BACKGROUND DISCUSSION:

This item consists of two separate sewer projects. The first project is the rehabilitation of three sewer diversion manholes at Old Bingham Highway, 4800 West, and 9000 South. In the past, these diversion manholes split the flow to distribute it to both the 90th South trunkline, and along 4800 West to the 78th South trunkline. However, debris buildup on the splitting mechanisms causes the sewer to backup, and requires the sewer crew to spend every Friday afternoon cleaning off the dividers, which is a heavy burden on the operations manpower. Engineering staff designed new manhole bases to channel the flow to the appropriate trunkline, eliminating the need to have the diversions.

The second project is to replace, by open trench excavation, approximately 400 linear feet of damaged clay sewer pipe with new 8-inch PVC sewer pipe. The work will include sewer manholes, service laterals, and asphalt replacement upon completion of the work. Both projects are listed in the Sewer Master Plan and Strategic Plan.

The bid was advertised through the West Jordan Purchasing Department, and two companies responded with bids. The lowest responsible bidder is S&L Inc. with a total price of \$231,082.13, see attached bid results. S&L is just finishing up a water line project for the City at 2700 West and 9000 - 9400 South, and they have done satisfactory work for the City on that project. The bidding documents were reviewed and evaluated to ensure S&L Inc. met the bidding requirements.
