1. Call to Order

Chairman Ron Stratford called the meeting to order at **2:00 p.m.**

2. JUB Engineering – Farr West Shop Well Update

Presenter: Greg Siegmiller, JUB Engineering

- **Well Drilling:** Drilled to 1,000 ft depth. Artesian water pressure of 22 GPM
- **Zone Testing:** Ongoing lab tests. Results expected within two weeks.
- **Well Location:** Selected to avoid conflict with Weber Basin boundaries, who have stated they will protest any well construction within their designated zones.
- **Water Chemistry/Treatment:** Pending test results will determine treatment method.
Possible options include:
 - Reverse Osmosis (RO)
 - Nano-filtration
 - Chemical treatment
 - Blending
- **Depth Impact:** Depth does not appear to affect water draw volume.

- **Saline Intrusion:** JUB explained issues due to artificial recharge and Great Salt Lake water migration. Restricting natural percolation may be contributing to saline backflow into surrounding groundwater.
- **Costs:**
 - Final costs depend on water treatment method and well viability.

Board Discussion:

- Whether to consider alternate well sites.
 - Response: New sites carry same risks and higher costs. Current site is optimal due to proximity to 16" main line and limited viable locations.
-

3. Farr West Landing CRA (Community Reinvestment Project)

Presenter: Chris Crockett

- **New Contract Clause:** Added stipulation for secondary water use; developers must still go through the application process.
- **Public Concerns:** Focused on traffic impact. UDOT involvement ongoing.
