1. Introduction

Alpine School District (“ASD” or “The District”) contracted MGT to provide demographic information and analysis so the district can make informed decisions for a more vibrant future. These strategic consulting services are designed to assist ASD with an informational feasibility study on district reconfiguration.

The project included the following tasks:

- Project initiation
- Analysis of school and community demographics
- Analysis of school capacity
- Stakeholder interviews
- Budget and expenditure analysis
- Community engagement
- Analysis of findings and recommendations
- Preparation and presentation of findings and recommendations

This report consists of ten sections. Sections 1.0 through 7.0 describe the methodology, approach, and the data gathered as part of the study. Section 8.0 identifies the scenarios and options developed for consideration. Section 9.0 outlines the Community and Stakeholder engagement process as well as the results from that process. Section 10.0 describes the results of the analysis, recommendations, and planning priorities. The sections are as follows:

- Section 1.0 – Introduction
- Section 2.0 – Evolving Demographics
- Section 3.0 – Economic Overview
- Section 4.0 – Community Indicators
- Section 5.0 – Educational Landscape
- Section 6.0 – Geographical Considerations
- Section 7.0 – Financial considerations
- Section 8.0 – Scenarios and Options
- Section 9.0 – Community and Stakeholder Engagement
- Section 10.0 – Findings and Recommendations

Background

Utah's Alpine School District is an educational establishment that caters to Utah County communities. The district serves a varied student body in suburban and rural environments, including Lehi, American Fork, Pleasant Grove, and Highland. The 92 schools of the Alpine School District—60 elementary, 14 middle/junior high, and 11 high schools—serve an estimated 85,000 students across various grade levels. Additionally, there are 7 special purpose schools in the region.

In 2018, Orem, Utah, debated Proposition 2 to create a separate school district. This was driven by demographic challenges of the district overall and the differing needs of the western and eastern school communities. While Proposition 2 did not pass, the proposal sparked further discussions about the allocation of financial resources between eastern and western school communities. Simultaneously, a \$595 million district-wide bond for improvements failed, reflecting broader spending concerns. These events prompted a reassessment by the Alpine School District of educational needs and community sentiments.

The Orem proposal emerged due to concerns over the growing facility needs of western school communities and the strain it placed on existing educational resources within the Alpine School District. The Orem ballot initiative aimed to break away from the Alpine School District to form an Orem-only school district. Proposition 2 proved to be a contentious issue for the city. Political committees were formed in support of and opposition to the proposition.

Much of the discussion centered around concerns that eastern financial resources were being inadequately proportioned to support the facility needs of the western school communities while the needs of the more established, older facilities of the eastern side were not being addressed. Additionally, the demographic shifts and declining student enrollment in many of the Orem schools led to closures and the shifting of several of the dual language programs that are central to the educational identity of many of those same schools. Western advocates pointed out that the larger, growing schools of the west served to increase the amount of student support received from the state (Weighted Pupil Unit). It was noted that this increase in overall financial resources served to support the academic programs of the smaller eastern schools.

Supporters of the new district argued that a smaller, more localized administration would better address the specific needs of Orem's schools and students. They believed that a closer connection between the community and its educational leadership would lead to more responsive policies and improved academic outcomes.

Opponents, however, expressed skepticism about the financial feasibility of establishing a new district. They raised concerns about potential tax increases and the division of resources that could negatively impact schools remaining in the Alpine School District. Additionally, some were concerned that creating a separate district could exacerbate inequalities by favoring more affluent areas.

The debate stirred on for months, with both sides engaging in public forums, town hall meetings, and intense lobbying efforts to sway public opinion. Ultimately, in a vote in November 2018, residents of Orem decided against the creation of a new school district. The Proposition 2 vote to break away from the Alpine School District to form an Orem-only school district was defeated with 71.59% voting against and 28.41% in favor. This is a 43.18 differential.

1. INTRODUCTION

The outcome reflected the complexity and competing interests of such decisions. While supporters of the new district were disappointed, opponents saw it as a validation of their concerns about the potential drawbacks. Overall, the debate sparked important conversations about the future of education in Orem and Alpine School District as a whole. It also framed the broader challenges of managing growth and resources in rapidly expanding communities with disparate demographic demands.

In addition to the Orem vote regarding the reconfiguration of the district, there was a District-wide vote regarding a \$595 million bond. The bond was intended to address various needs within the school district, such as infrastructure improvements, facility upgrades, and other educational enhancements. However, 53.8% of voters opposed the bond, while 46.2% were in favor. The defeated bond vote in the Alpine School District became enmeshed in the broader city elections of Orem that included Proposition 2. This difference of 7.6% presented a notable challenge for the district.

The rejection of the bond was a first for the district. It reflected a divergence in opinions among voters in the various school communities regarding the allocation of funds and the priorities of the school district. It exposed broader concerns among residents about the proposed spending. The defeat of the bond also added to the complexity of the educational landscape in Orem and the broader Alpine School District. In that light school officials chose to reassess how to address the district's pressing infrastructure and educational needs and contracted with MGT to explore the broader community sentiments regarding reconfiguration.

2. Evolving Demographics

MGT utilizes several tools and databases to assess key focus areas such as demographics, educational attainment, workforce, and occupational trends. One such tool is Lightcast, a labor market analytics modeling tool which draws data from sources such as the Bureau of Labor Statistics and U.S. Census Bureau. Further, MGT conducts primary and secondary research accessed via systems such as the Integrated Postsecondary Education Data System (IPEDS) and National Center for Education Statistics as well as peer-reviewed research and policy briefs imparting empirical findings and best practice in the field.

Overall Population

The population in Alpine School District Region increased by 16% over the past five years and is projected to grow by 13% over the next five years and by 26% by 2033. In contrast, the state of Utah is projected to increase by 18% and the nation is expected to experience an increase of 6% by 2033.

Exhibit 2.1. Population of Alpine School District Region, North Carolina, and Nation, 2023-2033.

Area	2018 Population	2023 Population	2033 Population	Change	% Change

Source: Utah County

Population by Age

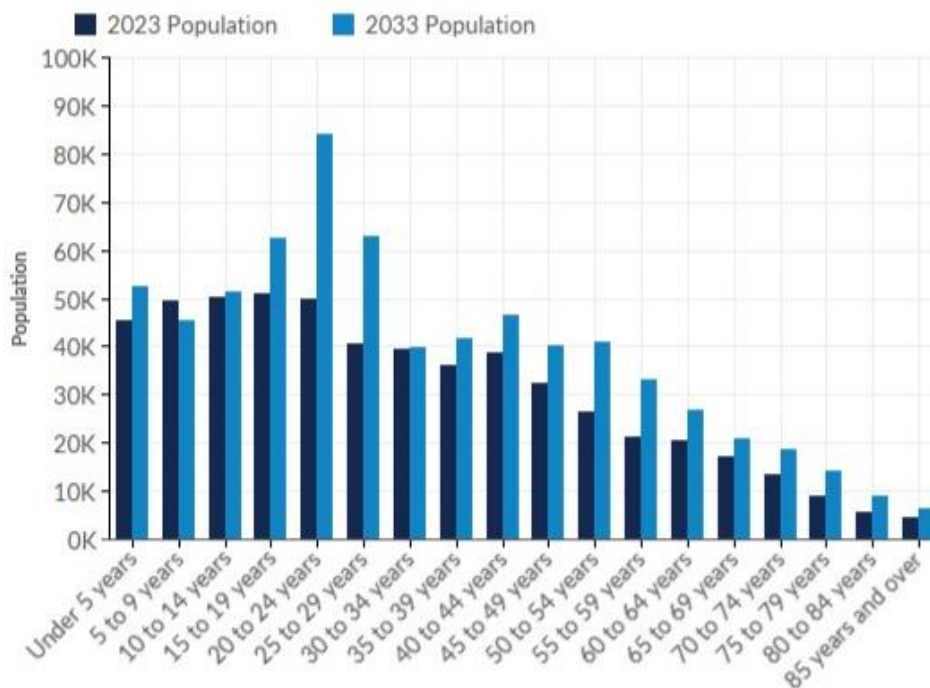

The projection of future data by Lightcast involves applying a cohort model to the data, anticipating the birth, death, and migration rates based on historical data, and adjusting for Census estimates. By advancing the population's age forward by one year and applying birth, death, and migration rates to the population, the cohort model generates demographic data for the projected years. Every year for which projections are made, this process is repeated. Following the cohort model's execution, forecasted years of data are contrasted to national estimates provided by the Census Bureau and are then modified to reflect the population's published growth rate.

Alpine School District Region demographics indicate mostly increasing traditional PK-12 age population (5 to 19 years) at the local level by 2033. The 10 to 14 cohort is projected to increase by 3% (1,319 individuals). The 15-to-19-year group is expected to increase the largest in the school age population by 23% or 11,480 individuals. The 5 to 9 cohort is expected to decrease by 8% (3,923 individuals).

Compared to the state of Utah in **Exhibit 2.42.4**, the 2033 PK-12 is estimated to grow by 3% (17,717 individuals). For the population that falls into the 15 to 19 age range, a 6% growth (17,590 people) is expected in the next 10 years. The percentage of the population that falls into the 5 to 9 age range will experience a 4% (10,154 individual) increase in the state. The 10 to 14 cohort in the state will experience a 4% (10,026 person) decrease.

Population by Race and Ethnicity.

Alpine School District Region Population

Those who identify as White, Non-Hispanic, are still predicted to account for 78.0% of the population in the Alpine School District Region and 72.1% of the state of Utah by 2033. While Utah will experience a 12% increase in this group, the Alpine School District Region residents will experience a 20% rise. The diversity among all other racial populations will grow considerably in the next 10 years. The Asian (Hispanic and Non-Hispanic) population will increase to account for 3.0% in the Alpine School District Region and 3.2% in the state of Utah. Collectively, those who identify as Hispanic will make up a sizable portion of the population in both Alpine School District Region and Utah with a 2033 cohort of 13.5% and 18.2%, respectively. It should be noted that the Black (Hispanic and Non-Hispanic) population will increase to 1.2% in Alpine School District Region and 1.8% in Utah.

Exhibit 2.5. Population in Alpine School District Region by Race/Ethnicity 2023-2033.

Population by Gender

Alpine School District Region Population

Similar to the 16% increase in Utah, the female cohort in Alpine School District Region is predicted to increase by 24% by 2033. Despite this gain, females are still expected to make up 4.4% less of the population than men in the county. In Utah, females are predicted to account for 3.5% less of the population by 2033.

Exhibit 2.7. Population in Alpine School District Region by Gender 2023-2033.

3. Economic Overview

Labor Force Participation

Labor force participation provides an understanding of whether individuals are working, actively seeking a job, or unemployed and are not seeking work for any reason. The “Not in Labor Force” category refers to those who are not actively seeking work whereas those who are unemployed are actively seeking employment. The following presents the current labor force breakdown in Utah County as of 2022. According to data, out of the 67.8% of residents capable of participating in the labor force, 97.0% are employed whereas 3.0% are unemployed.

Exhibit 3.1. Labor Force Breakdown in Utah County, 2023.

Note: Data for specific region is unavailable, therefore county data was analyzed.

Source: LIGHTCAST, Q3 2023 Data Set.

Out of the 69.9% of residents in Utah who are in the labor force, 97.0% are employed, and 3.0% are unemployed.

Exhibit 3.2. Labor Force Breakdown in Utah 2023.

Source: LIGHTCAST, Q3 2023 Data Set.

Employment

Overall job growth in the area from 2017 to 2022 increased by 24.1%, adding 53,263 jobs as of 2022 for a total of 274,472. Outpaced the national growth rate of 3.8% by 20.3%. Between 2023 and 2027, projections indicate an additional 35,449 anticipated positions for a total of 323,133 jobs by 2027, a 12.3% increase.

Exhibit 3.3. Job Growth for Alpine School District Region 2017-2027.

Source: LIGHTCAST, Q3 2023 Data Set.

From 2017 to 2022, jobs increased by 14.2% in Utah from 1,612,815 to 1,841,287. This change outpaced the national growth rate of 3.8% by 10.4%. By 2027, predictions indicate an estimate of 2,110,302 jobs, a 10.3% increase from the projected 1,913,481 jobs in 2023.

Exhibit 3.4. Job Growth for Utah 2017-2027.

Source: LIGHTCAST, Q3 2023 Data Set.

Underemployment

Nationally, employers are opting to focus on skills and experience allowing them to consider previously overlooked candidates.¹ In 2017, 51% of online job listings required a four-year degree. By 2021, that share has declined to 44%. This is consistent with the national trend of employers adjusting educational requirements for a variety of occupations, eliminating the need for a bachelor's degree for many intermediate and senior positions. In mandating a degree, 64% of nationwide working-age individuals without a degree are automatically excluded from consideration. This shift in how employers are focusing on skills-based hiring has the potential to change the way higher education operates. Projections indicate an additional 1.4 million jobs could open to workers without college degrees over the next five years.²

A comparison of the educational attainment of the population in Utah County to jobs that require a specific level of education indicate more jobs that require no formal education, a high school diploma or equivalency, or a bachelor's degree than the number of people who reached the education level in Utah County. This highlights the underemployment of those with certificates (non-degree awards), associate degrees, or master's degrees. Ensuring graduates receive a certificate or associate degree are equipped with skills to guarantee they are competitive in the workforce will be essential. Comparatively, the same holds true for Utah.

Economic Drivers

Top Industries

The top industries that drive the economy in Alpine School District Region are Retail Trade, Construction, and Professional, Scientific, and Technical Services. These industries provide insight into majors and partnerships for ASD that may also build enrollment growth.

With 35,792 employees in Alpine School District Region, Retail Trade is the largest industry as of 2022. Since 2017, the number of jobs in the industry has grown by 4,694, or 15%. Employees in this industry earned an average of \$50,194 per year.

Construction is the 2nd largest industry with 29,882 jobs in the region as of 2022. Jobs in the sector in Alpine School District Region have increased by 29% (6,797) since 2017. The annual salary on average for employees in this sector was \$75,670.

Since the Professional, Scientific, and Technical Services industry has experienced a 41% growth in the MSA since 2017, there were 29,675 jobs in the region by 2022, making this the 3rd largest industry. Employees in the industry can expect an average yearly salary of \$112,252.

Exhibit 3.7. Largest Industries Alpine School District Region, 2022.

Source: LIGHTCAST, Q3 2023 Data Set.

3. ECONOMIC OVERVIEW

Exhibit 3.83.8 is a breakdown of the largest industries in Utah. With a 4% decrease in jobs since 2017, the Government industry was the largest industry in the state with 268,371 jobs by 2022. Employees in these positions earned an average of \$77,209 per year at that time.

Retail Trade was the 2nd largest industry in the state with 189,431 jobs as of 2022. Jobs in the sector have increased by 14,740 (8%) since 2017. The average annual salary for industry workers was \$47,720.

Health Care and Social Assistance was the 3rd largest industry in Utah in 2022, with 179,936 employees. A total of 234,391 (15%) more jobs have been added to the sector since 2017. The average annual wage for those working in the industry was \$66,071.

Exhibit 3.8. Largest Industries Utah, 2022.

Source: LIGHTCAST, Q3 2023 Data Set.

Top Growth Industries

The largest rise in jobs since 2017 has been in the Professional, Scientific, and Technical Services sector, which employed 29,675 people by 2022 after 8,654 new positions are added. Construction has experienced a 29% increase in jobs to account for 29,882 jobs by 2022. While there was a 60% increase in jobs in the Finance and Insurance industry, the addition of 5,989 jobs led to 15,945 employees in the associated roles.

Exhibit 9. Top Growing Industries in Alpine School District Region, 2022.

Source: LIGHTCAST, Q3 2023 Data Set.

3. ECONOMIC OVERVIEW

In Utah, Professional, Scientific, and Technical Services experienced the greatest increase in employment, adding 35,882 new positions since 2017 to reach 143,316 workers by 2022. In the same period, there were 145,554 positions in the Construction sector, representing 32% (35,496 jobs) growth. The number of jobs in the Manufacturing sector increased by 18%, and 24,106 additional jobs led to 155,733 jobs in the related roles by 2022.

Exhibit 3.10. Top Growing Industries in Utah, 2022.

Top Occupations

The Alpine School District Region's top three occupations by number of employees are Management, Sales and Related Roles, and Office and Administrative Support.

As of 2022, Office and Administrative Support was the most prevalent occupation in the Alpine School District Region, employing 255,346 people. The industry's employment count has increased by 16,521, or 7%, since 2017.

With 26,560 positions in the area as of 2022, Sales and Related Roles ranked as the second most common occupation. Since 2017, the number of jobs in the industry in the Alpine School District Region has climbed by 8% (1,909).

Since 2017, the number of positions in management occupations has grown by 60% in the region, with 24,742 jobs in 2022.

Exhibit 3.11. Top Companies by Job Postings in Alpine School District Region.

Source: LIGHTCAST, Q3 2023 Data Set.

3. ECONOMIC OVERVIEW

A similar trend among the top vocations is noted in Utah. Office and Administrative Support grew by 7% between 2017 and 2022 to become the leading occupation in the state with 255,346 jobs.

As of 2022, Sales and Related Roles accounted for 147,714 jobs, making it the 2nd largest occupation in the state. Since 2017, there have been 4,735 (3%) fewer jobs in the industry.

With 146,765 workers, Management ranked as the third most common occupation in Utah in 2022. Since 2017, there have been 38,545 (36%) additional employees introduced to the industry.

Exhibit 3.12. Top Companies by Job Postings in Utah.

Top Employers

From October 2022 to October 2023, 7,109 companies in Utah County posted advertisements for open roles. Utah Valley University posted 1,730 unique postings accounting for the largest number of advertisements in the county. With 1,495 listings, Intermountain Healthcare was the company with the 2nd highest number of open positions. Brigham Young University published 1,246 job advertisements, ranking them as the 3rd highest company searching for employees.

4. Community Indicators

In 2022, zip code 84020 (Draper County), which had 51,337 jobs, employed the majority of Alpine School District Region residents. With 43,516 employees, zip code 84043 (Lehi County) was the 2nd most popular site for employment. Given the 42,515 residents of zip code 84043 (Lehi County), this was the preferred location for employees to reside in 2022.

Exhibit 11. Alpine School District Region Employee Residence and Work Trends, 2022.

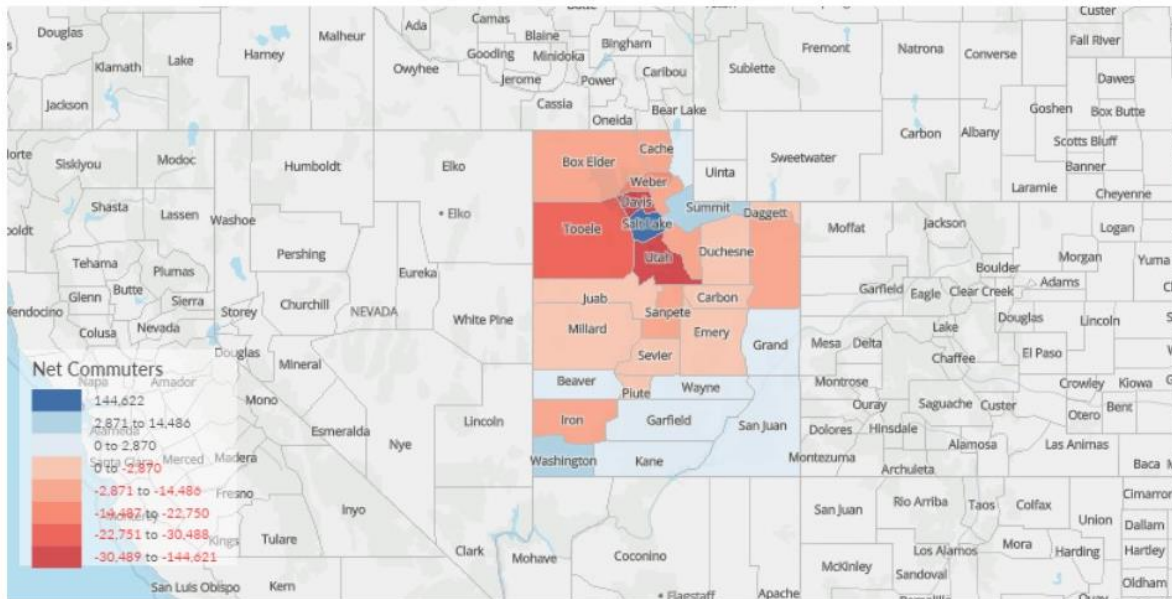

Where Talent Works			Where Talent Lives		
ZIP	Name	2022 Employment	ZIP	Name	2022 Workers
84020	Draper, UT (in Salt Lake county)	51,337	84043	Lehi, UT (in Utah county)	42,515
84043	Lehi, UT (in Utah county)	43,516	84065	Riverton, UT (in Salt Lake county)	31,049

4. COMMUNITY INDICATORS

In the top 5 Utah counties in 2022, Salt Lake County (code 49035) had 852,629 workers, which made it the most employed region. The 2nd most prevalent location for employment was Utah County (code 49049), which had 332,429 workers. Given that the most populated code (49035) had a total population of 708,007, Salt Lake County is where most employees opted to live. The 49049 Zip code in Utah County had 362,918 residents, making it the 2nd most populated place for workers to live.

Exhibit 4.2. Utah Employee Residence and Work Trends, 2022.

Where Talent Works

County	Name	2022 Employment
49035	Salt Lake County, UT	852,629
49049	Utah County, UT	332,429
49011	Davis County, UT	156,435
49057	Weber County, UT	125,532
49053	Washington County, UT	88,239

Where Talent Lives

County	Name	2022 Workers

Migration Trends

By 2020, 10,814 individuals had moved from Salt Lake County to Utah County. In the same year, 7,863 individuals moved from Utah County to Salt Lake County. Although 1,540 residents moved from Davis County to Utah County, Utah County lost 1,331 people to Davis County. A total of 846 Maricopa County, AZ inhabitants relocated to Utah County, while 1,053 Utah County individuals relocated to Maricopa County, AZ. In 2020, the total net migration for Utah County was a gain of 4,511 residents.

Exhibit 4.3. Inbound and Outbound Migration Utah County, 2020.

4. COMMUNITY INDICATORS

By 2020, 3,976 people had relocated from Clark County, NV to Utah. In the same year, 3,256 people moved from Utah to Clark County, NV. Los Angeles County, CA gained 1,315 citizens from Utah, while the same county also lost 3,665 residents to Utah. A total of 3,579 Maricopa County, AZ residents moved to Utah, while 3,507 Utah residents moved to Maricopa County, AZ. The total net migration for Utah in 2020 was 15,442 people relocating to Utah.

Exhibit 4.4. Inbound and Outbound Migration Utah, 2020.

Transportation

Transportation is provided for students fitting the following criteria:

- K-6 students live 1 to 1.5 miles from their school.
- 7-12 students living 2 or more miles from their school.
- K-12 students with disabilities regardless of distance from their school

Enrollment Policy

The online application process for returning or transferring students entails creating a Skyward account, adding the children who will be enrolled in the schools, submitting the application, and uploading several types of supporting documentation.³ Documents required include:

- Certified birth certificate
- Record of immunizations
- A transcript for students in grade 7-12
- Proof of residency in the attendance area of enrolling school.
- Withdrawal form
- Any court documents for guardianship.

Specialty Programs

Career And Technical Education (CTE)

Career and Technical Education (CTE) offers students the necessary skills and resources they need to succeed in a career after high school and/or continue their postsecondary education at a technical school or a two- or four-year college.⁴ This is accomplished through competency-based instruction, practical experiences, and work-based learning opportunities. It is recommended that every student delve into different fields of study and acquire the skills required to confidently enter the competitive job market.

Clear Creek Camp

Teachers and administrators from Alpine School District oversee and supervise the outdoor education camp at Clear Creek Summer Camp.⁵ The goal of the camp is to teach children to respect and learn about the environment, including water, wooded areas, and wildlife. Situated near Scofield, UT, Clear Creek Camp has been catering to students in the ASD for more than 50 years.

At the moment, the institution operates on a two-day, no-overnight schedule in order to accommodate influxes of students and maintain their safety. Ropes courses, stream studies, walks among trees and flowers, field book drawing, fossil research, and erosion tables are just a few of the activities that are included in this model.

Dual Language Immersion

Students can study academic content and learn another language simultaneously by participating in Dual Language Immersion.⁶ In a target language, students receive coursework in science, math, and other subjects. In order to achieve academic success, the instructional tactics employed aid in the development of literacy proficiency in both English and the target language. Schools that use the Utah Dual Language Immersion approach instruct children in the target language for 50% of the school day while the remaining 50% is spent in English. Native or proficient speakers of the language teach the target language. The curriculum is for students in grades K-12, with university-level coursework available in grades 10-12.

Gifted Program

Alpine School District's Gifted Programs encourage effective educational opportunities for a wide variety of advanced children.⁷ Program objectives include:

- expanding knowledge of the special and impressive academic and social/emotional requirements of high ability children among administrators, educators, parents, and the community
- strengthening the community's, educators', parents', and administrators' ability to influence high-ability children's lives in an advantageous manner.
- fostering the establishment of an ongoing series of high-quality programs for high-ability kids in all Alpine School District schools

ADVANCED LEARNING LAB (A.L.L.)

ELEMENTARY

Elementary children in grades 4 through 6 can participate in the district's Advanced Learning Lab, or A.L.L. For third graders, there are now three programs available. The curriculum is based on the Common Core State Standards, and students read literature at an advanced level, achieve advancements in arithmetic, and study science and social subjects at a more complex and comprehensive level. A commitment to a magnet location is expected of students placed in the A.L.L. class.

SECONDARY

Advanced classes in English and history are available at all district middle school/junior high schools; science courses are available at American Fork, Frontier, Lake Mountain, Lehi, Mountain Ridge, Orem Jr., Pleasant Grove, Timberline, Viewpoint, Vista Heights, and Willowcreek. Additionally, an intensive mathematics curriculum is available at every school. Students in the 7th and 8th grade can enroll in the Advanced Learning Lab (A.L.L.) Secondary curriculum. For placement purposes, students undergo assessments in January and February of their 6th grade year. For sixth graders who desire to participate in the accelerated 7th grade mathematics course, math assessments are offered concurrently.

Christa McAuliffe Space Center

Since 1990, thousands of students and adults in the state have benefited from the knowledge provided by the Space Center.⁸ Through the use of curriculum-based tasks, the simulators offer a realistic setting in which students can experience themselves participating in leadership, engineering, scientific, and other position. Education can take many forms, from simple field trips to more extensive training in a setting akin to a camp.

School Overviews

In the 2022 school year 84,667 students were enrolled in various institutions. With 6,863 students, grade 9 had the highest number of enrollees. Grade 11 was the 2nd most populated grade with 6,738 students. The lowest enrollment is currently those in grade 12 with only 1,499 students. The 2022 academic year also had the highest enrollment rate in the past 5 years. The lowest rate was a cohort of 79,856 students in 2018.

5. EDUCATIONAL LANDSCAPE

Over the period from 2018 to 2022, the educational landscape experienced varying trends in percent changes across different grades. Among the grade levels, the highest change was observed in 10th Grade, which surged by 18.1%. On the other end of the spectrum, the Summit program underwent a significant decline of 62.5%. The lowest percentage change occurred in the 6th Grade, with a modest increase of 0.2%, suggesting relative stability in this grade level over the years. When considering all grades collectively, the average percentage change across the board was 1.4 %, reflecting a moderate upward trend in enrollment across all grade levels.

Exhibit 5.5. Graduation Rates % Change 2020-2022.

Source: Alpine School Districts Enrollment History and Projection.

High School Graduation Rates

Alpine School Districts had an average 4-year cohort graduation rate of 91.6%, which was only 3.4% higher than the Utah figure of 88.2% from 2020 to 2022. For the district, 2020 had the highest graduation rate at 93.0%. The highest statewide graduation rate occurred in 2020 and 2022 with 88.2% of students graduating. Westlake High had the highest graduation rate of 96.7% in 2022. The lowest rate occurred at Summit High School with a rate of 53.0%.

Postsecondary Educational Pipeline

Exhibit 14 is ranked based on the largest to smallest completions in 2021. The top institutions in the Alpine School District Region had 18,514 program graduates in 2022. Over the last five years, this pipeline has grown by 117%. The highest share of these graduates come from "General Studies" (Associate's), "General Studies" (Certificate), and "Registered Nursing/Registered Nurse" (Associate's). There were 5,996 certificate completions, 4,917 Associate's completions, 4,072 Bachelor's completions, and 326 Master's or higher completions from Utah Valley University. Mountainland Technical College produced 2,277 certificate completions.

Exhibit 14. Top 7 Graduation Trends for Alpine School District Region Institutions.

● Certificate ● Associate's ● Bachelor's ● Master's or Higher

Source: LIGHTCAST, Q3 2023 Data Set.

In 2022, there were 117,379 graduates in Utah. This pipeline has grown by 38% over the last 5 years. The highest share of these graduates come from "Registered Nursing/Registered Nurse" (Bachelor's), "General Studies" (Associate's), and "Business Administration and Management, General" (Bachelor's). Western Governors University produced 43,845 graduates. With 15,311 graduates, Utah Valley University produced the second highest number of graduates in the state.

5. EDUCATIONAL LANDSCAPE

Exhibit 5.9. Top 10 Graduation Trends for Utah Institutions.

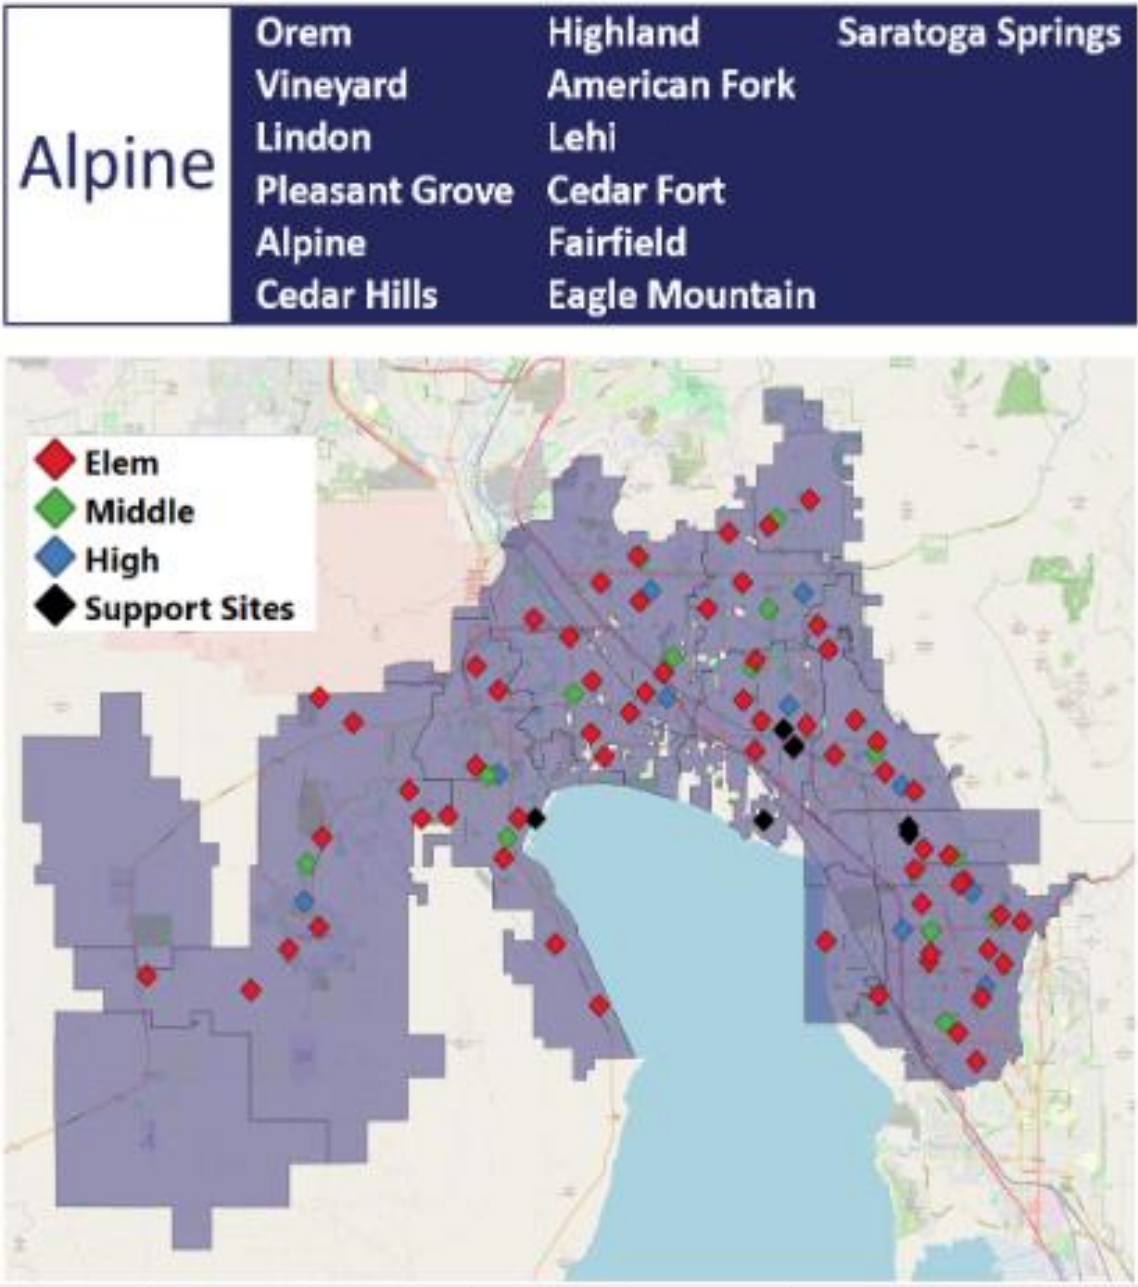

Source: LIGHTCAST, Q3 2023 Data Set

6. Geographical Considerations

Alpine School District has a unique geographical footprint due to the location of Lake Utah in the center of the district. Multiple municipalities reside within the district located around the lake in a semi-circle fashion. **Exhibit 6.1** lists these municipalities and illustrates the district boundaries and facility locations.

