GWSSA FULL BOARD AND DISTRICT MEETINGS

**GRAND WATER & SEWER SERVICE AGENCY, SPANISH VALLEY WATER & SEWER
IMPROVEMENT DISTRICT, GRAND COUNTY WATER CONSERVANCY DISTRICT, AND
THE GRAND COUNTY SPECIAL SERVICE WATER DISTRICT**

3025 E. SPANISH TRAIL ROAD, MOAB, UTAH

THURSDAY DECEMBER 18TH, 2025 – 7:00 P.M.

THE GRAND WATER AND SEWER SERVICE AGENCY

The Meeting was called to order by President Gary Wilson at 7:11 PM. In attendance were Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Not in attendance were Dan Pyatt, Luke Wojciechowski, Ben Wilson, Preston Paxman, Rick Thompson.

Also in attendance were GWSSA Employees: Agency Manager Ben Musselman and ARO Josh Green.

Minutes for Board Meeting 11/20/2025 – MOTION to approve minutes by Mike Holyoak. SECONDED by Kevin Clyde. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Citizens to be heard – None

Approval of Checks and Expenditures 11/21/2025 to 12/18/2025 – MOTION by Kevin Clyde to approve the amount of \$240,322.78. SECONDED by Dale Weiss. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Financial Statement – Presented by Ben Musselman. 92% of the year is completed.

Browns Hill – Nothing new to report as negotiations are still ongoing. Gary Wilson requested a one-year contract rather than a five-year. Browns Hill agreed while negotiations are occurring, to keep current agreement/pricing.

Approval of Final 2025 Amended Budget and 2026 Budget – MOTION by Dale Weiss to approve the budgets as presented. SECONDED by Rani Derasary. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Approval of 2026 meeting schedule – All dates are the 3rd Thursday of each month, except for June, which will be the 3rd Wednesday to avoid conflict with a federal holiday. MOTION by Brian Martinez to approve 2026 schedule. SECONDED by Ken Helfenbein. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Lake and Snow report – The lake is slowly gaining elevation.

Resolution 2025-12-18-a: A RESOLUTION OF THE GRAND WATER & SEWER SERVICE AGENCY TO ENACT A DATA PRIVACY PROGRAM PURSUANT TO THE GOVERNMENT DATA PRIVACY ACT – MOTION by Kevin Clyde to approve the resolution. SECONDED by Brian Backus. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Resolution 2025-12-18-b: A RESOLUTION OF THE GRAND WATER AND SEWER SERVICE AGENCY WHICH AUTHORIZES THE AGENCY TO PURSUE PARTICIPATION IN THE UDMT PROGRAM –

MOTION by Dale Weiss to approve the resolution. SECONDED by Kevin Clyde. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Items from Staff – The office remodel is mostly done. Emails have been created for all board members (excluding Grand County and Moab City liaison's). The Water Conservation Plan was accepted by the UDWR and will be in place until 2030.

Committee Reports – Gary Wilson, Steve Getz, and Kevin Clyde met to discuss the budget.

Items from Board Members – Dale Weiss would still like to do media interviews, in regard to HB 280, to inform our customers of the fees that the State is implementing for drinking water. Commission Brian Martinez notified us that the ordinance for lawn reimbursement was approved by the Commission. Brian Martinez also stated that Andrew Jackson is the new Zoning Administrator. He has two priorities, one of which is the update of the land use code, including the water element of the General Plan. Jackson will be required to work with the water agencies. Mike Duncan let the board know that he is moving, and let them know it might be better to find someone who can devote more time. He said he's leaving June 1st, and said he'd retain his seat until then if the board wanted him to.

Future Agenda Items Request – Would like to ask the new Grand County Zoning Administrator Andrew Jackson to meet with us to discuss the water portion of the General Plan.

Closed Meeting – 504.2.205.(1)(d)(i) – “Strategy session to discuss the purchase, exchange, or lease of property”. At 7:48 PM a MOTION by Brian Martinez was made to enter closed session. SECONDED by Steve Getz. MOTION CARRIES UNANIMOUSLY with over 2/3 vote, which allows Closed Session. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Closed Session ended at 8:27 PM, with a MOTION by Rani Derasary, which was SECONDED by Brian Backus. The MOTION CARRIED UNANIMOUSLY; In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

Discussion and Action for the hiring of a consultant for the feasibility of acquisition – MOTION to hire consultant for feasibility of acquisition for one month by Mike Holyoak. SECONDED by Brian Backus. MOTION CARRIES 8-2. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, and Dale Weiss. Opposed were Mike Duncan and Rani Derasary.

Adjournment – MOTION to adjourn the meeting by Mike Holyoak at 8:31 PM. SECONDED by Brian Backus. MOTION CARRIES UNANIMOUSLY. In favor were Gary Wilson, Brian Martinez, Ken Helfenbein, Brian Backus, Kevin Clyde, Mike Holyoak, Steve Getz, Rani Derasary, Mike Duncan, and Dale Weiss.

ATTEST:

GARY WILSON, PRESIDENT

BEN MUSSELMAN, AGENCY MANAGER

PENDING APPROVAL

RESOLUTION 2026-01-15-a

A RESOLUTION OF THE GRAND WATER & SEWER SERVICE AGENCY ADOPTING A POLICY FOR CITIZEN WRITTEN SUBMISSIONS TO BE READ INTO MEETING MINUTES

WHEREAS, the Grand Water and Sewer Service Agency (“the Agency”) is committed to promoting transparency, encouraging public participation, and ensuring that all input is received in an orderly and respectful manner; and

WHEREAS, the Agency recognizes that citizens may wish to submit written statements to be read into the official meeting minutes when they are unable to attend or when written communication is otherwise preferred; and

WHEREAS, the Board finds it necessary to establish clear and consistent guidelines to ensure such submissions are relevant, appropriate, and aligned with the mission and responsibilities of the Grand Water and Sewer Service Agency;

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE GRAND WATER AND SEWER SERVICE AGENCY that the Board hereby accepts and adopts the newly created “Submission of Citizen Writings for Inclusion in Meeting Minutes” (EXHIBIT A) as official Agency policy. These rules shall go into effect immediately upon adoption of this Resolution.

NOW, THEREFORE, BE IT RESOLVED by the Grand Water & Sewer Service Agency that:

1. The board hereby accepts and adopts the newly created “Submission of Citizen Writings for Inclusion in Meeting Minutes” (EXHIBIT A) as official Agency policy.
2. These rules shall go into effect immediately upon adoption.

