The WFEDD recently completed the 2023-2028 Regional Comprehensive Economic Development Strategy or CEDS. This process took seven months to complete with extensive outreach to stakeholders including government officials, private-sector business and economic development organizations, local and state government economic development staff, and public input. The work by WFRC and the WFEDD is meant to complement and support the work done by the cities and counties and other economic development organizations. **[00:54:15]** Commissioner Froerer introduced Marcia White, WFRC, who, along with Trina Kittleson, Better City, gave a

This is a routine action, which reflects that many of WFRC's projects are multi-year in nature. [01:41:14] Mayor Ramsey asked if there were any comments from the public in attendance. Mayor Ramsey also noted that the plan for Council meetings in 2024 is to change the start time from 2:00pm to 1:30pm. This would better align with the FrontRunner schedule and make it more feasible for people to use - the station is just a few hundred yards away. This would also enable people who drive to leave earlier, and better avoid traffic. [01:52:16] Mayor Mike Caldwell made a motion to adjourn the meeting, which was seconded by Mayor Mark Shepherd. The motion was approved unanimously. The meeting adjourned at 3:59pm.

AGENDA ITEM: 2a
SUBJECTS: **ACTION:** Endorse Appointments to WFRC Council and Committees
PREPARED BY: Andrew Gruber, Executive Director

BACKGROUND:

Under WFRC's Articles of Agreement and Bylaws, each year, appointments to WFRC and its committees are also made by the County Councils of Governments (COGs) in the WFRC region. The WFRC Chair also makes appointments to several WFRC committees.

Prior to the January 25 WFRC Council meeting, the COGs in the region have acted on appointments to WFRC Council and committees. The updated WFRC Council and committee membership lists reflecting any changes will be distributed at that meeting.

RECOMMENDATION:

WFRC staff recommends that the Regional Council make a motion to "endorse the appointments to WFRC committees as presented."

SUBJECT: Utah Legislative Session Overview
PREPARED BY: Miranda Jones Cox, Government Affairs Manager

At the Wasatch Front Regional Council (WFRC) meeting, the Council will be briefed on key issues in the 2024 General Legislative Session, including relevant transportation, housing, economic development, land use, and other legislation and appropriations.

BACKGROUND:

Utah Legislative Session Preview

The 45-day General Legislative Session began Tuesday, January 16th and runs through Thursday, March 1st.

WFRC members can keep themselves apprised of notable relevant legislation by subscribing to WFRC's [Government Affairs](#) emails which are frequently distributed during the session. Members may also reference WFRC's [bill tracker](#), and [appropriations tracker](#) found on WFRC's website.

WFRC's legislative engagement is coordinated on behalf of our communities by Executive Director Andrew Gruber, Government Affairs Manager Miranda Jones Cox and WFRC's state legislative consultants Rob Jolley, Chris Bleak, and Jodi Hart. On legislative issues, WFRC works in close partnership with local governments directly and through the Utah League of Cities and Towns and Utah Association of Counties, as well as our transportation agency partners at the Utah Department of Transportation, Utah Transit Authority, and Mountainland Association of Governments.

SUBJECT: Report on Board Modifications to the 2024-2029 TIP
PREPARED BY: Ben Wuthrich, Transportation Improvement Program Coordinator

BACKGROUND:

Since the last meeting of the Wasatch Front Regional Council (WFRC), WFRC received requests to modify the current 2024-2029 TIP. The modification required action from Trans Com (since WFRC was not meeting) and the Utah Transportation Commission but did not require a new air quality conformity analysis or a 30-day public comment period. The modification is attached to the approved resolution.

The Little Cottonwood Canyon EIS Record of Decision identified tolling in Little Cottonwood Canyon as a key element of Phase I of the selected alternative. UDOT proposes to implement a similar tolling policy in Big Cottonwood Canyon to reduce the potential for causing greater traffic congestion on SR-190. An environmental study must be completed in Big Cottonwood Canyon before tolling can be implemented.

The scope of this project is to add dual right turn lanes on 650 North to the South bound on ramps of I-15. This will allow better utilization of the existing dual left turn lanes on SR-126.

