Hi Bill,

The evening festivities at the Draper Historical Park just before Halloween last year were a great success and very well attended, congratulations!

As someone that lives off the continuation of 9th East past 12650 South the parking situation on our lane became a real problem. People parked randomly off the lane and it was so narrow that I could not get my truck through the space that was left.

If an emergency vehicle would have been needed down our lane, it would not have been possible. Thankfully, we didn't have that need.

It would be nice to have a sign at the corner of 9th E and 12650 S that advised people that it is not a through street and that there is no parking on the lane.

Thank you for your consideration.

Be well,

Rob Longacre
