

# Amendment #1 to the 2023-2050 Regional Transportation Plan and Air Quality Conformity Memorandum #42

## Public Comment Period, March 22 - April 23, 2024

The **Wasatch Front Regional Council** (WFRC) invites the public to provide feedback on the draft of Amendment #1 to the **2023-2050 Regional Transportation Plan** (RTP) and the draft of **Air Quality Conformity Memorandum #42**.

### What is the Regional Transportation Plan?

The Regional Transportation Plan (RTP) is the **regional long-term strategy for our Region's future transportation system** from now to 2050. The Wasatch Front Regional Council (WFRC) works with transportation partners and local communities, organizations, stakeholders, and residents to develop the plan.

### What is the Public Comment Period For?

Every four years, WFRC prepares and adopts an RTP. WFRC adopted the current 2023-2050 RTP in May 2023. While the RTP receives considerable review before being formally adopted, circumstances may warrant a change to the RTP after its initial adoption, including funding availability, changing local and state needs, modifications to land use, the outcomes of environmental analyses and other planning studies, or updated timelines on the development of projects.

Amendment #1 to the 2023-2050 RTP is multimodal – it includes active transportation, transit, and roadway projects developed in consultation with transportation partners and local communities across the Wasatch Front.

The public comment period for the Amendment #1 projects runs from March 22 - April 23, 2024, and are **available for review and comment here**:
