

BOARD OF COMMISSIONERS OF UTAH COUNTY, UTAH

Budget Work Session

September 4, 2025

Page 1 of 37

PUBLIC NOTICE IS HEREBY GIVEN THAT THE

BOARD OF COMMISSIONERS OF UTAH COUNTY, UTAH

WILL HOLD A BUDGET WORK SESSION

IN THE UTAH COUNTY HISTORIC COURTHOUSE BALLROOM

51 S UNIVERSITY AVE, PROVO, UT 84601

September 4, 2025 - 2:00 PM

WORK SESSION

1. WORK SESSION REGARDING THE 2026 UTAH COUNTY BUDGET FOR THE GENERAL FUND AND OTHER BUDGETARY FUNDS OF UTAH COUNTY, UTAH.

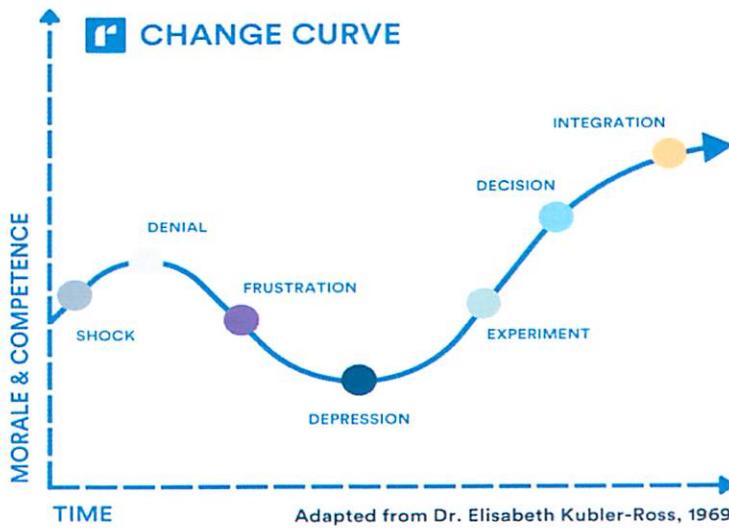

-Ezra Nair, Commission

(Meeting called to order: 2:02pm)

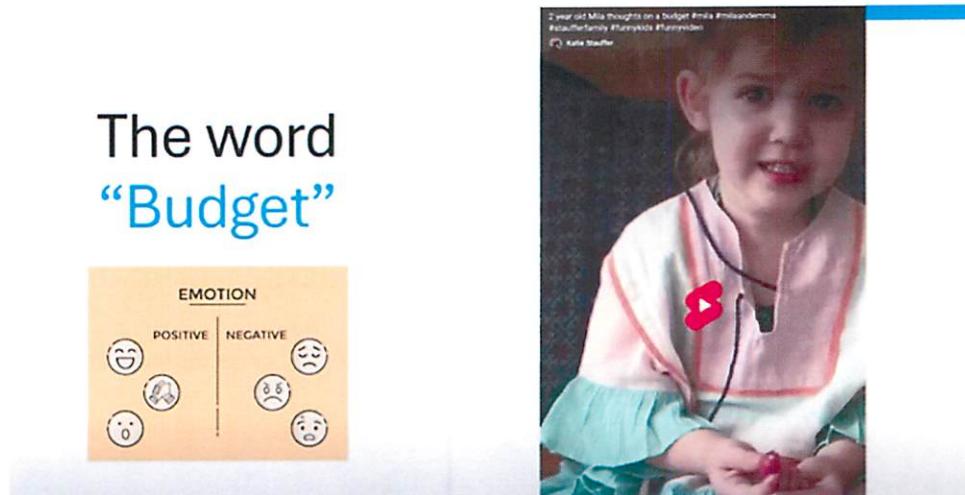

In attendance: see attached sign in sheet

EZRA NAIR (Utah County Administrator) WELCOMED EVERYONE TO THE BUDGET KICK-OFF AND PRESENTED THE FOLLOWING SLIDES. PLEASE REFER TO THE AUDIO FOR ADDITIONAL INFORMATION.

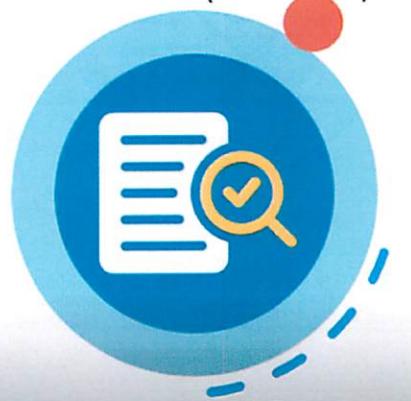

GINA TANNER (*Budget Manager*) PRESENTED THE FOLLOWING POWER POINT.

Budget Team - Set Core Service Costs (baseline)

- Fixed Core Services:** Costs provided by others- required (non-discretionary)
 - Personnel – salary and benefits (except OT)
 - Internal service fund charges
 - Capital projects
 - Contractual increases
- Variable Core Services:** Costs programmed by Departments (discretionary)
 - Training and travel
 - Materials and supplies
 - Overtime, on-call, and time-limited
 - Other

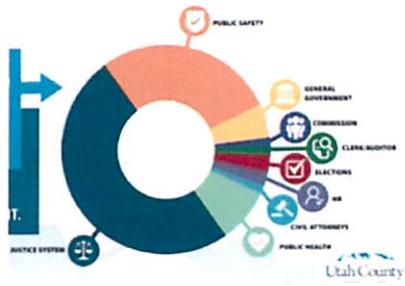

What is in a Supplemental Services Allocation Decision Package?

A Request is Much More Than Cost

- Is the request one-time or ongoing?
- Is it for full-time employees (FTEs)? Have all the appropriate costs been identified?
- Does it have facilities or IT elements? If so, has it been vetted by those areas?
- How will this improve services or solve a problem? What other options were considered? Why were they rejected?
- What happens if this is not funded?
- How does this support Utah County's strategic plan?
- What performance measures are in place? How will success be measured?

The Budget Process for Target-Based Budgeting

- Revenue Forecast: Total available budget is determined.
- Core Services and level of service defined as existing "baseline" budget.
- Core Services Target: Budget Team provides departments a fixed discretionary budget for essential core services.
- Supplemental Services Allocation Request: Departments propose additional funding through decision packages as a "new request."
- Final Budget: Budget Team will balance core and supplemental services within available revenue.

What we do in Financial Services Division

Our Purpose

We support departments in providing essential services effectively and efficiently while ensuring compliance, promoting transparency, and safeguarding taxpayer dollars.

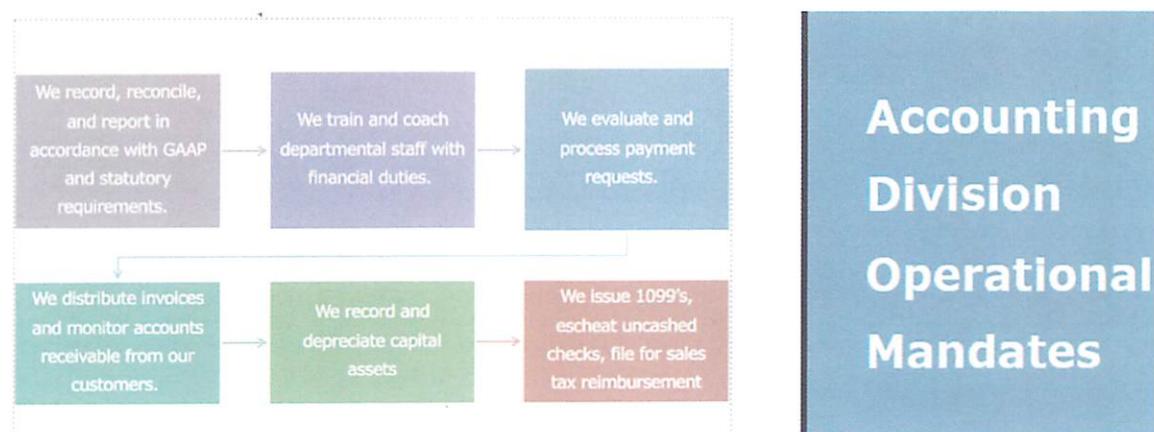

Our Mission

Our mission is to support Utah County departments through collaborative and expert financial management. We work closely with departments to understand their operations, needs, and goals. We deliver accurate accounting, responsible budgeting, efficient procurement, insightful analysis, compliant grant administration, effective training and support, and maintain sound financial policies.

Cost Drivers

				
Accounting	Budget	Training and Support	Grants Admin	Procurement
# of Funds and Accounts	# of Departments	# of System Users	# of Grants	# of Purchases > Threshold

PLEASE BE GENEROUS.

RODNEY MANN (*Utah County Auditor*) PRESENTED THE FOLLOWING SLIDE SHOW.

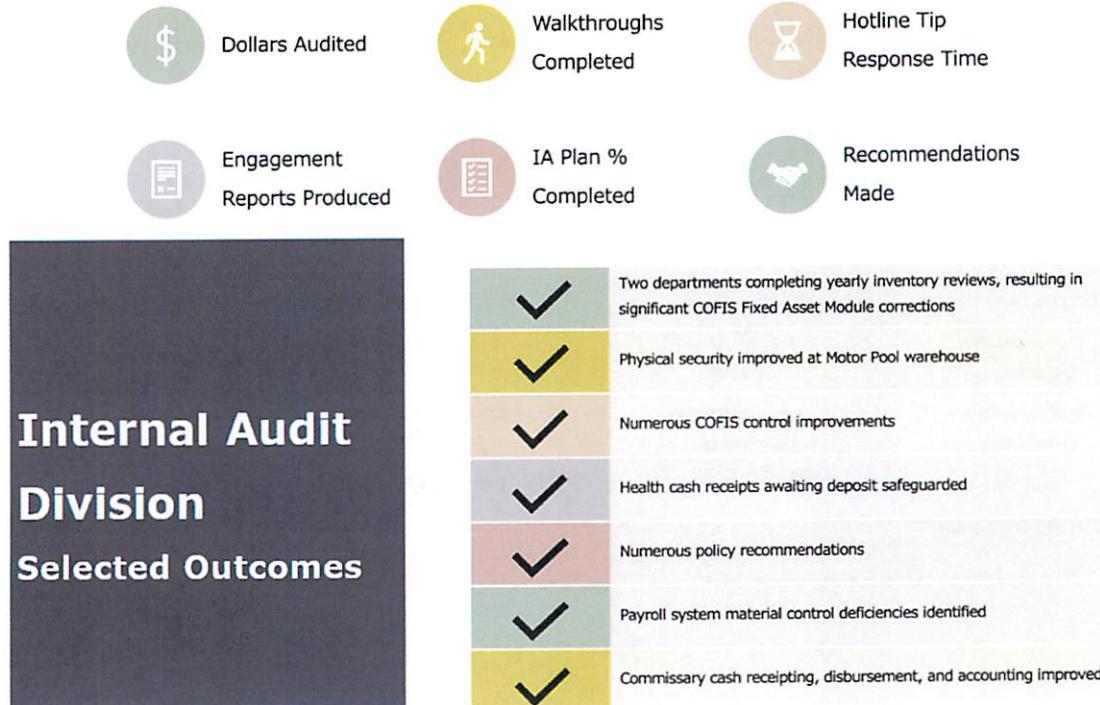

The slide features the Utah County Auditor logo on the left, which consists of a circular emblem with the words "UTAH COUNTY" at the top and "AUDITOR" in the center, flanked by a mountain range and a rising sun. Below the logo, the text "Internal Audit Division" is displayed. To the right, the title "Our Mission" is followed by a detailed description of the auditor's role in strengthening the county through independent auditing.

Our Mission

Internal auditing strengthens Utah County by providing independent, risk-based assurance and advice to elected officials and management. It enhances the County's ability to achieve its objectives, improve governance, risk management, and controls, support decision-making and oversight, build credibility with stakeholders, and better serve the public interest.

Cost Drivers

			
Internal Audit Plan	Engagement Work	Engagement Work	Training
# of Assurance Engagements	# of Findings (and Follow-ups)	# of Untimely Client Data Responses	# of Untrained Countywide Employees
# of Consulting Engagements	# of Regulatory Requirements (i.e. Engagement Criteria)	# of Complex Operations	# of Division Required CPE Training Hrs.

Costs for Services

Describe the Cost Driver or Structure

Human resources: (old) Cost driver was based on a percentage of your overall personnel wages and benefits

(new) Cost driver will be determined by overall employee headcount

Simpler and more transparent: each employee generates roughly similar HR workload (hiring, benefits enrollment, records, policy administration). More equitable when workload is driven by headcount rather than salary level.

FAQs

Frequently Asked Questions

- Why isn't vacation and sick time into a single paid time off program?
- How are appropriate wages determined?
- What is being done to get rid of underperforming employees?
- What is Utah County doing to better communicate with employees?
- Why do some employees get to work from home and others don't?
- What is Utah County doing to improve physical safety and security for employees?
- How does our wage and benefits plan compare to other entities?

PAUL JONES (*Utah County Deputy Attorney – Head of Civil Division*) **PRESENTED THE FOLLOWING SLIDE SHOW.**

UCAO
Civil Division

The Civil Division of the Attorney's Office diligently provides the highest quality legal representation to Utah County Government.

THE CIVIL DIVISION provides legal advice and representation to Utah County, its elected officials, department heads, and employees.

Our **LEVEL OF SERVICE** is dependent on the number and weight of assignments each of the 8 attorneys are assigned in their portfolio. Each attorney manages the workload within their portfolio and can work with the division chief if they need additional resources.

COST STRUCTURE for the civil is based on each department's share of the overall budget.

HOW WE WORK:

- Each attorney has a close working relationship with each department head in their portfolio and provides legal services as requested.
- Our office is required to approve the form of each contract.
- PLUS non-departmental assignments: civil commitments, property tax officer, GRAMA.

UCAO Civil Division

The Civil Division of the Attorney's Office
diligently provides the highest quality legal
representation to Utah County Government.

- Under the **INTERNAL SERVICE FUND**, the personnel cost is estimated to be less than 50% of what the County would have to pay private attorneys for a similar level of service.
- Additionally, departments are not motivated to cut attorney services, you have an attorney integrated into your team.
- We are prepared to maintain the **SAME LEVEL OF SERVICE NEXT YEAR.**

Communications – 50% funded by Commission General Fund
50% by ISF

All else – budget is split according to department size

FAQs

Frequently Asked Questions

Best medium to contact me – Urgent requests text me at 801-857-0361

Email me with high priority marker, contact Aileen for meetings.

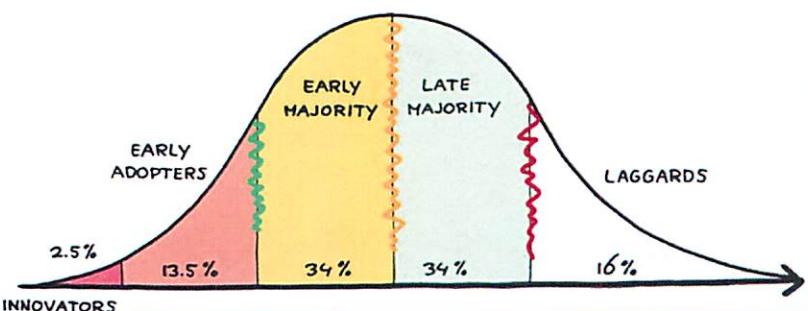

Emails are great for general request, but it may take me a couple days to respond. If you haven't heard back on email in a couple days that needs a response, text me.

I have availability to meet after our 3:30 agenda review and collaboration meetings every Tuesday at 4PM

Strategic Plan Update is going well. We'll talk more tomorrow but through this plan we'll end up identifying our strategic focuses, where we want to invest to best manage our future growth. Which functions do we support innovations in vs maintaining stasis in?

FAQs

Frequently Asked Questions Continued

FAQs

Frequently Asked Questions Continued

List services related to your ISF that you don't provide and / or what you would like departments to do when they would like a service you don't provide.

