

# UTAH STATE BOARD OF EDUCATION

**Subject:**

DISCUSSION: Measuring the Results of Appropriations for Specific Programs - Examples

**Agenda item type:**

Discussion Item

**Recommended Action:****Background:**

The Utah State Board of Education (USBE) currently operates under performance measures mandated by legislation. However, there exists an opportunity to enhance our understanding of the impact of allocated funding by incorporating additional data and information focused on the specific benefits or positive outcomes derived from these investments, using an agreed-upon standard of measure.

This discussion is to follow up on the March 2024 Finance Committee direction to staff to develop a "proof of concept" logic model around two specific programs; To and From Pupil Transportation and Competency-Based Learning.

USBE staff will present the proof of concept drafts to get feedback and additional direction from members of the USBE Finance Committee on ways staff can modify the model to meet the needs of the Board.
