

# PUBLIC NOTICE

The Federal Environmental Protection Agency (EPA) is requiring that Torrey identify any lead water lines in the area.

**WE NEED YOUR HELP.**

**STEP 1:** Please join a Public Outreach **meeting** during the regularly scheduled City Council meeting on **April 11th, at 6:30 pm at Torrey Town Hall**, 100 North 75 East in Torrey for information about this survey.

**STEP 2:** If you can identify the type and size of water pipe to your home, please use the QR code on the right to complete the short on-line survey. If you're unsure what type of pipe you have, the pictures on the back of this letter may help. You may also come to city hall and view a sample board. **Please fill out this QR survey before April 30th, 2024.** Survey instructions are on the back of this letter.

**STEP 3:** If you are unable to respond to the above survey, we may attempt to document your water line through other means including contacting you directly.

If you have any questions or concerns, please feel free to ask them during the upcoming public meeting or call city hall, (435) 425-3600.

We greatly appreciate your help.

**NOTE:** If your service lateral was replaced or installed after 1989 your service lateral will not be lead, but we still need you to complete the survey for documentation purposes. Thank you.

Additional information on the Lead and Copper Service Rule Revision can be found at the websites below.
