Apprentice License Application Exception Proposal

Shawn Swapp <Shawn.Swapp@davistech.edu>

Electrician and Plumbers Licensing Board,

My name is Shawn Swapp and I have overseen the Electrical Apprenticeship program here at Davis Tech for the last 5 or so years. I believe our tech schools do a great job training apprentices and over the last few years we have also seen a huge increase in interest from High School Students coming into the program taking daytime classes and wanting to enter the field. Currently here at Davis Tech we have 120+ High School students enrolled in 1st year classes. These students come from their respective high schools and take these classes during their normal school hours. We run these students through the exact same 1st year curriculum as our traditional evening apprentice students but we also have these students take added hours of training to train them on "Hands on" type of work, so that when they graduate they will be somewhat proficient in many of the tasks that they will be asked to do in the field.

Something that I have observed over the past few years is that contractors absolutely have a need for more electricians/plumbers in the field. The problem that we run into is that these contractors would rather pay an apprentice a couple more dollars/hour and steal them from another company, rather than take the time to hire a brand new apprentice and break down a Journeyman to train them. I can't blame these contractors because it is probably more cost effective to try and find a semi-experienced apprentice and pay them more, rather than break down one of their more productive people to train someone new. It is pretty evident that this is going on when you look at current job postings. The majority of postings out there ask for "Experienced apprentices" or "Must have a Current apprentice License" and very few postings allow for new apprentices with no work experience or no license to even apply.

What I am proposing is that there be some sort of exception on or for the "Verification of Supervision Form" that accompanies the apprentice application. High School Students looking to get into the apprenticeships typically can't get a job while taking their 1st year classes because full time employment isn't an option for them. But this does not mean that they are not doing "Supervised Electrical Work" while in the classroom.

What I would like to see is an exception that might be something like "Students who complete their 1st year classes as well as a minimum number of Hands on Training hours in a supervised classroom, under the direction of a Journeyman or Master plumber/electrician as their Instructor, can have their Instructor sign off on this form or some similar form that meets this application requirement."

What this would do for the students is make them much more employable once they graduate high school and look to enter the work field. This would also be massive when we talk with high school students and their parents/counselors when we are trying to recruit for our program and trades. This would also set these students apart in the eyes of the contractors looking for apprentices. It will show contractors that if they have a license, they have had some sort of training and work experience in the field vs someone that walks in off the street.

I would be happy to discuss this in a board meeting or with any of the board members. I see this as a huge positive for all parties involved and would help get more interest in our amazing trades. Thanks for listening!

Shawn Swapp
