BACKGROUND

Salt Lake City International Airport (SLCIA), is owned, operated, and maintained by the Salt Lake City Corporation through a managing body called the Salt Lake City Department of Airports (Permittee). It is a public transportation terminal that leases space and provides services to airline companies and other support services. The general nature of the discharges is storm water runoff that flows to the City Drain Canal (Outfall 001) and the Surplus Canal (Outfalls 004, 002, 003, and 005). The Division of Water Quality has determined that the SLCIA does not qualify for a general UPDES permit and must be covered by an individual UPDES permit. See the Permit and Fact Sheet for more information.