Exhibit 6.1. Alpine school district map.

6. GEOGRAPHICAL CONSIDERATIONS

When analyzing the feasibility of splitting the current Alpine school district into multiple school districts, MGT employed the approach that any resulting school district's boundaries should be contiguous and be made along municipal boundaries so that no municipality would be split into multiple districts.

Additionally, MGT established how many facilities were located within each municipality and what the educational capacity of those facilities are. **Exhibit 6.2** displays the capacity of each municipality by grade band.

Exhibit 6.2. Municipality Capacity Table.

Municipality	Elem Capacity	Middle Capacity	High Capacity
Alpine	1,988	1,551	0
American Fork	4,676	2,013	2,790
Cedar Fort	0	0	0
Cedar Hills	1,988	0	0
Eagle Mountain	10,472	2,178	3,660
Fairfield	0	0	0
Highland	2,996	1,617	2,340
Lehi	12,404	6,204	5,100
Lindon	1,876	1,782	0
Orem	10,696	5,709	5,670
Pleasant Grove	4,088	1,716	2,340
Saratoga Springs	7,728	3,927	2,730
Vineyard	1,988	0	0

Utilizing GIS software, MGT then geocoded student addresses and plotted them on maps to determine how many students reside within the various municipalities. This data was then compared against each municipalities capacity to help determine what scenarios were feasible for school district reconfiguration. **Exhibit 6.3** documents the number of students residing within each of the municipalities by grade band.

Exhibit 6.3. Municipality Student Resides Table.

Municipality	Elem Students	Middle Students	High Students
Alpine	745	541	669
American Fork	3,119	1,599	1,736
Cedar Fort	43	15	14
Cedar Hills	874	488	686
Eagle Mountain	7,260	2,983	2,808
Fairfield	11	8	9
Highland	1,864	1,247	1,507
Lehi	9,646	4,568	4,515
Lindon	858	560	634
Orem	6,895	3,347	3,623
Pleasant Grove	3,098	1,689	1,926
Saratoga Springs	6,183	2,696	2,593
Vineyard	1,414	458	399

6. GEOGRAPHICAL CONSIDERATIONS

Exhibit 6.4 and 6.5 spatially illustrate where students reside within the district.

Exhibit 6.4. Student Resides – Point Map.

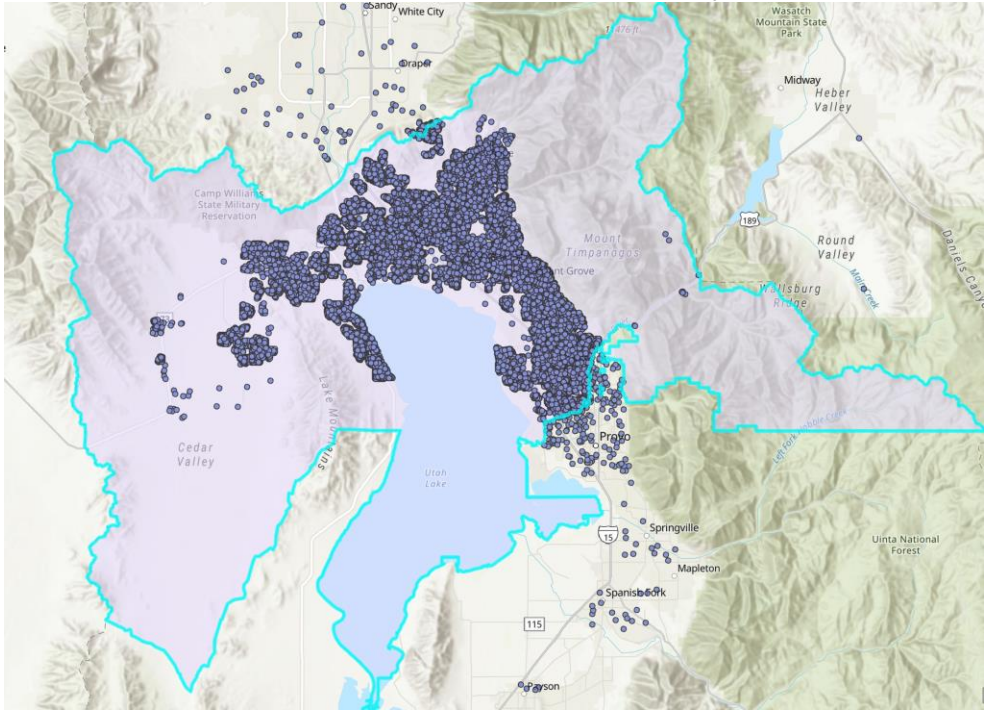

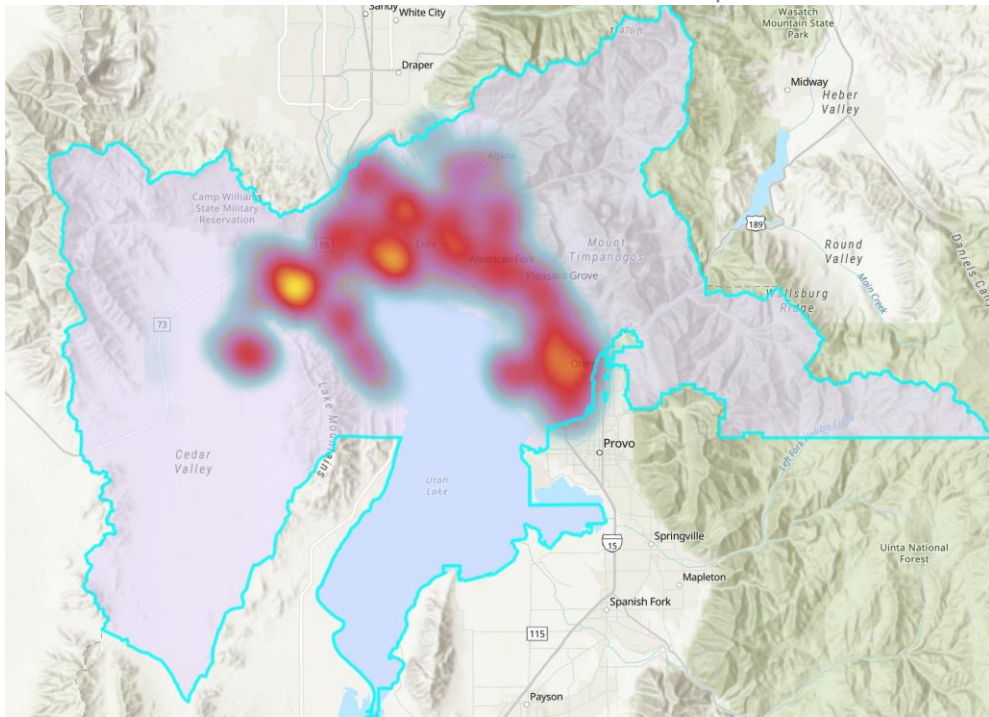

Exhibit 6.4. Student Resides – Heat Map.

7. Financial Considerations

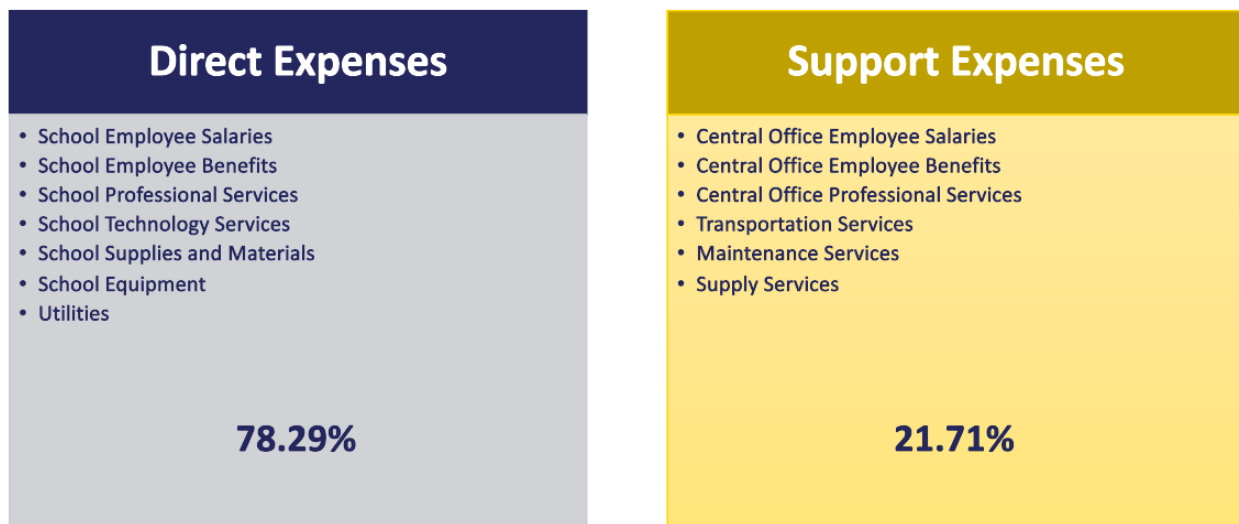

In examining the financial resources of the Alpine School District, MGT adopted a high-level approach in examining the various revenue sources as well as the financial obligations of the various school communities. A 50,000-foot view of the district's finances allowed community members to assess the related costs of the various options in a holistic manner. It is particularly important to note that this analysis is a snapshot of the finances for the fund year 2023 and reflects the revenue and expenses at that moment in time. We did not make any assumptions going forward from that period as to future operational or capital needs. These snapshot numbers are those that were used for analysis and shared in the reconfiguration options that were shared with the various school communities.

Expenses

In conducting a review of the financial dynamics within the Alpine School District, expenditures were divided into two primary classifications: Direct Expenses and Support Expenses.

Support Expenses encompass those financial obligations that are crucial for the general functionality of the overall district. These include all forms of transportation, central administration, human resources, maintenance staff salaries, central services, utility bills, maintenance, and other essential overhead expenses to cover the needs of the overall operations and infrastructure of the school system.

Direct expenses are allocations of resources specifically aimed at maintaining the day-to-day operations of the schools themselves. These are the direct costs associated with educating students in a particular building. These expenses encompass several essential areas. A significant portion is dedicated to compensating teaching staff, including salaries and benefits. Additionally, technology, school supplies, and materials for instructional purposes. Utilities are another key component, covering essential services like electricity, water, and HVAC.

Revenue

ASD Revenue has been separated into four distinct groups: Other, Federal, Local Tax and State. The "Other" category encompasses diverse revenue streams such as tuition investments, building rentals, cell tower fees, and donations. Federal funding comprises programs like Title Programs, Special Education, Medicaid, and the School Lunch Program. Local Taxes, including money for debt service, capital expenditures, and property tax levies. The largest share of revenue derives from State Funding for student enrollment. The Weighted Pupil Unit for students is ASD’s largest form of revenue.

8. Scenarios and Options

As discussed in the previous sections of this report, many important factors were considered when analyzing the feasibility of splitting the current Alpine school district into multiple school districts. Some of these factors are listed below:

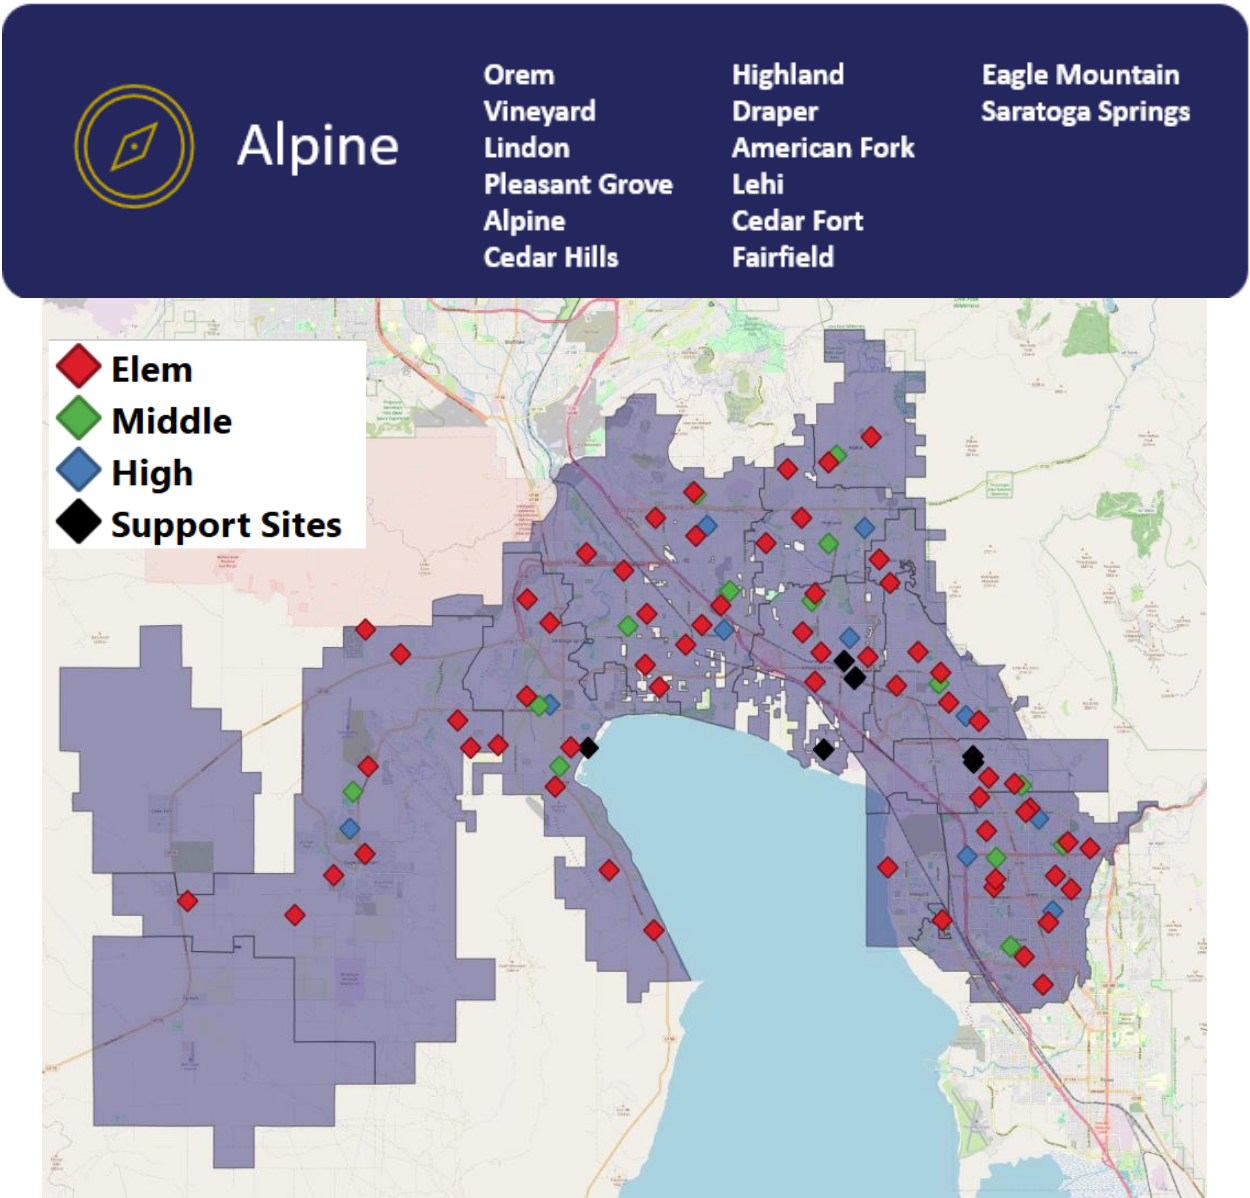

1. Each resulting school district boundaries should be created along municipality boundaries so that no municipality would be split into multiple school districts.
2. Each resulting school district must be contiguous and not geographically isolate any area from its school district.
3. Each resulting school district should have the facility capacity for the enrollment of the students that reside within their boundaries.

Based upon these and other factors outlined in this report, MGT developed six scenarios for school district alignment.

- Option 1: The first option is for ASD to remain one district in its current configuration.
- Option 2: The second option would split ASD into two districts. The east district would be made up of Orem, Vineyard, Lindon, Pleasant Grove, Alpine, Cedar Hills, Highland, and American Fork. The west district would be made up of Cedar Fort, Fairfield, Eagle Mountain, Sarasota Springs, and Lehi.
- Option 3: The third option would split ASD into two districts. The east district would be made up of Orem, Vineyard, Lindon, Pleasant Grove, Alpine, Cedar Hills, Highland, Lehi, and American Fork. The west district would be made up of Cedar Fort, Fairfield, Eagle Mountain, and Sarasota Springs.
- Option 4: The fourth option would split ASD into three districts. The east district would be made up of Orem, Vineyard, Lindon, and Pleasant Grove. The central district would be made up of Alpine, Cedar Hills, Highland, Lehi, and American Fork. The west district would be made up of Cedar Fort, Fairfield, Eagle Mountain, and Sarasota Springs.
- Option 5: The fifth option would split ASD into three districts. The east district would be made up of Orem, Vineyard, and Lindon. The central district would be made up of Alpine, Cedar Hills, Highland, Lehi, Pleasant Grove, and American Fork. The west district would be made up of Cedar Fort, Fairfield, Eagle Mountain, and Sarasota Springs.
- Option 6: The sixth and final option would split ASD into three districts. The east district would be made up of Orem, Vineyard, Lindon, Alpine, Cedar Hills, Highland, Pleasant Grove, and American Fork. The central district would be made up of Lehi alone. The west district would be made up of Cedar Fort, Fairfield, Eagle Mountain, and Sarasota Springs.

The following pages explore each option, listing the municipalities for each proposed district configuration along with some important data for consideration.

Option 1

Alpine

Orem
Vineyard
Lindon
Pleasant Grove
Alpine

9. Community & Stakeholder Engagement

Combined In Person and Online Session Data

In examining a combination of all the community engagement sessions held across the district, the total number of respondents were led by parents/guardians, followed by staff members, then community members. There was broad participation from across the Alpine School District overall.

Considering all of the online and community engagement sessions combined, 51% of respondents agreed, and 33% disagreed with the statement, "The Alpine School District should remain as one consolidated district." Nonetheless, 60% of respondents thought the board ought to propose a vote on reconfiguration. The assertion that "The Alpine School District needs to be reconfigured into two or more separate school districts" was also endorsed by 39% of respondents.

In 46% of the replies, members of the community expressed their belief that reconfiguration would likely render the expected outcomes for students and educational programs worse. Furthermore, according to 44% of respondents, there would be moderate to substantial losses in educational, social, and academic outcomes for the nearby school communities.

In terms of the reconfiguration options' ranking, 49% of voters supported "Stay as single, consolidated district," 34% supported "Split into two districts," and 11% supported "Split into three districts."

Option 2, with Lehi heading west, was deemed the most desirable two-way split by 56% of respondents. With Pleasant Grove heading east, Option 4 had the highest preference (56%), in the three-way split question.

Potential tax changes have an impact on reconfiguration considerations, according to 67% of community meeting attendees. If the district stays one, the concept of an expanded school board was endorsed by 66% of voters.

What describes your relationship to the school district? (check all that apply)

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Which high school serves as the high school for your attendance zone /cluster? (Where you live)

If you are an employee of the district, with which high school cluster are you affiliated? (Where you work)

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

If you are an employee of the district, how long have you been employed within the district?

Do you agree or disagree with the following statement? "The Alpine School District should remain as one consolidated school district."

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Do you agree or disagree with the following statement? "The school board should recommend that a district reconfiguration be brought to a community vote?"

Do you agree or disagree with the following statement? "The Alpine School District (ASD) needs to be reconfigured into two or more separate school districts."

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Do you agree or disagree with the following statement? "ASD faces too many challenges to continue as it is currently configured."

If ASD were to reconfigure, do you anticipate learning outcomes and educational programs for students would improve or worsen?

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Regarding long term academic, social, educational gains, or losses, do you believe local school communities will experience an overall gain or loss as a result of a reconfiguration of the district?

Property taxes are likely to change if the district were to reconfigure. Do you agree or disagree that reconfiguration decisions are impacted by potential tax rate changes?

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Rank the reconfiguration options based on your preference. (Rank order: 1= most favored 3=least favored)

IF there was a 2 way split, which option is more preferable?

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

If there was a 3 way split, which option is MOST preferable?

If there was a 3 way split, which option is LEAST preferable?

Would you support the district remaining as one unit with an expansion of the board from 7 to 9 members?

Do you have any additional thoughts on this topic or information you want to share?

Unity and Cohesion	Representation and Equity	Financial Stability and Planning
<ul style="list-style-type: none"> There is a prevailing sentiment among respondents, both in person and online, in favor of maintaining the district as one entity to preserve resources, services, and educational opportunities. Concerns are raised about the potential fragmentation of resources and disparities in educational quality if a split were to occur, highlighting the importance of unity for effective collaboration and equitable distribution of resources. 	<ul style="list-style-type: none"> Calls for better representation of all communities within the district, particularly the West side, underscore the need for inclusive decision-making processes that consider diverse perspectives and needs. Concerns about unequal distribution of resources and attention among different areas highlight underlying disparities and the importance of equitable governance structures to address community needs fairly. 	<ul style="list-style-type: none"> Widespread concerns about the financial implications of a split, including increased administrative costs and tax burdens, underscore the need for careful financial planning and sustainability measures. Questions about the distribution of surplus and deficit among potential split districts raise uncertainties about long-term financial viability and resource allocation.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Do you have any additional thoughts on this topic or information you want to share?

Impact on Educational Quality	Growth Management and Sustainability	Infrastructure and Facilities Planning
<ul style="list-style-type: none"> • Worries about potential negative effects on educational programs and services, particularly for students with special needs, reflect concerns about maintaining quality and accessibility post-split. • Emphasis is placed on preserving resources and support systems to ensure continuity and effectiveness in addressing diverse learning needs within the district. 	<ul style="list-style-type: none"> • Recognition of rapid growth and discussions about infrastructure challenges highlight the need for strategic planning and sustainable solutions to accommodate increasing student populations. • Concerns about overcrowding and infrastructure development underscore the urgency of addressing growth-related challenges to maintain educational standards and support continued community development. 	<ul style="list-style-type: none"> • Discussions about the need for new schools and facilities underscore the importance of addressing infrastructure needs to support growing student populations effectively. • Concerns about the impact of a split on infrastructure development and funding priorities highlight the complexities of planning and resource allocation in the event of district restructuring.

Do you have any additional thoughts on this topic or information you want to share?

Specialized Services and Support	Community Engagement and Transparency	Political Dynamics and Representation	Thorough Evaluation and Informed Decision-Making
<ul style="list-style-type: none"> • Worries about the potential impact on specialized services for students with disabilities underscore the need for comprehensive planning and collaboration to ensure equitable access to support services. • Emphasis is placed on maintaining continuity and quality of specialized programs and resources to meet the unique needs of all students within the district. 	<ul style="list-style-type: none"> • Calls for more community involvement and transparent decision-making processes reflect a desire for inclusive governance structures that prioritize stakeholder input and collaboration. • Appreciation for public information meetings and opportunities for feedback highlights the value of open dialogue in fostering trust and promoting informed decision-making. 	<ul style="list-style-type: none"> • Discussions about the political implications of a split raise concerns about power imbalances and division within the community, emphasizing the importance of fair representation and accountability in decision-making processes. • Fears of polarization underscore the need for inclusive governance structures and transparent decision-making to promote unity and collaboration in addressing community needs. 	<ul style="list-style-type: none"> • Opinions vary on whether to split or stay together, reflecting the complexity of the issue and the need for further exploration of options before making a decision. • Emphasis is placed on considering the needs and voices of all stakeholders and exploring alternative solutions to address community concerns and challenges effectively.

Overall Community Sessions

In examining a combination of all the community engagement sessions held across the district, the total number of respondents were led district staff members, followed by community members, then parents/guardians. There was broad participation from across the Alpine School District overall.

When asked if “The Alpine School District should remain as one consolidated district,” 66% agreed and 21% disagreed. Yet, 61% felt that the board should bring a reconfiguration vote forward. Additionally, 24% agreed with the statement that “The Alpine School District needs to be reconfigured into two or more separate school districts.”

Community participants indicated with 65% of the responses that anticipated student outcomes and educational programs were likely to worsen with reconfiguration. In addition, 59% indicated that local school communities would experience moderate to significant losses in academic, social, and educational outcomes.

As for the rank order for reconfiguration options, “Stay as single, consolidated district” received 71% of the votes, “Split into two districts” received 26%, and “Split into three districts” received 9%.

A solid portion of this group at 46% felt that the most preferable two-way split is Option 2 with Lehi going west. In the three-way split preference question, Option 4 with Pleasant Grove going east was the preferred option at 49%. (Note: In the early community sessions participants could select “I do not prefer” and that choice was selected by 20% in the two-way question and 26% in the three-way question.)

A strong 92% of the community session participants indicated that reconfiguration considerations are impacted by potential tax changes. A strong majority of 73% supported the idea of an expanded school board should the district remain as one.

Questions about the distribution of surplus and deficit among potential split districts. Skepticism about the affordability and feasibility of splitting the district. Discussions about taxation and funding sources for future developments.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Impact on Education Quality	Growth and Sustainability	Infrastructure and Facilities
<ul style="list-style-type: none"> • Worries about the potential negative effects on the quality of education post-split. • Concerns about the availability of specialized services and programs. • Fears of losing experienced educators and staff in the event of a split. • Emphasis on maintaining resources and opportunities currently provided by the district. 	<ul style="list-style-type: none"> • Recognition of the rapid growth, especially in areas like Saratoga Springs and Eagle Mountain. • Discussion about the need for stability and sustainable solutions for future growth. • Suggestions for considering Lehi's involvement to stabilize the growth curve. • Concerns about overcrowding and infrastructure development in rapidly growing areas. 	<ul style="list-style-type: none"> • Discussions about the need for new schools and administrative buildings. • Concerns about the allocation of resources for building maintenance and expansion. • Questions about the impact of a split on school facilities and infrastructure growth. • Suggestions for addressing the capital needs and potential bond failures in split districts.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Special Education and Support Services	Community Involvement and Engagement	Political Dynamics	Preferences for Future Actions
<ul style="list-style-type: none"> • Worries about the potential impact on specialized services for students with disabilities. • Concerns about the coordination and advocacy for students with specialized needs post-split. • Discussions about the accessibility of resources like the Utah School for the Deaf and Blind. • Emphasis on maintaining support for students with special needs within the district. 	<ul style="list-style-type: none"> • Calls for more community involvement in decision-making processes. • Desires for open dialogue and transparency regarding the potential split. • Suggestions for conducting polls or surveys to gauge stakeholders' preferences. • Appreciation for public information meetings and opportunities for feedback. 	<ul style="list-style-type: none"> • Discussion about the political implications and power dynamics of a split. • Concerns about the influence of smaller groups of individuals on decision-making. • Fears of division and polarization within the community as a result of the split. • Suggestions for ensuring fair representation and decision-making processes. 	<ul style="list-style-type: none"> • Opinions on whether to split or stay together vary among respondents. • Calls for further exploration of options before making a decision. • Suggestions for alternative solutions, such as increasing district management and representation. • Emphasis on considering the needs and voices of all stakeholders in the decision-making process.

Employees Meeting 1

In this grouping, 44% of participants felt the school board should recommend a community vote on reconfiguration. Additionally, 82% of those same participants felt that the district should remain as one consolidated school district.

Thoughts differed on the impact a reconfiguration would have on student learning with 3% indicating learning outcomes would improve and 73% indicating there would be academic, social, and educational losses.

In the rank order of reconfiguration options, “Stay as single, consolidated district” received 86% of the votes. “Split into two districts” received 11%, and “Split into three districts” received 2%.

A majority of this group, 22%, felt that the most preferable two-way split is Option 3 with Lehi in the east. In the three-way split preference question, Option 4 with Pleasant Grove going east was the selected option at 5%.

Participants agreed (94%) that potential tax changes should impact reconfiguration considerations. Moreover, 76% supported the idea of an expanded school board should the district remain as one.

Q20 - Would you support the district remaining as one unit with an expansion of the board from 7 to 9 members?

Q21- Do you have any additional thoughts on this topic or information you want to share?

Preference for District Unity:

- Many participants expressed a strong desire for the district to remain unified, citing benefits such as shared resources, stronger support for students, and collaborative opportunities for teachers.
- Concerns were raised about potential negative consequences of splitting, including loss of services, increased taxes, and decreased teacher benefits.
- Participants emphasized the importance of considering what is best for students when making decisions about district organization.

Employee Concerns:

- Employees, including teachers and staff, raised significant concerns about how a district split would impact their salaries, benefits, and retirement plans.
- There were questions about whether benefits would be maintained in the event of a split, as well as concerns about potential job changes and stability.
- Participants emphasized the need for clear communication and transparency regarding how a split would affect employees.

Data Collection and Survey Design:

- Several participants criticized the survey design and data collection methods, noting that some questions were confusing or did not accurately capture their opinions.
- Concerns were raised about the reliability of the data collected and whether it accurately represented the views of the participants.
- Suggestions were made for improving future surveys, including clearer wording and the inclusion of more detailed questions about specific concerns.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Q21- Do you have any additional thoughts on this topic or information you want to share?

Financial Considerations:	Community Engagement and Education:	Special Education and Student Services:
<ul style="list-style-type: none">Many participants expressed concerns about the financial implications of a district split, including potential increases in taxes and the costs associated with creating and maintaining separate districts.Questions were raised about how resources would be allocated in the event of a split, particularly in terms of funding for specialty programs and support services.Participants stressed the importance of considering the long-term financial sustainability of the district when making decisions about its organization.	<ul style="list-style-type: none">Participants highlighted the importance of educating the community about the potential consequences of a district split and ensuring that all stakeholders are fully informed before making any decisions.Suggestions were made for increasing community engagement and providing more opportunities for input from parents, teachers, and other community members.Concerns were raised about the level of awareness and understanding among community members, particularly regarding the complexities of district organization and funding.	<ul style="list-style-type: none">Many participants emphasized the need to prioritize support for special education students and ensure that their needs are met regardless of any changes to district organization.Concerns were raised about potential disruptions to student services and programs, particularly for vulnerable populations such as special education and English language learners.Participants stressed the importance of maintaining access to specialized programs and services, such as the space center and alternative schools, for all students.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Employee Retention and Recruitment:	Transparency and Communication:	Student Impact and Educational Quality:	Preference for Maintaining Current Structure:
<ul style="list-style-type: none">Participants expressed concerns about the potential impact of a district split on employee retention and recruitment, particularly for experienced teachers and staff.Questions were raised about whether teachers would be incentivized to stay in the district or whether a split would lead to an exodus of experienced educators.Participants emphasized the importance of considering the needs and concerns of employees when making decisions about district organization.	<ul style="list-style-type: none">Many participants called for greater transparency and communication from district leadership regarding the potential consequences of a district split and the decision-making process.Concerns were raised about the perceived lack of information and clarity surrounding the issue, particularly regarding how decisions would be made and what factors would be considered.Participants emphasized the need for open dialogue and honest communication between district leadership, employees, and the community.	<ul style="list-style-type: none">Participants expressed concerns about the potential impact of a district split on the quality of education and the overall student experience.Questions were raised about how a split would affect class sizes, teacher-student ratios, and the availability of resources and programs.Participants stressed the importance of prioritizing student needs and ensuring that any decisions made about district organization ultimately benefit the students.	<ul style="list-style-type: none">Many participants expressed a preference for maintaining the current structure of the district, citing its success and effectiveness in providing education and support for students.Concerns were raised about the potential risks and uncertainties associated with a district split, particularly if there are no clear benefits or improvements expected.Participants emphasized the value of continuity and stability in the district, particularly during a time of growth and change in the community.

Employees Meeting 2

The school board should suggest a community vote on reconfiguration, according to 54% of participants in this grouping. Furthermore, 76% of the same participants thought the district should continue to function as a single, consolidated school system.

