Wasatch Front Waste and Recycling District

May-September 2014

Report For Taylorsville City

Presented November 5, 2014

Our Mission is to provide sustainable integrated waste and recycling collection services for the health and safety of our community

…because not everything fits in the can.

Our Vision is to be the waste collection industry leader by 2016.

District Updates & Information

Wasatch Front Waste is very pleased to announce that we will have onsite CNG fueling capability by January 2015. Thanks to our community partners in Salt Lake County Fleet Management, the station will be located at the District's Midvale location with capacity for 50 trucks. The nation's leader in CNG fueling, Clean Energy, won the contract and will be installing state-of-art technology. The District anticipates reducing costs by $34,800 with the on-site station. We will also save $472,000 next year in fuel costs by using CNG versus diesel and $660,000 in 2016 once the entire fleet is converted to CNG.

Our FALL LEAF COLLECTION is in full swing! Residents can pick up leaf bags at no additional charge (1 bundle of 10 per household) at Taylorsville City Hall. After the bags have been filled, residents can drop them off at South Ridge Park, the Valley Ball Complex or Vista Park between now and November 30th. See www.wasatchfrontwaste.org for other address locations.

IS YOUR TRIO COMPLETE?

We have rolled out our new promotional campaign for recycling and green waste cans that is featured on our trucks.

To complete your trio call 385-468-6325 to get your new green waste can!