Adopted by the Grand Water and Sewer Service Agency January 15th, 2026, by the following vote:

Aye: _____

Nay: _____

Abstained: _____

Absent: _____

ATTEST:

GARY WILSON, PRESIDENT

BENJAMIN MUSSelman, AGENCY MANAGER

Submission of Citizen Writings for Inclusion in Meeting Minutes

1. Purpose

This policy establishes procedures for the submission, review, and inclusion of written statements from citizens in the official meeting minutes of the Grand Water & Sewer Service Agency, the Grand County Water Conservancy District, the Grand County Special Service Water District, and the Spanish Valley Water & Improvement District (Henceforth known as THE AGENCIES). The intent is to promote transparency, orderly operations, and meaningful public participation in matters relating to Agency business.

2. Policy Statement

The Agencies welcome and value written input from citizens concerning topics relevant to water service, community impact, and district governance. Submissions will be reviewed to ensure they align with the Agencies' mission, maintain civility, and support informed and constructive discussion.

3. Submission Requirements

3.1 Deadline

All written submissions must be received no later than seven (7) calendar days prior to the scheduled board meeting to allow adequate time for review, verification, and preparation by Agency staff.

3.2 Content Standards

Submitted writings must:

- a. Relate to matters within the Agencies' mission and scope of work.
- b. Be constructive in tone and intended to support productive public discussion.
- c. Be free of profanity, personal attacks, discriminatory or defamatory language, and unrelated subject matter.
- d. Include the submitting citizen's name, mailing address, phone number, and email address for verification purposes.

3.3 Review and Notification

Submissions that do not meet these standards will be rejected. The submitting citizen will be notified of the reason for rejection and may revise and resubmit prior to the submission deadline.

4. Lengthy Submissions

4.1 Definition

Any written submission exceeding 1,000 words or two (2) standard pages, whichever is shorter, shall be considered a lengthy submission under this policy.

4.2 Synopsis Requirement

Authors of lengthy submissions must provide a concise synopsis not exceeding 250 words. This synopsis will be read into the official record during the board meeting in place of the full text.

4.3 Public Record Access

The complete, final version of any lengthy submission will be retained by the Agencies as part of the official record and made publicly available:

- a. Via the Agencies' official website, and
- b. As a referenced attachment to the approved meeting minutes.

4.4 Noncompliance

Failure to include a synopsis for a lengthy submission may result in the submission being deferred for consideration at a future meeting, pending compliance with this requirement.

5. Administration

The Agencies' administrative staff shall be responsible for maintaining records of all accepted submissions, ensuring compliance with this policy, and facilitating public access to approved writings. The Agency Manager or designee shall have the authority to interpret and apply this policy as needed to preserve the integrity of the public record.

6. Effective Date

This policy shall take effect immediately upon approval by the Agencies Board and shall remain in force until amended or repealed.

RAINMAKER

La Sal UAV Operations Update

January 2025

1. Operations Summary

General weather from November 1 through December 31 trended warm. A variety of storms occurred in the region however, only two storms met the criteria for seedable conditions. Average temperatures in the region were well above normal through November and December. This creates challenges for cloud seeding operational targeting.

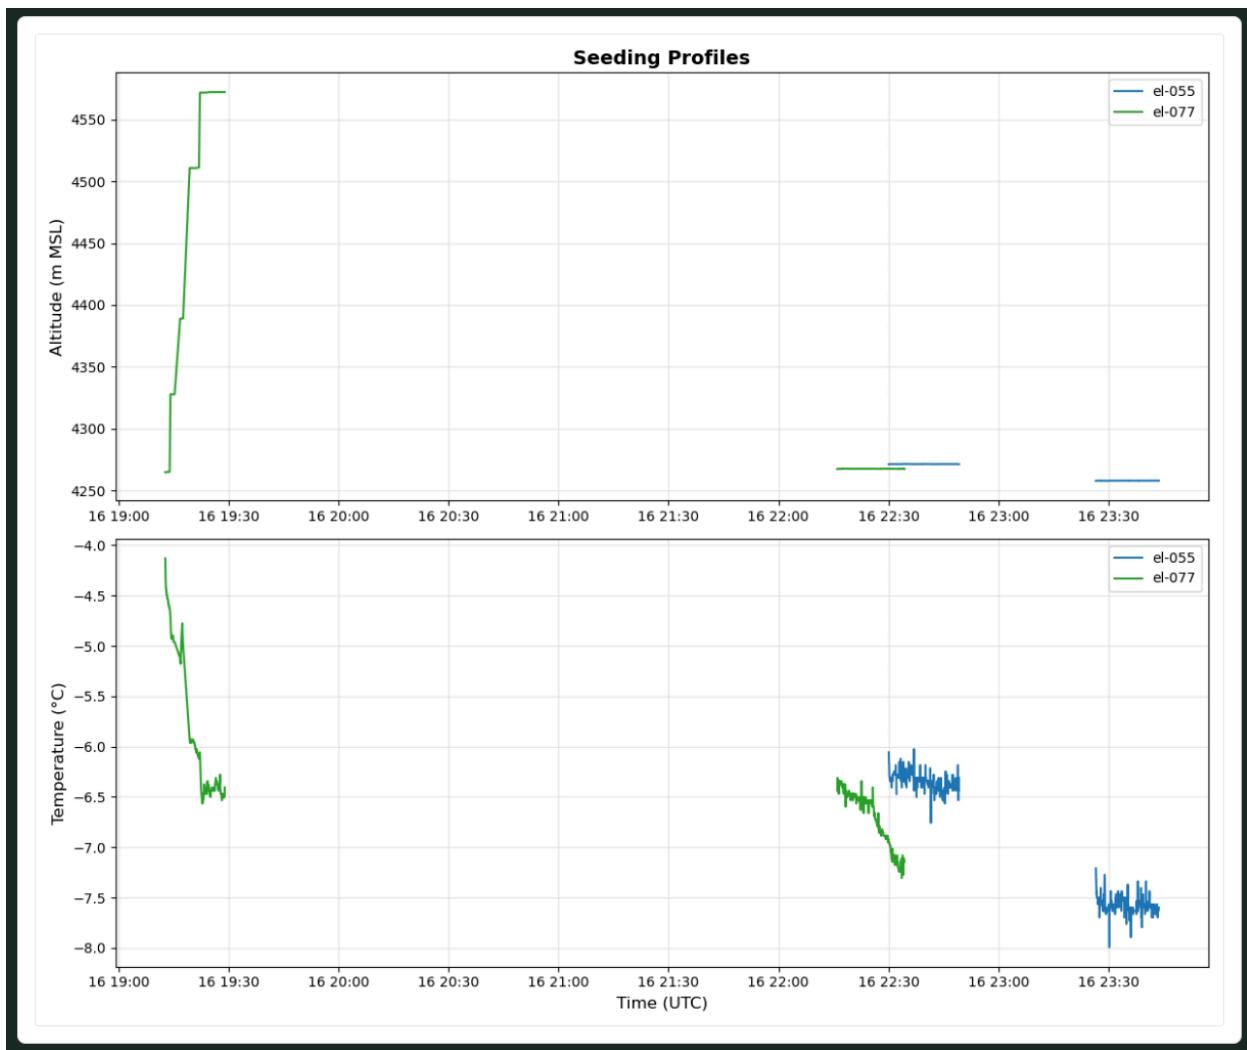

The target seeding criteria is the presence of supercooled liquid water that is -5 C or colder and in sufficient quantity to grow snow flakes if nucleation begins. Targeting storms that meet these conditions but wouldn't naturally precipitate is the ideal storm. Additionally, storms that are precipitating but are deemed inefficient are also good targets.

