

Ordinance Summary
Planning Commission Public Hearing for July 1, 2025

The following section of the Cedar City Ordinance, and Engineering Standards are proposed to be amended in order to align with recent changes to the Utah State Code:

Section 32-9-B: The proposal is that Engineering Standard changes will now be adopted by ordinance rather than resolution. Also, a revision that variances no longer be granted by the City Council, but by the City Engineer.

Engineering Standards 3.1 General: Changing the verbiage to clarify the purpose of the standards, and that variances should be exercised by professional engineering judgement of the design engineer and City Engineer.