Example:

Information Systems – I want this software solution that's not on our list of preapproved software.

Explain how that software can be submitted to IT and vetted before you're allowed to purchase it.

Describe why the process is the way that it is (i.e. third-party software can be subject to vulnerabilities, or may not be compliant with data privacy policies)

Benefits and
Drawbacks

Why an ISF for this function?

Benefits of running our operations as an ISF:

- Our department supports each department in the county whether they are funded by the general fund or other source
- Distributes general administrative expenses
- Level of support tends to follow department size

Drawbacks of running our operations as an ISF:

- Departments may not equally use our services according to their budget size
- Departments may have more complexity in their document and privacy retention that doesn't necessarily match the size of their ISF contribution.

Future Needs &
potential
Supplemental
Services

Budget 2026

Admin Services – Records & Data Privacy – New data privacy laws (HB 491 and HB 444) from the state are requiring better tracking and more detailed reporting for all of our historic documents. **11,549,446 documents have not been assigned retention dates.** Retention periods will need to be identified and carried out for many documents we've previously kept forever.

10,000 aging microfilms need to be digitized as the county historically did not provide them long-term preservation.

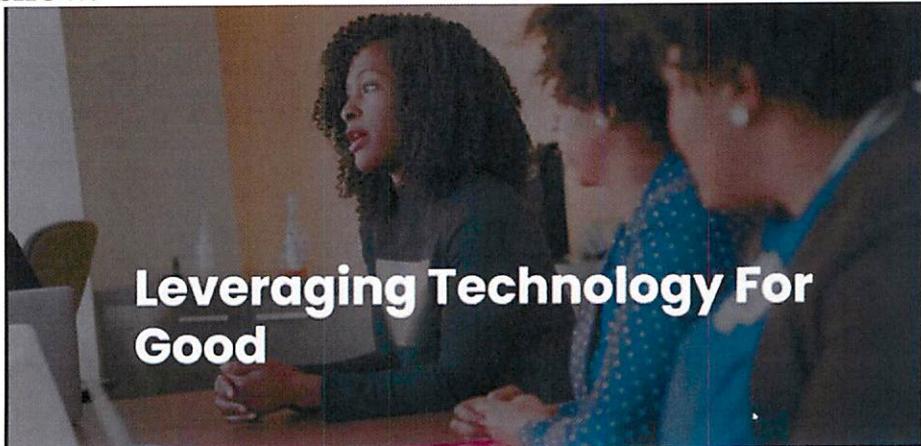

New Records building will have additional availability to public. Public engagement with the office will increase demand to support services.

Big Beautiful Bill has allowed additional incentives based on historic records that are not efficiently categorized right now.

New position is being requested to support these functions

Break

PATRICK WAWRO (*Director – Information Systems*) PRESENTED THE FOLLOWING SLIDE SHOW.

Leveraging Technology And Loving It

Take a moment to think about the technology you use at Utah County and what it enables you to accomplish every minute of every day. In most cases, we can't do much without a computer and a network that connects us to each other and the world around us. Many of these systems are designed and managed by Utah County's Information Systems Department.

To most, their work is well out of sight, and often out mind. We turn on our computer or tell it to do something, and we just expect it to work, every time.

However, many things have to be intentionally designed, expertly managed, and performance carefully optimized to maintain that level of service. That is the job of the Information Systems Department...and we love it!

Services Provided by IT Operations

IT Operations encompasses much more than its help desk services.

BOARD OF COMMISSIONERS OF UTAH COUNTY, UTAH

Budget Work Session

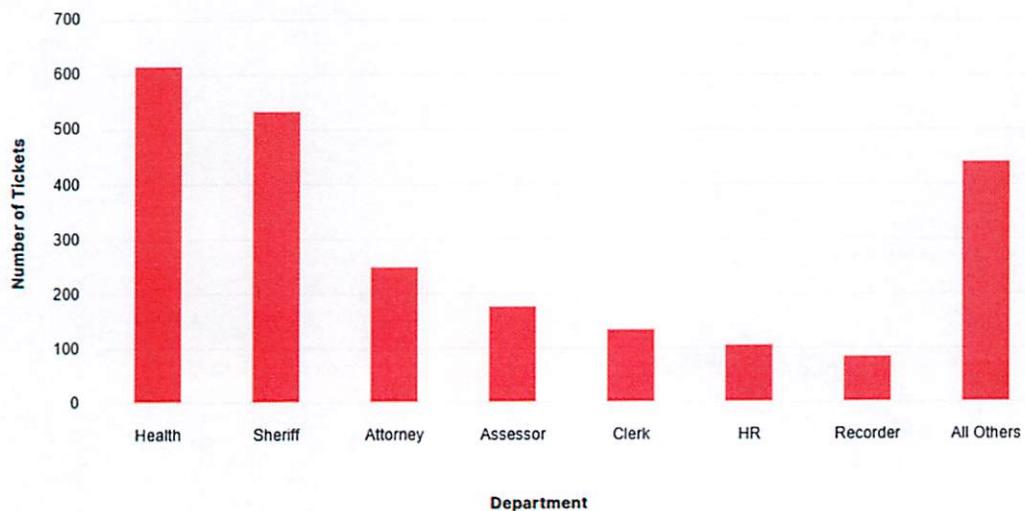

September 4, 2025

- Server Management:** 14 Physical Host Servers, 140 Virtual Servers
- Network Optimization:** 120 Network Switches, 170 Wi-Fi Access Points, 4 Internet Services
- Data Storage Backup Systems:** 675 Terabytes of Data, 3 Levels of Backups (On-Site, Off-Site, and in the Cloud)
- Windows Updates & Software Installation:** Dozens of Security and Feature Updates, Installed on Almost 1,500 Computers.
- GRAMA Support:** Growing Public Demand for Government Records
- New Computer Procurement, Setup, & Disposal:** 400 Computers Replaced Each Year
- Public Meeting Audio-Visual Streaming Support:** In Last 12 Month - 81 Public Meetings, 8,000 Online Views
- Help Desk:** Approximately 400 Tickets Per Month, 82% Resolved in Same Business Day

Which Departments Request The Most Help?