Regarding how a reconfiguration would affect student learning, opinions varied: 66% said there would be losses in academic, social, and educational aspects, while 7% said learning outcomes would improve.

"Stay as single, consolidated district" garnered 80% of the votes in the ranking order of reconfiguration choices. At 16% and 4%, respectively, were "Split into two districts" and "Split into three districts."

Of those surveyed, 75% believed that Option 2, which places Lehi in the east, is the better two-way split. Option 4, which showed Pleasant Grove heading east, was chosen by 72% of respondents in the three-way split preference question.

Reconfiguration considerations should be impacted by possible tax changes, as agreed upon by 95% of participants. If the district stays a single entity, 84% of respondents favored the notion of an expanded school board.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Concerns about Equity and Low-Income Areas:	Uncertainty about Pay, Benefits, and Work Environment:	Preference for Unity and Staying as One District:
<ul style="list-style-type: none"> Participants express worries about the impact of a split on low-income communities. They emphasize the need to ensure that all students have access to resources and opportunities regardless of their socioeconomic status. Concerns are raised about potential disparities in funding, support, and program availability between different districts. 	<ul style="list-style-type: none"> Employees voice concerns about the potential negative effects of a split on their pay, benefits, and work environment quality. There's apprehension that a split could lead to decreased compensation, fewer opportunities for growth, and a less supportive work environment. Questions arise about whether contracts will be honored and if employees will have the same level of support in a new district structure. 	<ul style="list-style-type: none"> Many participants express a desire for the district to remain unified, citing benefits such as shared resources, collaborative learning, and economies of scale. They emphasize the importance of maintaining the current district configuration for the well-being of students, educators, and the community. Unity is seen as essential for providing consistent support, programs, and opportunities across the entire district.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Concerns about Student Opportunities and Program Availability:	Transparency and Access to Information:	Employee Retention and Recruitment:
<ul style="list-style-type: none"> Participants worry that a split could lead to a reduction in opportunities and programs available to students. They express a desire to preserve the wide range of educational offerings and support services currently provided by the district. There's a recognition of the importance of maintaining program quality and ensuring equal access to opportunities for all students. 	<ul style="list-style-type: none"> There's a call for transparent and easily accessible information to help the public make informed decisions about the district's future. Participants express a desire for clear, unbiased information to be disseminated to the community, free from social media biases. Concerns are raised about the potential for misinformation and the need for objective overviews of complex issues involved in a district split. 	<ul style="list-style-type: none"> Participants express concerns about the potential impact of a split on employee retention and recruitment. They worry that a split could lead to talented teachers and administrators leaving the district, which could negatively affect the quality of education. Questions are raised about how a split would affect salary, benefits, and opportunities for professional growth, which could influence employees' decisions to stay or leave.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Emphasis on Student Needs and Equity:	Skepticism of the Need for a Split:	Support for Strategic Decision-Making:	Desire for Community Involvement and Engagement:
<ul style="list-style-type: none"> • There's a strong emphasis on prioritizing student needs and maintaining equity across the district. • Participants stress the importance of ensuring that all students, regardless of their location within the district, have access to high-quality education and support services. • Equity in resources, opportunities, and program availability is seen as essential for providing an equal educational experience for all students. 	<ul style="list-style-type: none"> • Many participants express skepticism about the necessity of a split, particularly if the district is functioning well. • They question the rationale behind a split if there are no significant issues and the district is operating efficiently. • Concerns are raised about the potential stress and disruption that a split could cause without clear benefits or improvements. 	<ul style="list-style-type: none"> • Participants express support for strategic decision-making to address the district's challenges and opportunities. • They emphasize the importance of considering the needs of all communities within the district and making decisions that benefit students and educators. • There's a call for collaboration and unity in finding solutions to the district's challenges, such as addressing overcrowding and ensuring equitable access to resources. 	<ul style="list-style-type: none"> • Participants emphasize the importance of community involvement and engagement in the decision-making process. • They call for opportunities for citizens to participate in discussions, ask questions, and provide feedback on important issues such as a potential district split. • There's a desire for continued communication and dialogue between the district leadership and the community to ensure transparency and accountability in decision-making.

Community Session PTA 1

With a response rate of 76%, participants at the PTA engagement session did think that the school board should recommend a community vote on reconfiguration. Additionally, 50% of those same respondents felt that the district should remain as one consolidated school district while 29% indicated that the district should split.

Thoughts differed on the impact a reconfiguration would have on student learning. The selections regarding learning outcomes reflected this separation of thought with 10% believing outcomes and programs would improve and 61% believing they would worsen.

In regard to the rank order reconfiguration options, “Split into two districts” received 34%, “Stay as single, consolidated district” received 56% of the votes, and “Split into three districts” received 10%.

The majority of participants, 64%, felt that the most preferable two-way split is Option 3 with Lehi in the east. Option 4 with Pleasant Grove going east was the chosen three-way split selection at 64%.

With 92% agreement, participants expressed that potential tax changes should impact reconfiguration considerations, while 73% supported the idea of an expanded school board should the district remain as one.

Community

Session

PTA

2

A majority of respondents (62%) to the PTA engagement session expressed the belief that the school board should recommend a community vote on reconfiguration. Furthermore, 31% of the same respondents indicated the district should split, while 59% of them thought the district should stay as a single, consolidated school system.

Opinions on how a reconfiguration might affect students' learning varied. This division of opinion was replicated in the choices made about learning outcomes, with 22% of respondents thinking that programs and results would become improved and 61% thinking that they would get worse.

Regarding the possibilities for rank order reconfiguration, 32% of voters chose to "split into two districts," 62% chose to "stay as single, consolidated district," and 6% chose to "split into three districts."

With Lehi in the west, Option 2 was deemed the most desirable two-way split by most participants (79%). At 75%, option 4, which would have Pleasant Grove heading east, was selected for the three-way split.

Participants indicated that reconfiguration considerations would be impacted by future tax adjustments 87% of the time, and 89% agreed that if the district stays as is, there should be an increased school board.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Q18- If there was a 3 way split, which option is MOST preferable?

Q19-If there was a 3 way split, which option is LEAST preferable?

Q20 - Would you support the district remaining as one unit with an expansion of the board from 7 to 9 members?

Q21- Do you have any additional thoughts on this topic or information you want to share?

Financial Concerns and Stability	Community Engagement and Representation	Impact on Vulnerable Populations
<ul style="list-style-type: none"> Worries about the financial implications of a split, including bond ratings, interest rates, and negotiating power. Preference for the current district's financial management and resources. 	<ul style="list-style-type: none"> Calls for better representation of different areas and demographics on the school board. Interest in understanding community sentiment and preferences through voting and feedback. 	<ul style="list-style-type: none"> Concerns about the potential negative impact of a split on vulnerable groups, such as special education students, English language learners, and lower-income areas. Desire for clarity on how a split would affect services and support for these populations. Strong opposition to a split based on perceived harm to vulnerable groups.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Preferential District Configuration	Educational and Programmatic Concerns	Unity vs. Split Decision
<ul style="list-style-type: none"> Mixed opinions on the optimal district configuration, with some advocating for a single district and others proposing alternative splits. Suggestions for specific district arrangements, such as Lehi joining the West or creating a three-way split. Concerns about potential isolation or imbalance in power dynamics within districts based on income or demographics. 	<ul style="list-style-type: none"> Questions about the educational benefits and demographic makeup of proposed district configurations. Worries about the impact of a split on schools like Summit High School and Polaris High School, and potential changes to magnet school programs. Desire for clarity on how a split would address issues such as overcrowding, busing, and staffing shortages. 	<ul style="list-style-type: none"> Mixed sentiments on whether the district should remain unified or split, with some advocating for unity due to resource sharing and others preferring a split for increased community involvement or smaller district problems. Calls for careful consideration and education of the community on the implications of both options. Recognition of the benefits and challenges associated with both unity and split decisions.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Desire for Transparency and Education	Support for Current District Management	Teacher and Employee Concerns	Hopes for Community Cohesion
<ul style="list-style-type: none"> Requests for more transparency and education on district issues, regardless of the decision to remain unified or split. Calls for clear communication of the challenges and opportunities facing the district to better inform community members. Concerns about the accessibility and understanding of district data and information among stakeholders. 	<ul style="list-style-type: none"> Appreciation for the current district's management and resources, especially in handling student and employee needs. Confidence in the district's ability to manage resources and address challenges effectively. Desire to maintain the current district structure and management practices. 	<ul style="list-style-type: none"> Worries about the impact of a split on employee salaries, job security, and administrative costs. Desire for clarity on how a split would affect teachers and staff, as well as concerns about maintaining resources and support for employees. Preference for larger district problems over potential challenges associated with smaller districts. 	<ul style="list-style-type: none"> Hopeful sentiments about remaining as one district and sharing resources to benefit all students. Desire to maintain community cohesion and unity, while still addressing the needs and concerns of different areas within the district. Recognition of the importance of a strong, unified district in providing resources and opportunities for students.

Community Session Municipality Leadership 1

During the Community Municipality Leadership engagement session, most participants (77%) stated that they thought the school board ought to suggest a community vote on reconfiguration. The same respondents divided on the issue of the district's division, with 61% believing it should split into two separate school systems and 33% saying it should remain one.

Views on the potential impact of a reconfiguration on student success were divided. When it came to the decisions made about learning outcomes, respondents' opinions were split, with 23% believing that programs and results would improve and 33% believing that they would worsen.

With respect to the reconstruction of the rank order, 29% of voters selected "splitting into two districts," 14% selected "staying as single, consolidated district," and 57% selected "splitting into three districts."

Most participants (63%) said that Option 2 was the best two-way split with Lehi in the west. Option 4, which calls for Pleasant Grove to head east, was chosen for the three-way split at 50%.

Of the respondents, 94% of participants said that future tax changes would have an impact on reconfiguration considerations, and 39% said that if the district remains the same, there should be an expanded school board.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Anticipation of Change and Splitting	Representation and Equity	Data Transparency and Decision-Making
<ul style="list-style-type: none"> Participants acknowledge the current strengths of the Alpine School District but recognize the inevitability of change due to growth projections. Concerns about losing specialty programs in the event of a split are balanced with the recognition that addressing growth challenges may require district restructuring. Calls for a well-planned and equitable split if it becomes necessary, emphasizing the importance of making informed decisions for stakeholders, students, and staff. 	<ul style="list-style-type: none"> Issues of representation and equity within the district are highlighted, particularly regarding decision-making and resource allocation. Concerns about underrepresentation of certain areas, leading to decisions that may favor one side of the district over the other. Suggestions for fair representation on the school board based on population or student population to ensure balanced decision-making. 	<ul style="list-style-type: none"> Requests for comprehensive data, including capital needs, bond effects, and busing expenses, to inform discussions and decision-making processes. Emphasis on the importance of transparency in providing information to citizens, enabling them to understand the pros and cons of potential changes. Calls for inclusive decision-making processes, involving input from stakeholders and the wider community.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Addressing Specific City Concerns

- Specific concerns from residents of cities like Eagle Mountain, Saratoga Springs, and Lehi regarding the impact of growth on their schools.
- Recognition of the urgent need for a split to address overcrowding and infrastructure challenges in certain areas.
- Suggestions for city-based splits to ensure equitable distribution of resources and support growth management effectively.

Preparation for Future Needs

- Recognition of the importance of understanding future capital needs and startup costs associated with potential district splits.
- Concerns about significant gaps in the discussion related to capital costs and the implications for new school needs and startup expenses.
- Emphasis on proactive planning to address future challenges and ensure the sustainability of educational resources and infrastructure.

Community Session Municipality Leadership 2

Participants in the Community Municipality Leadership session (72%) said they believed the school board should recommend a community vote on reconfiguration. Regarding the district's division, the same respondents were split, with 75% saying it should become two distinct districts and 17% saying it should stay as one.

Divergent opinions existed over how a reconfiguration might affect students' achievement. Respondents' views on decisions about learning outcomes were divided; 40% thought that programs and outcomes would improve, while 27% thought they would get worse.

Regarding the reconfiguration of the rank order, the choices made by voters were as follows: 29% chose "splitting into two districts," 14% chose "staying as single, consolidated district," and 57% chose "splitting into three districts."

Option 3, according to the majority of participants (57%) was the best two-way split with Lehi in the east. At 57%, Option 5, which directs Pleasant Grove to head central, was selected for the three-way split.

Of those surveyed, 36% believed that an enlarged school board was necessary if the district stayed the same, and 85% agreed that future tax adjustments would affect reconfiguration considerations.

Equity and Representation Concerns	Financial Viability and Efficiency	Support for Change
<ul style="list-style-type: none"> Some participants question the equity of remaining unified, citing disparities between cities. Lack of representation and perceived inequities drive the discussion about a potential split. Calls for greater representation on the school board to address concerns about equity and decision-making. 	<ul style="list-style-type: none"> Recognition of the financial challenges facing the district, particularly after the failure of a school bond. Concerns about the viability of the district as a single entity, especially regarding small schools and financial decisions. Emphasis on the importance of efficiency and economy of scale in managing taxpayer funds effectively. 	<ul style="list-style-type: none"> Some participants express readiness for change, advocating for proactive decision-making. Calls to address issues head-on rather than prolonging the process, suggesting a willingness to embrace change. Sentiments favoring a split to address perceived issues of representation and equity.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Population-based Representation

- Observations about the influence of population size on representation within the district.
- Suggestions to expand the school board based on population size to ensure fair representation.
- Recognition of the impact of population demographics on decision-making processes within the district.

Transparency and Access to Information

- Requests for comprehensive financial data and information on capital needs to inform decision-making.
- Desire for transparency in sharing financial information and understanding the implications of potential changes.
- Emphasis on the importance of access to detailed financials and capital needs information for informed decision-making.

Community Session 1

In the community meetings, 76% of participants felt the school board should recommend a community vote on reconfiguration. Additionally, 50% of those same participants felt that the district should remain as one consolidated school district.

Thoughts differed on the impact a reconfiguration would have on student learning with 27% indicating learning outcomes would improve and 48% indicating there would be academic, social, and educational losses.

In the rank order of reconfiguration options, “Stay as single, consolidated district” received 52% of the votes. “Split into two districts” received 31%, and “Split into three districts” received 16%.

A majority of this group, 57%, felt that the most preferable two-way split is Option 2 with Lehi in the west. In the three-way split preference question, Option 4 with Pleasant Grove going east was the selected option at 65%.

Participants agreed (90%) that potential tax changes would impact reconfiguration considerations. Moreover, 65% supported the idea of an expanded school board should the district remain as one.

Equitable Resource Distribution	Impact on Special Education Services	Transparency and Accountability	Concerns about Student Welfare and Services
<ul style="list-style-type: none"> • Concerns about equitable distribution of resources and funding across different areas of the district • Desire for assurance that all students, regardless of location, will have access to quality education and services • Suggestions for strategies to ensure fair resource allocation in the event of a split or continued unity 	<ul style="list-style-type: none"> • Specific concerns about the potential impact of a split on special education services and students with special needs • Requests for assurances that specialized programs and schools will be maintained or replicated in the event of a split • Desire for clarity on how special education resources and support will be distributed in different scenarios 	<ul style="list-style-type: none"> • Calls for increased transparency and accountability in district decision - making and reporting • Desire for more detailed and comprehensive information on the options being considered and their potential impacts • Skepticism about the motivations and biases behind the district's presentations and surveys 	<ul style="list-style-type: none"> • Priority placed on ensuring that any decision regarding the district's future prioritizes student welfare and access to services • Concerns about potential disruptions to students' education and well-being in the event of a split or other changes • Desire for assurances that all options being considered will result in continued support for students and their needs

Community Session 2

The school board should suggest a community vote on reconfiguration, according to 77% of attendees at the community meetings. Furthermore, according to 57% of the same participants, the district should continue operating as a single, consolidated school system.

Reconfiguration's potential effects on student learning were viewed differently, with 30% believing it would increase learning outcomes and 48% believing it would result in losses in the areas of academics and education.

"Stay as single, consolidated district" garnered 60% of the votes in the reconfiguration choices ranking. "Split into two districts" received 27%, while "split into three districts" received 14%.

With Lehi in the west, Option 2 is deemed the most desirable two-way split by the majority in this group (77%). When asked a three-way split preference question, 69% of respondents chose Option 4, which showed Pleasant Grove heading east.

Reconfiguration considerations would be impacted by possible tax changes, as agreed upon by 87% of participants. Furthermore, 73% agreed that if the district stayed unified, there should be an expanded school board.