Weber	South Ogden	40th St & Chimes View	16936	Old - 40th Street & Chimes View from Riverdale Road to Washington Blvd New - Chimes View from Riverdale Road to Country Club Drive	Reconstruct with minor widening, improvements to Drainage, Curb, Gutter and Sidewalk	STP_URB_SL Surface Transportation Program - Urban Area Salt Lake (WFRC)	\$4,945,200	\$4,000,000	<i>Additional Funding</i>	\$200,000	2023-2024
						LOCAL_GOVT Local Matching Funds		\$745,200			

The original project was to reconstruct 40th Street & Chimes View (2 One-way couplets) from Riverdale Road to Washington Blvd, including improvements to curb, gutter, and sidewalk. However, in the recent plan-in-hand review process, it was determined that the necessary project improvements would more than double the project cost due to higher than expected inflation, additional right of way, safety enhancements, retaining wall, increased asphalt and roadbase thickness. With the need for additional funds, South Ogden is proposing to split the project into two phases. Splitting the project would allow the City to use the available money to fund part of the project while seeking additional funding for the remaining portion. Based on the available funds and maintenance needs, the proposed phasing would include construction on Chimes View Drive from Riverdale road to Country Club Drive, complete all project design, and acquire all right of way. South Ogden is also requesting an additional \$ 200,000 to allow the team to finalize the design and property acquisition.

-------	------	--------	-------	-----------------------	-------------------------	---	-------------	-------------	---------------------------	--------------------	-----------

The scope of the SR-273 project is to remove and replace 2” of pavement on the roadway surface. After the pavement project was funded, it was identified that the structure that carries SR-273 over US-89 needed deck pothole patching and a new microsurface. This request will add the scope and funding to the existing project.

Weber	Washington Terrace	300 West	17795	300 West; 5000 South to Riverdale City Boundary	Reconstruct Roadway and improve Curb, gutter, and sidewalk where necessary	STP_URB_OL Surface Transportation Program - Urban Area Ogden/ Layton (WFRC)	\$3,774,100	\$2,702,831	Additional Funding	\$215,000	2023-2024
						LOCAL_GOV Local Matching Funds		\$321,269	Additional Funding	\$535,000	

This project will reconstruct 300 West, from 5000 South to Riverdale Road with improvements to curb, gutter, sidewalk where necessary. As the project has moved through the design process the engineers estimate determined the project to be approximately \$ 750,000 over the programmed amount. The cost increase was mostly accredited to an increase in building materials and labor, and the number of pedestrian ramps that needed to be replaced. Washington Terrace is continuing to work with and identify solutions to reduce the overall project cost and is requesting an additional \$ 215,000 in Urban Surface Transportation Program (STP) funds while the City will be responsible for their matching funds and any shortfalls.

This project will improve the intersection of 800 West and 1500 South by separating turning movements from through lane travel and installing a traffic signal. Intersection improvements will include additional right of way for turning lanes and ada ramp improvements. The project was initiated three years ago; however due to new development in the area, the warrants were only obtained this year. Since the project initiation, the construction costs and materials have increased more than originally anticipated. Woods Cross is requesting an additional \$ 250,000 in Urban Surface Transportation Program (STP) funds so that the project can advertise this fall.

The Shepard Lane interchange project is to construct a new interchange on I-15 and also includes a series of pedestrian structures at the Park Lane Interchange. When the project bid was opened, the bids exceeded the current project funding. Region One requests the additional funding so that the project can be awarded as well as provide contingency for the project during construction.

The scope of this project is to reconstruct and widen SR-39 from 4700 W. to SR-126. Due to the cost of this project the funding is coming from both the Statewide TSP funds and two years of Region One TSP funds. This request is to add \$20,000,000 of Statewide TSP funds with the anticipation that Region One will be presenting this project again at a later time to add Region TSP funds.

						STP_BRIDGE STP - Bridge Funds for State Projects					

The scope of this project is to remove and replace the Devils Slide Bridge, this bridge is an off-system structure maintained by Morgan County but is a critical bridge servicing the Holcim cement plant. Because of the tight work constraints, winter work window, river fluctuations, UPRR property, and remote location the project has experienced un-anticipated challenges and increased costs including: additional track monitoring (UPRR), pavement repairs, drilled shaft heaving, robust river diversions, schedule slip, and temporary structure costs.

