### APPLICATION FOR ISSUANCE OF CONDITIONAL USE PERMIT

*The Municipal Code 17.48.020 requires that the following be considered to obtain a Conditional Use Permit.*

Application Date 7/12/24 Applicant Name Caleb Stoker

Mailing Address [REDACTED]

Phone Number [REDACTED]

Property address of proposed conditional use 1309 N 1200 W Current Zoning: C2

Please list the requested conditional use as listed within the city zoning ordinance

Construction Business

A) Explain how the proposed use of the particular location is necessary or desirable to provide a service or facility which will contribute to the general well-being of the community.

This location is on a main road that is easily accessible to potential tenants. It is also in a location that is hard to use for other purposes due to the property uses to the north and south.

---

---

---

B) Explain how such use will not be detrimental to the health, safety and general welfare of persons nor injurious to property or improvements in the community, but will be compatible with and complementary to the existing surrounding uses.

We will clean up a property that has been over-grown with weeds for many years.

---

---

---

C) Explain how the proposed use will comply with the regulations and conditions specified in this title for such use.

We will install a 6' fence on the west and north property. Building will be centered on the frontage leaving approximately 48' from the north and south properties and another 50' from the west property line. Some outside of trailers and equipment will be stored behind the building and fully fenced in area.

---

D) Explain how the proposed use conforms to the goals, policies and governing principles and land use of the Farr West City General Plan.

The current zoning of C2 is to provide for business to be in this area. This location does not have the traffic volume for some retail businesses. This location will provide construction companies opportunity to move out of some residential areas to this location.

E) Explain how the proposed use will not lead to the deterioration of the environment, or ecology of the immediate vicinity, the general area, or the community as a whole.

No hazardous operations are expected to be in this area. We will clean up and maintain a landscaped property.

## MEMORANDUM

CONSULTING ENGINEERS

TO: Farr West City Planning Commission and City Council

FROM: Matt Robertson, P.E.  
City Engineer

RE: **BRAD BUTTERFIELD SITE PLAN**  
**Site Plan Review**

Date: August 5, 2024

Our office has completed a review of the site plan for the Brad Butterfield Site located at 1407 North 2000 West. This site is the location of an existing home but the parcel has been re-zoned to commercial in anticipation of converting the building to a dental office. All proposed improvements are outside of the existing public right-of-way and an access easement off of 2000 West is recorded between this parcel and the parcel to the north. The additional stormwater runoff created by the new parking lot will drain to a new swale along the south end of the lot and will be retained on-site. We recommend approval of the site plan at this time with the following comments:

1. A Long-Term Stormwater Management Agreement will need to be signed and recorded on the property to ensure that the private, on-site stormwater system is maintained and to give the City permission to inspect the system.
2. Obtain any necessary approvals from UDOT for this site plan change. Per correspondence from UDOT Region 1, no changes are required at this time, but a Variance Request Form has been submitted and is pending approval.
3. A pre-construction conference with the Developer and their Contractor should be held with the City and utility providers prior to beginning any construction.

Please let me know if you have any further questions.

# BRAD BUTTERFIELD