November 16th, 2025

Flight operations were performed between 3 pm and midnight. Target flight altitudes were around 12,000 feet. Target altitudes were achieved and AgI was dispersed in target location in cloud. Two different drones were used during operations EL-055 and EL-077

Meteorologist notes: La Sal may have to contend with period of mdt/hvy precip 21-00Z but otherwise bases 8-10 kft with -5°C at 12-13 kft and winds SW 30-35 kt (sfc winds SE to SW 10-15 kt). Winds around 00Z at -5 may hit 40-55 kt so take a break here.

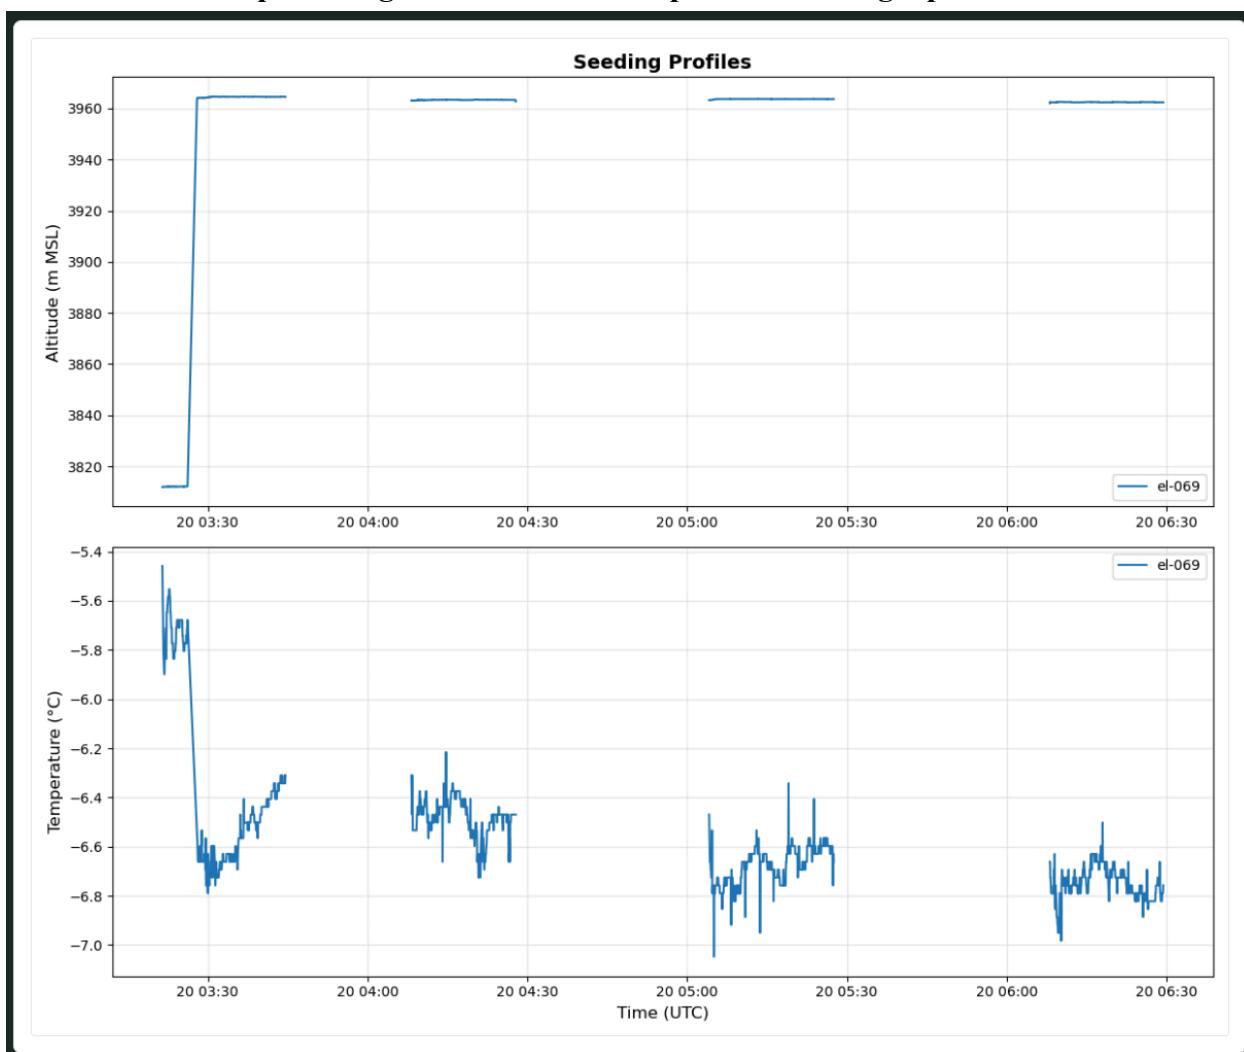

Sample of Flight Altitudes and Data During Seeding

November 19th-20th, 2025

Flight operations were performed between 2 pm of the 19th overnight to 2 am on the 20th. Target flight altitudes around 11,000 feet. Target altitudes were achieved and AgI was dispersed in cloud. Drone EL-069 was the only drone used during operations.

Meteorologists notes: LaSal: May have to contend with period of mdt/hvy precip 21-00Z but otherwise bases 8-10 kft with -5°C at 12-13 kft and winds SW 30-35 kt (sfc winds SE to SW 10-15 kt). Winds around 00Z at -5 may hit 40-55 kt so take a break here.

Revision History

Ver #	Comments	Author	Approved	Date
0.0c	Original Document Development - Draft	Jeffrey Chagnon, Scott Morris, Rutuja Dongre	N/A	12/2/25
1.0	Released for External Review	Jeffrey Chagnon, Scott Morris, Rutuja Dongre	Scott Morris	12/14/25

2 ***Executive Summary***

This report provides a preliminary review of the Weather Enhancement Technology Array (WETA) installed by Rain Enhancement Technologies (RET) on the Flat Iron Mesa, outside Moab Utah. WETA is a self-sufficient and ‘off grid’ solution installed to provide enhancement of precipitation in year-round operations – Snow and Rainfall – over the La Sal Mountain Ranges.

