## **10-14-8: Fence Regulations**

1. Maximum Specified: No fence or other similar structure may be erected in any required front yard of a dwelling to a height in excess of four feet (4') and must be an open fence as described in section 10-2-1 of this title; nor shall any fence or other similar structure be erected in any side or rear yard to a height in excess of six feet (6').
2. Corner Lots: On corner lots, no fence or other similar structure may be erected in any yard bordering a street or front yard of an adjoining lot to a height in excess of four feet (4'), except a six foot (6') high fence may be placed not less than ten feet (10') away from the property's side yard property line, with said fence not to extend further toward the front of the property than a point equal to the front line of the house.

Provided, however, that the Hearing Officer may grant special exceptions as provided for in subsection 10-4-6B of this title, to allow fence types and fence heights of up to six feet (6') in height for public and semipublic buildings, including schools and churches, where the Hearing Officer finds: 1) the fence height is necessary for protection or safety of persons or property; 2) no significant adverse effect will be suffered by any surrounding property; and 3) the requirements of section 10-14-14 of this chapter are maintained.

3. Difference In Elevation: Where a fence is erected upon a retaining wall or where for other reasons there is a difference in the elevation of the surface of the land on either side of a fence, height of the fence will be measured from a point halfway between the top of the retaining wall and the land on the lower side, or from the average elevation of the surface of the land on either side of the fence, but nothing herein contained will be construed to restrict a fence to less than four feet (4') in height measured from the surface of the land on the side having the highest elevation.
4. Exceptions: The provisions of this section shall not apply to fences required by State law to enclose public utility installations and public schools. (Ord. 17-23, 11-21-2017, eff. 11-21-2017; amd. Ord. 21-05, 6-1-2021, eff. 6-1-2021)
5. Recreation Use:

1. A chain link or mesh fence may be erected to a height not exceeding ten feet (10') for the purpose of enclosing a tennis court, or other court game area. Said fence may not be located in a front yard setback.
2. Golf safety nets may be permitted only on lots ~~where a property is adjacent to~~ that abut a golf course and only on the side(s) of the lot that abut(s) the golf course.

Safety nets that are six feet (6') to a maximum of thirty feet (30') in height above grade require a permit issued by the building department. Golf safety nets are prohibited in the front yard. Netting material shall be black in color and of a quality designed for the purpose of obstructing golf balls. Nets may be located on the property line. Netting shall meet all requirements of the city's Building Code and all other applicable codes.

3. Planning and building staff have the authority to grant exceptions for any proposed net over 30 feet on a case by case basis. Such exceptions may be granted when staff determines that such an exception is justified because of some unusual, emergency, act of God situation or that the health, safety, convenience, order and welfare of the inhabitants of the City will not be materially, or adversely affected, if such exception is granted.