The scope of the I-84; Over Weber River and UPRR Bridge project will replace two bridges, 2C 476 and 4C 476, on I-84 over the Weber River at milepost 91 in Weber County. Based on the most recent estimate, the total project value of this project has increased by \$16,000,000 since the project design was initiated in 2020. The complicated geometry in the canyon and the relationship of the road to the railroad, has led to additional walls, rockfall mitigation, and other modifications to the originally proposed alignment. Through the review process with Union Pacific Railroad Road (UPRR) it was directed that an existing retaining wall would need to be removed, which increased the length of the westbound bridge by 100ft and required a new retaining wall. In addition, the railroad corridor has increased train operations over the last several years. To minimize disruptions to railroad operations, there are limited windows allowed for construction work resulting in a longer construction schedule and increased costs for flagging operations during construction.

The scope of this project is to create a pedestrian and bicycle crossing of SR-186 at Kensington Avenue and add landscape features along SR-186. The bid was opened on December 14, and with the current project funding, we are not able to construct the project. This additional funding will cover the higher bid prices, allow us to award the project as well as provide a contingency for the project during construction. The additional funds are coming from an agreement with Salt Lake City.

The scope of this project is to add one travel lane southbound from Sunset Lane to Stansbury Parkway. The project estimate was originally developed in 2021. Since the original estimate, the roadway has had a median barrier placed requiring additional shoulder width to be needed, and homes developed along the roadway requiring a sound wall to be placed. The current engineer estimate reflecting these items and today's bid prices show a project need of \$14 Million. Region Two would like to add these funds to deliver the project as scoped.

This project includes the bridges carrying SR-201 over 3200 West a(OC 709) and 5600 West over I-80 (OC 669) in Salt Lake County to address structural deficiencies. The SR-201 bridge carries an average of 114,000 vehicles a day. In order to maintain this level of traffic, as well as to facilitate efficient fatigue crack repairs to the steel bridge beams, it was determined the best course of action was to close the bridge during construction. Traffic will be detoured over the interchange ramps. The additional project funding will address ramp upgrades in order to facilitate this maintenance of traffic plan.

The original scope of the SR-126 (Main Str/ State Str); I-15 to 300 N. project was to add 1" of pavement to the roadway surface. However, the roadway is experiencing deeper rutting and pavement failures at the SR-193 intersection than was anticipated. The project team recommends that 2" of pavement be removed and replaced at this intersection and that some additional roadway features, such as curb and gutter along the roadway be included in the project scope.

The S-Line, which launched in 2013, currently runs between Central Pointe Station (221 W. 2100 South in South Salt Lake) to Fairmont Station, which is located at 1040 E. 2200 South in Salt Lake City. UTA completed some double-tracking on the line in 2019 that allowed the street car service to run every 15 minutes. This project will extend the S-Line from the end of line at Fairmont Station at 1040 East along the north side of Simpson Avenue to the heart of the Sugar House business district at Highland Drive. This is a distance of about 900 feet. The projected cost for this extension is \$16 million for construction related costs (including right of way, utilities, etc.) and \$7 million for a vehicle for a total of \$23 million. The Utah Legislature has appropriated \$12 Million for the project. Salt Lake City is pursuing \$10 million from sources such as Transit Transportation Investment Fund (TTIF). Utah Transit Authority has funding allocated to cover amounts that TTIF may not be able to, and to cover cost escalations/contingencies.

AGENDA ITEM: 5a
SUBJECT: **ACTION:** Station Area Plan Certification Request–13 Stations in downtown Salt Lake City
PREPARED BY: Meg Townsend, Community and Economic Development Director

At the January 18th Regional Growth Committee (RGC) meeting, WFRC staff, and representatives from Salt Lake City, presented a certification request for 13 Salt Lake City station areas, in accordance with the Station Area Planning (SAP) components of state law and WFRC policy: 900 South, 600 South, Courthouse, Gallivan Plaza, City Center, Temple Square, Arena, Planetarium, Old Greek Town, Salt Lake Central TRAX, Salt Lake Central FrontRunner, North Temple Bridge/Guadeloupe TRAX, and North Temple FrontRunner.

RGC recommended that the Wasatch Front Regional Council certify these 13 stations, as they meet the requirements for prior actions as described below.

BACKGROUND:

[HB462](#), passed in 2022, as amended in 2023, requires cities with fixed-guideway transit stations to develop a Station Area Plan for the area around the station, within ½ mile for rail and ¼ mile of bus rapid transit. [Station Area Plans](#) (SAPs) are intended to promote housing availability and affordability, access to opportunities, sustainable environmental conditions, and transportation choices and connections. The [SAP requirements](#) are consistent with communities' identification of [Wasatch Choice Vision](#) centers.

WFRC staff has been assisting communities in their development of their station area plans, in partnership with UTA, GOEO, and the Mountainland Association of Governments (MAG). At the RGC meeting, WFRC staff will provide an update on Station Area Planning to date, and discuss the Salt Lake City SAPs that have been submitted to WFRC for certification, pursuant to state law and WFRC policy.

STATION AREA PLAN CERTIFICATION

State law establishes that the Metropolitan Planning Organizations (MPOs – WFRC and MAG) have the responsibility to review and, in consultation with UTA, certify each SAP for compliance with statutory requirements. In May of 2022, and amended in March of 2023, WFRC adopted a [policy for the certification review](#) of SAPs.

Cities may satisfy the SAP requirements, in whole or in part, by submitting adopted resolutions that find that prior actions have substantially promoted the SAP objectives in whole or in part. Prior actions refer to adopted plans or ordinances, approved land use applications, approved agreements or financing, or investments that have been made, before June 1, 2022, that substantially promote each of the four objectives within the station area. Cities must demonstrate that such plans, ordinances, approved land use applications, approved agreements or financing, or investments are still relevant to making meaningful progress towards achieving such objectives.

ACTION: Certify Salt Lake City Downtown Stations

Salt Lake City has submitted an adopted resolution finding that prior actions substantially promote the required objectives for the city's downtown station areas, pursuant to 10-9a-403.1 (2)(b). Such prior actions include but are not limited to: the Downtown Plan; zoning changes that allow up to, and even exceed, 50 units/acre, and encourage a mix of uses; cycling

improvements such as those along 300 West and 900 S; reduced or eliminated parking minimums; water-wise landscaping requirements; improvements to Pioneer Park; and the Funding Our Future sales tax increase to fund affordable housing initiatives. The Downtown Plan included a goal to build 10,000 homes downtown by 2040. As of 2022, the city had already built 9,076, with hundreds more on the way. The extensive list of actions taken by Salt Lake City to fulfill the requirements pursuant to 10-9a-403.1 (2)(b) is summarized in the Staff Findings attachment. Though there is a high degree of overlap amongst the 13 station areas, the report organizes the actions by each station area, as well as by the four objectives outlined in the legislation.

In accordance with our policy, WFRC staff has reviewed the submission to assess its satisfaction of the requirements of the statute, and made a positive recommendation for certification to the Regional Growth Committee. All of the documentation is included within, including:

1. Salt Lake City's Downtown Stations Resolution
2. WFRC SAP Certification Resolution
3. WFRC Staff Findings and Analysis

RGC voted to recommend the Council certify these stations based on the analysis of the SLC submission.

RECOMMENDED MOTION:

The Regional Growth Committee and WFRC staff recommend that the Council adopt a “motion to certify these 13 downtown Salt Lake City Station Areas.”

AGENDA ITEM: 6a
SUBJECT: Potential Impacts of Federal Ozone Air Quality Standards
PREPARED BY: Wayne Bennion, Director of Short Range Planning

Utah is currently not able to meet requirements of the Federal Clean Air Act related to ozone levels. These requirements are extremely difficult to meet because of high levels of "background" ozone, which comes from outside Utah or from natural sources. This situation poses potential risks for significant highway and transit capacity-increasing projects to proceed. WFRC staff, in collaboration with Utah Division of Air Quality staff, will brief the Regional Council on this issue and discuss ongoing collaborative efforts to address the situation.

BACKGROUND:

When national air quality standards are established, the federal Environmental Protection Agency (EPA) designates areas throughout the country as attaining or not attaining these standards. In 2018, the EPA designated the "northern Wasatch Front" area as nonattainment for ozone. Since that time, the Utah State Division of Air Quality (DAQ) has been monitoring ozone levels, modeling air quality conditions, and developing what is known as a State Implementation Plan (SIP) for air quality. The purpose of a SIP is to describe how the air quality standard will be attained. WFRC, UDOT, and others have provided technical and other support in this process.

