Discussion with Katie Miner and Kyle Jensen from Utah Association Counties. Eric Clark is a full time Attorney for UAC. This was originally offered to Daggett County for \$10,000.00. However, it was requested to be done for us, case by a case due to Daggett County being so much smaller. Katie is going to follow up. UAC is the trusty for the MCAT. Curtis Coke is helping to guide the effort with MCAT. They are hoping to make it a county wide system. MCAT is a statewide collection of information Usable for the State and Counties. Increased TRT rate makes the pot available for around 6 million, maybe 7 million. UAC Board Meeting is the night of September 8th. The UAC conferences are September 9-11.

Possibly canceling the Commission Meeting on September 9th. Due to not having enough Commissioners present for quorum. Commissioner Tippetts and Commissioner Asay are going to look into their schedules to see if they can make the board meeting on Monday. Commissioner Lytle has a meeting in Vernal on Monday the 8th not sure he can make the board meeting.

With nothing further to discuss, Commissioner Tippetts adjourned the meeting by acclamation at 12:41 PM.

Greetings,

Colorado pikeminnow (CPM) experimental base flows have started and releases from the dam will maintain targeted flows at the Jensen gage.

Beginning on September 02, 2025, Flaming Gorge daily average total releases shall decrease to 1,625 cfs. Hourly releases from Flaming Gorge Dam will be scheduled through the Western Area Power Administration (WAPA). Hourly release schedules issued by WAPA for power production may include daily fluctuations to meet power demand contracts.

Hourly patterns will vary to allow the Utah Department of Natural Resources to conduct fall fish surveys in the Green River on the 2nd and 3rd.

The daily average total release of 1,625 cfs will continue thereafter or until a new notification is issued.

This data is considered the most likely scenario given the current forecast and is subject to changing conditions. Forecasted (tentative) hourly release schedules can be found by visiting the Colorado River Basin Forecast Center at this website:

https://www.cbrfc.noaa.gov/dbdata/station/flowgraph/flowgraph_hc.html?id=GRZU1&ptype=3&linear_flow=0.

Please note that the CBRFC data is in Zulu time, which is 6 hours later than MDT. For example, 6 pm Zulu (Z) is 12 pm MDT.

Notifications such as this one could take some time, a day or so, to be reflected on the website.

Thank you,

Mike Callahan
