**DESCRIPTION OF FACILITY**

The Beryl Junction EcoDrum Treatment Facility (Facility) collected sanitary waste from sawdust toilets used at backcountry endurance events and composted it using an EcoDrum unit (an in-vessel composting system). The compost would then be land-applied on agricultural land.

On December 1, 2025, the Division of Water Quality (DWQ) received a request to terminate the permit. According to the request, they closed the operation in 2022 and no longer process or land apply any biosolids. As such, a Permit is no longer necessary; therefore, the DWQ Director intends to terminate the Permit.