Total Help Desk Tickets in 2025 Through June 30 = 2,337

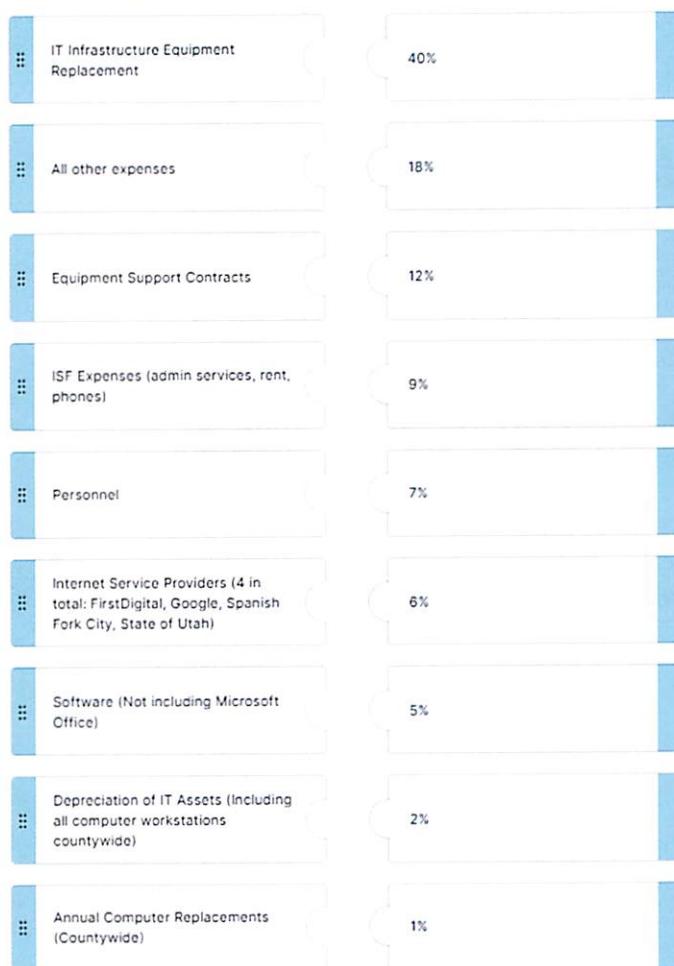

What it Costs to Deliver IT Operation Services

Technology, like many high-demand services, requires highly trained personnel and expensive equipment and software components to perform those services effectively. In 2026, these services are estimated to cost the county \$4,247,370, excluding Microsoft Office software.

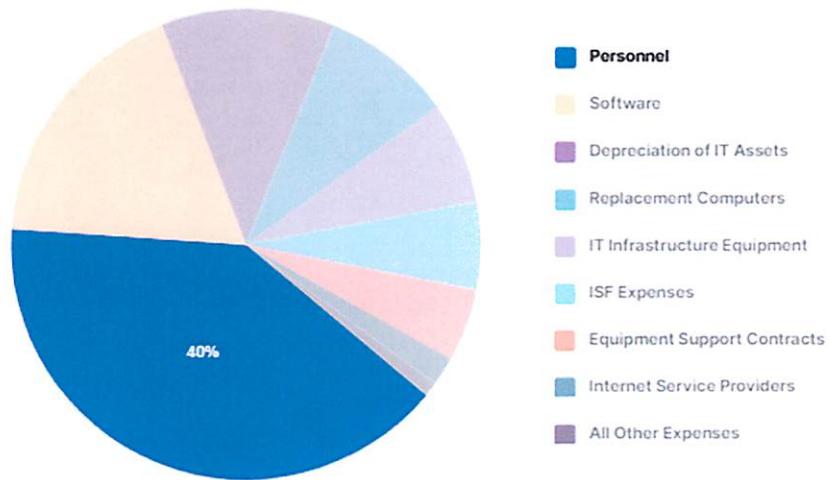

What are the biggest cost drivers for IT Operations?

Match the IT expenses with the percentage of overall IT Operations budget

**Automating the
Residential Exemption
Declaration System**

Primary Residence

Under state code 59-2-103, primary residences are eligible for a 45% residential exemption, meaning you only pay property tax on 55% of its fair market value.

If your mailing address differs from your physical address, you must declare whether this property is your primary or secondary residence.

Procedure of New Written Declaration

Your are required to redeclare if:

- **there is a *change in property ownership*, or**
- **If your *mailing address changes* or**
- **If the County reasonably believes the property may no longer qualify as a primary residence (e.g., not occupied for at least 183 consecutive days per year)**
- **Households can only claim one primary residence.**

Utah County
ASSESSOR DEPARTMENT

Residential Property Declaration

This declaration must be submitted to the county within 90 days (see link with PIN below). Failure to do so will result in withdrawal of the primary residential exemption from your residential property.

