- (1) Inactive Water Connections: A monthly rate of the current year rate shall be assessed on each inactive water connection inside city limits. Inactive connections purchased or installed before April 1998 shall only be assessed inactive connection fees after that date. A fee of twenty five dollars (\$25.00) shall be assessed to activate or inactivate any connection. If the owner of a connection is over sixty two (62) years of age the fee to activate or inactivate any connection will be five dollars (\$5.00). Prior to activating any connection, the balance of all fees must be paid in full.
- (2) Active Water Connections: A monthly rate of the current year rate for zero gallons used shall be assessed for each active connection.
- (3) Usage Rates: A monthly rate of one dollar (\$1.00) will be assessed for each one thousand gallons of water used up to ten thousand (10,000) gallons per connection; three dollars (\$3.00) shall be assessed for each additional one thousand (1,000) gallons up to twenty five thousand gallons (25,000); six dollars (\$6.00) shall be assessed for each additional one thousand (1,000) gallons up to fifty thousand gallons (50,000), and nine dollars (\$9.00) shall be assessed for each additional one thousand (1,000) gallons in excess of fifty thousand gallons (50,000). The use of water by the user may be restricted or regulated by the city council in times of drought.

b. User Fees And Restrictions Outside City Limits:

- (1) Inactive Water Connections: A monthly rate of the current year rate shall be assessed on each inactive water connection outside city limits. A fee of twenty five dollars (\$25.00) shall

be assessed to activate or inactivate any connection. If the owner of a connection is over sixty two (62) years of age the fee to activate or inactivate any connection will be five dollars (\$5.00). Prior to activating any connection, the balance of all fees must be paid in full.

(2) Charges for usage outside the corporate limits of the city shall be the current year rate per month for zero gallons used for each active connection.

(3) Usage Rates: A monthly rate of one dollar (\$1.00) will be assessed for each one thousand gallons of water used up to ten thousand (10,000) gallons per connection; three dollars (\$3.00) shall be assessed for each additional one thousand (1,000) gallons up to twenty five thousand gallons (25,000); six dollars (\$6.00) shall be assessed for each additional one thousand (1,000) gallons up to fifty thousand gallons (50,000); and nine dollars (\$9.00) shall be assessed for each additional one thousand (1,000) gallons in excess of fifty thousand gallons (50,000). The use of water by the user may be restricted or regulated by the city council in times of drought.

c. The city council may at any time change rates, eliminate services, restrict the amount of usage or modify any provision, policy or procedure for out of city water use without the need to give such user notice and without hearing. This is a mandatory provision based on the irrevocable, perpetual policy of the city that the municipality has no obligation to deliver water on a permanent, continuing, temporary basis to any user outside the city limits.

6. Advance Payment Privileges:

a. In the interest of the city saving billing and bookkeeping costs, a user may pay in advance on year's total minimum water and sewer user fees and the user shall be entitled to a twenty dollar (\$20.00) discount for that year.

7. Sewer Rates:

a. Basis Of User Charge: Each equivalent residential unit (ERU) will be charged ~~twenty seven~~ thirty dollars (\$~~30~~27.00) per month.

b. Equivalent Residential Unit: An equivalent residential unit is a unit of measurement estimated to equate to an average residential household's use. It is estimated that the average residential household will add approximately ten thousand (10,000) gallons of flow to the wastewater treatment facility monthly. It is impossible to gauge the flow of wastewater from each contributor and it is difficult to measure the flow based on culinary water usage since there are many and varied uses in the city which do not reach the wastewater treatment facility. Therefore, the city has estimated the residential equivalent based on state department of environmental quality estimated quantity

of domestic wastewater (Utah state administrative rules for large underground wastewater disposal systems R317-5, effective date November 15, 1991; tables 5-2).

Equivalent residential units are defined as follows:

Classification Of User	Number Of ERUs
Single-family dwelling	1 per household
Trailer parks - permanent residents	1 per trailer
Recreational vehicle parks: Independent spaces (temporary or transient with sewer connection) Dependent spaces w/service bldg.with showers	.125 per space .40 per space
Small/miscellaneous business (flow estimated <10,000 gal/mo)	1 per business
Elementary school (cafeteria, gymnasium and shower)	.05 per person
Secondary school (cafeteria, gymnasium and shower)	.0625 per person
Gas stations and convenience store (estimated 50 vehicles/pump/day)	.125 per vehicle served
Launderette (self-serve) (estimated 30 loads/washer/day)	.125 per load of laundry
Restaurants	.0875 per seat
Motels	.155 per person/day
Churches	1 per estimated 10,000 gal/mo

- c. Inactive Services: All sewer services which have been approved and connection fees paid to the city which have not been installed or utilized shall pay seventy five percent (75%) of the base fee of an equivalent residential unit. The charge was determined by a ratio of debt service cost to total costs of the system, estimated as follows:

$$\$88,431.00 / \$119,031.00 ** = 75 \text{ percent}$$

\* debt service

\*\* total annual costs of operation.

- d. Enforcement: The city may discontinue culinary water service and seek restitution in civil court as appropriate for the nonpayment of sewer fees when such payment is delinquent in excess of ninety (90) days.
- e. Annual Review: The monthly charge will be reviewed and calculated once a year in conjunction with the city's annual budgeting procedure.
- f. Special Treatment Of Sewage: Where the sewage which is discharged by any commercial or industrial establishment in the city sanitary sewer system is of such character as to require special treatment or to constitute an unusual or abnormal burden on the disposal facilities, such additional charges shall be assessed as the city council shall determine.
- g. Owner To Bear Cost: Any owner of property who has not made application for connection shall bear the expense of the construction of his own service stub and shall be held responsible for replacing the street to its original condition.
- h. Connection And Fee Required: The city will require that all possible connections that can be served must connect to the system and the connection fee must be paid by the time each connection to the system is made.
- i. Subdivider Responsibility:
  - (1) All charges for each building or water user and all developments within the subdivision shall be paid for by the subdivider, which shall include the city's cost of connections and the prevailing rates for water meters, and the city shall become the owner thereof. Each building or place where water is consumed shall be deemed a separate connection.
  - (2) Subdividers shall provide, at their own expense and upon approval of the city council, all materials, lines, labor, preparations and all other items necessary to establish a water connection from the main water line to the location of the water use, except the city shall provide and install the meter upon payment of the fees and costs provided in this section to be the obligation of the subdivider.
- D. Disposition Of Funds: All connection fees and monthly user charges collected under the provisions of this chapter shall be deposited in the city water and sewer system funds and used to meet the operation and maintenance costs of the systems; debt service on obligations appertaining to the construction associated with the completion of the systems; and such other allocations as the city council may by resolution provide.
- E. Application For Culinary Water Connection: Any person seeking a water connection shall file with the water department a written signed connection application that can be obtained from the city recorder.
- F. Application For Sewer Connection: Any person seeking a sewer connection shall file with the sewer department a written signed connection application that can be obtained

from the city recorder.

G. Irrigation Of Public Schools: Escalante City water rates for the outside irrigation of public schools shall be amended to the following rate structure. The provisions of this paragraph shall not amend rates for connections used for inside domestic usage of public schools or for any other purpose than to benefit the direct irrigation needs of public schools.

1. Base Rate: A base rate of seventeen dollars (\$17.00) shall be assessed monthly and shall entitle the consumer to the use of fifteen thousand (15,000) gallons of water per month.
2. Overage: An overage charge of one dollar (\$1.00) shall be charged for each one thousand (1,000) gallons of overage per month not exceeding four hundred fifty thousand (450,000) gallons. Any water overage in excess of the four hundred fifty thousand (450,000) gallons per month shall be charged five dollars (\$5.00) for each one thousand (1,000) gallons.

Following the enactment of this paragraph G, the Escalante City council may at its discretion, reduce all or portions of water overage charges incurred in 2005 prior to the passage date of this ordinance.

3. Special Requirements: Consumers utilizing this rate shall only use water for irrigation purposes between the hours of six o'clock (6:00) P.M. and ten o'clock (10:00) A.M. and comply with all other usage restriction means implemented by Escalante City.
4. Expiration And Repealer: All provisions of this paragraph G shall expire one year from the date of enactment. Any previous ordinance in conflict is hereby repealed.

**SECTION 2:        REPEALER CLAUSE** All ordinances or resolutions or parts thereof, which are in conflict herewith, are hereby repealed.

Equivalent Residential Unit: An equivalent residential unit is a unit of measurement estimated to equate to an average residential household's use. It is estimated that the average residential household will add approximately ten thousand (10,000) gallons of flow to the wastewater treatment facility monthly. It is impossible to gauge the flow of wastewater from each contributor and it is difficult to measure the flow based on culinary water usage since there are many and varied uses in the city which do not reach the wastewater treatment facility. Therefore, the city has estimated the residential equivalent based on state department of environmental quality estimated quantity of domestic wastewater (Utah state administrative rules for large underground wastewater disposal systems R317-5, effective date November 15, 1991; tables 5-2).

Equivalent residential units are defined as follows:

--	--

Classification Of User	Classification Of User
Single-family dwelling	1 per household
Trailer parks - permanent residents	1 per trailer
Recreational vehicle parks: Independent spaces (temporary or transient with sewer connection) Dependent spaces w/service bldg.with showers	.125 per space .40 per space

Elementary school (cafeteria, gymnasium and shower)	.05 per person
Secondary school (cafeteria, gymnasium and shower)	.0625 per person
Gas stations and convenience store (estimated 50 vehicles/pump/day)	.125 per vehicle served
Launderette (self-serve) (estimated 30 loads/washer/day)	.125 per load of laundry