Preference for Unity vs. Split	Impact on Education Quality	Financial Considerations
<ul style="list-style-type: none"> Some participants advocated for maintaining the district's unity, citing benefits such as shared resources, strong community relations, and consistent quality across schools. Others supported a split, emphasizing the need for local control, tailored solutions to unique community needs, and more manageable district sizes for effective governance. Concerns were raised about potential division and discord among communities in a split scenario, while others saw it as an opportunity for increased autonomy and responsiveness to local needs. 	<ul style="list-style-type: none"> Participants expressed concerns about how a split or staying together would affect education quality, including class sizes, teacher recruitment, specialized programs, and student outcomes. Some believed that staying together would ensure continuity and stability in educational standards and services, while others argued that smaller districts could offer more personalized attention and targeted support. Questions were raised about the potential disruption to academic programs, extracurricular activities, and student well-being in either scenario. 	<ul style="list-style-type: none"> Discussions centered around the financial implications of a split or staying together, including property taxes, funding allocations, bond measures, and administrative costs. Some participants expressed concerns about the financial feasibility of maintaining a large district, especially in the face of rapid growth and increasing demands for resources. Others questioned whether a split would lead to more equitable funding distribution, greater efficiency in resource allocation, or increased financial burdens for taxpayers in certain areas.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Q21- Do you have any additional thoughts on this topic or information you want to share?

Community Representation and Decision-making:	Concerns about Special Education and Student Support Services:	Employee Concerns and Job Security:
<ul style="list-style-type: none"> Participants discussed the importance of community representation and decision-making processes in shaping the district's future, particularly in areas such as governance structure, school boundaries, and resource allocation. Some advocated for increased local control and grassroots involvement in decision-making, while others expressed concerns about potential disparities or conflicts between different communities' interests. Questions were raised about how decisions would be made in a split scenario, the role of local stakeholders in shaping policies, and the balance between centralized and decentralized governance. 	<ul style="list-style-type: none"> Participants expressed concerns about the potential impact of a split on special education services, counseling, and other student support programs. Discussions focused on ensuring equitable access to resources and services for students with disabilities or special needs, regardless of the district's configuration. Some participants emphasized the importance of maintaining continuity and consistency in student support services, while others saw potential benefits in more localized and responsive approaches. 	<ul style="list-style-type: none"> Participants raised questions and concerns about how a district split or staying together would impact district employees, including teachers, staff, and administrators. Discussions centered around potential changes in employment conditions, salary, benefits, and retirement plans in either scenario. Some expressed worries about job security and the stability of employment opportunities, especially for those nearing retirement or planning to return to work in the future.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Perceived Bias in Decision-Making Process:	Infrastructure and Facility Needs:	Future Growth and Population Projections:	Communication and Information Accessibility:
<ul style="list-style-type: none"> Some participants expressed concerns about perceived bias or lack of transparency in the decision-making process regarding the district's future. Questions were raised about the influence of district stakeholders, such as employees and teachers, on the decision-making process, and whether community input was adequately considered. Participants called for greater transparency, unbiased information dissemination, and opportunities for diverse perspectives to be heard in future discussions. 	<ul style="list-style-type: none"> Participants discussed the infrastructure and facility needs of the district, including school buildings, classrooms, and transportation. Concerns were raised about overcrowding in schools, particularly in high-growth areas, and the need for additional facilities to accommodate growing student populations. Some advocated for investing in modernizing existing facilities, while others saw a split as an opportunity to prioritize infrastructure projects based on local needs and priorities. 	<ul style="list-style-type: none"> Participants considered the implications of future population growth and demographic changes on the district's capacity, resources, and infrastructure needs. Discussions focused on projected growth rates, urban development, and the potential impact on school enrollment patterns and demand for educational services. Some participants advocated for proactive planning and infrastructure investment to accommodate future growth, while others expressed concerns about the sustainability of the district's current size and structure. 	<ul style="list-style-type: none"> Discussions revolved around the accessibility and clarity of information provided to stakeholders about the district's future and potential options. Some participants expressed frustration with the complexity of the issues discussed and the difficulty in understanding the implications of different scenarios. Questions were raised about the effectiveness of communication channels, the availability of resources for community education and engagement, and opportunities for meaningful input.

Community Session 3

In the community meetings, 77% of participants thought the school board should recommend putting the reconfiguration up for a vote. Additionally, the district should keep running as a single, unified school system, according to 51% of the participants.

The possible impacts of reconfiguration on student learning were seen differently, with 40% predicting losses in academics and education and 27% predicting an increase in learning outcomes.

In the ranking of reconfiguration options, "Stay as single, consolidated district" received 57% of the votes. The responses to the question "split into two districts" and "split into three districts" were 24% and 19% respectively.

Most members of this group (77%) believe that Option 3 is the best two-way split, with Lehi in the east. Option 4, which depicted Pleasant Grove going east, was selected by 59% of respondents in a three-way split preference survey.

91% of participants agreed, reconfiguration considerations could be affected by potential tax changes. Moreover, 54% concurred that a larger school board was necessary if the district remained united.

Q16 - Rank the reconfiguration options based on your preference. (Rank order: 1= most favored 3=least favored)

Q17- If there was a 2 way split, which option is more preferable?

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Q18- If there was a 3 way split, which option is MOST preferable?

Q19-If there was a 3 way split, which option is LEAST preferable?

Q20 - Would you support the district remaining as one unit with an expansion of the board from 7 to 9 members?

Q21- Do you have any additional thoughts on this topic or information you want to share?

Desire for Unity and Cohesion:	Equity and Fairness Concerns:	Financial Considerations and Tax Burden:
<ul style="list-style-type: none"> Many participants expressed a strong preference for keeping the district together, citing benefits such as shared resources, community cohesion, and administrative efficiency. Unity was seen as crucial for maintaining consistent educational standards, preserving established relationships between schools and communities, and fostering a sense of belonging. Concerns were raised about potential fragmentation, loss of identity, and logistical challenges associated with a split. 	<ul style="list-style-type: none"> Participants highlighted the importance of equitable distribution of resources and opportunities across all schools within the district. There were concerns about potential disparities in funding, educational quality, and support services between different areas if the district were to split. Maintaining fairness and equal access to educational opportunities for all students, regardless of geographic location, was emphasized. 	<ul style="list-style-type: none"> Financial implications were a significant factor in participants' considerations, with concerns about the potential impact on taxes, property values, and household budgets. Questions were raised about how a split would affect school budgets, teacher salaries, employee benefits, and retirement plans. Some participants expressed skepticism about the affordability of maintaining educational standards and services in the event of a split.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Diverse Community Needs and Priorities:	Transparency and Communication:	Impact on Student Learning and Well-being:
<ul style="list-style-type: none"> Participants noted the diverse needs and priorities of different communities within the district, suggesting that a one-size-fits-all approach may not be suitable. Discussions revolved around accommodating growth, addressing infrastructure needs, and tailoring educational programs to meet the specific requirements of each area. A split was seen as potentially allowing for more localized decision-making and better alignment with the unique characteristics of individual communities. 	<ul style="list-style-type: none"> There were calls for greater transparency and communication from district officials regarding the potential implications of splitting or staying together. Participants expressed a desire for more information, clarity, and open dialogue about the decision-making process and the data used to inform it. Building trust through transparent communication and engaging stakeholders in meaningful discussions was seen as essential for reaching consensus on the best path forward. 	<ul style="list-style-type: none"> Concerns were raised about how a split or staying together would affect student learning outcomes, class sizes, and access to resources and support services. Participants emphasized the importance of prioritizing student well-being, academic success, and continuity of education in any decision made. Questions were raised about how potential disruptions, such as reconfiguration or changes in leadership, could impact student achievement and overall educational experiences.

Q21- Do you have any additional thoughts on this topic or information you want to share?

Employee Perspectives and Job Security:	Community Representation and Governance:	Infrastructure and Facilities Planning:	Long-term Sustainability and Future Planning:
<ul style="list-style-type: none"> Participants, including current and former employees, expressed concerns about how a split would affect job security, salaries, retirement benefits, and working conditions for district staff. Discussions centered around the potential impact on teacher recruitment and retention, morale, and professional development opportunities. Some participants questioned whether a split would create more opportunities for career advancement and local decision-making within their respective areas. 	<ul style="list-style-type: none"> Discussions revolved around the representation of different communities within the district and the governance structures that would best serve their interests. Participants considered options for increasing local control, such as expanding the number of board members or establishing separate governing bodies for each area. Questions were raised about how decision-making processes would change and whether communities would have adequate representation and influence in a split scenario. 	<ul style="list-style-type: none"> Concerns were raised about the capacity of existing facilities to accommodate growth and whether a split or staying together would better address infrastructure needs. Discussions focused on the allocation of resources for building new schools, renovating existing facilities, and addressing maintenance backlogs. Participants highlighted the importance of long-term planning and strategic investments in infrastructure to ensure that all students have access to safe and modern learning environments. 	<ul style="list-style-type: none"> Participants considered the potential long-term implications of a split or staying together on the district's ability to adapt to changing demographics, economic conditions, and educational trends. Discussions centered around the sustainability of current approaches to funding, governance, and service delivery in light of projected growth and budgetary constraints. Questions were raised about whether a split would position the district(s) better for future challenges or if staying together would provide greater stability and resilience in the face of uncertainty.

Combined Online Survey Data

In examining the results of the online survey distributed across the district, when asked if “The Alpine School District should remain as one consolidated district,” 48% agreed and 35% disagreed. Yet, 60% felt that the board should bring a reconfiguration vote forward. Additionally, 42% agreed with the statement that “The Alpine School District needs to be reconfigured into two or more separate school districts.”

Community participants indicated with 33% of the responses that anticipated student outcomes and educational programs were likely to worsen with reconfiguration. In addition, 42% indicated that local school communities would experience moderate to significant losses in academic, social, and educational outcomes.

As for the rank order for reconfiguration options, “Stay as single, consolidated district” received 43% of the votes, “Split into two districts” received 38%, and “Split into three districts” received 19%.

A solid portion of this group at 58% felt that the most preferable two-way split is Option 2 with Lehi going west. In the three-way split preference question, Option 4 with Pleasant Grove going east was the preferred option at 57%.

A strong 62% of the community session participants indicated that reconfiguration considerations are impacted by potential tax changes. A strong majority of 65% supported the idea of an expanded school board should the district remain as one.

Impact on Specialized Programs	Historical Precedent and Lessons Learned	Community Representation and Engagement	Overall District Functionality and Performance
<ul style="list-style-type: none">•Concerns are raised about the potential loss or reduction of specialized programs and services, such as career and technical education (CTE), dual language immersion (DLI), and special education.•Some worry that smaller districts may lack the resources or capacity to sustain or expand these programs, particularly if they rely on centralized funding or administrative support.•There is a desire to ensure that all students, regardless of which district they belong to, have access to high-quality and inclusive educational opportunities.	<ul style="list-style-type: none">•Some reference past experiences of other school districts that have undergone splits, expressing concerns about negative consequences such as increased administrative costs, loss of resources, and disruptions to education.•There is a call for thorough research and analysis of the potential benefits and drawbacks of a split, based on lessons learned from similar situations in other districts.•Concerns are raised about the potential for unintended consequences and long-term ramifications of a split, urging caution and careful consideration of all factors involved.	<ul style="list-style-type: none">•Some advocate for a split as a means to ensure more equitable representation and decision-making at the local level, particularly for communities that feel marginalized or overlooked within the current district.•There is a desire for greater community involvement and input in the decision-making process, with calls for transparency, accountability, and responsiveness from district leadership.•Concerns are raised about the current district's ability to adequately represent the diverse interests and priorities of its constituent communities, leading to calls for more localized governance structures.	<ul style="list-style-type: none">•Some argue that the current district is functioning well and that there is no need for a split, citing its overall performance and achievements compared to other districts.•Concerns are raised about the potential disruption and uncertainty that a split could cause, particularly if it leads to administrative inefficiencies, resource constraints, or declines in educational quality.•There is a desire to maintain continuity and stability within the current district, with a focus on addressing challenges and improving outcomes through collaborative efforts and strategic planning.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Employees

There is a strong belief among employees in the overall quality of education that ASD provides with 96% selecting good or excellent.

In this grouping, 46% of participants felt the school board should recommend a community vote on reconfiguration. Additionally, 69% of those same participants felt that the district should remain as one consolidated school district.

Thoughts differed on the impact a reconfiguration would have on student learning with 59% indicating learning outcomes would improve and 60% indicating there would be academic, social, and educational losses.

In the rank order of reconfiguration options, “Stay as single, consolidated district” received 63% of the votes. “Split into two districts” received 28%, and “Split into three districts” received 9%.

A majority of this group, 54%, felt that the most preferable two-way split is Option 2 with Lehi in the west. In the three-way split preference question, Option 4 with Pleasant Grove going east was the selected option at 52%.

Participants agreed (67%) that potential tax changes should impact reconfiguration considerations. Moreover, 81% supported the idea of an expanded school board should the district remain as one.

Skepticism about Splitting the District	Impact on Teacher Retention and Recruitment	Geographical Considerations and District Boundaries	Transparency, Communication, and Decision-Making
<ul style="list-style-type: none"> Some stakeholders express skepticism about the benefits of splitting the district and believe that it may create more problems than it solves. Concerns include the potential loss of resources, increased administrative costs, and negative impacts on students, employees, and communities. There's a preference for maintaining the district as one entity and finding solutions to existing challenges within the current framework. 	<ul style="list-style-type: none"> Stakeholders are concerned about the potential impact on teacher retention, recruitment, and job satisfaction. Many worry that changes in benefits, salaries, and working conditions could lead to a loss of quality teachers and staff. Suggestions include ensuring competitive compensation, job security, and supportive working environments to attract and retain talented educators. 	<ul style="list-style-type: none"> Concerns revolve around the geographical layout of the district, including disparities in resources, infrastructure, and access to services across different areas. Stakeholders highlight the need for equitable distribution of resources and infrastructure improvements, especially in rapidly growing communities. Suggestions include considering alternative district boundary configurations, such as North/South splits, to better address geographical challenges and disparities. 	<ul style="list-style-type: none"> Stakeholders emphasize the importance of transparency, effective communication, and inclusive decision-making processes. Many express a desire for more information, clarity, and opportunities for input from all stakeholders throughout the decision-making process. Suggestions include providing clear information about the rationale for a potential split, engaging stakeholders in meaningful dialogue, and prioritizing transparency and accountability in decision-making.

Parents

The Parent grouping represents a clear example of the community's varied perspectives. Survey data highlights significant support, exceeding 60%, for allowing the community to vote on potential reconfiguration initiatives.

However, opinions diverge on the issue of district unity, with approximately 40% advocating for maintaining consolidation and 42% favoring a split. Despite this divide, there is a shared belief among parents that students receive a quality education within ASD.

In the rank order of reconfiguration options, "Split into two districts" received 42%, "Stay as single, consolidated district" received 37% of the votes, and "Split into three districts" received 21%.

On the question of should there be a reconfiguration, 49% of respondents concurred. Among the options for a two-way split, 59% favored Option 2, which involves Lehi heading west. Regarding the three-way split preference, Option 4, entailing Pleasant Grove moving east, emerged as the preferred choice with 59% support.

Do you have any additional thoughts on this topic or information you want to share?

Concerns about Resource Allocation	Impact on Teachers and Employees	Overcrowding and Infrastructure
<ul style="list-style-type: none"> Many express concerns about the fair allocation of resources in the district, including funding, facilities, and programs. Some worry that certain areas, particularly the west side, are being overlooked or underserved in terms of infrastructure and educational opportunities. Suggestions include implementing impact fees for new builds, ensuring equitable representation on the school board, and exploring options for sharing resources between districts. 	<ul style="list-style-type: none"> Many teachers and employees are worried about the potential negative consequences of a split, including loss of benefits, uncertainty about employment, and disruption to school schedules. There are concerns about how a split could affect retirement plans, insurance coverage, and overall job stability for educators. Some emphasize the importance of considering the needs and concerns of teachers and staff members in any decision-making process. 	<ul style="list-style-type: none"> Overcrowding in schools, particularly on the west side, is a significant concern for many respondents, who fear it may impact student learning and well-being. There is a consensus that additional infrastructure, such as new schools and classrooms, is urgently needed to address overcrowding and accommodate growing student populations. Suggestions include prioritizing the construction of new schools, implementing more efficient use of existing facilities, and exploring innovative solutions to alleviate overcrowding.

Do you have any additional thoughts on this topic or information you want to share?

