CITY COUNCIL MEETING **DECEMBER 10, 2025** **5:30 P.M.**

Mayor
Garth O. Green

Council Members
Robert Cox
W. Tyler Melling
R. Scott Phillips
Ronald Riddle
Carter Wilkey

City Manager
Paul Bittmenn

The City Council meeting will be held in the Council Chambers at the City Office, 10 North Main Street, Cedar City, Utah. The City Council Chambers may be an anchor location for participation by electronic means. The agenda will consist of the following items:

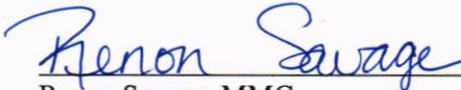

- I. Call to Order
- II. Agenda Order Approval
- III. Administration Agenda
 - Mayor and Council Business
 - Staff Comment
- IV. Business Agenda
 - Public Comments
- V. Public Consent Agenda
 1. Approval of minutes dated November 19 & December 3 (action), 2025
 2. Approve bills dated December 5, 2025
 3. Approve the petition to annex 5 acres of land in the vicinity of 3000 North and 100 East (DeCabrol/Lindsay Annexation). Platt & Platt / Randall McUne
 4. Approve the appointment of Milt McLelland to the Board of Adjustments
 5. Approve Second Amendment to the Water Right Contribution Agreement with development Team, LLC. Jonathan Stathis/Tyler Romeril
 6. Approve the bid from Carter Enterprises in the amount of \$252,912 for the Fort Cedar Railroad Trail Restroom and Frontage Improvements project. Shane Johnson
 7. Approve the 2026 meeting schedule. Renon Savage
 8. Approve the purchase of a Type 5 Brush Truck from Siddons-Martin in the amount of \$406,267. Mike Phillips

Staff Agenda

9. Consider an ordinance modifying Cedar City Ordinances 32-2 and 32-9 pertaining to the installation of sidewalks in subdivisions and PUDs. Tyler Melling / Kent Fugal
10. Consider an ordinance modifying Cedar City Ordinance 32-9 pertaining to the required width of Public Utility Easements in commercial and industrial zones. Kent Fugal / Randall McUne
11. Consider an ordinance changing the zone from Annexed Transition (AT) to Industrial and Manufacturing (I&M-1) in the vicinity of 4500 West and 800 North. Platt & Platt / Rick Holman / Randall McUne
12. Consider an ordinance changing the zone from General Commercial (GC) to Residential Dwelling – Multiple Units (R-3-M) for the addresses of 496, 498, 502, and 510 North 400 West. Go Civil / Randall McUne

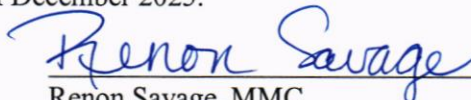

13. Consider an ordinance changing the General Plan from Natural Open Space to Central Commercial and a zone change from Annexed Transition (AT) to Central Commercial (CC) for a property in the vicinity of 2700 S Cedar Blvd. Development Team / Randall McUne
14. Consider an ordinance annexing 19.18 acres of land located at approximately 3000 N 400 W. Go Civil / Randall McUne
15. Consider a resolution reappointing the Cedar City Arts Council as the Local Arts Agency. Cedar City Arts Council/Randall McUne
16. Consider an ordinance adopting the Water Use and Preservation Element of the City's General Plan. Jonathan Stathis/Randall McUne
17. Consider a resolution approving revisions to the 2025-2026 fiscal year budget. Terri Marsh
18. Appoint Mayor Pro Tem
19. Consider amendments to the deferral agreements on 100 East Street. Mike Green/Bill Maxwell
20. Approve the bid from Inntelx, LLC in the amount of \$900,214.85 for the 100 East Roadway Improvement project. Bill Maxwell
21. Closed Meeting – property negotiations

Dated this 8th day of December 2025.

Renon Savage, MMC
City Recorder

CERTIFICATE OF DELIVERY:

The undersigned duly appointed and acting recorder for the municipality of Cedar City, Utah, hereby certifies that a copy of the foregoing Notice of Agenda was delivered to the Daily News, and each member of the governing body this 8th day of December 2025.

Renon Savage, MMC
City Recorder

Cedar City Corporation does not discriminate on the basis of race, color, national origin, sex, religion, age or disability in employment or the provision of services.

If you are planning to attend this public meeting and due to a disability, need assistance in accessing, understanding or participating in the meeting, please notify the city not later than the day before the meeting and we will try to provide whatever assistance may be required.

COUNCIL WORK MINUTES
NOVEMBER 19, 2025

The City Council held a meeting on Wednesday, November 19, 2025, at 5:30 p.m. in the City Council Chambers, 10 North Main Street, Cedar City, Utah.

MEMBERS PRESENT: Mayor Garth O. Green; Councilmembers: Robert Cox; R. Scott Phillips; Phil Schmidt; Carter Wilkey.

MEMBER EXCUSED: Councilmember Ronald Riddle.

STAFF PRESENT: City Manager Paul Bittmenn; Finance Director Terri Marsh; City Recorder Renon Savage; City Engineer Kent Fugal; Police Lieutenant JR Robinson; Fire Marshal Mike Shurtz; Leisure Services Director Ken Nielson; Cross Hollows Arena Manager Scott Christensen; Public Works Director Ryan Marshall; Airport Manager Tyler Galetka; Economic Development Director David Johnson; Project Engineer Jonathan Stathis; Public Relations Director John Zierow.

OTHERS PRESENT: Scotty Harville, Thomas Holyoak, Joe Sandberg, Tom Jett, Ann Clark, Waldo D. Galan, Steve Miller, Rick Bryant, Cathy Bryant, Wendy Green, Elena Roundy, Bill Payne, Tonya Payne, Sarah Allred, Jade Borthick, Paul Monroe, Matt Bagley, Brant Parker, Greg Powell, Christian Simmons, Tom Horrito.

Greg Powell - On behalf of the outgoing president of the Cedar Area Interfaith Alliance this year, I want to thank you the invitation this last year for allowing us to come and begin this meeting each week with prayer. Thanks for your service to the community, and to Ron as well.

CALL TO ORDER: Director Greg Powell of The Church of Jesus Christ of Latter-day Saints, Canyon Country Communication Council gave the invocation; the pledge was led by Paul Bittmenn.

AGENDA ORDER APPROVAL: Councilmember Phillips moved to approve the agenda order; second by Councilmember Cox; vote unanimous.

ADMINISTRATION AGENDA – MAYOR AND COUNCIL BUSINESS; STAFF

COMMENTS: ■ **Mayor** – thank you all for your service and for your upcoming service, we recognize you, and to for Mr. Phillips for making this happen and keeping involved and giving you the opportunity to serve. Swear in Youth City Council. **Phillips** – it is an honor for me to be able to serve as the council liaison to the Youth City Council. They are the next leaders, the next folks that will be setting in these chairs leading our community or some other community, state or nation. This has been a wonderful opportunity for me to learn from them. I get a little nostalgic because I get pretty close to these kids and I have to say goodbye and move on to the next group. We will first honor the outgoing Youth City Council who have served for the last year, they have done hundreds of hours-of-service projects. They have raised money for Special Olympics, they have cleaned cemeteries, they have cleaned

sidewalks, they have picked up trash at the interchanges, they have helped with the moonwalk, the July Jamboree, the Spring Fiesta, Wreaths Across America, youth projects in their schools, they are currently involved in a food drive in both of their high schools. They have been very involved, and I want to thank them and have each of them come up. There are a few absent tonight. As they become seniors in high school, they get involved and they have jobs and many other things going on. Sunny Alger could not be here, Sarah Allred, CVHS, Maliza Griffiths, CVHS, Jonas Hunt CHS, Shannon Roach, CVHS, Elena Roundy CHS, who has also been honored on a National level. Gabriel Smith, CHS and Cole Stanley CVHS. They were each presented with a plaque.

The new Youth Council members are: McKinley Bagley, CVHS; Madallyn Beazard, CHS; Jade Borthick, CVHS; Ellie Bulloch CVHS, Parker Dotson, CHS; Charity Herriing CVHS; Ascher Ray, CHS, Lucy Shaha, Lighthouse Commonwealth; Gabriel Smith CHS; Sage Whittaker, CHS. Renon Savage administered the Oath of Office. ■ **Phillips** – I wanted to thank those that came out and supported Dancing with the Community Stars, it was very successful, they raised over \$100,000. ■ **Mayor** – I had a thought on the Downtown Parking, I called Mark Bruffi and Niel Berndt to the Board. I believe if you have a business, you should be represented. ■ **Niel Berndt** – I have a business downtown and have a personal interest, but it is more than that, we have been there about 8 years. The parking gets progressively worse, it not only impacts the downtown businesses, but the entire downtown area. We have Shakespeare and the University, I have a lot of customers from Shakespear, the biggest issue people have is parking. I think parking affects the long-term vitality of the business. I want to figure out how to solve these issues long term. ■ **Mayor** – I want to talk about Tom Horrity, I think he is a community hero for taking on the Cedar Hotel. It is hard to take something like that and repair it. He didn't want to remodel or repair it; he wanted it exactly the way it was. I know what that is like, I started my first business in an insulation shop, turned a sewing factory into a distribution center, and later it became a corporate office. I took a glass company and made a heating and cooling store, I took a grocery store and made a plumbing supply house, I took a boat repair with a swimming pool in the back so they could put boats in it to see if they leaked, I took over a vulcanizing conveyor belt plant in Price, an auto repair shop in Springville, an abandoned bulk fuel plant on first west, my boys took a sheep shed and made a grade school, I took a bowling ball factory in Kentucky and made a distribution center. I took abandoned office buildings in the Philippines and restored it. These are hard projects. These buildings are privately owned, and they don't fall down, generally people bulldoze them down which is fine and start new because it is easier and cheaper. I talked to Tom and have been over there, and I am embarrassed that we can't help you more to finish your dream to restore an old building and what we want you to do with a building built in 1890, perhaps the oldest. A year ago, we came to a great fight over a sprinkler system, and you caved and put it in. You want a business license but are leaving for Mongolia next week. They don't have a building permit for a sprinkler system and they want one, we need to engineer everything. ■ **Phillips** – as a member of the Historic Preservation Commission, Mr. Horrito came forward and what he wanted to do is exactly what we wanted to happen. He has given us a tour, and he has done a remarkable job restoring it to the original. I don't want us to be a stumbling block, but he needs to do it legally. ■ **Paul** – Mr. Horrito came to Mayor Green to operate the Cedar's Hotel, we don't issue business licenses unless there is compliance with City Ordinance, which is building code, fire code, etc., the

business license is the last step. Staff have reached out to Tom to go through what they need to work with him. **Cox** – what is deficient. **Paul** – I don't know, I asked staff to let Tom know what is needed. **Wilkey** – what license are you going for? **Tom** – right now for an event center. We have been going on for four years with this. There are a lot of things we don't have, the building is 130 years old, they want a full set of plans, I don't know why we need it. Fire is the issue, I fought it and spent hours and many dollars to try and get an alternative method, but I caved. They won't give a write off without a permit. We are still waiting. I hope to schedule a meeting with the Fire Marshal tomorrow. Last week new things came up, a full new permit packet, I don't need to do the prairie dog clearance and airport things. If I had left it as a hotel or retail, I wouldn't need the sprinkler. My daughter doesn't advertise, but wants to start doing the events. We did get a temporary business license when she first started. We have been having engineers do the alternative methods. I am leaving in 9 days. I want to open the doors to the public. There is nothing like that in the city. We have original furniture that has been donated by individuals. **Cox** – is it a health or safety issue or can we just not check a box? **Tom** – safety is an issue. I am hoping she can get a business license. There is not a remodel permit **Phillips** – we can't get a new ordinance in 9 days. **Tom** – the Fire Marshal is the key person. **Mike Shurtz**, Fire Marshal – I will disagree with the last comment, it is a Building Official department. The fire sprinkler is one issue, we don't have a permit for anything on the Cedars Hotel. The last correspondence I had with Mr. Horrito was in 2024. **Schmidt** – has anyone been in there? **Mayor** – yes, Drew has been in there as have others, it has been going on for four years. **Mike** – the fire system has not been inspected. **Schmidt** – was the electrical upgraded? **Tom** – it had been updated in 1984 throughout the building; we upgraded any cloth wire and put conduit in. **Schmidt** – is it only on the bottom floor? **Wilkey** – are you trying to get the second floor? **Tom** – the first and second floor, the second floor is offices and a bride's room. **Schmidt** – is it accessible for the public, will the city be liable if something goes wrong? **Paul** – if we haven't inspected the place and it is not to code, and we issue a business license we take on some liability. **Cox** – what is not to code? **Paul** – I don't know. **Kent** – Drew met with Tom today. I was not here when it started, but my understanding is the reason it has not been inspected is because there has not been a completed application issued to go over the project or issue a permit. Over the years there has been a lot of communication telling him they need certain things, and nothing has come forth. There has been nothing coming forth for staff to help move this through. **Cox** – so he could have continued business there without doing anything. **Paul** – At some point the city would have initiated prosecution for him doing business without a license. **Cox** – I mean if he would have continued without changing the use. So, it's safe as a boot store, but not safe as an event center. **Paul** – once you change uses in the premises you have to upgrade to the current codes. It is nice that it is an old building that is 100 plus years old, and it's a piece of history, but there are some unsafe things in a 100-year-old building that current code does not allow. So the logic is when you change the use and upgrade the use you have to upgrade to the current code. **Wilkey** – what would be the way we move forward where we have projects in old historic buildings, there has to be some give and take. **Paul** – there is an adopted code for restoration of buildings, electrical, plumbing. **Phillips** – Mr. Horrito brought in a consultant from the State on what he should do to apply for historic credit. **Tom** – they have to approve everything I restore, like the windows. **Wilkey** – to move on, normally council is not part of these issues, can we get an update when he meets with Drew by email with a list. **Renon** – he has a business license; it is for retail only. **Wilkey** – council

doesn't want to get in the weeds, but we get involved so I want to see what the issues are.

Cox – if there is not a permit, why is there not an inspection. **Paul** – for a permit, we don't do anything without a full application. Our staff has been over there to look at it. **Tom** – they cannot tell me what to call it. If there is a permit for restoration we would do it. We needed a permit for fire, and it requires a building permit. **Schmidt** – have there been any inspections?

Tom – years ago, not in the last couple of years, other than Mike walking through for alternative methods on the sprinkler system. **Wilkey** – was it just to see what they have?

Tom – I pulled a permit to lift the building up 12 inches. I bought the building, so it was not demolished **Cox** – did they sign off for the safety of the building at that time? **Tom** – I don't know about the safety, but for the foundation. **Kent** – building officials have to certify that it meets code to issue a permit. **Cox** – there are health and safety that we go overboard on.

Kent – codes are for health and safety. The choice to change the use of the building and that makes it so certain codes must be met and that has not been given to the city. **Cox** – the live nativity is next Saturday; this is the third-year running. **Phillips** – we have little angels and choir singers. There is a lot going on the 29th, downtown lighting, live reindeer,

music Christmas market, live Nativity, Jubilee of Trees, there is a lot. **Wilkey** – I want to give my thanks to all the people that support us, especially to my amazing wife that gave birth to our 7th child last week. Tomorrow the statewide grant workshop is at SUU. **Paul** – the Water Conservancy District (WCD) got a letter from Beaver County from an attorney in New Mexico and the WCD has prepared a response, and it was emailed to you, is it ok if the mayor signs the response and we will bring a resolution to you in two weeks. The city in the past has passed several resolutions in support of the Pine Valley water project. **Phillips** – are we the first city to respond? **Paul** – yes, but Enoch is also meeting tonight. **Paul** – We will get the mayor to sign it tomorrow. **Schmidt** – I will be out of the country on December 3rd.

Jonathan – the chart (see Exhibit "A") shows expenses about the proposed well south of 3000 North. As we discussed with staff and with a consultant, there are other things we will need. With an ag well it is different than a municipal well, it is constructed with perforated casing which is a lot coarser than a municipal well and the sand can migrate through that a lot easier. Something to consider in purchasing the well is that there will be additional costs.

Cox – are they required? **Jonathan** – they are 10 parts per million, we can do 5 parts but 1 is preferred. The more sand the more pumps you will go through. The money spent up front pays off in the end. **Schmidt** – this is almost \$440,000 before we purchase the well. I don't want to spend any more money until we know the cost to purchase the well. **Cox** – we were waiting on the test before we started negotiating. **Wilkey** – is the additional well development include the structure. **Paul** – the additional is swabbing the well, cleaning out the drilling fluid left, not the swages. **Wilkey** – for the price of the well can you have everything included instead of piece by piece. **Cox** – we do know the known commodity.

Mayor – we also need the property. **Jonathan** – I will get the cost estimate. We know the flow rate and quality is good. It was 1,800 gallons per minute, but there will be a haircut.

PUBLIC COMMENTS: **Christian Simmons** – I am happy that congress. What do you think about the Epstein files coming out. **Steve Miller** – a resident in Monte Vista Subdivision on 800 North, I would like speed limit signs where that has become a drag strip. **Phillips** – 800 N is in the city; your subdivision is not. We can place signs on 800 North, but within your subdivision you have to go to the county. **Steve** – we are just talking about 800 North. **Kent** – we are doing the engineering study to determine the speed limit first. 800 N is

a major collector road; it is not a 25-mph road. We have counters out there now; it will be done within the next 2 weeks. ■**Rick & Cathy Bryant** – we do several events, we are doing another on December 27th, Holiday Hoopla in the Cross Hollow Event Center, free to attend. We want you to know we have a new event in town. **Wilkey** – it says you are sponsored by Cedar City, what are we doing? **Cathy** – I have talked with Brandon in Events; he has consented to donate \$600 to the event. **Phillips** – that is very brave of you, it is a wonderful thing. There is a lot before Christmas, but not a lot in between. **Rick** – this is to fill time between Christmas and New Years. ■**Brant Parker** – for the Hotel conversation, if he got permitted to sell boots and he stayed within fire code would that be allowed. Retail is a lower threshold. ■**Scotty Harville** – we have a Thanksgiving Dinner on the 27th from 12-5 free to Veterans.

**PUBLIC HEARING TO CONSIDER MODIFICATIONS TO CEDAR CITY
ORDINANCE 26-IV-9 REMOVING THE REQUIREMENT OF FENCING AROUND
PRIVATE POOLS WHEN USING COMPLIANT LOCKING POOL COVERS.**

RANDALL MCUNE: **Paul** – we have an ordinance requiring a self-latching gate with fence, the State changed the requirements and they allow these types of covers with not fence required. We want to bring our ordinance into compliance. **Phillips** – how do we know? **Paul** – we do it at building permit. **Phillips** – would we do that with the cover? **Paul** – yes. **Schmidt** – my neighbor had a duck pond in their yard, and the other neighbor had a 2-year-old wonder into their yard and ended up face down in the pond. **Paul** – the State has certain standards they require us to follow, if we don't follow there is a stick behind it. There are areas they control such as gun control and the State said it is a State policy, not a municipal authority, I don't see that same dominance, I don't know what they would hit us with. **Wilkey** – we can be more restrictive? **Paul** – gun control, they would hit us with something, they have required us to do housing plans etc., this is not in that list. **Cox** – I ask about weight bearing, so they can't sink. **Wilkey** – read the code and they are rated for 500 lbs.

Mayor Green opened the public hearing. **Tom Jett** – this came to Planning Commission a few weeks ago, I said we should pass it, but I think the legislature made a mistake, a lot of people drown because of swimming pools. You can walk on it if it is closed, but if left open it is a moot point. **Phillips** – you make a good point, in the summer are you going to cover it every day. **Tom** – State law says you have no choice, so we passed it. **Wilkey** – I don't think they will come back on us. **Kent** – I have seen a cover in operation, you push a button and it self-locks, it is easier to get over a fence than get in one of these. I think this improves safety, that is my opinion. The hearing closed. Action.

**CONSIDER WAIVING A PORTION OF THE SOLID WASTE BILL FOR TINK
HOLYOAK. PAUL BITTMENN:**

Tink Holyoak – I looked at my city bill, and it was more than my electrical bill. I have been paying for 4 garbage cans at my home for 10 years, it was \$1,910. I had an issue with the garbage collector, I missed my putting my can out so I took it across the street, and he told me I cannot do that, I think that is where it started. I have two garbage cans. **Phillips** – you have two cans. **Tink** – I looked at my bill, and it was \$32 for garbage so I called the city and they said it is \$8 per can and you have 4 cans, I said no I don't, I only have 2. **Wilkey** – so a driver reported that he had 4 cans. Our records can only go back 3 years. **Paul** – I see the note in 2015 that says 4 cans out for trash several times. **Wilkey** – do you have record of that? **Tink** – I called the city. **Paul** – we can see the bills going back 3 years, but

the note was back 10 years ago, we told him we would refund 3 years back and he could come to city council if he wanted more. **Ryan Marshall** – a few years ago, if a driver goes by and sees more cans they call the city office, if it is one and they have two we contact the homeowner and add it to the bill. **Wilkey** – our records go back 3 years, so there is no way to prove when it was put on. **Phillips** – if you are moving the can to the other side of the street because you missed the pickup, you are not double dipping. **Ryan** – it is only if they put it in front of the neighbors and they think the neighbor had more cans. **Cox** – will you take the 3 years they offered you, or you will need to bring us bills. **Tink** – I appreciate that the Police Department saved my wife's life so I was going to take the 3 years, but I decided to come, that is a lot of money. **Cox** – no one is accusing, but we don't have proof. **Wilkey** – we need concrete proof when it was public money. Action.

CONSIDER A RESOLUTION AMENDING THE CONSOLIDATED FEE SCHEDULE FOR ARENA FEES. SCOTT CHRISTENSEN/KEN NIELSEN/RANDALL MCUNE: Ken

- the next few are related to the new addition. We took these items to the arena committee and they approved of them. **Cox** – we compared it to other arenas, and we are lower on most of them. **Phillips** – why don't we do the fee schedule when we do the budget in July? **Paul** – you do, but it is a new addition to the facility. **Ken** – we are only here because we have a new rentable space. **Wilkey** – indoor only (north, west, east entrance only) that is the old area. What if the rent only the warmup area? **Scott** – they have a deposit no matter what the rent. It is returned. **Phillips** – a ticketed event, the parking and warmup area is not in addition for the parking lot? **Scott** – no, it is like if a carnival only rents the parking lot. **Phillips** – I have had residents reach out about the arena fees. You have done a great job in getting events out there. **Cox** – the calendar is almost full. **Scott** – we are very competitive with our prices and people that have rented the facility are aware of the price increase. **Wilkey** – example, Pumpkin Festival, the rate would be \$1,000 for a ticketed event. **Phillips** – they took out the weekend; it is a full day rental. **Scott** – we do have an hourly rental rate during the week, but not on the weekend. The hours are from when we open until midnight. **Schmidt** – how did the new addition hamper the parking, are we looking to expand to the north? **Scott** – the livestock Association owns that property, we would love to. We will have the same amount of parking; we had a white fence there before. The memberships right now have to pay for their lights and that has been a sore spot for a lot of people. If we raised the price it will bring in more money, but the lights will come on when they ride in and it will go off with no movement, it is a better system. **Phillips** – on the banquet room, how did the costs relate to Festival Hall? **Scott** – it is similar. The banquet room is extra on every rental. **Wilkey** – the tables and chairs are included in the rental at Festival Hall. **Scott** – in talking with all the other facilities, they all have an alcohol fee, if they sell alcohol, they pay 20-30% on the alcohol they sell, if it is a private event they pay double rent for the facility. This is St. George, Spanish Fork, South Jordan, Blackhawk. That is something to consider. **Phillips** – you will have people use the banquet room with alcohol. **Wilkey** – just increase the deposit. **Cox** – I agree with the sales, but for a private event double is too high. **Ken** – it gives him the ability to have 4 events there at the same time if it works out. **Wilkey** – is the stage rental built in? **Scott** – we have asked for money from the restaurant tax for a stage. Action

CROSS HOLLOW ARENA DONATION LETTER. SCOTT CHRISTENSEN/KEN NIELSON:

Cox – we are looking for about \$40,000 to complete the project, if someone gave \$20,000, they could put their name on the banquet room. If there is more than one there could be a bid offer. **Phillips** – on the inside of the room? **Paul** – how long would that last, \$20,000 is very low. Would you consider a doner wall instead of naming rights. **Scott** – Rusty Akin has

been out raising money. **Cox** – I do like the doner wall at this stage. **Ken** – I am in favor of the doner wall, we have the Livestock Association, we have Rusty that have already donated, so we want to recognize them all. **Phillips** – the community knows the entire complex as the Diamond Z arena. **Ken** – we will rework the letter for a doner wall. Action.

CONSIDER A RESOLUTION APPROVING THE CONCEPT OF PLACING A SHEEP HERDER MONUMENT IN FRONT OF THE CROSS HOLLOW EVENTS CENTER.

PAUL BITTMENN: Paul – the council approved an ordinance about placing monuments, if someone wants to place a statute or monument, they bring the concept, and you get the thumbs up or down and then whoever runs the facility does the follow through. We have folks, Commissioner Robinson and Livestock and Heritage Festival were out of town and saw this sheep herder monument and they wanted to do something similar in front of the arena on the roadside of the fence. There is a 10-foot-wide livestock easement that has been not used a lot, it is still there for the Livestock Association, and they know they have to agree to this. Donna Christensen has talked to the Livestock Association; they just want something in writing. It is our property, and they have an easement. **Phillips** – the final artwork would be reviewed by the Historical Preservation Commission, that is in the ordinance. **Paul** – if the city is on board they will start raising money. Action.

CONSIDER A RESOLUTION TO INCLUDE A QUICHAPA CANYON RANCH BRAND ON THE OUTSIDE OF THE WARMUP BARN AT THE CROSS HOLLOW EVENTS CENTER. SCOTT CHRISTENSEN/KEN NIELSON:

Paul – Jean Lopour has donated a substantial amount of money to the warmup barn and will continue to donate money. She did not ask for this, but they wanted to recognize her. They will have someone do something similar to the Diamond Z lettering. **Phillips** – the white square makes it look like a sign, but the rest of it looks like a brand. **Ken** – Diamond Z is individual letters. **Phillips** – I think you need to reach out to Mrs. Zaphiropoulos. **Ken** – already done. It is the Cross Hollows Arena, the Diamond Z arena, Iron Ranges is the outdoor arena. It will be on the east side of the new addition which is the warmup area. Action.

CONSIDER A SPECIALIZED AVIATION SERVICES OPERATION (SASO)

ADDENDUM FOR WRIGHT WRENCH AVIATION. TYLER GALETKA: Tyler – they want to include flight instruction and aircraft rental the users and customers have nothing but good to say. They have already purchased an aircraft. **Phillips** – the Airport Board was supportive. Consent.

CONSIDER APPROVAL OF THE 2025 MASTER PLAN FOR THE CEDAR CITY REGIONAL AIRPORT. TYLER GALETKA:

Tyler – the last one was in 2017, we started the process in 2021. We are looking to adopt the final plan.

Jeremy McCalister – a couple highlights, we did one in 2017, the master plans are done every 7-10 years. If there is a runway construction, they want them sooner. We started the master plan in late 2022, they take up to 4 years, 18 months to 3 years is normal. We focused on hangar development, terminal expansion, air traffic control and runway expansion. We had two advisory committees, technical advisory committee and community advisory committee. We had four meetings with each advisory committee. We had three public open houses. It was overseen by the Denver office, and they have provided guidance and reviewed the Airport layout plan of what you can plan to see of the next 10-20 years. We made it flexible for a diverse range of needs for

corporate needs and individual needs. There are a lot of details in the thresholds. The airport layout plan (ALP) has been through the FAA and once the city accepts the FAA will accept the plan. **Phillips** – it is a formality because they have reviewed along the way. **Jeremy** – correct. **Phillips** – on the short-term cost analysis it said master plan study it said \$1 million dollars. **Jeremy** – yes, the \$1 million is an earmark. We are working on one in Reno for \$1.2 million because they are redoing their airport. I don't see the justification for that. **Phillips** – we can or cannot do what is in the masterplan, but we cannot do something that is not in the plan. **Jeremy** – correct, the FAA wants things that are justified.

CLOSED MEETING – REASONABLY IMMINENT LITIGATION & PROPERTY

NEGOTIATIONS: Councilmember Phillips moved to go into closed meeting at 7:50 p.m.; second by Councilmember Wilkey; roll call vote as follows:

Robert Cox	-	AYE
Scott Phillips	-	AYE
Ronald Riddle	-	AYE
Phil Schmidt	-	AYE
Carter Wilkey	-	AYE

ADJOURN: Councilmember Wilkey moved to adjourn at 9:02 p.m.; second by Councilmember Schmidt; vote unanimous.

Renon Savage, MMC
City Recorder

Up-front Expenses for Brent Hunter Well
November 7, 2025

Pull the existing pump, run test pump in, camera the well

Item #	Description	Estimated Cost
1	Sewer lines in Zone 1 – special construction outside townhome units in Zone 1.	\$11,750
2	Sewer lines in Zone 1 – special construction underneath the townhome buildings.	\$120,000
3	Preliminary Evaluation Report (PER) and Drinking Water Source Protection Plan (DWSPP)	\$5,720
4	Appraisal of existing well	\$6,000
5	Water Quality samples – full set, radiological, and bacteriological (This cost has been increased. Another set of samples may need to be taken if the flowrate is different than when we took the previous samples)	\$6,000
6	Test Pump cost – Step-drawdown test and Constant-rate test Pull the existing pump. (Quote from Luke Anzalone was \$38,600. Some contingency was added in the estimated cost.)	\$39,000
7	Video of the well by City Water Division	\$0
	Total Amount =	\$188,470

Well Development Costs for Brent Hunter Well
November 19, 2025

Additional well development for municipal use

Item #	Description	Estimated Cost
1	Additional gravel pack	\$9,000
2	Additional well development	\$150,000
3	Plumbness and alignment test (actual cost for gyroscopic test)	\$5,300
4	Install swages for pump chamber	\$50,000
5	Pump test after development & swages	\$40,000
	Total Amount =	\$254,300

COUNCIL MINUTES
DECEMBER 3, 2025

The City Council held a meeting on Wednesday, December 3, 2025, at 5:30 p.m. in the City Council Chambers, 10 North Main Street, Cedar City, Utah.

MEMBERS PRESENT: Mayor Garth O. Green; Councilmembers: R. Scott Phillips; Ronald Riddle; Carter Wilkey.

MEMBER EXCUSED: Councilmembers Robert Cox and Phil E. Schmidt.

STAFF PRESENT: City Manager Paul Bittmenn; Finance Director Terri Marsh; City Recorder Renon Savage; City Engineer Kent Fugal; Police Chief Darin Adams; Fire Marshal Mike Shurtz; Senior Engineer Jonathan Stathis.

OTHERS PRESENT: Ann Clark, Wendy Green, Brent Drew, Tom Jett, Steve Nelson, Tyler Melling, Bill Payne, Tonya Payne, Rick Holman, Dallas Buckner, Tom Jett, Tyler Romeril, Eugene Humphries, Carol Humphries, Milt McLelland, Rochelle, Barry Short, Jonathan Pyne, Jace Burgess, Ridley Griggs.

CALL TO ORDER: Kent Fugal gave the invocation; the pledge was led by Councilmember Phillips.

AGENDA ORDER APPROVAL: Councilmember Phillips moved to approve the agenda order for the action and work meetings; second by Councilmember Riddle; vote unanimous.

ADMINISTRATION AGENDA – MAYOR AND COUNCIL BUSINESS; STAFF

COMMENTS: ■ Mayor's report to City. **Mayor Green** – I am taking a personal privilege and will read a report to the citizens; a copy is attached as Exhibit "A". Council members Wilkey and Phillips as well as citizens Eugene and Carol Humphries helped read the report. Section 5 was skipped. ■ **Mayor** – the lighting ceremony was amazing. **Phillips** – thanks to the hundreds of volunteers that participated. Wreaths Across America will be on the 13th at the Cedar City Municipal Cemetery, 1,375 wreaths will be placed on the graves of our veterans. ■ **Wilkey** – there is mention on social media of a protest of the new Maverik opening this Friday.

PUBLIC COMMENTS: ■ **Jonathan Pyne**, resident on College Way. We have had multiple cars bump my curb and hit a speed limit sign and a fence. I have lived there since 2013; this is one of the busiest streets in the city. There was a rollover last year, it drove through the field next to my lot, this has happened 3 or 4 times. It is frustrating that there is no attention, Ridge Road has radar traffic. There are stop signs on Cove Drive to expensive homes, it is time to look at College Way and address these concerns. People drive 35-45 mph. Other options are lowering speed limit, speed bumps, stop signs for the safety and wellbeing of the residents. I have seen less police on the road than I did as a college student. I hope to have you improve our quality of life. **Phillips** – are the accidents going southbound? **Mr. Pyne** - yes. ■ **Milt McLelland** – I am Vice Chair of non-profit Forge doing musicals for the community. With the 250th of the US, we have the rights to 1776, we would like to invite all the city officials, and past officials to sit on stage and represent each colony. We want you to wear a wig and show support for the Declaration of Independence. We have a few shows that we have started, they have been written in house, two radio style shows, The Star Still

Shines and Santa Clause is Coming to Town, a re-creation of a Christmas Carol in modern fashion. Tickets are \$5 for individuals and \$10 for a family of up to 8. This is at the Fiddlers Fun Center. ■ **Wilkey** – a public comment a few weeks ago was asking about speed limit signs on 800 North, they have put the speed limit signs up for a 25-mph zone. **Kent** – that is on the west end by residential neighborhood and then it goes up to 35 mph. ■ **Wendy Green** – I want to thank the city for all the work for the lighting ceremony, it brings a hometown feeling to the city. I was amazed at how many people worked on this, especially Scott. ■ **Ann Clark** – the lighting ceremony was fabulous, my family was here for Thanksgiving, and I want to thank all involved, it is wonderful.

CONSENT AGENDA: (1) APPROVAL OF MINUTES DATED NOVEMBER 5, 12, & 18, 2025; (2) RATIFY BILLS DATED NOVEMBER 18, 21, & 25, 2025; (3) APPROVE A SPECIALIZED AVIATION SERVICES OPERATION (SASO) ADDENDUM FOR WRIGHT WRENCH AVIATION. TYLER GALETKA; (4) APPROVE THE APPOINTMENT OF NIEL BERNDT AND MARK BARUFFI TO THE DOWNTOWN PARKING AUTHORITY. MAYOR GREEN: Councilmember Phillips moved to approve the consent agenda items 1 through 4 as written; second by Councilmember Wilkey; vote unanimous.

CONSIDER WAIVING A PORTION OF THE SOLID WASTE BILL FOR TINK HOLYOAK. PAUL BITTMENN: Paul - we left it to waive what we have record of which is 36 months of the two cans. We didn't get any additional documentation from Tink.

Councilmember Wilkey moved to move forward with waiving the portion staff recommended, but not the additional; second by Councilmember Riddle; vote unanimous.

CONSIDER A RESOLUTION APPROVING THE 2025 MASTER PLAN FOR THE CEDAR CITY REGIONAL AIRPORT. TYLER GALETKA: Councilmember Phillips moved to approve the resolution approving the 2025 Master Plan for the Cedar City Regional Airport; second by Councilmember Riddle; vote as follows:

AYE: 3
NAY: 0
ABSTAINED: 0

CONSIDER MODIFYING CEDAR CITY ORDINANCE 26-IV-9, REMOVING THE REQUIREMENT OF FENCING AROUND PRIVATE POOLS WHEN USING COMPLIANT LOCKING POOL COVERS. RANDALL MCUNE: Phillips – I still have concerns with this. I would like more information. **Wilkey** – do we have a permit waiting? **Paul** – we had one resident go through BOA for a variance, that is what brought this up. **Wilkey** – I don't want to require more than the State requires, I see it both ways, if a gate is not locked a fence is useless. I am fine with more than one option and let people be responsible. **Steve Nelson** – I am on BOA, Randall told us that it is in contradiction of State law and it could create liability for the city, so I feel it is what the city should do. **Paul** – my opinion is slightly different, the state controls some fields, such as firearms and gun control, they are in control of that for the State of Utah and municipalities cannot deviate from that. That is when Virgin was trying to make their own gun control laws. This area is not that pronounced, the state has not said this is the only way you can do it. I don't know what

liability we would have if we were more restrictive. **Riddle** – I thought about it, and government should not be responsible for everything. Life that is lost is usually a young child which is tender to me. We had a situation with Coal Creek when one of my boys got trapped and my two older ones pulled him out. I think this gives them an option.

Councilmember Riddle moved to approve the ordinance amending 26-IV-9, giving the option for a gate or using compliant locking pool covers; Wilkey – clarification, they can use one or the other. Riddle – correct. The motion was seconded by Councilmember Wilkey; roll call vote as follows:

Scott Phillips -	AYE
Ronald Riddle -	AYE
Carter Wilkey -	AYE

CONSIDER A RESOLUTION AMENDING THE CONSOLIDATED FEE SCHEDULE FOR ARENA FEES. SCOTT CHRISTENSEN/KEN NIELSEN/

RANDALL MCUNE: Paul – these are new fees for the indoor facility that should be finished on the 3rd of January. **Wilkey** – the alcohol was not included. **Paul** – it was not.

Councilmember Wilkey moved to approve the resolution amending the consolidated fee schedule for Arena fees; second by Councilmember Phillips; vote as follows:

AYE:	<u>3</u>
NAY:	<u>0</u>
ABSTAINED:	<u>0</u>

CONSIDER A RESOLUTION APPROVING THE CONCEPT OF PLACING A SHEEP HERDER MONUMENT IN FRONT OF THE CROSS HOLLOW EVENTS

CENTER. PAUL BITTMENN: Paul – I talked with Donna Christensen and told her we would need to see renderings and put it before the Historic Preservation Board and she was on board for that. **Wilkey** – once installed, the upkeep around the area is on the city, who would do that? **Paul** – Leisure Services. I don't know the intention with the statutes, we maintain the statutes at Veterans Memorial, but not the one on North Main, it is private. We will plan that as it goes down the road.

Councilmember Phillips moved to approve the resolution approving the concept of placing a Sheep Herder monument in front of the Cross Hollow Event Center; second by Councilmember Riddle; vote as follows:

AYE:	<u>3</u>
NAY:	<u>0</u>
ABSTAINED:	<u>0</u>

CONSIDER A RESOLUTION TO INCLUDE A QUICHAPA CANYON RANCH BRAND ON THE OUTSIDE OF THE WARMUP BARN AT THE CROSS HOLLOW EVENTS CENTER. SCOTT CHRISTENSEN/KEN NIELSON: Paul – they have some proofs of the brand itself, similar to what you saw last week without the white background, it

will be cut out, the entire thing will be on the doner plaque, their name will not be on the building, just the brand.

Councilmember Wilkey moved to approve the resolution to include a Quichapa Canyon Ranch brand on the outside of the Warmup Barn at the Cross Hollow Events Center; second by Councilmember Riddle; vote as follows:

AYE: 3
NAY: 0
ABSTAINED: 0

CONSIDER CROSS HOLLOW ARENA DONATION LETTER. SCOTT

CHRISTENSEN/KEN NIELSON: Paul – the only change is no naming rights, it will be a doner memorial wall inside the facility.

Councilmember Phillips moved to approve a donation letter to have names included on a donor wall at the Cross Hollow Events Center; second by Councilmember Riddle; vote unanimous.

ADJOURN: Councilmember Phillips moved to adjourn and move into the work meeting at 6:50 p.m.; second by Councilmember Wilkey; vote unanimous.

CITY COUNCIL – DECEMBER 3, 2025

Report to the Citizens of Cedar City

I come tonight with a sense of deep humility as I reflect on the opportunity I have had to serve as the Mayor of Cedar City. When I first considered offering this report, I felt the weight of the years behind me — years of work, of learning, of successes, and of plenty of mistakes along the way. I am 76 years old now, and when I began this journey I was 71. I thought I had already lived a full professional and personal life. But nothing could have prepared me for what these past four years would demand or what they would give back to me.

Before becoming mayor, my life had been a long mixture of business, service, and faith. I spent nearly twenty years in banking, and another twenty running a business. When that season ended, I turned my energy toward humanitarian work — in Kenya and Uganda, in Malaysia and Mexico, throughout Europe, and across the Philippines. Those experiences gave me perspective, gratitude, and a measure of success that blessed my family. We raised five children, and they have supported me every step of the way. I truly thought my days of big assignments were behind me.

Then along came Paul Cozzens — a friend, a former city councilman, and a county commissioner — insisting that I needed to run for mayor. I'm not sure he fully understood what he was asking of me. And I'm not sure, at the time, that he knew exactly what he was getting. I have never been a quiet or cautious operator. I've often been described, sometimes affectionately and sometimes not, as a bull moose in a china cupboard. When I take on a challenge, I take it on completely. I throw every fiber of my being into the task, hold nothing back, and move fast. It's the only way I know.

So in November of 2020 — in the middle of a nation divided, during a presidential election that stirred passions everywhere — I began preparing for a mayoral campaign. Donald Trump was running against Joe Biden, and like Trump, I tend to be direct, unfiltered, and relentless once I set my mind to something. I believed that if I entered the race, I could figure it out, work hard, and get things done. And that belief carried me through a difficult campaign.

The election was no easy contest. I ran against the sitting mayor — young, articulate, a lawyer, well-liked, and well-prepared. I spent my own money. I asked no one for campaign donations. I used some unconventional methods. And when the votes were counted, I won by the narrowest of margins — a little over a hundred votes. It was a humbling victory, and in some ways, it set the tone for my

entire term: nothing would come easy, but everything worth doing would be worth fighting for.

When I took office in January of 2022, I was confident but not naïve. I knew Cedar City faced serious challenges, and I also knew exactly what I had promised the voters. I had made several strong commitments — not vague campaign talking points, but real goals that I intended to accomplish. I wasn't interested in symbolic victories. I wanted results. And I was ready to work.

From the beginning, I focused on five or six major initiatives that I believed were essential to the future of Cedar City. First and foremost was water — our most urgent and important long-term challenge. I also committed to building a gym for the community, building new parks, recruiting a grocery store for the north end of town, improving our roads, and starting a book club for the children of the community — the now-beloved BSBC, the Banana Split Book Club. And on the water question alone, I knew my work would break down into two monumental battles: navigating the newly imposed Groundwater Management Plan, and finding a way to save and reuse our wastewater.

These commitments became my roadmap, my compass, and in many ways, my constant companions. I did not take them lightly. I intended, from day one, to deliver on them fully. And as I begin this report to the citizens, my hope is to walk you through each of these efforts — the obstacles, the victories, the frustrations, and the reasons I believe Cedar City is stronger today than it was when I took office.

This is not simply a list of accomplishments. It is the story of a community that faced major challenges, made hard decisions, and continued moving forward. It is the story of what we attempted, what we achieved, and what still remains to be done. And it is my privilege to share it with you.

Section 1 — Roads and Infrastructure

Cedar City's roads and infrastructure presented one of the most complex challenges of my administration. There were dozens of projects that deserved attention — from long-needed east-west connections on the south end of town, to the unfinished extension of Center Street, to the important improvements still needed on 2400 North. All of these remain important for the future. But early in my term, I identified what I believed to be the single most critical road project for the long-term function of our community: establishing a true north-south route that would allow residents to travel through Cedar City without being forced onto Main Street.

The most logical and achievable option was 100 East, a route that many parts of town had already partially developed over the years. Some areas had segments of 100 East, others had Wedgwood Lane, Fairway Drive, and even 75 East, all tied together loosely by an existing bridge over Coal Creek at 200 North. The foundation for a true corridor was there — but the gaps made it impossible for anyone to travel from one end of Cedar City to the other without funneling onto Main Street.

The single largest obstacle was completing the connection across several parcels of land. Fortunately, a beautiful bridge already existed at 200 North and 200 East, built decades ago and perfectly placed to serve this project. From the north interchange, the route could proceed north along Wedgwood Lane, then through what we know as the Trader Park, across Fairway Drive, and onto 100 East as it passes through the Paiute Tribal area.

From there, the road would continue south, connecting to 600 South, where drivers could transition to either 75 East or 300 East, and from there move southward toward the subdivisions near the South Interchange. The most significant remaining gap lay between Fairway Drive and 600 North — but this section was on land the city already owned or held rights-of-way for. The property bordered the golf course and was near enough to Main Street to benefit from nearby traffic signals, making the corridor safer and more functional.

Several local businesses supported this effort, including my own children, whose block of property lies along that prospective route. They ultimately purchased the old “sheepshed” property and converted it — through an enormous effort — into the American Preparatory Academy (APA). That campus now borders the planned 100 East alignment and will benefit from proper road access.

However, the most difficult negotiations involved the U.S. Forest Service, whose parcel lay between Fairway Drive and the golf course. We worked for years to resolve those issues, and I am pleased to report that we successfully acquired the necessary deed to complete the corridor. This not only enables the road, but also supports improvements to the driving range and golf course.

Another section crossed the old drive-in theater property, and the Tong property. We purchased the needed land and secured an easement to the theater property. The Jones family was already working along their area and was supportive, providing yet another cooperative step toward completion.

As of now, the project is out for bid, with construction expected to proceed to 900 North, and with additional segments being developed as a double-chip sealed roadway from there to Fairway Drive. This represents significant progress toward a true north-south alternative to Main Street.

I must, however, offer a caution. To secure the crucial right-of-way from the Whittingham family, I personally agreed — in exchange for the land — that the city would build a double-chip sealed road through their section. This concession was vital in obtaining the right-of-way at no cost to the city. There has been discussion that funding may fall short for that segment. My strong counsel to the City Council and administration is this: honor the commitment. If additional funds are required, find them. We gave our word, and keeping it will protect the city from future liability and maintain our integrity in future negotiations.

There remains one last major gap: the section through the Trailer Park. Each time I raised it, I was assured that plans were underway. But progress has stalled, and I now urge the incoming administration — Mayor Steve Nelson, Council Members Waldo Galán and Phil Schmidt, and City Manager Paul Bittmenn — to make this a priority. Finalizing that segment, along with a small future extension toward 75 East near the Leavitt property, will complete the corridor and deliver the north-south connection Cedar City has needed for decades.

This road project was where I invested the greatest portion of my time on infrastructure. It will serve the community long after my term ends, improve traffic flow, provide safer access to Main Street through signalized intersections, and support both residential and commercial development across the east side of town. I look forward to seeing its completion in the coming year.

Section 2 — Parks and Recreation

When I took office, Cedar City's park system was already in a period of transition. Several projects were underway, each addressing long-standing needs in different parts of the community. Two of those parks — Discovery Park on the south end of town, and the West Canyon Park on the east side — had already been initiated before my administration began. Discovery Park, with its aging wooden structures, had reached a condition that was no longer safe or suitable for children, and it required complete reconstruction. At West Canyon Park, the Rotary Club had taken on a significant improvement project that included water features and other enhancements. Both projects moved forward successfully with little direct intervention from the mayor's office, and I applaud the organizations and volunteers who brought them to completion.

My primary focus, however, became the long-promised park for residents of the Fiddlers Canyon area — a commitment made many times over many years, but never fulfilled. The city owned a sizable parcel of land east of Fiddlers, obtained through a land trade with SITLA, but that parcel came with numerous restrictions and challenges. It lacked road access, included steep hillside that could not be used for development, and required costly improvements to become functional as a park.

To overcome these obstacles, I negotiated a land exchange with SITLA for a far more suitable location: two high-value parcels along Main Street at the intersection of Nichols Canyon Road, future site of a new traffic signal and future crossing for 2400 North. The city received two excellent pieces of property — one on the northwest corner and one on the northeast corner of that intersection — with only a small building lot excluded from the deal. We then secured an additional acre on the northwest corner to complete the site, giving the city an ideal footprint for a new north-end park.

The City Council wisely determined that rather than wait for years and attempt to build a massive 15-acre facility, we would use the funds we had to construct a high-quality, functional 3- to 4-acre park. This approach ensured that the residents of Fiddlers Canyon would finally receive the park they had been promised, without unnecessary delays or over-planning.

Engineering and architectural design work has been completed, and the project is moving steadily forward. Because funding was limited, I strongly encouraged the city to use our own Public Works departments to perform key infrastructure elements. Our road crew has been building the grade, establishing the shape and level of the future park. Our sewer department is installing the main line and the restroom stub-outs. The drainage ditch is being realigned for proper flow. The water department is installing the water service. With this work progressing through the winter, the site will be ready for full construction by spring, when bids can be let and the park itself completed. I anticipate that the families of the north end will finally enjoy this long-awaited neighborhood park in the months ahead.

The other major park project during my tenure is located west of Cedar City on land generously donated by former Mayor Joe Burgess. Early in my administration, Joe approached me with an extraordinary offer: he would deed the city 93 acres of land, along with 93 acre-feet of water, for use in creating a large multi-use recreational complex. The initial parcel conveyed to the city was 33

acres, along with all the water needed to irrigate future fields. The land had previously been excavated, leaving a natural bowl — a perfect location for athletic fields.

Our road department mobilized quickly and shaped the first large soccer field, which was planted and established over the course of last year. That grass is now mature, and by this coming spring, it will be ready for league play. The design of the complex includes five or six additional soccer fields, three of which are full-size professional fields. The county has already installed the bases for field lighting, and the City Council approved funding for a restroom facility with anticipated help from the youth soccer foundation.. With minimal additional improvements — an asphalt or gravel parking lot — the complex will open for full use.

In addition to the initial land transfer, Mr. Burgess later gifted roughly 20 more acres, enabling the city to construct a pond on the property. That pond is now complete, awaiting water. The plan is to fill it using a combination of runoff from the surrounding subdivision, flow from the Coal Creek irrigation ditch, and drainage water. Mr. Burgess is currently drilling a well to service his agricultural pivot, and he has promised that once he no longer needs that well, he will transfer it to the city. The well is being drilled to municipal standards, allowing the city to use it for irrigation of the athletic fields. The city can assign its 93 acre-feet to that well, creating a sustainable long-term water supply for the entire complex.

These two major parks — the Fiddlers Canyon park to the north and the Burgess-donated recreational complex to the west — represent the largest expansions of parkland in Cedar City in many years. Combined with the successful reconstruction of Discovery Park in the south and the Rotary-supported improvements on the east, the community now stands with four significant park projects completed or underway during my administration.

Each one enhances quality of life. Each one meets a long-standing need. And each one represents cooperation between citizens, service organizations, city staff, and generous community partners. I am proud of the progress we have made, and I am confident these parks will serve Cedar City families for generations.

Section 3 — Gyms

Early in my administration, I expressed interest in building a series of low-cost, value-engineered gymnasiums — simple, clear-span metal buildings similar to those offered by CO Building Systems and other manufacturers. These structures

are efficient, affordable, and widely used in other communities for basketball, volleyball, pickleball, and indoor recreation. My vision was to place individual gyms in or near neighborhood parks, distributing them throughout the community so that families and children would have convenient access to indoor recreation close to home.

To my surprise, there was not much enthusiasm for this approach. The City Council felt strongly that a single, large recreational complex would better serve the community. Specifically, they were interested in expanding the existing Aquatic Center and adding three full gymnasiums to the building — an option that had been anticipated in the original construction plans many years ago. While I understood their reasoning, I did not support that direction. In my view, standalone gyms would have provided far more use for far less money. Rather than spending an estimated ten million dollars for three gyms attached to the Aquatic Center, I believed we could build four or five independent gyms for roughly half that cost.

Ultimately, the Council chose to proceed with their preferred concept of an Aquatic Center expansion. That is their prerogative, and future councils may continue down that path or choose another. As of the end of my term, no construction has begun. The city has placed a two million dollars into a recreation fund, but that fund has not grown nearly as fast as needed to undertake a major project of this scale.

Meanwhile, Cedar City remains without a single indoor public gymnasium — a surprising situation for a community of our size and growth. We did, however, complete an important recreational improvement during my administration: the construction of a beautiful outdoor pickleball complex, which has been well used and well received by the public.

I continue to believe that Cedar City would be well served by creating indoor gym space for youth and adults alike. Whether through neighborhood gyms, a large centralized complex, or a hybrid of both, future leaders will have the opportunity to meet this need in the way they feel best serves the community.

