

# SPANISH FORK

PRIDE & PROGRESS

## What is Rain Harvesting?

- Rain barrels are placed under roof downspouts to collect the water that falls during rainstorms. The water that is collected can be used for a variety of outdoor purposes, including irrigating gardens and lawns.

## Benefits

- Conserves Water.
- Improves water quality and lessens the amount of water into the storm drains.
- Gives residents a perspective of how much water they use.
- Use it to water indoor plants.
- Supplement your drip irrigation system.

## Rain Harvest Utah

- In its 10th year
- 125+ participating cities in the US
- 13+ participating cities in Utah
  - Distributed 5700 barrels over 7 years
- 2 in Utah County (Orem and Lehi)

**If we participate:**

- Barrels cost \$111
  - Residents pay \$83
  - City subsidizes \$28
  - Residents pick up the barrels.
- Sign on Commitment with URC for 100 barrel minimum (\$2800)
- URC would do the majority of the marketing but also send us a packed to help promote it through our social media and website
- SFC would need to help verify proof of residency as they collect applicants.
- We can be involved as much as we want to be.
- Program is for spring of 2025
