Electricians OJT in Utah

Problematic

Questions:

- What standards are used to evaluate education?
 - State standards discussed with Schools in February 2019?
 - NEC is a factor
- Educational hours is a factor (4 years for Utah students)
- How current is a factor
- Supervised work time is a factor
- Legally working in their jurisdiction is a factor
- Other Certificates could be a factor (DOL certificate?)
- There won't be exact matches - needs to be a % match to qualify

Example: Danner Leishman

- Have permission to use him as an example
- Completed 4 years in Idaho (College of Eastern Idaho Apprentice)
- Passed ID written test
- Moved to Utah before he completed his work experience in ID
- Obtained UT Apprentice License
- Took and passed UT Tests
- Submitted to DOPL
- DOPL → IEC → ??
- IEC Review would be to recommend to take test, then issue license upon meeting OJT requirements.
- No Rubric for consistency, present to board, but potential for inconsistency here too.

Proposal:

1. Approve Danner to move forward rather than being stuck in bureaucracy
2. Establish a task force to create a rubric for approval by board
 - a. Major approved players engaged: ETA, USHE, IEC
 - b. Consult with International team at DOPL
 - c. Bring recommendations back to this board for approval
