The USACE issues PGP 10 permits to streamline the authorization process for minor activities that have minimal individual and cumulative adverse effects. These activities are subject to Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act and are authorized in conjunction with the State of Utah's Stream Alteration Program. Typical activities to be authorized under this PGP include, but are not limited to, culvert installation and extension, bridges, low water crossings, utility crossings, bank stabilization, linear transportation projects, diversion structures, outfall structures, boat ramps, docks, commercial and residential construction, flood control facilities, and maintenance of previously permitted activities. The USACE proposes to reauthorize the PGP with modifications, including alterations to 14 terms, minor changes to 7 conditions, and expanded coverage for authorized activities.
