 - f. **Approval of minutes for October 14, 2025 – Commissioner Finlay made a motion to approve the minutes. Commission Poulson seconded and all voted in favor.**
 - g. **Conflict of Interest Declaration** – None

2. **PUBLIC COMMENTS –**

Jim Rushton noted that during the last City Council meeting, Andy Losee’s term on the Planning Commission was briefly discussed. He was not going to stay on the Planning Commission. Are there other people who are willing to apply? City Manager Dotson said Mr. Losee was willing to stay on until he could be replaced. There is a form to fill out for applicants on the city website or in the city office.

3. **CONSIDER LETTER OF SUPPORT FOR THE GOEO RURAL OPPORTUNITY GRANT APPLICATION– Storm Drainage**

City Manager Dotson stated that the Governor's office has grants available for infrastructure and that it's always tied to economic development. In the plans for the MCM facility, they are required to build drainage. He explained where that drainage would go. The intent was infrastructure improvement from Midvalley, north to the Enoch retention basin. He showed it on a map in relation to the city offices. They will take all stormwater and bring it to their property. The city will abandon the easement and put all

water on MCM property and work with the proper owners further north for an open channel to bring storm water to a massive retention. There is a 40% match grant available. The city and entity (MCM) would be the two entities paying for the match. They build their part of the match, and we get the grant to do the rest. The app is due on October 31st and requires the Planning Commission approval and the Iron County Economic Development Advisory Board for their support.

Chairman Correa read the letter of support for the record.

Commissioner Finlay asked if the stormwater infrastructure that will be developed in partnership with MCM was part of the Community Agreement that allowed them to change the zone. City Manager Dotson said no, this is additional support.

Commissioner Finlay asked what the clean energy was. City Manager Dotson said MCM builds parts for power all over the USA. MCM supports clean energy through the sales of its products. Commissioner Finlay asked what the project's gigawatt was. City Manager Dotson said it's to support different infrastructure for our power needs throughout the state. This includes natural gas for power, solar, etc., to help reduce power throughout the state. MCM supports that through the product they build.

Commissioner Finlay made a motion to approve the Letter of Support for the GOEO Rural Opportunity Grant Application. Commissioner Poulson seconded and all voted in favor.

4. TRAINING - General Plan Basics

City Manager Dotson played a video for the training. Chairman Correa said in relation to street widths, they have changed. What brought that on? City Manager Dotson said the state legislature passed a law that we couldn't require neighborhood streets and asphalt wider than 27 feet. This changed ours from 55 ft to 47 ft and is the maximum right of way.

Rob showed the General Plan. We may want to go over it again. He listed all of the Elements. He discussed goals and policies.

5. COMMISSION/STAFF REPORTS

Hayden White

- He reported that they set the meter towers. There are three of them. They will read the meters, so they don't have to send someone out to read them. They have leak detection so they can notify people.
- They finished the secondary line down Minersville Hwy.
- They are working on flood drainage at Ravine Rd.
- They will be done building the fuel station on Friday, but will have to wait for plumbing until after Christmas.

6. ADJOURN – Commissioner Poulson made a motion to adjourn. Commissioner Finlay seconded and all voted in favor.

Lindsay Hildebrand, City Recorder
