To the Board of Directors of South Jordan Daybreak Public Infrastructure District:

Piper Sandler & Co, (“Piper Sandler”) on behalf of South Jordan Daybreak Public Infrastructure District (the “District”), has requested that Causey Public Finance, LLC (“Causey”) perform a compilation engagement of a financial forecast of the District, consisting of forecasted statements of sources and uses of cash and fund balances for the fiscal period of December 31, 2026 through December 31, 2051, comprising activities of the debt service fund of the District established in connection with the proposed issuance of certain Special Revenue Bonds, Series 2026A (the “Bonds”). The forecast will be prepared based on information provided by Piper Sandler and other representatives engaged on behalf of the District (“Management”). We are pleased to confirm our acceptance and our understanding of this engagement by means of this letter.

A financial forecast presents, to the best of Management’s knowledge and belief, the District’s expected fund balances and cash position for the forecast period. It is based on Management’s assumptions reflecting conditions it expects to exist and the course of action it expects to take during the forecast period.

Our report will also state that we assume no responsibility to update the report for events and circumstances occurring after the date of the report.

Our report will contain a base case forecast predicated upon assumptions and conditions that Management believes are most likely to exist during the forecast period, as well as up to two alternative projection scenarios predicated upon conditions that Management in its judgement believes may occur during the forecast period. Our report will state that the alternative scenario is an alternative to, and not part of, the forecast and is provided for additional analysis only.

We understand our report will be produced for use in a limited offering document for sophisticated investors to assist in their evaluation of the mathematical accuracy of the various computations contained in the projections.
