Facilities List, - 1.0 mile; and
- Federal RCRA Generators List, - Subject sites and adjoining properties.

For additional information regarding previously identified sources of contamination, it is recommended that property owners complete a Freedom of Information Act request for Federal, State, and local government environmental records.

ENVIROFACTS

Envirofacts is a single point of access to select U.S. EPA environmental data. This website provides access to several EPA databases to provide information about environmental activities that may affect air, water, and land anywhere in the United States.

Envirofacts allows the search of multiple environmental databases for facility information, including toxic chemical releases, water discharge permit compliance, hazardous waste handling processes, Superfund status, and air emission estimates.

Facility information reports regarding toxic chemical releases, water discharge permit compliance, hazardous waste handling processes, Superfund status, and air emission estimates is publicly available and accessible on the [Envirofacts website](#).

UTAH ENVIRONMENTAL INTERACTIVE MAP

The Utah Department of Environmental Quality (UDEQ) maintains an [Environmental Interactive Map](#) that contains information about drinking water, water quality, air quality, environmental response and remediation, waste management and radiation control, and environmental justice.

The information contained in this interactive map has been compiled from the UDEQ database(s) and is provided as a service to the public. This interactive map is to be used to obtain only a summary of information regarding sites regulated by UDEQ.

UDEQ currently maintains several water quality monitoring wells near the project area. Information regarding these water quality monitoring locations can be accessed via UDEQ's [Environmental Interactive Map](#).

Currently, there are no air quality monitoring stations maintained by UDEQ located in the project area. The closest air quality monitoring station is located at 425 W 2550 North in Harrisville, Utah.

HAZARDOUS MATERIALS

Information gathered relating to past and present land use as well as previously identified sources of contamination can be used to evaluate if readily available evidence indicates whether the presence or likely presence of hazardous materials on or under the property surface exist and attempt to determine if existing conditions may violate known, applicable environmental regulations.

The range of contaminants considered should be consistent with the scope of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and should include petroleum products. The EPA maintains a [List of Lists](#), which serves as a consolidated chemical list and includes chemicals subject to reporting requirements under the Emergency Planning and Community Right-to-Know Act (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA), the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and section 112(r) of the Clean Air Act (CAA).

WASTE GENERATION, STORAGE, AND DISPOSAL

To determine whether hazardous or non-hazardous waste generation, storage, and disposal activities currently exist, it is necessary to conduct a visual site inspection of properties, associated facilities, improvements on real properties, and of immediately adjacent properties. The site inspection should include an investigation of any chemical use, storage, treatment and disposal practices on the properties. Review of Federal, State, and local government environmental records, including landfill and other disposal location records, may determine whether hazardous or non-hazardous waste generation, storage, and disposal activities existed previously on the property.

ABOVEGROUND AND UNDERGROUND STORAGE TANKS (ASTS AND USTs)

Aboveground Storage Tanks are typically regulated by local fire departments. Cleanup of petroleum spills may be handled through Utah State's Underground Tank Program. Additionally, permitting of tanks may be required through the State's air quality program.

AIR QUALITY

The Clean Air Act (CAA) is a federal law that requires the Environmental Protection Agency (EPA) to establish National Ambient Air Quality Standards (NAAQS) for pollutants that are harmful to public health and the environment. NAAQS are established for criteria pollutants which include carbon monoxide (CO), lead (Pb), nitrogen dioxide (NO₂), ozone (O₃), particle pollution (PM₁₀ and PM_{2.5}), and sulfur dioxide (SO₂). [Current Nonattainment Counties for All Criteria Pollutants](#) are maintained by the EPA and updated regularly.

Weber County is currently in serious non-attainment for PM_{2.5} and moderate non-attainment for 8-hour ozone.
