Construction and Maintenance Projects:

Mr. Ferguson reported that District personnel worked for 9 hours on Thanksgiving Day to repair a main line break on 2900 S. Three old main line valves were broken in the process. The District hired a contractor to replace those valves the following week. There was a service line break in the area of 2900 S. and 50 W. which caused a sink hole about 120 feet long. District personnel have repaired that leak and the road has been repaired. There was a main line break right in front of the District office on 3100 S. that has also been repaired. District personnel have also been counting inventory to prepare for the audit.

Mr. Ferguson reported that the District may have to run a dedicated line from the Val Verda well to tie into the Bona Vista well in order to lower PFAS levels in the water coming out of the Val Verda well. This project will most likely be paid for with the settlement money from the lawsuit against companies who produce PFAS.

Mr. Ferguson reported that the snowpack is at 77% of average.

There being no further business the meeting adjourned at 6:56 p.m.