2.1 **Operational Summary**

1. This report contains 19 days from 11/15/25 to 12/3/25.
 - a. WETA installed and operating for 9 of those days from 11/15/25.
 - b. Precipitation Events occurred on 10 of the 19 days evaluated in this report.
 - c. No adverse weather conditions or storms occurred during this operating period
2. Early evaluation shows 3 very promising enhancement events consistent with HySPLIT modelling and WETA operation
3. Feedback from local sources is that the “storms are different and more intense” on days when WETA is operating
4. Preliminary operational evaluation shows positive signs supporting WETA having enhanced precipitation events over the target La Sal Ranges
5. Radiometrics Radiometer operating from 15th November
 - a. Power use 2 to 4 times higher than specified by Radiometrics creating power availability issues on site.
6. Incorrect protective equipment on solar array has caused limitation on peak solar performance.
 - a. Does not impact operation on overcast days, changes implemented remotely to ‘work around’ until full repair implemented.
7. Window missed for the installation of more instruments in the ranges for 2025 due to good snowpack formation limiting access.

2.2 **Actions and Improvements**

1. Establish further historic data sources against which current data sources can be evaluated. This includes working with USDA Avalanche Forecasting to access historic snowpack data to support statistical evaluation as well as existing SnowTel sites.
2. Addition of load shedding and backup generator for improved power reliability on site (planned December ‘25 and January ‘26)
3. Installation of further instrumentation in La Sal Ranges (Planned March/April 2026)
4. For each event, identification of treatment and control probabilities based on HySPLIT simulations
5. Based on those treatment probabilities, provide a preliminary estimation of treatment effect sizes in radar and gauge observations with >1 month data available.

6. Incorporation of analysis of radiometer observations.
7. WETA operations will continue to target predicted precipitation events that are not considered adverse weather conditions.

3 Operations Summary

Table 1 details the operating schedule during the reporting period. WETA was active during several precipitation episodes, as described in Section 3 of this report.

Several technical issues required attention:

- On the 16th a solar fault was identified and local support reset the fault with remote modifications made by RET.
- Energy demand from the Radiometer exceeded the 100W specified before installation by a factor of 2 (consistently) and up to 4 times when an internal heater was active.
- Energy management has been critical at Flat Iron to avoid loss of both Radiometer and WETA function as well as loss of communications from over discharge on battery bank.

Despite these issues, WETA operated for all but one precipitation event.

Table 1. Operating schedule for the WETA during the reporting period 11/15/2025 to 12/3/2025.
Periods of WETA operation are shaded green.

4 Data and Analysis

4.1 Summary of Precipitation Events

Several precipitation events occurred during the reporting period. The WETA operated during these events, except for 18-19 November, when power issues were being resolved. Figures 1 and 2 summarize the observed precipitation and snow accumulation, respectively. Three distinct active periods during WETA operations are evident as follows:

- Period 1 – 16th November to 17th November,
- Period 2 – 20th November to 21st November,
- Period 3 – 30th November to 2nd December.

Each of the above provides an opportunity to review the circumstantial evidence for precipitation enhancement. Section 4.3 highlights the evidence for enhancement during Period 1.

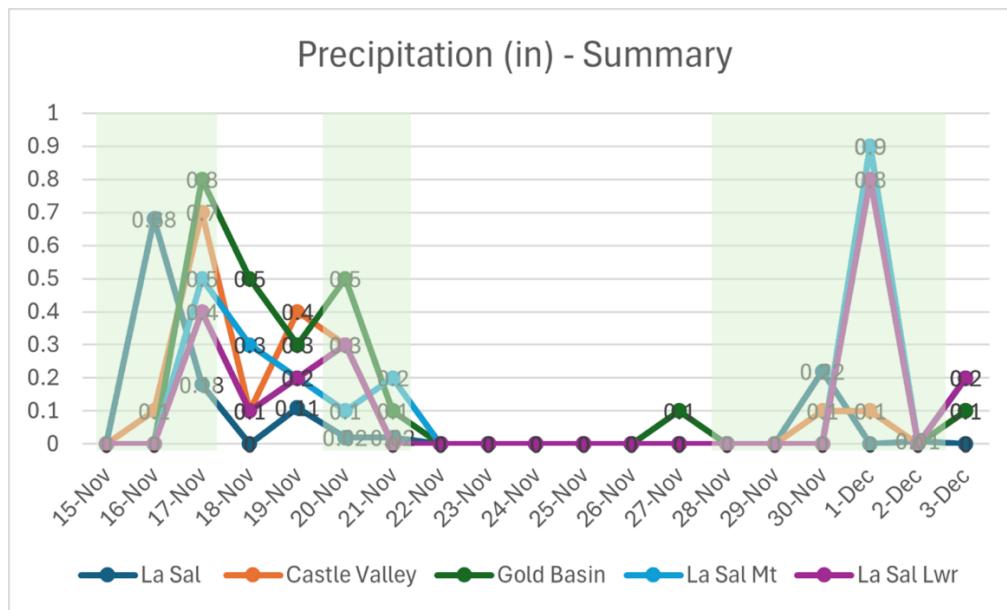

Figure 1. Daily total precipitation accumulation (in) for period 15 November to 3 December 2025. Periods of WETA operation are highlighted in green.

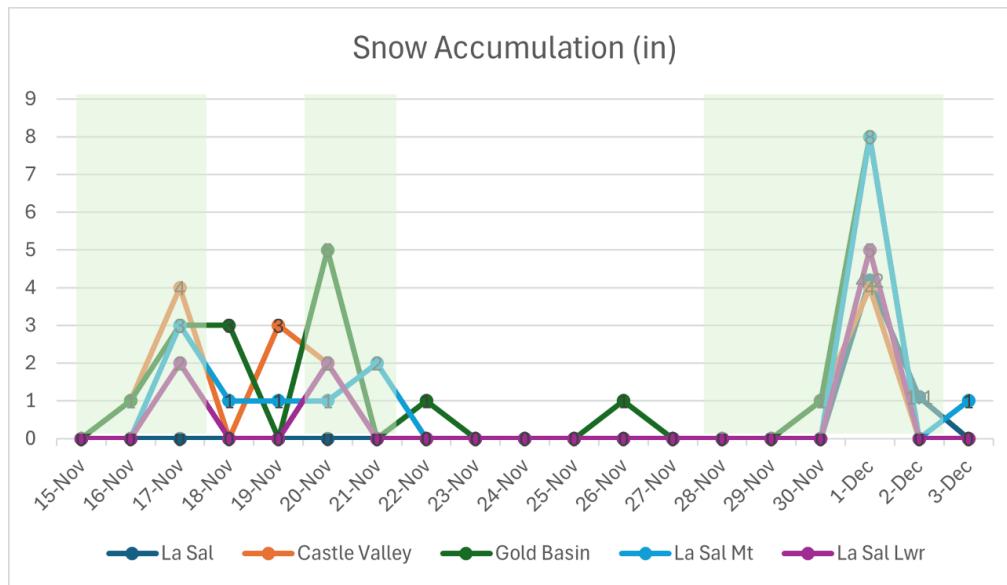

Figure 2. As in Figure 1, but for snow accumulation (in).