Section 4 — Grocery Stores

Early in my administration, I met with residents from the Fiddlers Canyon area who expressed a strong desire — and a long-standing frustration — regarding the lack of a grocery store on the north end of Cedar City. Our community has grown rapidly, yet the nearest full-service grocery options remained far to the south: Walmart at the southernmost end of town, Smith's at 600 South, and Lin's in the

center of town. For families living north of there, the distance and congestion created a real inconvenience. The need was obvious, and the opportunity was tremendous.

As a businessman who has built and operated successful enterprises, I initially believed that attracting a grocery store would be a straightforward process. But I learned quickly that large commercial decisions are driven by internal models, long-term projections, and corporate strategies that do not always align with community needs or local enthusiasm. Even when every indicator pointed to a strong market, it took time — more time than I expected — for the right parties to move forward.

I met with numerous business owners, developers, and entrepreneurial visionaries, many of whom agreed that the north end of Cedar City was one of the best untapped retail opportunities in Utah. Yet even with that level of universal agreement, no one seemed ready to take the first step. National chains, regional operators, and private developers all expressed interest, but the project simply did not materialize as quickly as any of us hoped.

However, persistence pays off. In recent months, I am pleased to report that two major grocery initiatives have finally moved forward.

First, WinCo Foods has now committed to building a large grocery store on the north end of town, just south of the Love's Truck Stop. This will be a major addition to the community, bringing lower prices, broad selection, and a proven business model that thrives in fast-growing communities like ours.

Second, the Smith's Grocery Store chain has announced plans to construct two new stores in Cedar City. One will be located farther south than their current 600 South location, nearer to the South Interchange. The other will be placed on the north end of town, east of the bowling alley near the North Interchange. Both stores are planned to be substantial facilities — approximately 123,000 square feet each.

These developments mean that Cedar City will soon have not just one, but two full-scale grocery stores serving the northern section of our city.

I am grateful to the companies who ultimately recognized the tremendous opportunity, and I wish them great success as they build and open these stores. They will serve our citizens well and strengthen Cedar City's economic base for decades to come.

Section 5 — The BSBC (Banana Split Book Club)

Many years ago, when a few of my own grandchildren were struggling to read, I created something simple and fun to help them: the Banana Split Book Club, or BSBC. The idea was straightforward — you pick out a book, you read the book, and you earn a banana split. It worked beautifully for my grandkids, and when I ran for mayor, my campaign team asked me whether I had anything that might soften my reputation. They told me I was too gruff, too bold, too big, too male — too everything. When I told them I had once started a book club for kids, their eyes lit up. They said, “The mamas will love that. The grandmas will love it even more.”

So I made a promise: if I were elected, Cedar City would have a Banana Split Book Club..

And that is exactly what we did.

During the summer months of my first two years in office, children from across the community came each week to choose a book and enjoy a banana split. When they finished reading their book, they brought it back, picked another one, and earned another banana split. We held events at the Cedar City Library and on the lawn of the city park on the south side. Thousands of children participated, and thousands of banana splits were served. Parents and grandparents still tell me how much their children looked forward to reading — because reading meant ice cream, sunshine, and fun.

I had already made a promise to the kids at the end of year two — that some of the BSBC books would be taken to the Philippines, where I have long-standing business operations and employees. So we prepared a full pallet of books, more than 1,300 in all, and shipped them to Bacolod in the Visayas.

There, in partnership with a major public market in the center of the city, we recreated the Banana Split Book Club experience for Filipino children. The turnout was remarkable. From 9 a.m. until about 1 p.m., we served more than 1,500 banana splits and distributed every single book. As quickly as our team could scoop ice cream into a banana boats and slide it across the table, children carried them off to load them with whipped cream, sprinkles, and toppings. We literally emptied the ice cream freezers of one of the largest grocery stores in town.

The books have now all been given away. They are in the hands of children in the Philippines. The children here in Cedar City ate their banana splits, read their

books, and grew in their love for reading. It was fun, it was simple, it was joyful — and it worked.

The Banana Split Book Club is one of the happiest things we did during my term. It served our children well, and it created memories that I hope will last for them as long as they will for me.

Section 6 — Wastewater Treatment and Reuse

During my campaign for mayor, I made a bold promise: Cedar City would no longer waste its wastewater. I believed strongly then — and even more strongly now — that in a desert community, we simply cannot afford to throw away a resource as valuable as treated water.

Cedar City owns and operates a large, modern wastewater treatment plant on the far north end of the valley. It is a beautiful facility and consistently produces high-quality Type 2 effluent, a level perfectly suitable for many non-contact uses but not yet clean enough for irrigating turf, parks, school grounds, or areas where the public might come into contact with the water. To make the water suitable for those purposes, it must be further refined to Type 1 effluent, which can safely be used on grass and in public settings.

Every year, this plant produces approximately 3,400 acre-feet of treated water — a massive amount of potential irrigation supply in one of the driest regions of the United States. Yet for decades, this water was discharged onto the Mud Springs property, a hardpan, clay-heavy area north of town. Some of it grew sparse grass, and most simply evaporated. In a desert climate where every drop matters, this was a lost opportunity.

I was determined to change that.

From the beginning of my administration, I pushed to capture this water, refine it, and bring it back into Cedar City where it could be used to irrigate parks, schools, public facilities, the golf course, and other green spaces. Not only would this reduce our dependence on culinary water for irrigation, but it would also preserve our deep aquifers, strengthen our long-term water security, and improve neighborhood quality of life with green spaces that help moderate heat and provide beauty and recreation.

The road to accomplishing this was not easy. The project was complex, expensive, and filled with regulatory, engineering, and funding challenges. But step by step, we moved it forward. We secured grant funding. We appropriated city funds where we could. After reviewing technologies at trade shows and through engineering

evaluations, we determined that the best approach was to install a cloth-media filtration system — capable of refining our Type 2 effluent to Type 1 standards.

We designed a new treatment building at the plant, and the project was put out to bid. Action Contracting — a company I founded 25–30 years ago, now owned and operated by my sons and another community member — submitted an excellent bid and was awarded the contract. They have done outstanding work. The building is complete, the filtration equipment is installed, and the final plumbing is now underway. The facility will be finished within the next month or two, finally allowing Cedar City to produce Type 1 effluent water.

The next phase is critical. We must now construct a pump station and a pipeline — roughly seven to eight miles in length — to deliver this water back to Cedar City. Once connected to the existing secondary water system, this supply can irrigate our schools, university, golf course, cemetery, public parks, churches, and other green spaces. This will allow us to replace a significant portion of the pristine culinary water currently used for irrigation, preserving it for indoor use and ensuring long-term sustainability in a time of shrinking groundwater resources.

I am deeply grateful to the construction workers at the wastewater treatment plant, to the city staff, and especially to our city engineers, including Jonathan Stathis, for their diligence and vision in pushing this project forward. And I am proud that we accomplished the first phase without issuing bonds.

The remaining work — building the pump station and pipeline — will be costly. It will likely require a combination of grants, loans, or bonding. But it must not be delayed. Cedar City should begin using its reclaimed water as soon as possible. It is time to stop wasting 3,400 acre-feet of water each year and put it to work for our community.

This project is essential for Cedar City's future, and I strongly urge future administrations to carry it forward without hesitation.

Section 7 — Water: The East, the North, and the West

Water is the lifeblood of Cedar City. Because we live in a closed basin, with no river flowing in and no river flowing out, we must live on what God blesses us with. Every decision we make today about water will determine whether our children and grandchildren can remain in this valley tomorrow. For that reason, the most significant focus of my administration — from its first day to its last — has been water.

I divide this section into three parts:

1. The East — Cedar Canyon
2. The North — Rush Lake and the Northern Drainages
3. The West — Quichapa, pumping fields, and long-term stabilization

Part One: The East — Cedar Canyon

Cedar Canyon is the single largest natural source of water flowing into Basin 73. On the water map attached to this report, you can clearly see the major drainages that feed our valley. The eastern drainage, running from the high plateaus near Cedar Breaks, produces one of the strongest, most reliable water sources available to us. Snow melts on the cliffs, sinks into the rock layers, and emerges as springs and as Coal Creek itself. Coal Creek then flows down through our canyon and into the valley, where it eventually ends either north toward Rush Lake or west toward Quichapa.

For decades, Cedar City has pumped nearly all of its culinary supply from wells far to the west in Quichapa, and two additional wells near Enoch that come from the north east drainage. Meanwhile, the great eastern drainage from Cedar Canyon has remained largely untapped, except for the well fields at Cluff Springs and right hand canyon. Those springs produce anywhere from 800 to 1,200 gallons per minute, depending on the year and the snowpack. That water is clean, cold, and among the best quality water in the state.

The Threat to the Springs

Unfortunately, the State of Utah has notified us that all Springs will require additional treatment if we intend to continue using it for culinary supply. We already chlorinate the water, and the quality is excellent, but new regulations require a second form of purification. Through extensive engineering and pilot studies, we have determined that cartridge filtration is the best solution. But the cost will be very high.

This forced us to rethink our approach. It became clear that before investing ten million into a spring treatment plant, we needed to secure additional sources of canyon water that could help fill our existing 8-inch and 10-inch pipeline that already comes down Cedar Canyon.

The Cedar Canyon Pipeline

Cedar City owns a pipeline that begins near Cluff Springs and the Old Iron Mine in the upper canyon. It starts as an 8-inch line from the upper reaches down to Right-Hand Canyon. From there, it becomes a 10-inch line that continues into the city. That pipeline can carry a significant amount of water — far more than the springs alone currently provide.

Several months ago, I made the decision that instead of rushing immediately into constructing an expensive new treatment plant for the springs, our first priority should be to fill that pipeline with clean water from a new well at Martin's Flat.

The Martin's Flat Well

Our engineers informed us that there was excellent water at approximately 800 feet, and we drilled to that depth. The water we encountered met state standards. But it became clear that the true long-term opportunity lies in reaching the Navajo Sandstone, a formation that produces some of the best water in the western United States.

We therefore revised the plan and began drilling deeper. As of this writing, the Martin's Flat well is being drilled toward a total depth of 2,100 feet, with the goal of entering the Navajo Sandstone and securing a major new source of high-quality culinary water. If successful, this well alone could replace the water we currently receive from the threatened springs — and possibly much much more.

A Vision for the Canyon

My vision is clear:

1. Drill the Martin's Flat well into the Navajo Sandstone and secure enough water to replace the spring water temporarily.
2. Build a new treatment plant that can filter not only spring water but also Coal Creek water itself.
3. Construct a new, larger pipeline down Cedar Canyon capable of carrying:
 - the spring water
 - the well water
 - the nearly 2 cubic feet per second of Cedar City's grandfathered Coal Creek rights
4. Use elevation drop to push this water directly to the Square Mountain Tank without pumping.
5. Create a unified eastern supply system large enough to partially sustain Cedar City for generations.

