

UTAH COUNTY LEPC MINUTES

Primary Children's Hospital Miller Campus
2250 N Miller Campus Drive
Lehi, Utah 84042
September 19th, 2024 @ 14:00-15:00

Open the Meeting:

1. Welcome & Introductions- LEPC Chair

General Meeting Items:

1. Delay approval of the July 18th, 2024 approval of the Minutes until November.
2. General LEPC Business
 - a. Kelly Johnson - LEPC Chair - LEPC TTX October 17th at Utah Valley Hospital in Provo. There will be breakout rooms and a lunch for all who are signed up. If you haven't already signed up, please do. There aren't as many industries that are signed up, so Kelly asked that those at the meeting take the information back to their supervisors and let them know what is going on and let them know they are invited to attend.
3. Action Items- None

Presentation:

1. Primary Children's -Miller Campus presentation - Julianne Ehlers: Officially the Miller Family Campus, but also use the Lehi-Primary Children's name as well. Our motto is "Anything for the Kids". We are bringing child care to the south county area. 66 in patient beds and can build out for increase if needed. In the tour we will talk about the observation rooms that we are providing as a middle between needing to stay and just having observation for a few hours. It is a step down from the ED. We are a Pediatric Trauma Center and offer Pediatric Emergency Services. We do have adults come in where we will stabilize and then transport them as needed for extra care. We aren't built for the adults, we are built for the little people. We have inpatient and retail pharmacies for a nice availability. We also have lab services. We are shaped like an L. We have on one side that is inpatient, ER, behavioral Health, the other side is outpatient services. We have offices and other services available with amazing partners to give the best services to our patients. A lot of the doctors that treat kids at the U campus come and treat at our facility as well.

Briefings:

1. Local Incident Briefs: SF has had a few incidents. On Hwy 6 a tanker hit a box truck head on and the tanker spilled over 6,000 gallons of fuel. Mitigation efforts were deployed. They were able to contain it from the water, and now

Envirocare is doing their tests now. There was an explosion at Nature's Sunshine from dust particles. The safety officer was very helpful with city fire and EMS. School bus crashed from down south and hit head on with a box truck. Kids were all okay and they played the game the next day. Lindon: a train derailment that took out a spur and ripped up some track. The repairs took over two months, but it is now functional again. Flooding from a storm that flooded Lindon and caused a shutdown on Geneva Road overnight. Some of the businesses that were flooded are now seeking damages from the railroad due to the issues with the effects of the derailment causing the flooding in that area. There was a fire at Belmont Coatings during the middle of the night. It was put out, but it took out one of their buildings. There has not been a Tier II reporting, so there will be a flier sent out to the industries to explain the need for the reporting. One other thing to let you know about, the SRT has put together the process for a 503C to take donations for their program.

Other Business:
