TO WILLARD CITY COUNCIL:

As a property owner of some of the property being considered in the annexation plan in to Perry City, I am not in flavor of my property being included in this annexation.

My property, along with part of the other property being considered was annexed from Perry to Willard in the early 1990's. This was accepted at that time and I would like it to remain in Willard Cities jurisdiction with the rest of my property that is congruent to it.

I feel this annexation can possibly benefit Perry City and the developers, with no benefit to Willard City or my self. If water and sewer for development is wanted , then it needs to be paid by those requesting it.

In this day and age I don't understand allowing a transaction like this take place with out a favor or compensation for the land. Again I see no benefit to Willard City.

Lastly, being down stream from potential development, I am concerned about storm water drains directing more water and contaminates my way since Perry has already installed a 20 inch drain pipe heading my direction in Willard City limits.

Thank you for your time and efforts for Willard City.

Fred Barker