4.2 Evaluation of Case for Enhancement

Several rounds of showers occurred along a frontal boundary that was draped across the eastern portion of Utah (Fig 3) late on 11/16 into early 11/17. A strong signal for enhancement was evident in the analysis of radar reflectivity and precipitation accumulation.

To determine the probable movement of the ion plume, particle trajectories were simulated using NOAA's HySPLIT (Hybrid Single Particle Integrated Trajectory) model. Simulated trajectories were launched from the WETA location over a period of 6 hours, beginning at 0600 UTC and relaunched at 0900 UTC. Figure 4 presents a map showing the density of particle trajectories. The region of highest density is located to the north and east of the WETA site, while individual precipitation cells drifted to the east. Optimal enhancement was thus likely over the La Sal Mountains due to intersection with the ion plume.

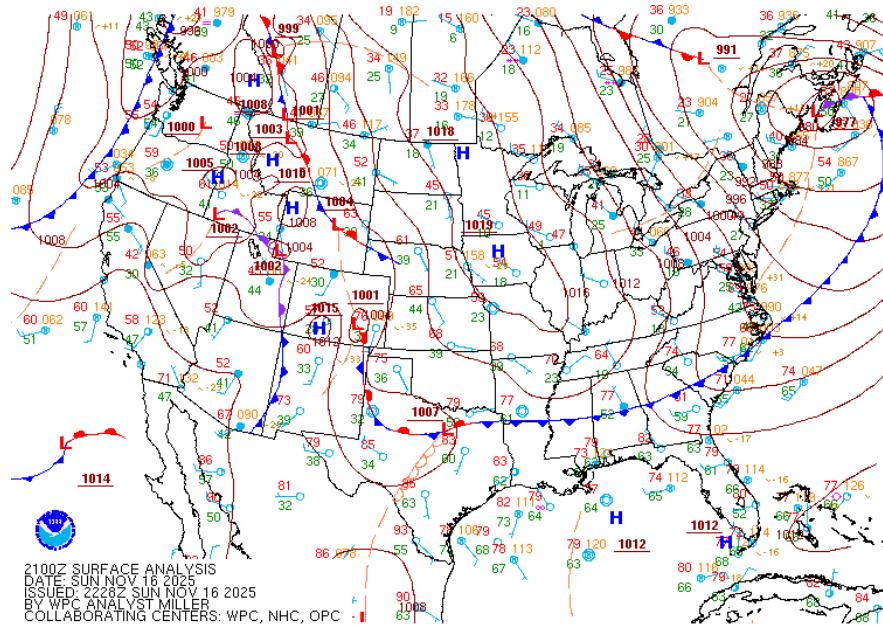

Figure 3. Surface weather analysis for 2100 UTC on 16 November 2025.

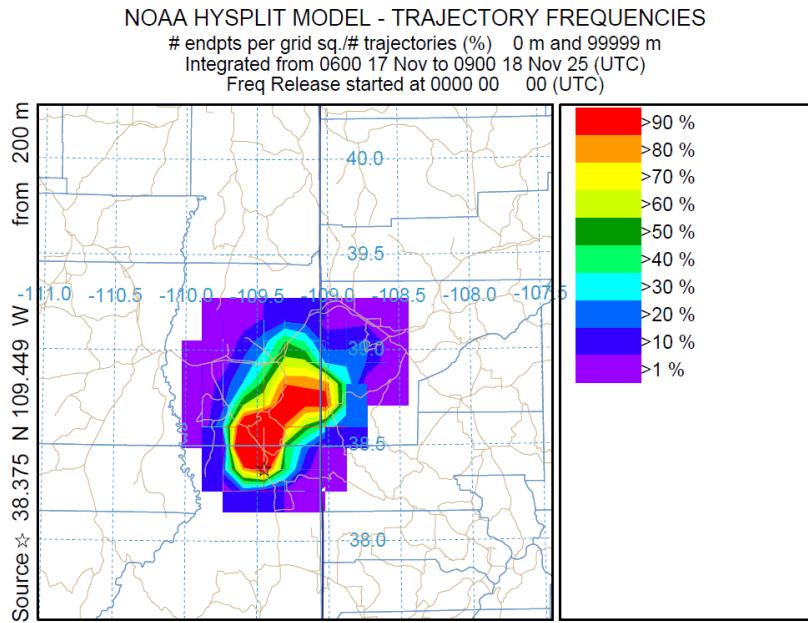

Figure 4. Frequency of HySPLIT trajectories, calculated as the proportion of trajectories located within each quarter degree grid cell, on 17 November 2025. Trajectories were launched from the WETA coordinates, marked as a star icon on the map. Meteorological data supplied by the High-Resolution Rapid Refresh (HRRR) model.

Radar reflectivity and radar-derived accumulation were analysed throughout the event. While showers were widespread across the region there was a distinct preference for showers to originate, linger, or intensify over the La Sal range, immediately to the east of the ion plume.

Figure 5 presents a sequence of radar reflectivity scans from the WSR88d radar located in Grand Junction, CO. Analysis was completed at an elevation angle of 0.5 degrees to avoid reflection of the mountains. Of note is the sustained presence of radar returns over the La Sal range occurring well after showers had cleared the eastern half of the state (e.g., see Fig 5, bottom panel).

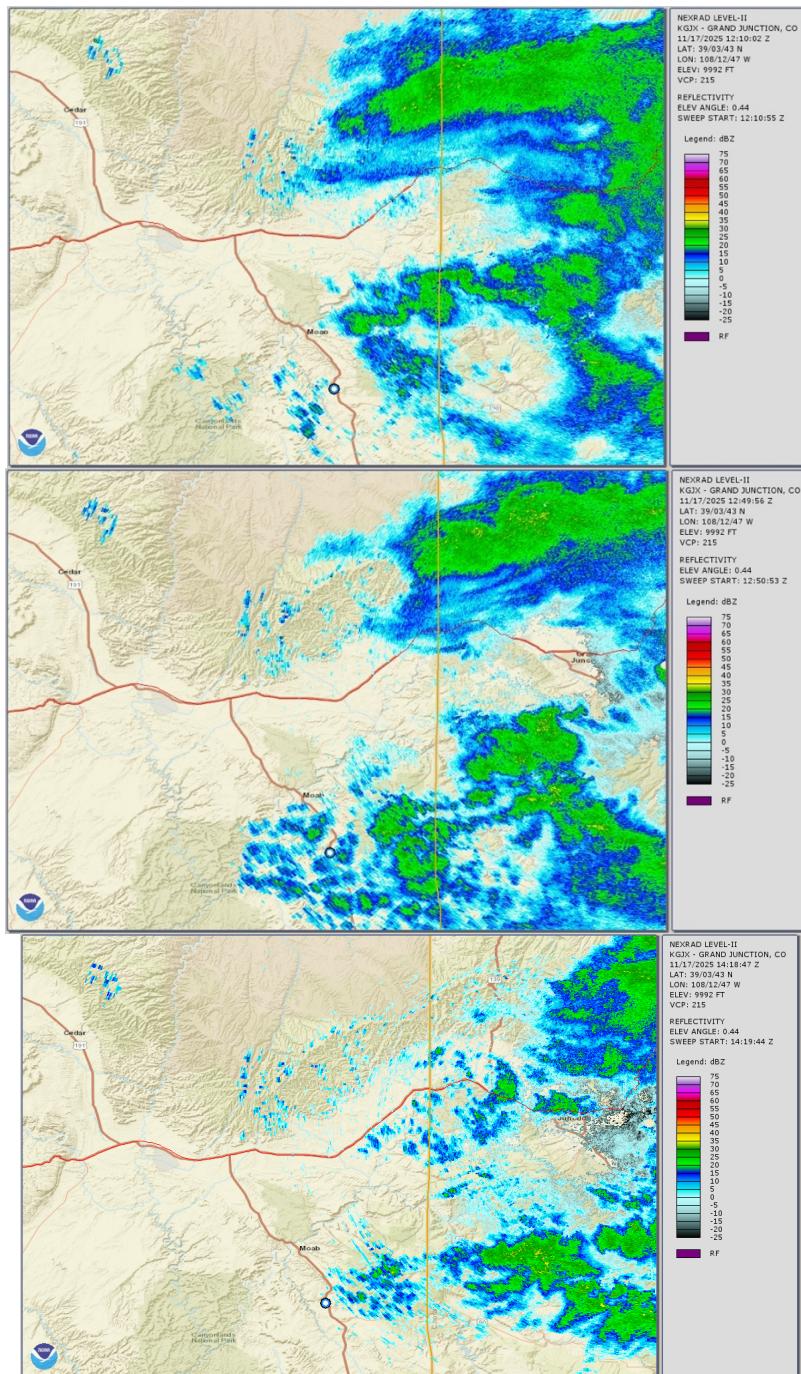

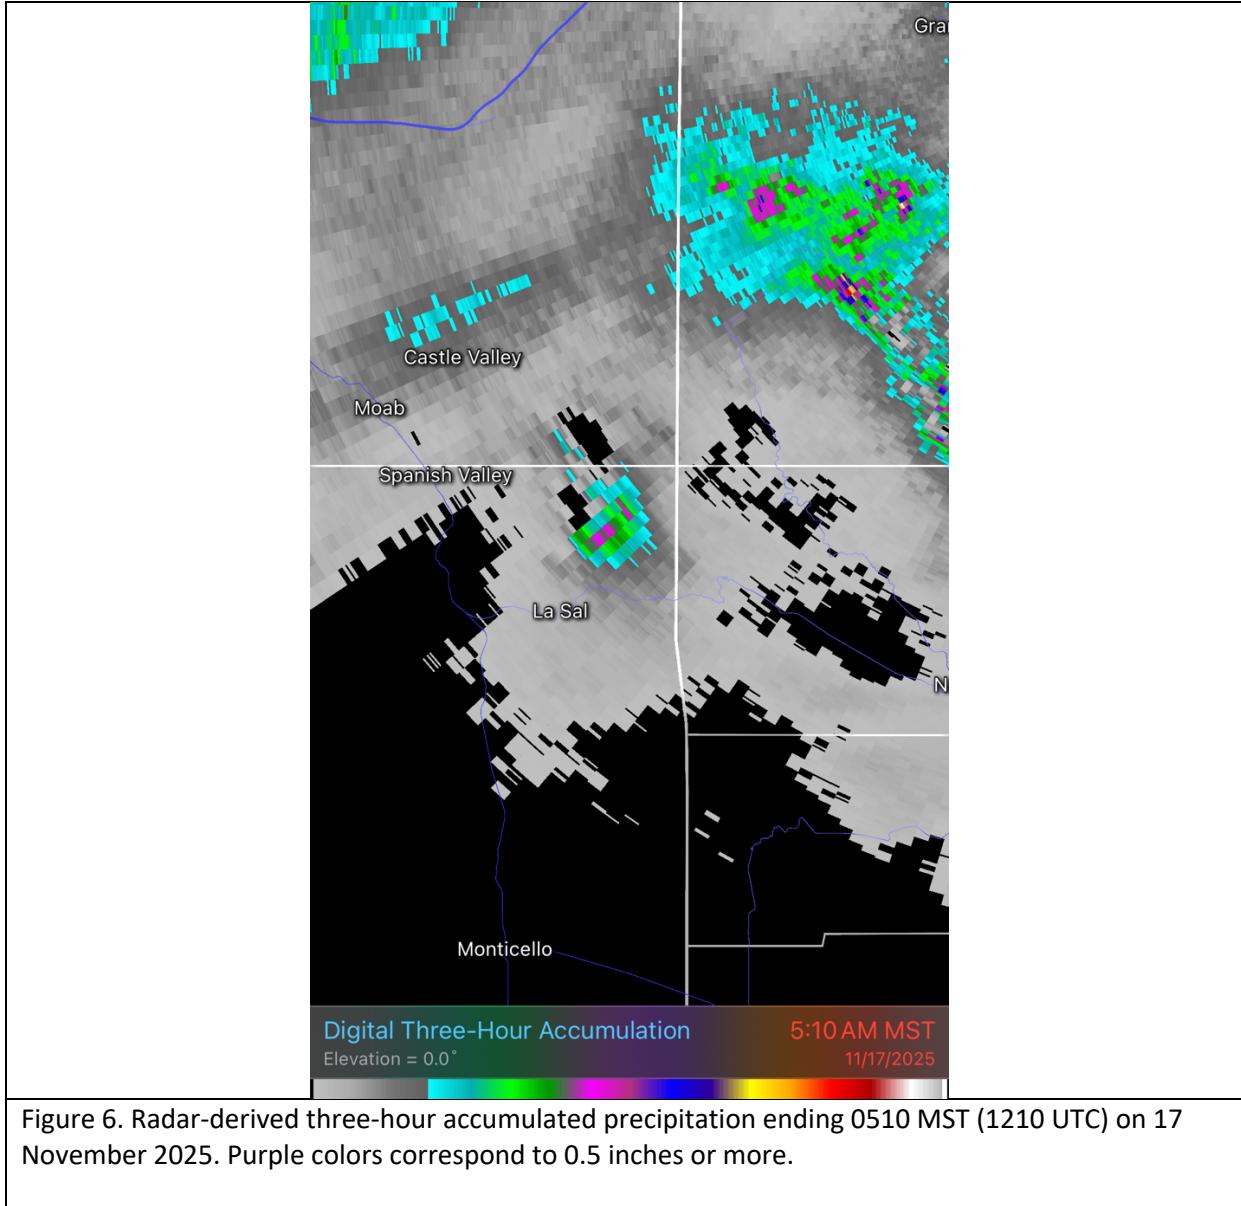

Figure 5. Radar reflectivity at 0.5 degrees elevation at 1210 UTC (top), 1250 UTC (middle), and 1418 UTC (bottom) on 17 November 2025. The WETA location is marked by the white circle.

The tendency for showers to linger and intensify over the La Sal range is also evident in radar-derived accumulated precipitation (Figure 6). A localized area of higher precipitation amounts exceeding 0.5 inches is evident to the north-west of the city of La Sal where the La Sal range is located and where enhancement due to ionization from the WETA was expected.

5.1 Data Sources

Observational data from all available sources are being archived and analysed on an ongoing basis. Table 2 summarizes the sources of data that have been archived to date. Additional gauges and weather stations will be deployed when weather permits (expected Q1 2026).

2 Executive Summary

This report provides a preliminary review of the Weather Enhancement Technology Array (WETA) installed by Rain Enhancement Technologies (RET) on the Flat Iron Mesa, outside Moab, Utah. WETA is a self-sufficient and “off grid” solution installed to provide enhancement of precipitation in year-round operations (snow and rainfall) over the La Sal Mountain Ranges. The focus of this report is on the December 2025 operating period.

2.1 Operational Summary

1. This report covers 31 days from 12/01/2025 to 12/31/2025.
 - a. WETA operated on thirteen days in December 2025.
 - b. Precipitation was observed on twelve of those days.
 - c. Operations were suspended from 12/23 through 12/25 to avoid significant rainfall on snowpack at high altitude.
2. December 2025 was a climatologically dry month, despite the occurrence of precipitation on twelve days.
3. Relatively warm and dry conditions, coupled with the rain event on 12/23-12/25, resulted in a reduction of snowpack during the month. Some of this loss has already been recuperated in January.
4. Despite the month being relatively dry, the evidence presented in this report supports the likelihood that precipitation was enhanced by WETA over the La Sal range.
5. Radiometrics radiometer data is being processed. Preliminary analysis indicates orographic enhancement of vertically-integrated liquid water over the La Sal range.
6. Power issues related to the radiometer elaborated in the previous report are ongoing.
 - a. Changes implemented remotely to “work around” until full repair implemented.
 - b. Generator installation expected early February 2026.

2.2 Actions and Improvements

1. December precipitation and snow pack depth was evaluated against a historical baseline.
2. Addition of load shedding and backup generator for improved power reliability on site (planned for Jan / Feb 2026).
3. Installation of further instrumentation in La Sal Ranges (planned Mar/Apr 2026).
4. For each event, identification of treatment and control probabilities based on HySPLIT simulations (next reporting cycle).
5. WETA operations will continue to target predicted precipitation events that are not considered adverse weather conditions or impacting snow pack.

3 Operations Summary

Figure 1 details the operating schedule during the reporting period. WETA was operated during periods when forecasts indicated any chance of precipitation over the target area, including marginal cases involving scattered light showers. Operations were suspended from 23 to 25 December due to the likelihood of moderate rainfall over high-altitude snowpack.

4 Data and Analysis

4.1 Summary of Precipitation Events

December 2025 was a relatively dry month. Figure 2 presents the daily time-series of precipitation measured at weather stations and SNOTEL in the region. Intermittent periods of light showers occurred during the first three weeks of December. WETA was operational during all but two of these marginal events. The most significant period of precipitation began on 24 December and terminated on 28th December. WETA was operational for all but the beginning of this event. The late start was due to concern about rain over snowpack.

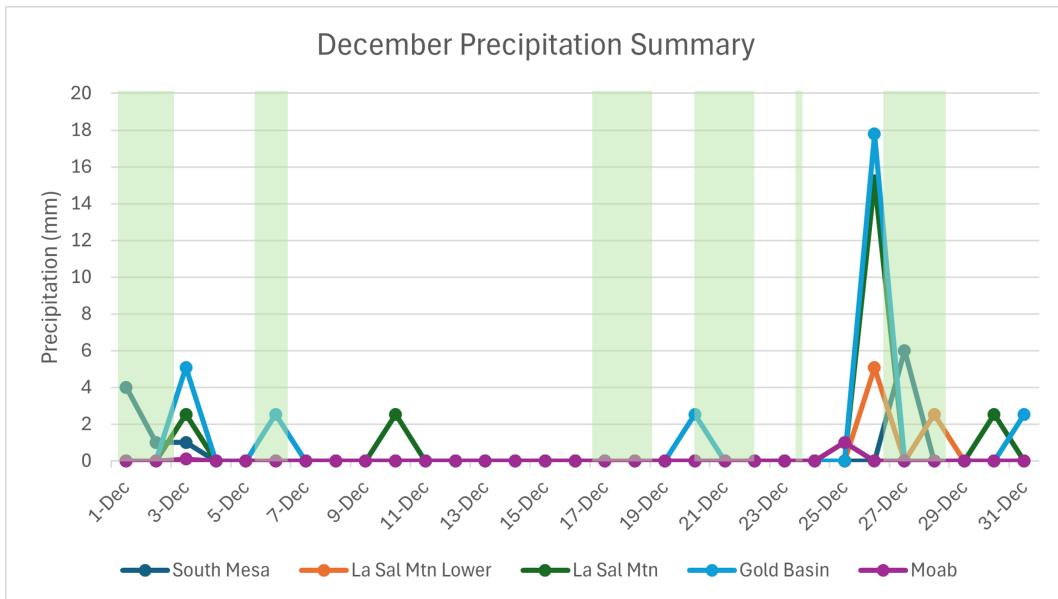

Figure 2: Summary of daily accumulated precipitation at reporting weather and SNOTEL stations.