Recording Date: June 21, 2021

Residential Property Owner Information

You can fill this form out online at: www.utahcounty.gov/redecl
Your online PIN number is: 120759

Residential Property Information

Residence Address: [REDACTED]

Residence Type: [REDACTED]

Residence Status: [REDACTED]

Residence Tax ID: [REDACTED]

Residence Zip Code: [REDACTED]

Residence County: [REDACTED]

Residence State: [REDACTED]

Certification

Is this property occupied by the owner or by another person for more than 183 consecutive calendar days as their primary residence? Yes No

If the property is not occupied for 183 or more consecutive calendar days, is it currently used by the owner(s) or by another(s) for the exemption? Yes No

The following amounts is based on 2022 Market Value and Tax rates which have been finalized for 2023 and are subject to change. THIS IS NOT A TAX.

Taxes as Primary Residential	Taxes as Secondary Residential
Market Value: \$308,700.00	Market Value: \$308,700.00
Taxable Value: \$13,970.00	Taxable Value: \$13,970.00
Tax Rate: 0.0283%	Tax Rate: 0.0283%
Taxes: \$1,173.34	Taxes: \$1,173.34

If a property owner or property owner's spouse claims a residential exemption under Utah Code Ann. §59-2-103 for property that is not the primary residence of the property owner or the property owner's spouse, a claim of a residential exemption is a resolute presumption that the property owner or the property owner's spouse have domicile in Utah for income tax purposes. The rebuttable presumption of domicile does not apply if the residential property is the primary residence of a tenant of the property owner or the property owner's spouse.

Signature(s): (This form must be signed by all owners of the property)
Under penalties of perjury, I declare to the best of my knowledge and belief, this declaration and accompanying pages are true, correct and complete.

Print Name: [REDACTED] Date: [REDACTED] Signature: [REDACTED]

Print Name: [REDACTED] Date: [REDACTED] Signature: [REDACTED]

Print Name: [REDACTED] Date: [REDACTED] Signature: [REDACTED]

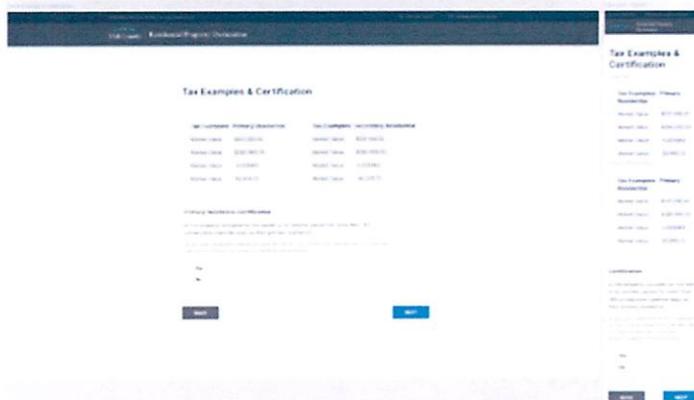

A redacted letter - notice the bar code at the top.

The Residential Declaration System is fully integrated with our land information system. It selects properties that appear to meet the criteria in batches (usually 500 at a time) and generates personalized letters on demand.

The County Assessor will send a letter requesting that residents submit a new Residential Property Declaration within 90 days. Failure to respond may result in loss of the exemption and a significant increase in property taxes.

Value of Automated and Integrated System

- Designed to be administered by as little as one staff member.
- High Volume: Since releasing in May 2025, sent 1,400 letters a month.
 - More than 415 online submissions received.

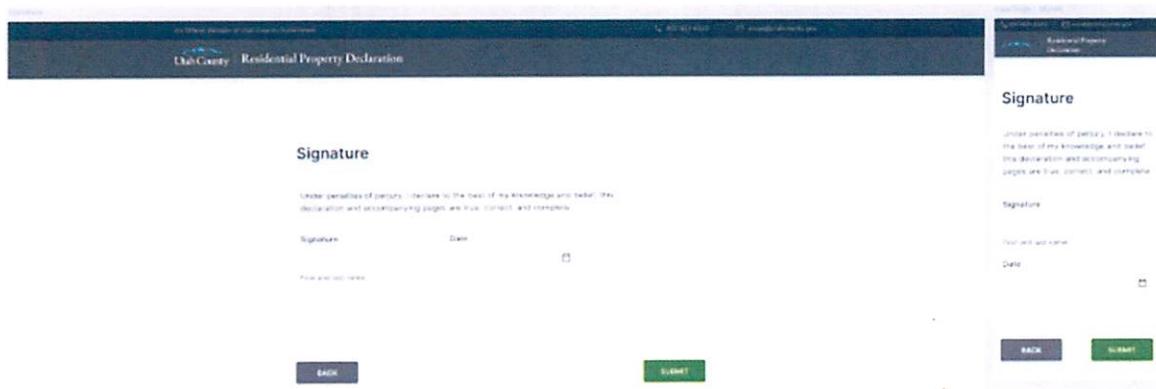

The screenshot shows the 'Tax Exemptions & Certification' section of the portal. It contains two tables:

Next

Easy to read and understand information.