Coal Creek water is excellent roughly 90% of the time. When heavy rains or floods hit, it becomes too muddy to use. With a proper filtration plant and a massive diversion gate, Cedar City could allow the clear water to enter the treatment system, and the flood water to bypass directly into Quichapa and Mud Springs.

This would unlock the greatest unused water asset in Basin 73: the creek that flows right through our canyon.

That is the vision for the East. And it is achievable.

Part Two: The North — Rush Lake and the Northern Drainages

The second major water opportunity for Cedar City lies to the north. While Cedar Canyon feeds the eastern side of Basin 73, the northern drainage is nearly as significant, contributing roughly 21% of all water entering our closed basin.

This drainage begins far north — clear up toward Beaver — and includes:

- Brampett's Creek
- The Black Hills region
- Broad areas of basalt flows and lava tubes
- Multiple tributaries that all slope southward

Everything drains toward one place:

Rush Lake — the Bottom of the Bathtub

Rush Lake is the lowest point in Basin 73. It is the natural collection basin for all northern inflow and part of the eastern inflow. Because of its geology — lava tubes, basalt layers, fractured rock — the water quality around Rush Lake is exceptional.

I cannot overstate the importance of Rush Lake. It is the most strategic long-term water source in our valley.

Cedar City, being by far the largest community in the basin, with the largest population and the strongest financial ability, must secure water from Rush Lake and bring it to town. It is only 10 miles away — close enough to supply us for the next decade and beyond if the right infrastructure is built.

Cedar City's Northern Efforts

Section 7 —

The city has already pursued water in the north. We have drilled several wells over the past years — some successful, others not — and we have learned a great deal about the geology and the flow patterns that govern this part of Basin 73. Even so, the northern drainage remains underdeveloped, and its long-term value cannot be ignored.

The Rush Lake Ranches Opportunity

The single greatest opportunity in the north lies with the Rush Lake ranches, where landowners are now drilling a major well at the lowest point of the basin, right in the “bottom of the bathtub.” This location is important for two reasons:

1. It is immediately adjacent to the large lava tube system that underlies much of the Rush Lake region.
2. Decades of agricultural irrigation have helped maintain water levels in this pocket of the basin, making it one of the most productive and reliable sources in our valley.

The ranch owners have already sold Cedar City a substantial amount of high-quality water rights — some of the most valuable rights available in the entire basin. Their intention now is to sell the city:

- The well itself once it is completed and producing at full capacity,
- An acre of land surrounding the well,
- And the legal right to export that water from their property and deliver it to Cedar City.

If this comes to pass — and I believe it can — it will provide Cedar City with access to an extraordinary volume of clean, stable water from one of the best geological formations in the entire region. The water quality at Rush Lake is exceptional, likely second only to the very best water that can be obtained from Quichapa or, at certain times, from Cedar Canyon.

A Win-Win Potential

From the ranchers' perspective, this arrangement also benefits them. Their plan is to drill, develop, and sell a high-producing well for municipal use, and then locate lower-quality water — water perhaps with slightly higher arsenic or mineral levels, unsuitable for drinking — to irrigate their crops. That is a perfectly reasonable arrangement and is common in agricultural regions throughout the West. It allows the city to purchase the premium water while leaving the lower-quality water for agricultural irrigation.

The Scale of the Northern Drainage

When you look at the attached map, the numbers tell the story very clearly:

- 24% of our basin's recharge comes from the dominant northern drainage.
- 10% comes from the Brapett's Creek area, which is part of the same system.

Combined, 34% of all the water that enters Basin 73 flows from the north — and the vast majority of that ultimately converges at Rush Lake.

Add to that the eastern flows from Cedar Canyon that pass beyond our capture systems, and you can see immediately why Rush Lake is the most strategic location in the entire basin for the development of long-term culinary water.

In short:

Rush Lake is the best large-scale water opportunity Cedar City has — perhaps rivaled only by the full development of Cedar Canyon.

We must take this opportunity seriously and act decisively when the moment is right.

Section 7 — Water: Part Three (The West)

The western opportunity for Cedar City's future water supply is both promising and complicated. It begins several years ago, shortly after I became mayor, when I had the chance to purchase a significant block of water rights located not in our basin, but in Basin 71, the basin immediately west of Cedar City. That acquisition brought Cedar City 1,000 acre-feet of high-quality water — a substantial amount — even though the water itself lies outside the boundaries of Basin 73.

Basin 71 is a large agricultural region. The water there is excellent, clean, and plentiful, and for decades farmers have drawn from it to irrigate crops. Importantly, the distance from that water source to Cedar City's existing infrastructure is not as great as some people might imagine. With careful planning, it can be imported and used by our residents.

The Conservancy District's Western Pipeline

The Central Iron County Water Conservancy District (CICWCD) has been working in the western valley for years. They constructed a major pipeline that delivers water to a mine west of Cedar City, and along the way they have secured

360 acre-feet of Basin 71 water rights of their own. Their plan is fully compatible with ours:

1. Drill a high-production well west of Cedar City, near the WECO (azide) plant.
2. Pump Basin 71 water into their pipeline.
3. Combine their 360 acre-feet with our 1,000 acre-feet purchased earlier.
4. Deliver the total to a new 4-million-gallon storage tank the district has built west of town.
5. From there, import it into Cedar City's culinary system.

This arrangement benefits both the Conservancy District and Cedar City. It allows us to bring in new outside water — legally owned, fully appropriated, and ready for municipal use — without having to build the pipeline or pay for the large storage tank. Cedar City will be able to put its Basin 71 water directly into that system and drink it. That is a major achievement.

The Limitation: Volume Versus Capacity

But there is an important caveat that the community needs to understand clearly.

Even if Cedar City pumps every drop of the 1,000 acre-feet we own in Basin 71 — full-time, year-round — the total amount of water moving through the system would be less than 500 gallons per minute.

That is not much water when compared to our needs.

To put it plainly:

- A three-inch pipeline could carry all of our Basin 71 water rights.
- Yet the Conservancy District's western pipeline is 18 inches in diameter.

This means that while the west-side importation project is very good, cost-effective, and beneficial for Cedar City, it is not large enough on its own to solve our long-term water needs. It is only one part of a much larger portfolio we must continue to build.

The Need to Acquire More Western Water

Because of the relatively small amount of Basin 71 water Cedar City currently owns, it is absolutely critical that we take every opportunity to acquire more if it becomes available.

Any Basin 71 water rights that become available in the future must be taken seriously. We should purchase every viable block we can, bring it out of the well the district plans to drill, and put it into the Conservancy District's western pipeline. That is how we maximize the value of the infrastructure already in place.

A Good Deal — And Part of a Larger Vision

The west-side project is a good deal for Cedar City. Consider:

- We do not have to build the pipeline.
- We do not have to build the 4-million-gallon tank.
- The district will not charge us to put our water in their tank.
- We can run our water through their well, their pipeline, and their tank at minimal cost.
- And the system will be connected to Cedar City's network in the near future anyway, strengthening reliability for the entire valley.

All of that is a tremendous advantage for Cedar City.

But we must be clear-eyed: the west-side importation system will only be as valuable as the volume of water we are able to put into it. With only 1,000 acre-feet, we are underutilizing an 18-inch pipeline. With more water — far more — the west could become a major artery supporting Cedar City's growth and stability for generations.

Section 8 — 375 PSI Is Too High: Fixing Cedar City's Over-Pressurized Water System

When I campaigned for mayor, I did so with a very direct message about one of the structural flaws in Cedar City's water system. I summed it up in five words:

"375 PSI is too high."

For decades — since the 1960s — Cedar City has operated its water system in a way that forces us to pump water from the very bottom of the Quichapa well field all the way to the highest tank above Walmart, nearly 900 feet in elevation. That enormous elevation climb requires massive pumps. The well pumps at Quichapa run at 600 horsepower and must generate nearly 375 pounds of pressure just to get the water up the hill.

This design has always been unreasonable, inefficient, and unsustainable. And yet it has been allowed to continue for generations because it "worked" — even though it worked at too high a cost and too much strain on the system.

A New Problem Arrived: Mandatory Chlorination

The real crisis came when the State of Utah finally stepped in and required Cedar City to chlorinate all municipal water, including the water that comes from the Quichapa wells. But there is a major problem:

There is no chlorination system anywhere capable of injecting chlorine into water at 375 psi.

No manufacturer makes such a device. No system exists that can safely or reliably do it.

If we continue to run our system this way, we will not be able to chlorinate our water. And if we cannot chlorinate, the State will issue fines, impose boil orders, potentially condemn our system, and put Cedar City in direct violation of state law.

The Only Solution: Booster Stations

The long-term fix has always been the same: break up the excessive pressure with properly placed booster pump stations.

These stations reduce pressure to manageable levels, allow for proper chlorination, and bring our system into modern compliance.

Cost Estimates and the Reality We Face

The city has been working with an engineering firm from Salt Lake City to design a full solution. Their proposal would fix the problem — but at a projected cost of \$17 million.

Cedar City does not have \$17 million available while also drilling at Martins Flat, developing Rush Lake, importing Basin 71 water from the west, building new pipelines from the wastewater treatment plant, expanding our secondary water system, and constructing new tanks and transmission lines.

A More Practical Approach

Having spent 35 years in the pipe, valve, and fitting industry, and after working closely with a local engineering firm that also serves the Conservancy District, I am convinced that we can solve this problem for closer to \$10 million rather than \$17 million.

But even at \$10 million, the cost is significant. The city will need to find or raise these funds, and we will need to prioritize this project immediately. The booster system is not optional.

This Must Be One of Cedar City's Highest Priorities

While we continue to explore Martins Flat, pursue Rush Lake, and import water from the West Desert, we cannot neglect the water system we already have. The Quichapa well field is critically important, and the water from those wells must meet state chlorination standards.

To do that, we must reduce the pressure in our transmission line, install booster stations, and finally bring Cedar City's infrastructure into the 21st century.

This is not merely a project of convenience. It is a project of necessity, and it must begin now.

Section 9 — Purchasing Water Rights: The Most Critical Accomplishment of My Administration

When I first took office, Cedar City was facing a frightening reality. The State of Utah had finalized the Groundwater Management Plan for our aquifer — a plan that declared what many of us had feared but few wanted to admit. The state announced that it had issued 51,000 acre-feet of water rights in Basin 73, but that after careful study, they discovered the basin only produced 21,000 acre-feet of real water.

Their solution was harsh but unavoidable:

Over the next 50 years, the State would systematically cancel water rights until the total usage matched the sustainable yield. The first major cuts would begin in 2035.