As a Metropolitan Planning Organization, under federal law WFRC has the responsibility to determine the conformity of transportation plans and programs in our region with the applicable emission budgets established in the SIP.

If the EPA disapproves the ozone SIP adopted by the Air Quality Board, that will trigger regulatory restrictions that can have significant consequences on Utah's transportation and development, restrictions that can become increasingly onerous over time.

Recognizing the deleterious impacts on human health from ozone, Utah is making concerted efforts to reduce the emissions that lead to the formation of ozone.

But the particular challenge faced in Utah -- a challenge that is shared across the intermountain west -- is that the majority of our ozone is "background" ozone; it comes from outside of Utah (from other states or even internationally), and/or from natural sources (e.g., certain trees). Therefore, even with careful management and control of emissions, ozone levels still exceed the applicable standards.

RECOMMENDATION:

This item is for information only.

Summer Ozone Attainment and Transportation Conformity:

Emerging Transportation Planning Issue related to Clean Air Act Requirements

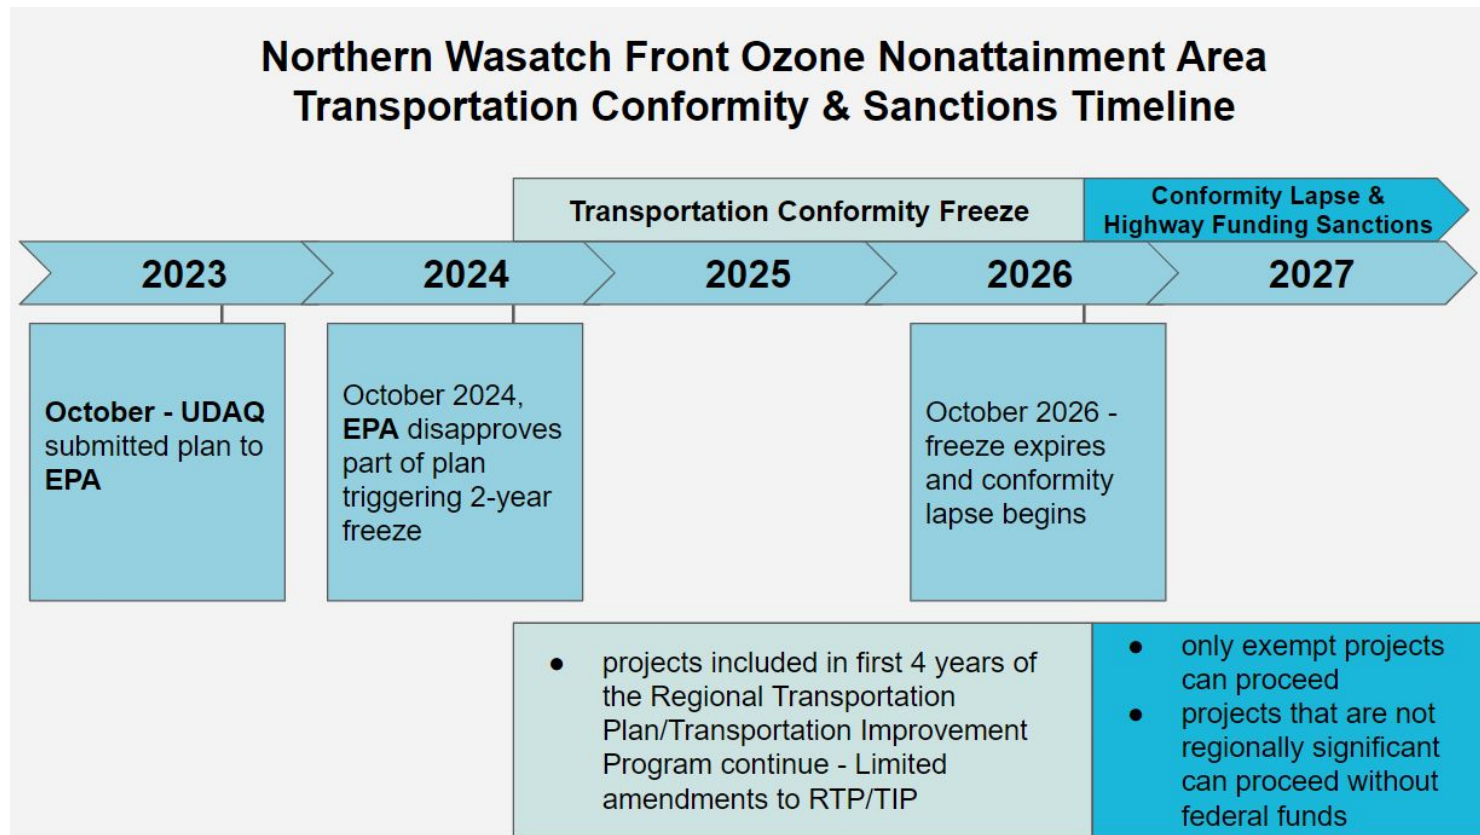

Federal Clean Air Standards: Impacts of Nonattainment on Transportation Projects

Issue: Utah is not able to meet the requirements of the Federal Clean Air Act

Impact: Limitations to transportation project construction and planning under the Federal Clean Air Act

Federal Clean Air Standards: Impacts of Nonattainment on Transportation Funding and Planning

Federal Clean Air Standards: Impacts of Nonattainment on Transportation Funding and Planning

Examples of Potentially Impacted Transportation Projects:

- I-15 reconstruction/widening Davis County
- Bangerter Multiple Interchanges
- MVC; Porter Rockwell to Old Bingham Hwy
- Front-Runner Forward
- Point of the Mountain transit
- 5600 West Core Bus Route

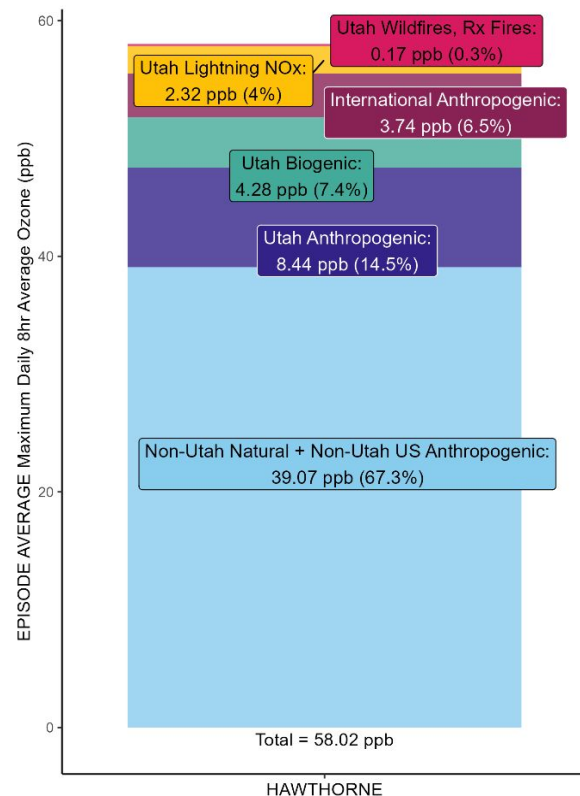

Local versus uncontrollable emissions

Summer ozone formation is driven by precursor emissions from local, transported and natural sources.

Only 14% of the emissions that drive ozone concentrations along the Wasatch Front are from Utah manmade sources.

What can be regulated by the state is about 5.8% of the total.

Most reasonable controls have already been implemented for winter PM2.5 particulate planning efforts

Strategy to Address Transportation Impacts

- Work to meet requirements with the State Implementation Planning tools that reduce emissions and show reasonable progress.
- Prepare a modeling demonstration of the impact of international transported emissions under CAA 179B.
- Litigation strategy based on EPA actions under international transport and plan reviews.
- Multistate letter/congressional actions to amend the prescriptive provisions of the Clean Air Act and EPA's implementing regulations.

Federal Clean Air Standards: Impacts of Nonattainment on Transportation Funding and Planning

- DEQ needs support for emission reduction rules and incentive programs to attempt to meet CAA requirements.
 - Rule R307-314 Limitations on Use of Two-Stroke Small Off-Road Engines in Yard Care Activities
 - Reallocate Incentive funding to purchase electric two-stroke equipment
 - FTE for State Implementation Plan Coordinator
 - Support funding plan for international transport modeling
- UDOT is working with transportation partners to ensure that transportation plans are updated before a potential freeze.