The screenshot shows the 'Residential Property Declaration' section of the portal. It includes the following fields:

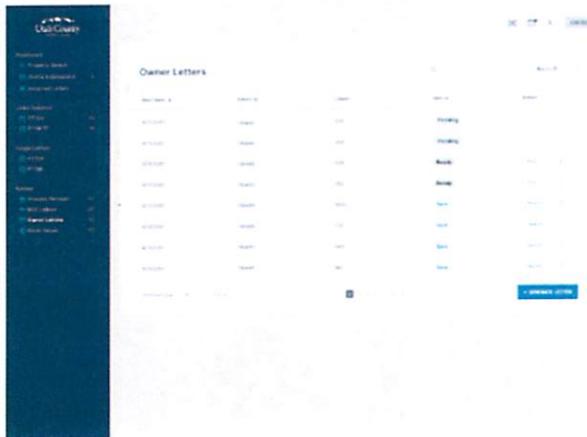

- Signature:** A placeholder for a digital signature.
- Declaration:** A statement: "Under penalties of perjury, I declare to the best of my knowledge and belief, this declaration and accompanying pages are true, correct, and complete."
- Signature:** A placeholder for a digital signature.
- Date:** A placeholder for a date.

At the bottom are 'BACK' and 'SUBMIT' buttons.

Digital signatures from either a computer or a phone make submissions easy and convenient.

Administrative Dashboards

- Administrative dashboards for monitoring real-time status, mailbox alerts, letter histories, batch processes, property information and more.
- Letters include a barcode eliminating data entry errors and vastly increasing speed.
- Integrated with Board of Equalization systems.

Technology That Helps Meet a Difficult Mandate

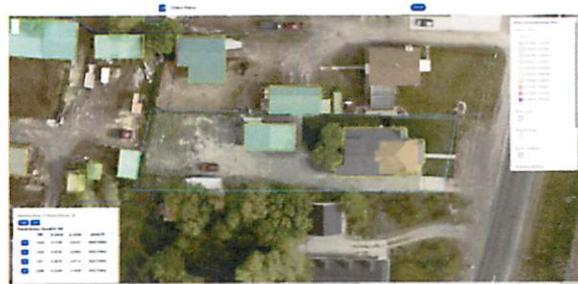

The Assessor's Office is mandated to inspecting every tax-assessed property at least once every five years and updating property values annually, based on current market data. With over 230,000 tax-assessed properties in Utah County and the number rapidly growing, this task is monumental.

To address this challenge, the GIS Division developed and trained a deep-learning A.I. model to compare recorded sketches with the most current aerial imagery. This innovative model identifies new buildings or those that do not match existing sketches, estimating a match rating. *This allows appraisers to focus on properties with the poorest match ratings during field checks, significantly improving the efficiency of the inspection process.*

A home with a good match. The bright yellow outline is the current building perimeter from the AI model. The green shaded area is the original sketch on file - the green color of the shading indicated it is a good match (see key). This home probably doesn't need a field visit.

By integrating this A.I. model with iLOOKABOUT's API, the GIS Division has added a map displaying the sketch, aerial image, and machine learning-generated building outline to the iLOOKABOUT field screen. This enhancement provides field appraisers with comprehensive information about a property, including all historic valuation data and detailed sketches of the building's floorplans. These sketches are crucial as they outline the taxable square footage, essential for accurately determining property values.

A home that has been added to from the original sketch on file. The bright yellow outline is the current building perimeter from the AI model. The yellowish shaded area is the original sketch on file - the yellow color of the shading indicated it is a poor match (see key).

Currently, the Assessor's Office pays iLOOKABOUT 70 cents per parcel to identify possible changes in building footprints, costing over \$160,000 to check all assessed properties. However, with the rapid improvements in our deep learning model, we anticipate that this expenditure may soon be eliminated, resulting in significant cost savings for the County.

A home that does not match the sketch on file. The purple outline is the original sketch on file which does not match the home at all which is why the home is shaded red.

The GIS Division's forward-thinking solution not only enhances the efficiency of the Assessor's Office but also demonstrates a commitment to leveraging advanced technology to meet complex mandates. This innovative approach ensures accurate and up-to-date assessments, ultimately benefiting the entire community.

The GIS Division's contribution has been instrumental in helping the Assessor's Office meet its mandate. By providing an innovative and efficient solution, we are paving the way for a more effective and cost-efficient property assessment process.

BRANDON WONG (*Information Security Manager*) GAVE THE FOLLOWING SLIDE SHOW PRESENTATION.

SAFEGUARDING UTAH COUNTY

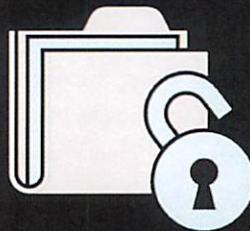

BUILDING OUR INFORMATION SECURITY TEAM

Utah County Budget Retreat 2025

A central figure of a person wearing a fedora and sunglasses, holding a laptop, is surrounded by various icons representing data and security. These icons include a smartphone with a fingerprint, a laptop with a padlock, a document with a lock, an envelope with a dollar sign, a key card, a computer monitor with a bar chart, a server tower, and a stack of money.

WHY INFORMATION SECURITY MATTERS TO THE COUNTY

Counties across the U.S. are experiencing costly cyber incidents that disrupt services and put citizen data at risk.

- 1 Counties are prime targets for cyberattacks.
- 2 Service disruptions can halt essential operations.
- 3 Compliance failures result in legal and financial penalties.
- 4 Breaches erode citizen trust in government.
- 5 Average ransomware recovery cost for state and local governments in 2024: \$2.83 million.