When Cedar City analyzed its own water portfolio, we discovered something even more alarming:

- Out of 20,000+ acre-feet of water rights the city held on paper,
- Only 2,000 acre-feet were safe-yield, senior, pre-1934s water rights that would survive the long-term cuts.
- And yet our current demand is 8,000 to 9,000 acre-feet per year just to serve our residents.

We were living on borrowed water. And the clock was ticking.

Immediate Action: Conservation and Policy Reform

We implemented strong conservation measures, required developers to bring water or buy the right to use city-controlled water at a high price, and put meaningful controls on new construction. Those steps helped. But conservation alone would not save Cedar City.

We needed more old water rights — safe-yield water — and lots of it.

Truthfully, when I campaigned I never intended to become a water-rights negotiator. I did not foresee this challenge. But during my first months in office, the opportunity came — suddenly and unexpectedly — and I had to act.

The Holt Farms Purchase — 1,000 Acre-Feet

Through long-standing relationships in the West Desert, I was introduced to an opportunity with a major agricultural operation in the Beryl Valley (Basin 71). They offered Cedar City 1,000 acre-feet of water rights — extremely valuable, senior, and high-quality — at a price below market.

The market value at the time was around \$15,000 per acre-foot.

I was able to secure the purchase for \$12,800 per acre-foot. This became the first major acquisition.

The Rush Lake Purchase — 960 Acre-Feet of the Famous Benson Right

Soon after, another major opportunity arrived — completely unexpected.

The ranchers at Rush Lake were ready to sell 960 acre-feet of pristine old water, including some of the oldest and best water rights in the entire basin — dating back to the 1860s. This was the Benson right.

Again the asking price was favorable — \$12,000 per acre-foot — and again, the market value was closer to \$15,000. We moved quickly, the city had cash available, and we were able to close the deal.

This was a watershed moment for Cedar City.

The Hardin Purchase — 540 Acre-Feet

Then it happened again.

The Hardin family, needing to settle an estate, approached us with another senior block of water rights — roughly 540 acre-feet — and they needed a fast sale. They offered it for \$10,000 per acre-foot, well below true market value.

We purchased the entire amount.

Other Minor Purchases and Total Acquired

Through several additional smaller transactions, we acquired enough to bring the grand total to nearly 3,000 acre-feet of safe-yield water — the single largest increase in secure, senior water in the history of Cedar City.

This increased the city's safe-yield water ownership from roughly 2,000 acre-feet to more than 5,000 acre-feet.

When combined with:

- Our spring water
- Our coming production from the wastewater treatment plant
- And our future wells in Cedar Canyon, the North, and the West

Cedar City is in a far better position today than it was when I took office.

The Financial Side

In total, we purchased about \$35 million worth of water rights.

We financed roughly \$18 million (about half), and we must continue paying that off wisely.

Meanwhile, our Water Acquisition Fee — paid by developers who do not bring their own water — brings in \$1 million to \$1.5 million every year. This money must always remain in a protected account, dedicated solely for future water purchases.

Why This Matters

Cedar City can find water. We can drill it in the canyon, the north, the west, and everywhere in between. We have water in the ground.

But if we do not legally own the rights, we cannot pump it.

Acquiring safe-yield water rights is the only way to secure Cedar City's long-term future.

My Final Word on Water Rights

Without question, the most significant accomplishment of my administration has been the acquisition of these nearly 3,000 acre-feet of senior, safe-yield water rights.

These purchases will safeguard Cedar City for decades — long after pipelines are built, wells are drilled, and booster stations are installed.

They will stand as a cornerstone of Cedar City's security, prosperity, and future growth.

Conclusion — A Final Word to the Citizens of Cedar City

As I bring this report to a close, I am struck by how much has happened in just four short years. When I began this journey, I made several very specific commitments to the citizens of Cedar City. I said I would focus on roads, parks, gyms, grocery stores, children's literacy, wastewater reuse, and—above all—water security.

These were not small promises, and the work that followed was not small either. But as you can see throughout these pages, we tackled each of those commitments head-on. Some projects are fully completed, others are under construction, and a few will continue under future administrations. But every one of them has moved forward in meaningful and lasting ways.

We built new parks.

We advanced roads that had stalled for decades.

We secured grocery stores that people said would never come.

We created opportunities for our children to read, learn, and laugh—one banana split at a time.

We reclaimed water that was being evaporated away, and we began building systems that will serve Cedar City for generations.

We drilled wells, built pipelines, and pursued water in every part of Basin 73.

And we bought the most valuable asset of all—nearly 3,000 acre-feet of senior, safe-yield water rights, securing Cedar City's future in a way that may never be replicated.

But as important as these accomplishments are, they represent only a portion of what has been done. I could fill another report entirely with the rest:

- The new hold room at the airport

- Major improvements to storm drainage
- Enhancements to our public facilities
- Additions to the equestrian Center and the Arena
- Growth in our business community
- Improvements to public safety
- Countless small but meaningful upgrades in nearly every department

Truly, the list goes on and on.

And at some point—likely about 4:30 this morning—both the mayor and ChatGPT finally ran out of energy and agreed it was time to sleep. But the work itself did not sleep. It continued day after day for four years, and the results are now part of the city I love.

This report contains the core of what I promised the citizens of Cedar City when I first asked for their trust. It contains what I said I would do—and what I have done. I am grateful for the chance to put it on the public record tonight. Next week, I will simply say goodbye and step aside for new leadership.

Thank you for your attention.

Thank you for your patience.

And thank you, especially, for allowing me the privilege of serving as your mayor. It has been a wonderful four years.

We Seek a Secure Water Future Without Sacrificing Our Ag Heritage

CEDAR CITY COUNCIL

AGENDA ITEM - 9

TO: Mayor and City Council
FROM: City Attorney
DATE: December 8, 2025
SUBJECT: Ordinance shifting the installation and warranty of most sidewalks from subdivision to building process

DISCUSSION:

The discussion last week included reference to state law requiring cities to give at least 18 months before attempting to pull a bond on incomplete sidewalks. This restriction can be found in Utah Code § 10-20-1001. I quote the relevant subsections below, but in short, the statute prohibits us from denying a building permit for single- and two-family homes and townhomes for lack of a completed sidewalk if a bond has been posted covering the sidewalk and requires us to give at least 18 months after the bond is posted before we can pull it for lack of a proper sidewalk being installed.

I understand the Council discussion included the possibility of a 3-year bonding period. I talked to a commercial loan officer at the State Bank of Southern Utah today to determine the feasibility of a 3-year letter of credit (LOC). I was informed they "could facilitate that." Their fee structure is 1% of the LOC per year, so a 3-year LOC would be 3% of the amount of the bond. Presumably, other bonding/LOC providers could do the same, although rates will vary.

Please also note that the statute allows for a separate bond/LOC for the sidewalk, which means you could keep a shorter timeframe for most public improvements – even the same 12-month requirement in ordinance currently, while extending the sidewalk timeframe to anything 18-months or more. The bonding/LOC cost would then be reduced because only the sidewalk would require the 3-year level of fees.

Here are the relevant subsections in § 10-20-1001. Note that anywhere the statute refers to "an improvement completion assurance," it is referring to the performance bond/LOC.

- (5) *A municipality may not withhold a building permit based on the lack of completion of a portion of a public sidewalk to be constructed within a public right-of-way serving a lot where a single-family or two-family residence or town home is proposed in a building permit application if an improvement completion assurance has been posted for the incomplete portion of the public sidewalk.*
- (6) *A municipality may not prohibit the construction of a single-family or two-family residence or town home, withhold recording a plat, or withhold acceptance of a public landscaping improvement, as defined in Section 10-20-807, or an*

infrastructure improvement based on the lack of installation of a public sidewalk if an improvement completion assurance has been posted for the public sidewalk.

- (7) **A municipality may not redeem an improvement completion assurance securing the installation of a public sidewalk sooner than 18 months after the date the improvement completion assurance is posted.**

- (8) A municipality shall allow an applicant to post an improvement completion assurance for a public sidewalk separate from an improvement completion assurance for:

(a) another infrastructure improvement; or

(b) a public landscaping improvement, as defined in Section 10-20-807.

- (9) A municipality may withhold a certificate of occupancy for a single-family or two-family residence or town home until the portion of the public sidewalk to be constructed within a public right-of-way and located immediately adjacent to the single-family or two-family residence or town home is completed and accepted by the municipality.

**CEDAR CITY
CITY COUNCIL AGENDA ITEM 19
STAFF INFORMATION SHEET**

To: Mayor and City Council

From: Jonathan Stathis

Council Meeting Date: December 10, 2025

Subject: **Consider amendments to the deferral agreements on 100 East Street for Southwest Plumbing Supply and American Preparatory Academy (APA) School.**

Discussion: City staff has prepared an updated cost spreadsheet based on the actual bid amounts. Using the unit costs submitted by the low bidder, Inntelex, for the 100 East project, the actual costs that will be required for the property owner's frontage improvements are \$72,489.75 as shown on the attached spreadsheet.

The following are the options for the City Council's consideration:

1. Approve the Amendments to the Deferral Agreements: This option would approve the amendments to the deferral agreements as proposed last week for in-kind work and materials provided by the property owner. This option provides a total value to Cedar City of \$109,851.99 and will allow the project to be constructed in a continuous manner according to the bids that have been received for the 100 East project.
2. Deny the Amendments to the Deferral Agreements: This option would require the terms of the original agreements to be followed. This would allow the property owner to choose whether to make a cash payment to Cedar City in the amount of \$72,489.75, or install their portion of the improvements within 30 days of the City installing their improvements.

In discussions with the property owner, they are willing to make a cash payment to Cedar City in the amount of \$72,489.75 if the deferral amendments are denied. This cash payment would cover the costs of the frontage improvements for Southwest Plumbing Supply and the APA School. By accepting the cash payment, Cedar City will then need to bid out the water and sewer pipe materials separately. Also, the concrete sidewalk would either need to be bid out separately,

or a change order would need to be negotiated with the selected contractor to add the sidewalk into their contract.

A revised cost estimate for the frontage improvements based on actual bid amounts has been prepared by City Staff. The spreadsheets for Option 1 and Option 2 are included with this Information Sheet.

RECOMMENDATION: City Staff recommends moving forward with Option 1 which will approve the amendments to the deferral agreements. Option 1 provides greater monetary value to the City. In addition, Option 1 will allow the City to move forward with the bids that were received for the project without having to re-bid items.

Please consider approval of the amendments to the deferral agreements (or take other action deemed appropriate). Thank you for your consideration.

Option 1: Cost for Frontage Improvements for Green Properties Adjacent to 100 East Per Cost Estimate

Description	Units	APA School Frontage	Southwest Plumbing Fro	Combined	Unit Cost	Total