Transparency and Communication	Concerns about Student Well-being	Financial Considerations
<ul style="list-style-type: none"> Many respondents express frustration with what they perceive as a lack of transparency and biased communication from district officials regarding the potential split. There are calls for more open and honest dialogue, as well as greater efforts to involve community members in the decision-making process. Suggestions include providing clear and accurate information about the implications of a split, conducting more inclusive public meetings, and actively soliciting feedback from stakeholders. 	<ul style="list-style-type: none"> Ensuring the well-being and educational success of students is a top priority for many respondents, who worry about how a split could impact access to resources and support services. There are concerns about potential disruptions to students' academic progress, social connections, and extracurricular opportunities. Some emphasize the importance of putting students' needs first and considering the long-term implications of any decision on their overall well-being. 	<ul style="list-style-type: none"> Financial implications, including potential tax increases and changes to funding allocations, are a major concern for many respondents. Some worry about the affordability of a split, particularly for residents on fixed incomes or in lower-income communities. Suggestions include exploring alternative funding sources, conducting cost-benefit analyses, and ensuring that any financial burdens are equitably distributed.

Do you have any additional thoughts on this topic or information you want to share?

Local Control and Representation	Impact on Special Education and Other Programs	Community Cohesion and Identity	Need for Comprehensive Planning and Collaboration
<ul style="list-style-type: none"> • Many respondents express a desire for more local control and representation in decision-making processes, particularly regarding educational priorities and resource allocation. • There are concerns about the current district structure's ability to effectively address the diverse needs of various communities. • Suggestions include increasing the number of school board members to ensure fair representation, empowering local school communities to make more decisions, and promoting greater collaboration between districts. 	<ul style="list-style-type: none"> • Concerns about the potential impact of a split on special education programs, as well as other specialized programs such as dual language immersion and career and technical education, are widespread. • Many worry that a split could result in disruptions to these programs and reduced access for students. • Suggestions include prioritizing the protection and expansion of specialized programs, exploring options for sharing resources between districts, and ensuring that all students have equitable access to educational opportunities. 	<ul style="list-style-type: none"> • Maintaining community cohesion and identity is important to many respondents, who worry that a split could lead to division and fragmentation. • There are concerns about the potential loss of shared resources, traditions, and collective identity associated with the current district. • Suggestions include finding ways to preserve and strengthen community bonds, promoting inclusive decision-making processes, and fostering a sense of unity and common purpose among stakeholders. 	<ul style="list-style-type: none"> • Many respondents emphasize the importance of comprehensive planning and collaboration among stakeholders to address the complex challenges facing the district. • There is a recognition that any decision regarding a potential split must be carefully considered and based on thorough analysis of the potential impacts. • Suggestions include engaging in collaborative decision-making processes, conducting thorough research and analysis, and exploring all available options before making any final decisions.

American Forks

At the American Fork engagement session 92% of community members revealed that ASD is providing a good or excellent education. The AF participants felt the school board should recommend a community vote on reconfiguration with 56% in the affirmative. Yet, 51% of those same participants felt that the district should remain as one consolidated school district while 30% indicated that the district should split.

Thoughts differed on the impact a reconfiguration would have on student learning.

In the rank order of reconfiguration options, “Stay as single, consolidated district” received 49% of the votes. “Split into two districts” received 32%, and “Split into three districts” received 19%.

There was little separation as related to the two-way split preference with 49% selecting Option 2 and 51% choosing Option 3. Option 4 with Pleasant Grove going east was the chosen three-way split selection at 50%.

Participants agreed (64%) that potential tax changes should impact reconfiguration considerations, while 70% supported the idea of an expanded school board should the district remain as one.

Do you have any additional thoughts on this topic or information you want to share?

Preference for Unity	Concerns about Resource Allocation	Impact on Special Education
<ul style="list-style-type: none"> The majority of respondents express a desire for the Alpine School District to remain unified, citing the efficiency of current operations and resource management under the existing structure. Concerns are raised about potential negative impacts on students, employees, and communities if the district were to split, including increased taxes, administrative complexities, and decreased bargaining power. 	<ul style="list-style-type: none"> Many respondents highlight concerns about equitable resource allocation across the district, suggesting that a unified approach may result in more consistent distribution of resources. Some express worries that a split could lead to disparities in funding and support for schools, particularly in rapidly growing areas, potentially affecting the quality of education. 	<ul style="list-style-type: none"> Several respondents express concerns about the potential impact of a district split on special education programs and services, including disruptions to students' learning environments and difficulties in accessing necessary resources. There are calls for maintaining inclusive environments where special education students can attend their neighborhood schools alongside their peers, emphasizing the importance of social support and community integration.

Do you have any additional thoughts on this topic or information you want to share?

Financial Considerations	Impact on Employees	Concerns about Educational Quality
<ul style="list-style-type: none"> Financial implications, including tax increases, budget deficits, and concerns about pension plans and healthcare benefits for employees, are major points of discussion among respondents. There's a desire for transparency and accountability in financial management, with some suggesting that reallocating funds from administrative positions to direct educational resources could be beneficial. 	<ul style="list-style-type: none"> Respondents express concerns about the potential impact of a district split on employee benefits, job security, and seniority, with worries about pension plans and healthcare coverage. Some worry about the potential for increased competition for jobs and the retention of qualified staff, particularly if benefit packages are affected by the split. 	<ul style="list-style-type: none"> Many respondents emphasize the importance of maintaining educational quality and opportunities for students, expressing worries that a split could lead to disruptions in programs and services. There are concerns about the ability of smaller districts to provide the same level of academic and extracurricular opportunities as the current unified district.

Do you have any additional thoughts on this topic or information you want to share?

Community Representation	Impact on School Choice	Infrastructure and Facilities	Need for Comprehensive Analysis
<ul style="list-style-type: none"> Several respondents advocate for increased community representation and input in decision-making processes, suggesting that a larger school board or more localized governance structures could better serve diverse community needs. There's a desire for more direct involvement in shaping policies and initiatives that affect local schools and neighborhoods. 	<ul style="list-style-type: none"> Concerns are raised about the potential impact of a district split on school choice and access to preferred educational options, particularly for families with children attending specialized programs or schools outside their immediate neighborhoods. Some worry that a split could limit options for students and families, leading to overcrowding or disruptions in enrollment patterns. 	<ul style="list-style-type: none"> Many respondents highlight concerns about the condition of school infrastructure and facilities, expressing a desire for increased investment in maintenance and renovations. There are calls for more efficient use of funds to address infrastructure needs, including upgrades to school facilities such as bathrooms and classrooms. 	<ul style="list-style-type: none"> Several respondents emphasize the importance of conducting a thorough analysis of the potential impacts of a district split, including financial, educational, and community considerations. There's a call for transparency in decision-making processes and for all stakeholders to be included in discussions and planning for the future of the district.

Cedar Valley

At the Cedar Valley community engagement, respondents 83% indicated that ASD students receive a good or excellent education. Two-thirds (66%) felt that the board should bring a reconfiguration vote forward. When asked if ASD should remain as one consolidated district, 37% agreed and 44% disagreed. Just over half (51%) agreed that ASD needs to be reconfigured.

Respondents differed on the impact a reconfiguration would have on student learning and their respective school communities.

As for the rank order for reconfiguration options, “Split into two districts” received 51%, “Stay as single, consolidated district” received 34% of the votes, and “Split into three districts” received 16%.

A solid majority of this group at 86% felt that the most preferable two-way split is Option 2 with Lehi going west. In the three-way split preference question, Option 4 with Pleasant Grove going east was the preferred option at 72%.

Concerns about Overcrowding and Teacher Pay <ul style="list-style-type: none"> Many expressed worry about overcrowded schools and emphasized the importance of adequately compensating teachers. There's a consensus that addressing overcrowding and improving teacher pay are crucial for providing quality education to children. The need for increased funding and support for teachers is seen as essential to address the challenges of overcrowding. 	Communication and Transparency <ul style="list-style-type: none"> Respondents highlighted the importance of clear communication and transparency from the school board, particularly regarding bond proposals and district decisions. Lack of awareness about past bond proposals was cited as a reason for their failure, emphasizing the need for better advertising and education about future bond initiatives. Transparency in decision-making processes, especially regarding the potential district split, was requested to ensure community understanding and involvement. 	Concerns about District Splitting <ul style="list-style-type: none"> There's widespread concern and skepticism about the potential split of the district, with many expressing doubts about the benefits and feasibility of such a move. Some respondents voiced a preference for maintaining the district as a single entity, citing concerns about the impact on resources, funding, and educational opportunities if split. Questions were raised about the motives behind the proposed split, with a desire for more clarity and transparency from decision-makers.

Lehi

At the Lehi community session 89% of participants shared that ASD is providing a good or excellent education. The Lehi participants felt the school board should recommend a community vote on reconfiguration with 63% agreeing. In addition, 49% felt that the district should remain as one consolidated school district while 33% indicated that the district should split.

Thoughts were mixed on the impact a reconfiguration would have on student outcomes.

In the rank order of reconfiguration options, “Stay as single, consolidated district” received 44% of the votes. “Split into two districts” received 35%, and “Split into three districts” received 21%.

There was little separation as related to the two-way split preference with 49% selecting Option 2 and 51% choosing Option 3. Option 4 with Pleasant Grove going east was the chosen three-way split selection at 56%.

Participants agreed (60%) that potential tax changes should impact reconfiguration considerations, while 66% supported the idea of an expanded school board should the district remain as one.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Lone Peak

At the Lone Peak community engagement, respondents 91% indicated that ASD students receive a good or excellent education. In regard to a reconfiguration vote, 65% felt that the board should bring the question forward. When asked if ASD should remain as one consolidated district, 40% agreed and 43% disagreed. Additionally, 47% agreed that ASD needs to be reconfigured.

Respondent attitudes on the impact that a reconfiguration would have on student learning and their respective school communities were mixed.

As for the rank order for reconfiguration options, “Split into two districts” received 38%, “Stay as single, consolidated district” received 35% of the votes, and “Split into three districts” received 27%.

There was no separation on the two-way split preference with 50% selecting Option 2 and 50% choosing Option 3. Option 4 with Pleasant Grove going east was the chosen three-way split selection at 58%.

With 65% agreement, participants expressed that potential tax changes should impact reconfiguration considerations, while 59% supported the idea of an expanded school board should the district remain as one.

Concerns about Equity and Fairness	Preference for Status Quo	Teacher Concerns	Need for Comprehensive Planning
<ul style="list-style-type: none"> Equity concerns were raised regarding the potential distribution of resources and funding across newly formed districts. Some worry that certain areas or student populations could be disadvantaged in a split scenario. Fairness in resource allocation and educational opportunities for all students must be carefully considered in any restructuring plan. 	<ul style="list-style-type: none"> A significant portion of respondents expressed a preference for maintaining the district as it is. They cite the current district's successes and achievements and are wary of potential disruptions from a split. Stability and continuity in educational leadership and policies are important considerations for these individuals. 	<ul style="list-style-type: none"> Several comments expressed concerns about the impact of a district split on teachers, including potential changes in employment conditions and school schedules. Teachers' voices and perspectives should be considered in any decision-making process regarding the district's future. Maintaining teacher morale and ensuring a supportive work environment are crucial for retaining high-quality educators. 	<ul style="list-style-type: none"> Many respondents emphasized the importance of comprehensive planning and analysis before making any decisions about the district's structure. They urge thorough consideration of all potential impacts, including financial, educational, and community-related factors. Strategic planning should involve input from various stakeholders and address long-term implications for students and communities.

Mountain View

Mountain View respondents were decisive in their opinion on the overall quality of education that ASD provides with 88% selecting good or excellent.

In this grouping, 67% of participants felt the school board should recommend a community vote on reconfiguration. Nonetheless, 55% of those same participants felt that the district should remain as one consolidated school district.

Thoughts differed on the impact a reconfiguration would have on student learning with 50% indicating learning outcomes would improve and 48% indicating there would be academic, social, and educational losses.

In the rank order of reconfiguration options, "Stay as single, consolidated district" received 52% of the votes. "Split into two districts" received 32%, and "Split into three districts" received 17%.

There was no preference expressed on the question of the two-way split with 50% selecting Option 2 and 50% choosing Option 3. Option 4 with Pleasant Grove going east was the chosen three-way split selection at 57%.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Participants agreed (69%) that potential tax changes should impact reconfiguration considerations. Moreover, 68% supported the idea of an expanded school board should the district remain as one.

Some express concerns about potential disruptions to programs and services in the event of a split. 	<ul style="list-style-type: none"> Several respondents acknowledge the complexity of the issue and the challenges involved in making a decision. There's a recognition of the need for careful consideration of all factors and potential consequences. Some express a desire for a thoughtful and collaborative approach to addressing the district's needs and challenges.

Skyridge

At the Skyridge community engagement, respondents 89% indicated that ASD students receive a good or excellent education. Regarding a reconfiguration vote, 63% felt that the board should bring the question forward. When asked if ASD should remain as one consolidated district, 44% agreed and 38% disagreed. Additionally, 44% agreed that ASD needs to be reconfigured.

Respondent attitudes on the impact that a reconfiguration would have on student learning and their respective school communities were mixed. The outcome question was evenly split with 37% anticipating outcomes would improve and anticipating outcomes would 37% worsen.

As for the rank order for reconfiguration options, “Stay as single, consolidated district” received 42% of the votes. “Split into two districts” received 31%, and “Split into three districts” received 27%.

Interestingly the majority of Skyridge participants, 72%, felt that the most preferable two-way split is Option 3 with Lehi in the east. In the three-way split preference, Option 4 with Pleasant Grove going east was the selected option at 60%.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

With 66% agreement, participants indicated that potential tax changes should impact reconfiguration considerations, while 63% supported the idea of an expanded school board should the district remain as one.

Concerns About Splitting the District	Geographical Considerations	Financial Implications
<ul style="list-style-type: none"> Many respondents express apprehension about the potential split, citing worries about loss of resources, impacts on teacher salaries and employment, and disruptions to students. Some fear that a split may exacerbate inequalities between districts, particularly in terms of funding, resources, and opportunities for students. There's a general sentiment that if the district is functioning well as a whole, there may be little need for a split. 	<ul style="list-style-type: none"> Several respondents suggest considering a North/South split rather than an East/West split, citing concerns about weather disparities and geographical differences affecting school operations. There's a recognition that different areas within the district have unique needs and challenges, which may warrant tailored solutions. Some emphasize the importance of ensuring that boundaries are drawn in a way that makes logistical sense and minimizes disruptions for students and families. 	<ul style="list-style-type: none"> Many express concerns about the financial implications of a split, including potential increases in taxes, administrative costs, and the overall burden on taxpayers. Some suggest exploring alternative solutions to address financial challenges within the district, such as lobbying to repeal laws that limit impact fees on new builds. There's a desire for transparency and accountability in how financial decisions are made, particularly regarding budget allocations and resource distribution.

Do you have any additional thoughts on this topic or information you want to share?

Future Planning and Proactivity	Resource Sharing and Collaboration	Student Success and Academic Quality
<ul style="list-style-type: none"> While some oppose the idea of a split, others acknowledge that it may eventually become necessary and appreciate the district's proactive approach in considering potential changes. There's a call for long-term planning and strategic decision-making that takes into account projected growth, demographic shifts, and evolving educational needs. Some emphasize the importance of flexibility and adaptability in responding to future challenges, whether through a split or other means. 	<ul style="list-style-type: none"> Several respondents advocate for exploring options for sharing resources between districts, particularly for special education, technical programs, and software contracts. There's recognition that collaboration and cooperation between districts could help mitigate costs, expand opportunities for students, and improve overall efficiency. Some suggest forming partnerships with neighboring districts or municipalities to leverage resources and expertise in addressing common challenges. 	<ul style="list-style-type: none"> The primary focus for many respondents is on ensuring the best possible education and opportunities for students, regardless of whether the district remains unified or splits. There's a desire for smaller class sizes, adequate resources, and high-quality instruction that meets the diverse needs of students across the district. Some express concerns about maintaining academic standards and program excellence in the event of a split, particularly if resources are spread too thin or inequalities are exacerbated.

Do you have any additional thoughts on this topic or information you want to share?

Community Engagement and Representation	Impact on Teachers and Employees	Equity and Access	Long-Term Planning and Sustainability
<ul style="list-style-type: none"> Many emphasize the importance of involving stakeholders, including parents, teachers, and community members, in the decision-making process regarding the potential split. There's a desire for transparency, open communication, and meaningful opportunities for input and feedback from those directly affected by any changes. Some express concerns about the role of the school board and district leadership in influencing public opinion and decision-making, calling for greater accountability and responsiveness to community needs. 	<ul style="list-style-type: none"> Several respondents express concerns about the potential impact of a split on teacher salaries, benefits, and employment opportunities. There's a recognition that a split may result in mass shuffling of teachers across the county, with different districts offering varying incentives to attract and retain talent. Some emphasize the importance of ensuring stability and support for district employees, particularly in light of recent challenges and uncertainties in the educational landscape. 	<ul style="list-style-type: none"> Equity in educational opportunities and access to resources is a recurring theme, with many expressing concerns about disparities between different areas within the district. There's a desire for fairness and equal treatment, particularly for students in underserved or disadvantaged communities who may already face barriers to success. Some emphasize the need for policies and initiatives that address inequities and ensure that all students have the support and resources they need to thrive academically and personally. 	<ul style="list-style-type: none"> Respondents stress the importance of making decisions that are sustainable and consider the long-term implications for students, families, and communities. There's a desire for solutions that not only address immediate challenges but also set the district on a path toward continued growth, innovation, and success. Some advocate for comprehensive planning processes that take into account a wide range of factors, including demographic trends, infrastructure needs, and community feedback, to ensure that any changes are well-informed and future-ready.