THREATS IN OUR ORGANIZATION

Information security incidents are no longer rare — they are a 24/7 reality that requires constant vigilance.

Adlumin SIEM: Our new Security Information and Event Management Platform with Managed Detection and Response (MDR) services.

4,800+ Detections: Flagged by Adlumin since onboarding in March 2025.

320 Alerts Escalated: Validated detections by Adlumin's MDR Team requiring immediate action.

Recent Phishing Campaign: Fake Teams messages; ~25 employees clicked, full-day remediation required.

Vendor Email Compromise: Partner system hacked, malicious email sent to employees requiring length remediation process.

National Trend: 34% of state and local governments were hit by ransomware in 2024 (Sophos, State of Ransomware in State and Local Government 2024)

Box Elder County (2025): Ransomware shut down County systems, halting services.

Critical Infrastructure in Utah (2025): Ransomware swept through systems at the SLC airport and our 911 dispatch center, demonstrating vulnerability of essential services.

Ransom Increasing: The average recovery cost from ransomware for state and local governments in 2024 was \$2.83 million, more than double the cost in 2023.

THREATS BEYOND OUR ORGANIZATION

Cyberattacks are increasingly targeting Utah's public institutions—and the problem is widespread across the U.S.

CURRENT STATE

With one person managing security, we are stuck reacting instead of improving.

INCIDENT DRIVEN

The most amount of time is spent reacting and investigating alerts rather than improving security.

KEY GAPS IN COVERAGE

Important areas like cyber risk management, vulnerability management, and data tracking remain untouched.

NO BANDWIDTH FOR IMPROVEMENT

Limited capacity to plan ahead, strengthen defenses, or mature the program.

Longer Incident Impact: Threats linger longer, increasing disruption, as well as potential damages and costs increase.

Growing Vulnerabilities: Systems remain unpatched or poorly tracked, widening attack surface as new vulnerabilities are discovered by threat actors.

Compliance Risks increase: Increased likelihood of non-compliance with evolving information security mandates.

Loss of Trust: Citizens lose confidence in us if their data or services are compromised.

RISKS AND GAPS

Without added staff, the County faces serious risks that directly impact services and compliance.

CLOSING THE GAPS WITH 3 POSITIONS

These three positions give Utah County the coverage needed to monitor threats, respond effectively, and strengthen long-term resilience.

INFORMATION SECURITY ANALYST

Monitors and triages alerts to catch threats early.

JUNIOR INFORMATION SECURITY ENGINEER

Assists in incident response and optimizes security tools.

SENIOR INFORMATION SECURITY ENGINEER

Leads technical response, manages vulnerabilities, and supports strategy.

INFORMATION SECURITY ANALYST

STRENGTHENS SECURITY OPERATIONS BY HANDLING ALERTS, REDUCING NOISE, AND HELPING TO MANAGE PHISHING DEFENSE.

ALERT MONITORING AND RESOLUTION

Reviews alerts, closes false positives, and handles low-level incidents.

PHISHING SUPPORT

Assists with phishing simulations and investigates employee-reported emails.

INCIDENT TRIAGE

Takes immediate actions such as disabling accounts or blocking senders, then escalates when needed.

DOCUMENTATION AND TRACKING

Maintains detailed records and updates procedures so future incidents are resolved faster and more consistently.

JUNIOR INFORMATION SECURITY ENGINEER

EXPANDS THE COUNTY'S TECHNICAL CAPACITY BY DRIVING STRONGER INCIDENT RESPONSE, OPTIMIZING TOOLS, AND REINFORCING PROACTIVE DEFENSES.

INCIDENT RESPONSE ROLE

Investigates alerts, contains threats, and supports recovery efforts.

SECURITY TOOL OPTIMIZATION

Configures, maintains, and tunes security tools to reduce noise and improve accuracy.

PROJECT IMPLEMENTATION

Deploys new security solutions and ensures smooth integration with existing systems.

VULNERABILITY SCANNING

Runs scans, analyzes results, and prepares data for remediation.

SENIOR INFORMATION SECURITY ENGINEER

SERVES AS THE TECHNICAL LEAD FOR MAJOR INCIDENTS, VULNERABILITY MANAGEMENT, AND ADVANCING THE COUNTY'S SECURITY POSTURE.

INCIDENT RESPONSE LEAD

Takes command of technical response during incidents and can lead an incident if needed.

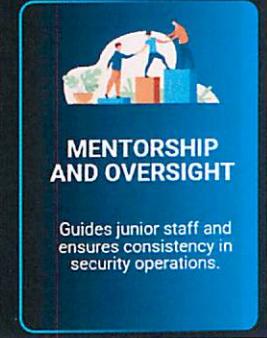

VULNERABILITY MANAGEMENT

Oversees scanning, prioritization, and remediation coordination across departments.

STRATEGIC SECURITY GUIDANCE

Advises on long-term technical direction and ensures alignment with County goals.

MENTORSHIP AND OVERSIGHT

Guides junior staff and ensures consistency in security operations.

BUILDING A STRONGER SECURITY PROGRAM

The risks are real, and the threat is 24/7.

CONSTANT THREATS

Cyber incidents continue around the clock.

LIMITED CAPACITY

One person cannot manage monitoring, response, and compliance alone.

THE SOLUTION

Three positions close gaps and strengthen resilience.

(Meeting Adjourned: 5:00pm)

Meeting minutes approved at the September 24, 2025 Board of Commissioners of Utah County, Utah Public Meeting.
