VI. User Experience Update

Britnee Johnston

Implemented a new UDRC engagement plan. Increased engagement will help policymakers with their policy decisions and support the growth of civic-minded Utahns. Inspiration for the plan came from the 2025 SLDS Engagement Workshop. Current efforts include Bagels and Research, UDRC Website updates.... We are doing a new webinar series and have currently hosted three since March. The format of the seminar includes the research host... We also link the data narrative once the webinar is complete. The New Data narrative template has now been utilized in our Cost of Living research, which was released a few weeks ago. This is the template that will be used in the future. UX projects in development are Data Narrative for Charter Schools and AI-generated Podcast Audio Recordings.

Aaron complimented the UX team on how impressive the new products are. They are more approachable and look great. Nichole Clark also said great job in the chat.

VII. Data Request Update