Timpanogos

At the Timpanogos community session, 87% of participants shared that ASD is providing a good or excellent education. Respondents felt the school board should recommend a community vote on reconfiguration with 60% agreeing. Moreover, 49% felt that the district should remain as one consolidated school district while 38% indicated that the district should split.

Opinions were divided on the potential effects of the reconfiguration on student learning. While 47% believed that learning outcomes would improve, an almost equal 45% anticipated academic, social, and educational losses.

In the rank order of reconfiguration options, “Stay as single, consolidated district” received 43% of the votes. “Split into two districts” received 39%, and “Split into three districts” received 19%.

Most participants, 62%, felt that the most preferable two-way split is Option 2 with Lehi in the west. In the three-way split preference question, Option 4 with Pleasant Grove going east was the selected option at 52%.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Session participants agreed (63%) that potential tax changes should impact reconfiguration considerations, while 61% supported the idea of an expanded school board should the district remain as one.

Advantages of Remaining as One District	Concerns About Splitting the District	Doubts About the Process
<ul style="list-style-type: none"> Staying as one district provides more resources for special programs and negotiating power for insurance companies and legislators. It took ASD many years to develop infrastructure and logistics necessary to serve students and the community well. A large district offers unique programs and opportunities for diverse student needs. 	<ul style="list-style-type: none"> Splitting would require duplicating existing infrastructure, such as board members, district offices, and special education schools, which could increase taxes for everyone. Many teachers and administrators may leave in search of more stability. Some worry that smaller communities with fewer students and lower income would be disadvantaged by a split. 	<ul style="list-style-type: none"> The MGT public meetings were perceived as one-sided, slanted towards the district not splitting, and not providing a fair representation of options. Concerns were raised about the assumptions used in the bonding presentations and the need for the public to be made aware of them. There is skepticism about the involvement of an out-of-state company in creating plans without a deep understanding of Utah's context.

9. COMMUNITY & STAKEHOLDER ENGAGEMENT

Do you have any additional thoughts on this topic or information you want to share?

Preference for Staff and Faculty Input	Impact on Local Communities	Complexities of a Split
<ul style="list-style-type: none">• There is a strong desire for board members to consider staff and faculty input when making decisions about putting the split on the ballot.• Concerns were raised about board members representing their constituents' opinions rather than their personal feelings about the issue.• Input from employees is seen as essential for making informed decisions about the potential split.	<ul style="list-style-type: none">• Some feel that staying together benefits their local community, while others express concern about how a split might affect their area.• There are worries about how a split could impact school closures, services, and opportunities for students in specific neighborhoods.• The potential effects on property taxes and the ability to maintain services for students in smaller communities are significant concerns.	<ul style="list-style-type: none">• Splitting the district would involve significant complexities, including creating new board members, district offices, and schools.• Concerns were raised about the financial implications of a split and the need to share resources effectively between the new districts.• The process of splitting would require careful planning and consideration of various factors to ensure a smooth transition.

Desire for Transparency and Information	Impact on Employees	Community Engagement and Support	Preference for Maintaining Current Structure
<ul style="list-style-type: none">• There is a call for greater transparency in the decision-making process, with concerns about biased presentations and the need for more information.• Some express the need for more clarity on the potential benefits and drawbacks of splitting the district.• Transparency and access to accurate information are seen as essential for gaining public trust and support.	<ul style="list-style-type: none">• Concerns about the impact on employees, including potential loss of benefits, retirement packages, and career stability.• Questions about whether employees would be grandfathered into existing benefits and how a split would affect their job security.• Recognition of the importance of retaining quality teachers and staff in maintaining the district's educational standards.	<ul style="list-style-type: none">• Some feel that community engagement and support are crucial for making decisions about the district's future.• There is a desire for voters to educate themselves before voting and for board members to represent their constituents' interests.• Concerns were raised about potential unrest and confusion among voters, emphasizing the need for clear communication and understanding.	<ul style="list-style-type: none">• Many express a preference for maintaining the current structure of the district, citing its strengths and the benefits of a large district.• Concerns about losing the advantages of a large district, such as shared resources and collaborative communities.• Calls for exploring alternatives to splitting, such as adding more board members or raising taxes, to address concerns while maintaining the district's unity.

Westlake

At the Westlake engagement session 88% of community members revealed that ASD is providing a good or excellent education. Participants did believe with a response of 62% that the school board should recommend a community vote on reconfiguration. Additionally, 43% of those same respondents felt that the district should remain as one consolidated school district while 40% indicated that the district should split.

Thoughts differed on the impact a reconfiguration would have on student learning. The selections regarding learning outcomes reflected this separation of thought with 34% believing outcomes and programs would improve and 36% believing they would worsen.

Regarding the rank order reconfiguration options, “Split into two districts” received 53%, “Stay as single, consolidated district” received 37% of the votes, and “Split into three districts” received 10%.

Most participants, 91%, felt that the most preferable two-way split is Option 2 with Lehi in the west. Option 4 with Pleasant Grove going east was the chosen three-way split selection at 72%.

With 60% agreement, participants expressed that potential tax changes should impact reconfiguration considerations, while 64% supported the idea of an expanded school board should the district remain as one.

Do you have any additional thoughts on this topic or information you want to share?

Preference for Unity:

- Many stakeholders express a strong preference for maintaining the Alpine School District as one unified entity.
- They believe that a unified district allows for shared resources, cost efficiency, and better opportunities for all students.
- Concerns are raised about potential financial disparities and the impact on educational quality if the district were to split.

Financial Concerns:

- Stakeholders express apprehension about potential tax increases and financial implications associated with splitting the district.
- There are worries about the unequal distribution of resources and funding between the east and west sides of the district.
- Some fear that a split could lead to higher costs for taxpayers and negatively affect employee compensation and benefits.

Educational Quality and Resources:

- Concerns are raised about overcrowded schools, large class sizes, and the need for additional facilities, particularly in rapidly growing areas like Saratoga Springs.
- Stakeholders emphasize the importance of maintaining high-quality education and ensuring access to special programs and services for all students.
- There's a desire to address disparities in resources and opportunities between different areas within the district.

Do you have any additional thoughts on this topic or information you want to share?

Impact on Special Education and Alternative Programs	Lessons from Past District Splits	Representation and Governance
<ul style="list-style-type: none"> Stakeholders highlight the importance of prioritizing special education programs and alternative education options. They express concerns about potential disruptions to these programs and the need for continuity and support regardless of the district's configuration. Some emphasize the need for comprehensive planning to ensure that these programs are not negatively impacted by any changes. 	<ul style="list-style-type: none"> References to past district splits, such as Jordan and Canyons, are made to draw lessons for the current situation. Some stakeholders highlight the negative consequences experienced in previous splits, such as administrative inefficiencies and educational disruptions. Others suggest learning from past mistakes to ensure that any potential split is managed effectively and does not harm students or educators. 	<ul style="list-style-type: none"> Concerns are raised about representation and governance, particularly regarding decision-making processes and community input. Some stakeholders feel that the west side of the district may be underrepresented and seek more local control and decision-making authority. There's a desire for transparent communication and collaboration between the district administration and stakeholders.

Do you have any additional thoughts on this topic or information you want to share?

Need for Comprehensive Planning	Concerns About Tax Burden	Desire for Local Control	Importance of Student Well-being
<ul style="list-style-type: none"> Stakeholders emphasize the importance of comprehensive planning to address the district's challenges and ensure a smooth transition, if necessary. They stress the need for clear communication, thorough analysis of potential impacts, and consideration of long-term consequences. Some suggest phased approaches or alternative solutions to mitigate potential disruptions and address the district's needs effectively. 	<ul style="list-style-type: none"> Many stakeholders express concerns about the potential tax burden associated with splitting the district. They worry about the affordability of tax increases, particularly for young families and residents on fixed incomes. There's a desire for fiscal responsibility and careful consideration of the financial implications for taxpayers. 	<ul style="list-style-type: none"> Some stakeholders express a desire for more local control and decision-making authority at the school level. They believe that local communities should have a greater say in educational policies and resource allocation. There's a recognition of the unique needs and priorities of different communities within the district. 	<ul style="list-style-type: none"> Throughout the feedback, there is a consistent emphasis on prioritizing student well-being and educational outcomes. Stakeholders stress the importance of providing quality education, supportive environments, and adequate resources for all students. There's a shared commitment to ensuring that any decisions made regarding the district's future ultimately benefit the students.

10. Findings and Recommendations

Determining whether the Alpine school district should remain as an individual district or split into multiple districts is a matter of many key considerations. The decision is based on assessing the potential benefits and drawbacks of all options.

- **Population and Size:** Consideration of the current population and geographic size of the district. If it is too large to effectively manage or if population growth is unevenly distributed, splitting could help in improving resource allocation and management.
- **Educational Needs:** Evaluation of whether the educational needs of students are being adequately met within the current district structure. If there are disparities in resources, academic performance, or access to programs, splitting may provide an opportunity to address these issues more effectively.
- **Community Insight:** Gather insights from stakeholders including parents, teachers, administrators, and community members. Understanding their perspectives on the potential benefits and drawbacks of splitting the district will help in making an informed decision.
- **Financial Implications:** Analysis of the financial impact of splitting the district. Consideration of the cost of establishing and maintaining separate administrative structures, the potential changes in funding allocation, and the overall budgetary implications for new potential districts.
- **Logistical Challenges:** Assessment of the logistical challenges associated with splitting the district, such as redrawing boundaries, reassigning staff, and managing transitions for students and families. Ensure that any potential disruptions for students are carefully considered and mitigated.
- **Educational Quality:** Consideration of whether splitting the district could enhance educational quality and outcomes for students. This could include factors such as class sizes, teacher-student ratios, curriculum development, and potential impacts on specialized programs.
- **Long-Term Vision for School Community:** Consideration of how splitting or maintaining the district structure would impact future growth, development, and the overall educational experience for students. Would this decision align with the long-term vision for education in the community?

Remain as One Consolidated District

The argument for maintaining the Alpine School District as a single entity is not just a matter of tradition; it is a strategic decision. This approach is rooted in three key principles: inclusivity, efficiency, and collaboration.

ASD students from different neighborhoods and socioeconomic backgrounds learn together, fostering empathy and understanding – crucial skills for a globalized world. Fragmentation risks segregation,

10. FINDINGS AND RECOMMENDATIONS

perpetuating inequalities, and hindering a sense of belonging for all students across all school communities.

Maintaining a unified district allows for better resource allocation and equal opportunities. Consolidated buying power lowers costs for essential goods and services. These savings can then be directly reinvested in district-wide programs that benefit all students, not just those in a few smaller districts.

Alpine School District's size fosters collaboration and innovation. Educators across the district can share best practices and pilot new initiatives on a larger scale than smaller districts could manage. This cross-pollination fuels continuous improvement, ensuring the district adapts to meet the evolving needs of students and prepares them for the 21st-century economy.

Some may worry that unification sacrifices local control. However, Alpine School District utilizes a distributed leadership model. Schools and communities have a voice within the broader district framework. Through elected school boards, parent-teacher associations, and community councils, stakeholders influence decision-making and address local needs within the shared vision of ASD. This fosters ownership and engagement, ensuring all communities feel invested in the district's success.

Alpine School District has had a history of collective purpose. By choosing unity, stakeholders reaffirm their commitment to the district's core values – excellence, equity, and community engagement. This ensures Alpine School District remains a beacon of hope and opportunity for generations to come.

Reconfigure Into Multiple Districts

There are potential benefits of dividing the district into two distinct entities. A split could lead to enhanced educational outcomes, improved resource allocation, and a more responsive learning environment for all students in their specific school communities.

A divided district allows individual communities to develop curriculums that cater to their specific needs. Communities could choose to prioritize career and technical training programs they believe are crucial for their future workforce, while others might focus and expand advanced placement courses. This localized approach ensures students are equipped with the skills most relevant to their futures.

A smaller district fosters a sense of ownership and engagement among parents, educators, and community leaders. Decision-making becomes more responsive to local needs, allowing stakeholders to have a greater say in shaping the educational experience for their children. Imagine Oakley residents directly influencing resource allocation for vocational training programs.

Dividing the district eliminates the dilution of resources. Communities would not have to compete for expansions, renovations, or upgrades with other schools. Each district could allocate local tax resources directly to their facilities, programs, and initiatives. This could potentially provide the greatest impact on their student populations.

Smaller districts can streamline approval processes for innovative programs. A proposal could be implemented more swiftly within a more focused structure, allowing students to benefit from a unique learning opportunity sooner.

10. FINDINGS AND RECOMMENDATIONS

Collaboration can still flourish on a regional level. Districts could share best practices and partner on larger initiatives, fostering a spirit of innovation within each entity. Dividing the district will undoubtedly require careful planning to ensure a smooth transition for students, staff, and families. Resource allocation and potential disruptions must be thoroughly addressed. Inter-district collaboration can ensure student populations remain diverse, promoting a well-rounded educational experience for all.

The decision to split the Alpine School District is not to be taken lightly. A case can be made that a strategic division could lead to a more responsive, efficient, and ultimately, more effective educational system for all students. Local communities could potentially tailor programs and allocate resources, foster innovation, and ensure a smooth transition.

Findings

After analysis and examination of the demographic, enrollment, geographical, and financial data, MGT developed six viable options for the district and stakeholders to consider. The first option is to stay as currently configured. Option 2 and 3 split the district into two new districts. Option 4, 5, and 6 split the option into three new districts.

After careful consideration and multiple stakeholder engagement opportunities, here are the key findings:

- Respondents from the community engagement believe that students are getting a good education. Every subgroup indicates that students in the Alpine School District are receiving a good or excellent education by large margins.
- As a group, respondents from community engagement endorse a potential vote on reconfiguration. All but one of the subgroups polled, employees, indicated their support for initiating the voting process. The employees, as a group, would prefer the question not to be brought forward.
- Overall, respondents from the community engagement indicated they would like to remain as one district. Despite this desire for a vote, a significant portion of the same polling participants also indicated their preference for the district to remain as one consolidated district. This dual sentiment points to the complexity of the community's perspectives. Respondents from the attendance zones of Cedar Valley, Westlake, and Lone Peak indicated a preference for a two-way split. Parents and Guardians were a designated subgroup for our analysis, and they chose a two-way split with 42% with one-district receiving 37%.
- If the district decides to put reconfiguration on the ballot, a reconfiguration resulting in two districts is preferred by respondents from the community engagement. While indicating that the district should remain as one, respondents preferred a two-district reconfiguration over a three-district reconfiguration. No subgroup expressed a strong desire for a three-district reconfiguration.

10. FINDINGS AND RECOMMENDATIONS

- The two-district reconfiguration options are not complex, conversely the decision of which option to put forward is more difficult. Both two-district options divide ASD into an eastern district and a western district, the difference between the options is determined by which district Lehi resides in. Most of the overall respondents from the community engagement supported Option 2 with Lehi going west. However, it should be noted that respondents from the high school attendance zones that currently make up Lehi favor Option 3 with Lehi going East. Skyridge attendance zone expressed support for Option 3 with 72%, Lehi and American Fork selected Option 3 with 51%, and Lone Peak and Mountain View were 50/50 on this question.

Recommendation

It is evident from the community engagement respondents there is strong sentiment to put the reconfiguration question to a community-wide vote, even though most of those respondents indicated they preferred to remain as one consolidated district.

Respondents also expressed a strong preference for a two-district configuration versus the three-district configuration options if a reconfiguration were to occur.

Therefore, based upon all the data gathered and the community response, MGT is comfortable recommending ASD bring forth a ballot question that addresses a potential two-district configuration.

By adding a question to the ballot, voters can decide whether to stay with the current consolidated school community or create separate districts. This allows the two potential school communities to evaluate the pros and cons of their new districts.

This approach promotes transparency, enabling residents to make well-informed decisions based on their school community preferences and priorities. In the end, the community vote serves as the most democratic process to determine the best direction for the district's future.
