

2025 Projects

An aerial photograph of a large-scale construction project for sewer expansion. The central focus is a large, circular concrete structure under construction, with a complex network of rebar and formwork visible around its perimeter. The interior of the structure is filled with earth and debris. Surrounding the site is a dirt-covered area with various pieces of construction equipment, including a yellow excavator and a yellow forklift. Several workers in safety gear are visible on the ground. The overall scene depicts an active and large-scale engineering project.