4.2 Evaluation of Snow Pack Enhancement

Snow pack enhancement was evident in the target area. Climatological snow-depth baselines have been calculated at SNOTEL sites inside the target area as well as outside (but nearby). Figure 3 presents a comparison of two such sites: La Sal Mountain and Camp Jackson. The SNOTEL site at La Sal Mountain is at an elevation of 9580 ft and is inside the treatment area. Camp Jackson is located at 8840 ft in the Abajo Mountains to the south and outside of the treatment area. Both sites are at a similar altitude, receive similar annual snowfall, and are subject to a similar synoptic environment. The comparison presented in Figure 3 reveals the following:

1. In a typical year, snow pack depth in the La Sal range is similar to that in the Abajo mountains.
2. Both sites had a much shallower snowpack than average in December 2025 (see red circles in Fig.3).
3. Despite the dry conditions, La Sal maintained a deeper snowpack than Camp Jackson. The difference was above the climatological mean.

4.3 Analysis of Radiometer Data

Radiometer-estimated liquid water content indicated a significant increase in cloud liquid water over La Sal during the active period at the end of December 2025. Fig. 4 presents the difference in vertically-integrated liquid water between two azimuthal directions – one to the northeast directed towards the La Sal range, and one directed vertically. The higher values over the La Sal range were evident both before and after December 26th when WETA was suspended and operating, respectively. A longer record of analysis will indicate whether WETA operations amplify this apparent orographic effect.

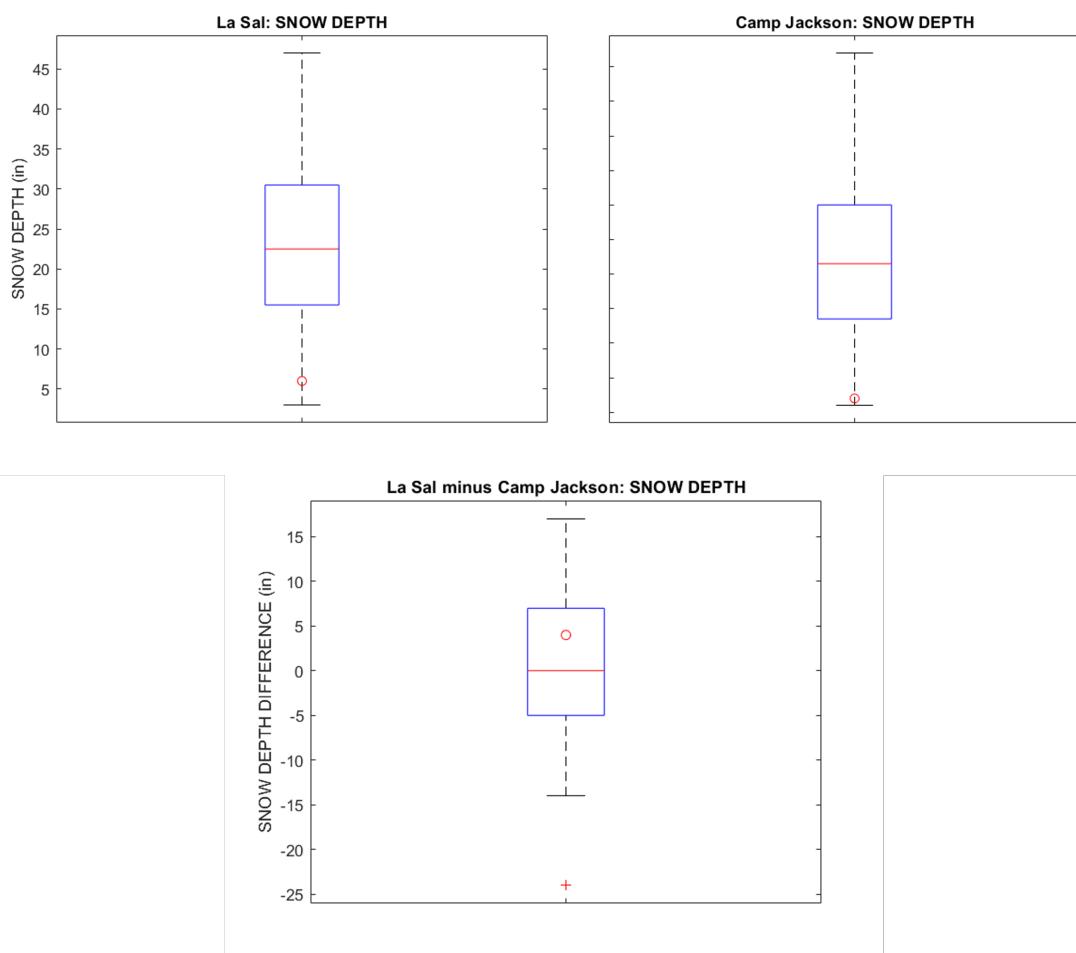

Figure 3: Box and whisker plots demonstrating SNOTEL-measured climatological December snow depth at (top left) La Sal Mountain, and (top right) Camp Jackson. The difference in monthly precipitation is shown in the bottom panel. The red circle in each panel indicates values for December 2025.

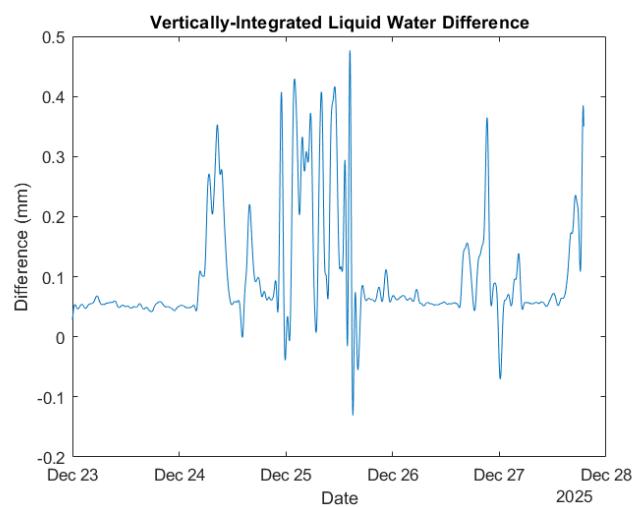

Figure 4: Low-pass filtered difference in radiometer-estimated vertically-integrated liquid water between two azimuthal directions: northeast (treatment) minus zenith (control).
