Growth and Future Events

- We have grown the event to the level that we believe is best. We plan to move forward with keeping the event at the level it was at in 2024 and **plan to now work on details such as better parking and better event management.**
- As a comparison, **other similar size airshows, charge as much as \$50+ per tickets.** For us to put on a 10 hour event that is packed with an array of vehicle and aircraft attractions is not cheap. We have to pay for the planes to come here.
- For example, the lineup of WWII aircraft that we had are exciting to look at, but comparatively, these aircraft are not cheap to bring to Spanish Fork. **Based on the feedback received, we plan to continue to make WWII aircraft the focus of the event.**
