

Kyla Topham  
Council Department Report  
October 2025

URC- The top 6 bids have been decided and we are working to finalize remaining steps so that RMP can run the necessary modeling to determine how each project will fit into the grid. We have worked through any information request regarding our application with the PSC.

Testimony from all intervening parties is due this month. It has been requested that the PSC hearing in December be virtual because many of our communities are spread throughout the state. We will be implementing our low income plan over the next few months which includes contacting key agencies in our area.

Community Development- We had a wonderful turn out for the 2 Cent Event walking tour last week. Checklist for CDD processes and permits is live on the website. Invasive species work will start this month. Affected property owners should be looking for reminder letters.

I attended the Emergency Preparedness Fair. My family learned a few things we didn't know. Thank you to everyone who made it a success especially Jen.

Plaza- we are waiting on the interpretive panels.
