**Background:**

The Department of Health and Human Services is seeking aggregate data. This data do not have USBE's disclosure avoidance techniques applied; thus, the data are not public-ready and require a data sharing agreement to share. The data shared under this agreement will be used for stratification and post stratification weighting of a dental screening conducted of third-grade students at certain schools by the Department of Health and Human Services. The screening survey assesses the dental health of 3rd graders in Utah. It helps track trends in oral health and identify any issues that might be affecting the learning and development of children. More information about the survey can be found in Attachment C: About the Basic Screening Survey in the agreement.
