

The Logan City Public Works Department, City of River Heights, City of Providence, Town of Millville Public Works Department, City of Nibley, and Cache County Public Works Department in accordance with National Flood Insurance Program regulation 65.7(b)(1), hereby gives notice of the Communities intent to revise the flood hazard information, generally located between Mendon Road, State Route 165, and E 400 N (Highway 89). Specifically, the flood hazard information shall be revised along the Logan River, Little Logan Divided Flow Path, Logan River 1000W North Divided Flow Path, Logan River 1000W South Divided Flow Path, Logan River Golf Course North Divided Flow Path, Logan River Golf Course South Divided Flow Path, and Logan River Crockett Split from a point approximately 1,100 feet downstream of Mendon Road to a point immediately downstream of State Dam. In addition, the flood hazard information shall be revised along Blacksmith Fork, Blacksmith Fork Tributary, Blacksmith Fork Tributary Railroad Split Flow Path, Blacksmith Fork 1700 S Split Flow Path, and Blacksmith Fork 450W Split Flow Path from the confluence with the Logan River to approximately 250 feet upstream of South Main Street (SR 165). The flood hazard information shall be also revised along Spring Creek, Spring Creek Divided Flow Path, and Country Manor Divided Flow Path from the confluence with Logan River Golf Course South Divided Flow Path to just downstream of South Main Street (SR 165). Finally, the flood hazard information shall be revised along Little Ballard Creek and Little Ballard Creek Split Flow Path from the confluence with Blacksmith Fork River to a point approximately 540 feet upstream of Talon Drive.

As a result of the revision, the floodway shall be established along all revised reaches.

The floodway shall also increase and decrease along the Logan River, Blacksmith Fork, and Spring Creek.

The 1% annual chance water-surface elevations shall be established along all revised reaches.

The 1% annual chance water-surface elevations shall increase along Blacksmith Fork and increase and decrease along the Logan River and Spring Creek.

The 1% annual chance floodplain shall be established along all reaches besides Blacksmith Fork and Spring Creek.

The 1% annual chance floodplain shall increase and decrease along the Logan River, Logan River Golf Course North Divided Flow Path, Logan River Golf Course South Divided Flow Path, Logan River Crockett Split, Blacksmith Fork, Blacksmith Fork Tributary, Blacksmith Fork Tributary Railroad Split Flow Path, Blacksmith Fork 1700

S Split Flow Path, Blacksmith Fork 450W Split Flow Path, Spring Creek, Spring Creek Divided Flow Path, Country Manor Divided Flow Path, and Little Ballard Creek.

Maps and detailed analysis of the revision can be reviewed at the Logan City Public Works Department at 290 North 100 West, Logan, Utah. Interested persons may call Darren Farar (Logan City) at 435-716-9160, Matt Philips (Cache County) at 435-755-1639, Chad Kendrick (Millville City) at 435-994-1232, Larry Jacobson (Nibley City) at 435-512-7495, Ryan Snow (Providence City) at 435-752-9441, or Jason Thompson (River Heights) at 435-752-2646 for additional information from April 2nd to April 31st, 2024.
