## **J-U-B ENGINEERING-MAIN STREET PROJECT UPDATE**

Gregg Williams stated that they hit a water line they didn't know that was there, they did install a valve to be able to turn it off. They thought this was the line feeding water to the old line and that this line was now dead, but it is not. So, there is still water in the old line, and they are not sure if the water is coming from an unknown line or a leaky valve that is feeding water to the old line. This is another reason why we need to install valves is to be able to isolate water to help with the leaks. Greg Williams stated there is a list of projects that Myton would like to get funding for, like updating the parks, and covering the irrigation ditches.

## **APPOINTMENT FOR MID-TERM VACANCY**
